Greater Georgia Tech Campaign

The Greater Tech movement first began in 1913, when a successful drive resulted in the erection of the Power Plant, now in operation. The next step is to be the erection of the new Research Building, which will be the home of the State Experimental Station for engineering, scientific, and industrial research work and training of research experts. Our college then will be equipped to render the same of assistance to the industries of Georgia that the State Agricultural Experimental Station offers to the farmers.

The cut above is the ultimate Greater Tech Plan, which, it is estimated, will cost $10,550,000 all told. The proposed new buildings are Research, Chemistry, Physics, Commerce, Electrical, Architecture, Mines, Ceramics, Highway and Civil, Experimental, Armory, Auditorium, Gymnasium, Aero and Automobile School, Textile, Student and Faculty Dormitories, Laundry, and Radio School, besides a host of improvements to the newer buildings of the present campus.

The present campaign is for $5,000,000, and a committee of prominent Alumni in New York have offered a challenge of $1,000,000 if friends of the school can raise the balance. The campaign is under the supervision of the Trustees, with Phineas Stephens, '05, acting as Director-General, and leading the drive in New York. Many prominent Georgians and Alumni are heading different parts of the work in the South, and it should surely prove an unlimited success.
Junior Poem

Three years we've spent on this campus dear—
Three years of work and fun,
And there alone remains our Senior year
Before our race is done.

As Juniors now our days have been
Carefree, yet advantageous too;
Our work has never made us thin,
Nor has study made us blue.

When set-backs came we faltered not,
Nor dreamed we could be downed;
No matter if the fight grew hot,
You found the Juniors sticking 'round.

At last we've run our Junior mile,
Our goal is 'most in view,—
We'll ne'er let worry bedim our smile—
We're the Class of Twenty-two.

W.

**Eighty-four**
The Ways of a Dreamer

Dream Clouds,
How they come and go!
How they fly so high,
Now they drift so low;
In subtle shapes that charm the eye
They steal to me on earth below
In mystery shrouds.

Bubbles, Bubbles,
Oh, so clear and bright!
See them wander far
And reflect the light,
As in morning glows the star
That gleaming tells of waning night
And all its troubles.

Castles of Air,
In the which I dwell,
Rise so gorgeous fair
O'er the sylvan dell
That I know not anywhere
That a grandeur can compel
So richly rare.

Rainbow Trails,
Follow them I must
Right to heaven's dome;
Then, with childlike trust,
To the foot of the arch I roam
And seek the gold buried in the dust
Of virgin dales.

Reveries, Reveries,
How they fetter me!
How they rule the heart
That was once so free!
Just close my eyes and up they start
Like whitecaps rise on a summer's sea
To kiss the breeze.

W. E. G.
Sophomore Poem

Old fellow, just think, when the year began
Could you hardly realize
That our Freshman year was an also-ran
And the world was before our eyes?

It seemed so queer to gaze with scorn
At the Freshmen's youthful tricks
And think with pride that the time was gone
When we were in that fix.

But now we're old, blase, and wise,
The world has nothing to show;
For it seems that all has passed our eyes
And there's little left to know.

Yet, still, we're plodding the good old road,
And the race has hardly begun,
For there are two more steps and a heavier load
Before the Goal is won.

That we're only halfway thru Tech's Halls—
Downhearted? No, not we!
May the time go slowly within her walls
Is the wish of "Twenty-Three"!

The Youth Seeks an El Dorado

Gaily, by Heck,
A rambling wreck,
Of high and mighty station
Had journeyed along,
Singing a song,
In search of Education.

He came to Tech,
His upper deck
Was full of expectation;
But he was dense,
He lacked in sense
And found not Education.

And as his nerve
Began to waver,
He stopped in hesitation.
"Dear Prof," said he,
"Please show to me
The royal road to Education."

"Doggone your hide,"
The Prof replied
In wrathful indignation;
"If you will go
Where it don't snow,
You'll need no Education!"

W. E. G.
freshman poem

A freshman class ain't got much right
to place themselves on the foremost row,
to hog the cheers and the limelight bright,
but we'd like to boast for a line or so.

We ain't so old, we gotta admit,
but age ain't all by a helluva sight,
and when it comes to doin' our bit—
just stand back boy—we're right!

With the good old spirit 'at can't be beat,
we're Tech right thru to the core,
and we fight like hell, just like we eat,—
we're the class of twenty-four!

C. Y. T.
