DEDICATION

TO

COACH
William A. Alexander

TRUE SPORTSMAN
AND
GENTLEMAN

THE 1929 BLUE PRINT IS DEDICATED.
We realize that our Alma Mater has taught us—
To dilute our work with play—
And
Never to take life so seriously that we lose its joy.
May we forever keep these policies of Duty, Honor and Love.
In Memoriam

Henry Genz
1898 - 1929

Frank Roman
1879 - 1928

WILLIAM VERNON SKILES, B.S., A.M., Sc.D.,

Dean

B.S., University of Chicago; A.M., Harvard University; Beta Theta Pi; Phi Beta Kappa; Phi Kappa Phi; Member Georgia Academy of Science.

DEAN SKILES assumes that position in our college life that requires an understanding of fairness and an ability to help. A watchful eye always displaces error and correction is ready to displace the error. It is the purpose of Dean Skiles to make our residence at Tech a source of knowledge and happiness.

FLOYD FIELD, A.B., A.M.,

Dean of Men

A.B., Willamette University; A.B., A.M., Harvard University; Theta Chi.

THE duty of Dean of Men is to help all students, whether he be a Freshman or Senior. The instructions that come from one of authority in the various phases of life are ready for those men that are determined to profit from their education at Tech. Dean Field has always used his talented resources to encourage the building of a greater manhood at Georgia Tech. It is in this capacity that Dean Field serves as advisor to the social, intellectual, and religious life of the student at Tech. It is fortunate for our institution to possess a man that fills these qualifications with exactness.
GEORGIA TECH was the first Southern school to establish a department of Ceramic Engineering. The course combines the theoretical and practical phases of the study of ceramics and the department is well equipped with up-to-date testing laboratory, clay machinery room, kiln room and machine shop. The student acquires the basic knowledge which would enable him to prospect for raw materials and carry them through the process of manufacture to the finished product.

The degrees of Bachelor of Science in Ceramic Engineering is awarded at the successful completion of the four-year course.

THE department of Chemistry was established at Georgia Tech in 1888. The course serves to give the theoretical and practical means of advancing the pursuit of this important science. The recent completion of larger quarters gives to Tech one of the most modern laboratories in the South. This course extends over a period of four years with the degree of Bachelor of Science in Engineering Chemistry.

The essentials of a liberal education combined with the strictly professional work gives the graduate a broad foundation for his future service of mankind.

THE School of Commerce was established in the fall of 1912 with the idea of permitting engineering students to supplement their courses with business subjects and to give students desiring to enter upon a business career an opportunity to receive a technical training along administrative lines.

The success of this department has been marked and its courses and reputation are being recognized as the best in the South and very close to the best business schools in the country.

The courses offered in the School of Commerce lead to the degree of Bachelor of Science in Commerce.

THE Co-Operative Department was established in 1912 to enable engineering students to acquire practical knowledge and experience along with their class work. The schedules are so arranged that a student works four weeks and then returns to school and attends classes four weeks. The manufacturers in Georgia and the neighboring states who employ these students find that they take a great amount of interest in the work and results show that the course is valuable and successful.

The degree of B.S. in whichever course of engineering is pursued is awarded after the five-year period.
THOMAS WITT FITZGERALD  
B.S., M.E., E.E., M.S. 
Head of the Electrical Engineering Department

THE Electrical Engineering Department has for its object the training of young men to be industrious and clear thinking, and to equip them with the scientific and practical knowledge necessary for the successful practice of their profession as Electrical Engineers.

Parallel with the theoretical work are carefully planned laboratory courses beginning with the first year in Chemistry and continuing throughout the four years in the sciences and other subjects studied. The four-year course leads to the degree of Bachelor of Science in Electrical Engineering.

ROY STEVENSON KING  
M.E., M.Sc., Sc.D.  
Head of the Department of Mechanical Engineering

THE high object of the mechanical engineering profession is to consider and determine the most economic use of time, power and matter. True mechanical engineering is the economical adaptation of the means and opportunities existing to the end desired.

The training given in the mechanical engineering department is a stepping stone towards membership in the profession, further dependent of course, on the individual. The four-year course leads to the degree of Bachelor of Science in Mechanical Engineering.

HIBBARD SPENCER BUSBY  
M.E.  
Director of the A. French Textile School

WITH the movement toward the South of the many Northern cotton mills and because of the qualities possessed by the South to foster this industry, the A. French Textile School has proven valuable and popular.

The department is equipped for performing practically every process of cotton manipulation from the cotton field to the finished product. The student in textile engineering is given a well rounded education in other phases of engineering offered in the school.

The four-year course leads to the degree of Bachelor of Science in Textile Engineering while for the two-year course a certificate is given.

ALLAN BENTON MORTON  
M.A., Sc.D.  
Dean of the Summer School

THE purpose of the Summer School is to offer students in Science, Commerce, Engineering and Modern Language an opportunity to do collegiate work for which full credit is allowed toward a degree.

The courses are open to college students and teachers who desire to advance their standing and usefulness.
IT is on this department of our institution that falls the maintenance of our school. The finance, appropriation, and endowments are assigned as the objects for this portion of the institution. Very fortunately, under the able guidance of Mr. Houston the college has increased its capacity to handle the large volume of business without loss.

FRANK KING HOUSTON
C.P.A.
Secretary and Treasurer

C.P.A.
A.B.
Secretary and Treasurer

THE purpose of the Registrar is to serve in the capacity of compiling the important records of the institution. Mr. Caldwell, in this position has created a most efficient method of handling important figures in the history of Georgia Tech. This department has been constructive and conservative in its purpose.

HAROLD BUSH BROWN
A.B., M.Arch.
Head of the Department of Architecture

Civil Engineering

FRANKLIN C. SNOW
C.E., Sc.D.
Head of the Department of Civil Engineering

THE course in Architecture has begun its twentieth year at Georgia Tech. The growth in this department has been amazing during the past years and has exemplified this fact by its necessity to increase the facilities in order to meet the large need.

The sincere purpose of the Department is to offer the necessary training in Design, Construction, and the associated subjects that will eventually fit the student for the practice of Architecture. This course extends over four years and leads to the degree of Bachelor of Science in Architecture.

Regarded as a Fine Art, it serves to introduce and maintain the beauty of the profession to the student.

THE ultimate aim of the Civil Engineering course at Tech is to teach the fundamentals in each branch and to so instruct the student that his B.S. degree stands for basic knowledge in every line of Civil Engineering.

The Civil Engineer is a builder. He uses asphalt, concrete, clay, sand, steel, stone, and numerous other structural materials in building pavements, roads, bridges, etc.

A graduate in Civil Engineering must be well informed in mathematics, especially mechanics, in order to design. He must know how to select and to use materials, locate sewers, lay out structures, railroads, and streets so that his designs can be carried into finished products.

Life's Highways

We've come to the forks of the highway,
That leads us on through life,
One takes us on to our happiness,
The other to sorrow and strife.

The roadway to strife is easy,
Nothing to do but "lay down,"
But the roadway to joy and its meaning,
Is paved with the hardest work found.

Of all who've gone before us,
Their work in life is complete,
We have our chance today,
In God's name, we shan't retreat.

—F. F. K.

The Evening School of Commerce of Georgia Tech is considered as one of the very active departments of the school, offering every year more than sixty courses of practical business training for the business men and women of Atlanta. It is the only department of Georgia Tech open to matriculation for women.

As Atlanta is the metropolis of the South and the southeastern headquarters for big business—so is the success of the Evening School of Commerce. More than two hundred business institutions are every year represented by five hundred students. The contact Georgia Tech receives thereby is not only manifest in the support of every endeavor attempted by Georgia Tech, but from year to year draws both the business world and the Georgia Tech student body mutually together.

The Evening School of Commerce is the father of the day school, itself one of the big factors of North Avenue campus life. With a faculty selected from the larger colleges and universities of the country and from the business executives of Atlanta, the downtown school is especially equipped to train men and women for the state.

A few words will suffice to outline the plans and hopes behind this book. We have sincerely and earnestly endeavored to publish a book that will express in years to come the thoughts that have been in the minds of the students during the past year. We have increased the size of the annual, partly because we wish to keep step with other schools of our reputation, and partly because we believe a larger book will present a better appearance. We have adopted a radical type of art work that has seldom been seen in any college annual. Shi Goodwyne, our art editor, has worked faithfully on this difficult assignment and has succeeded admirably.

We cannot say if our efforts have been successful, but leave the decision to you and accept your judgment.
The Marionettes

The Marionettes—"The South's Leading College Dramatic Club"—was founded soon after 1900, and has since that time, by the finish of its presentations and the general excellence of its work, made for itself an enviable reputation, not only in Atlanta and Georgia but throughout the South.

Since talent is recruited solely from among the students of Georgia Tech, the club has, naturally enough, to resort to female impersonations. The performances of many of the young men who take these parts testify to what hard work can accomplish in this line.

The Marionettes offer opportunity to aspiring members in fields other than the histrionic. Scenery construction, electrical work, business, publicity, and music are all necessary to a successful production.

The close of the season 1928-29 finds the Marionettes as firmly established as ever in popularity. A great deal of the credit should go to Leon Brown, President, to Harvey Smith, Director, and to the efficient Business Manager, Frank Sacha, for it is largely through their efforts that the club has maintained its place among the leading dramatic organizations of the Southern schools.

The vehicle for the club's dramatic talent this season was "Three Live Ghosts," a lively comedy in three acts by Frederick Isham and Max Marcin. The play is one which has been widely used by professionals and which is well known throughout the country.

The story of "Three Live Ghosts" deals with the complications that arise on the return to England from a German prison camp of three soldiers, two British and one American, who are officially recorded as being dead. Two of them, Jimmie Gubbins, and William Jones, the American, have good cause to remain dead. The other, Spoo, who has every inducement to be alive, must remain dead, for shell-shock has robbed him of reason and memory. Jimmie Gubbins cannot come back to life, for his mother, an old cockney, whose shrewdness borders on the shady, has collected his insurance. William Jones, the American is wanted by the police of his college town for the use of his father's bonds to pay his gambling debts. Nobody knows anything about Spoo, but he is evidently an aristocrat, who has developed kleptomania, due to shell shock. Jimmie Gubbins brings his two pals to his home in London. But the poor mentality of Spoo, after causing most of the trouble which befalls them, is the means ultimately of bringing everything to rights. The play gives satisfactory explanation of whose baby he kidnaps, whose house he robs, and whose jewels he steals.

Griffith Edwards was particularly good in his characterization of Mrs. Gubbins as was Hudson Edwards in the part of Jimmie Gubbins. Each of the other eight players deserves credit for some good acting.

The annual tour of the club was taken in early March and included Waynesboro, Georgia; Augusta, Ga.; Anderson, S. C.; Greenville, S. C.; Spartanburg, S. C.; and Gainesville, Georgia. Everywhere the club was enthusiastically received and cordially entertained.

Tech Debating Team

Only in recent years has Tech been active in forensic relationships with other leading colleges and universities. This newly created organization found a need for promoting debates at a highly technical institution. Its aim has been to incorporate the truth in life with the facts of living. With these ideals in view and with the untiring services of President M. L. Brittain, Professors E. H. Folk and E. B. Meriwether, a constant progress has been realized.

Section
Here are shown a few intimate snaps of the Champions on their cross-country trek. At the top left, the train is stopped to get a herd of buffalo off the track; the train crossing the Mississippi on the ferry; Kenneth Thrash and Stumpy thinking it over; President Brittain and party on a trip toward the skies; and a beautiful California home.

On the top right, Maree and Stumpy are announcing to the world from the top of the flag pole that they are homeward bound. Glenn Holland and a group of the players pose informally for a movie try-out; Keener and Faisst stretch their legs; Izzy Shulman listing to the message of the waves of the Pacific. In the circle Coot Watkins and Tom Jones sit on the platform and discuss the difference in weather since leaving California.
These snaps taken on the trip to California give an idea of the varying types of country through which the travelers journeyed. The picture on the left center was taken in the bar at Tia Juana and it is hoped no Tech students are recognized.

A good idea of R. O. T. C. camp life is given by these snaps. No one seems to be hard at work, yet the lack of formal attire seems to say that it is uncomfortably hot in an Army camp. To those not acquainted with a rifle range, the picture on the lower left was taken in a target pit.
These snaps show Tech's famous sea-dogs on shore and also on their sturdy brig last summer. From what we can see of the deck of the battleship it looks mighty well-scrubbed, and we begin to see now why the wide-bottomed trousers are a necessary part of the uniform.

Here, in various parts of the page, we have a student, really studying; a view of Uncle Jeff's new food emporium; the academic building at 3 P. M.; our old friend Shipwreck Kelly; our well-known band; and several Freshmen all dressed up on Sunday afternoon.
Prof. Luter pauses a minute in rushing to his welding lab; Prof. Narmore just happens by; Prof. Wycoff and his assistant, Mr. Lower, consent to halt a bisecting experiment to get "shot"; and we have pretty Louise and Mary and a student just out of lab.

A sport roadster rests peacefully in front of the dormitory; the "Major" steps out for a snap; Mr. Smith of the Yellow Jacket comes out for a little sunshine; and Mrs. Beam and Mrs. Lott rest between calls for pink and blue pills. We have also a prize squad and two well known faculty members.
The campus initiations are on and Sid Goldin has turned bootblack for the Bulldogs. The Army of Napoleons is composed of Scabbard and Blade pledges, while the horn-blowers make a horrible sound to qualify for Kappa Kappa Psi membership. On the right center a hard working platoon is shown at rest. The sweet girls with the brooms are Vance Maree and Earl Dunlap, preparing to be taken into Koseme.

On the right from top downward, we have a window display showing who won the world's football championship; a dormitory dressed up for the Georgia game; the baseball field from a balloon; "Major" of the athletic equipment room; and Grant Field. On the left, a view of the dining hall and Harris Hall; Freshmen on another Sunday; and Grant Field again with the good ship Knowles and the Academic building in the background.
Here we have some future stars of the Golden Tornado. Though not letter men this year, they are all good and will be heard from later on in their stay at Tech. They are, Jimmie Frink, Cain, Luna and Muse.

On this side are shown a few more future luminaries.
A few scenes around the campus. Our money man, Mr. Houston, at the top; an exhibit at the style show; Uncle Heinie ready for business; two coca-cola-drinking Sophomores; Warner Mitell, Maree and Dunlap at the right angle; Frank Sacha; Wadley Glenn; a view of the camp with tents furled; and Jack Brown.

On this side, General Buster Harris stops a moment; Mrs. Taylor consents to be snapped; Sid Goldin before the water fountain; Professor Stamy; Sergeant Godby; and a few more camp scenes.
Miss Hazel Wolfe

Miss Louisa Candler
Miss Helen Hendricks

Miss Susan Broyles
Choosing the Beauties

Each year considerable discussion is heard on the campus regarding the selection of girls to grace our Beauty Section. We don't consider one man's judgment to be competent when under the influence of beautiful girls, and we don't consider that a popular vote could be conducted which would fairly pick girls privileged to adorn these pages. Therefore, we have allowed the Captains of the four major sports and the fourth year men on the Annual Staff each to choose a girl.

We trust their choice will please you.

Alpha Tau Omega was founded at Richmond, Virginia. This was the first fraternity to be founded after the Civil War. After twenty Southern chapters had been installed, the first Northern chapter was chartered. This fact is of interest as this fraternity is the first of Southern origin to maintain chapters in the North.

Sigma Alpha Epsilon was founded at the University of Alabama in 1856. Being one of the oldest fraternities, it has in its history, many interesting incidents. One of especial interest is the woman member of the Kentucky Military Institute chapter who kept the ritual and chapter records during the Civil War. For this service she was initiated when the chapter was reorganized.

The Kappa Sigma Fraternity was founded at the University of Virginia. This fraternity is one of the largest—having one hundred and two active chapters. From its inception it was intended that Kappa Sigma should become widespread, and this policy has been followed, but in no means a radical fashion.

Sigma Nu originated from a secret society known as the Legion of Honor organized at the Virginia Military Institute at Lexington, Virginia, in 1868. Northern extension of Sigma Nu began in 1884 with the establishment of a chapter at the University of Kansas. In due time the fraternity entered the East completing a well-balanced national representation.

Kappa Alpha

ALPHA SIGMA CHAPTER
Membership 16,752
Founded 1865
Installed 1899
66 Chapters

COLORS: Crimson and Gold
FLOWER: Magnolia and Red Rose

The Kappa Alpha Fraternity was founded at Washington and Lee University, then the Washington College. It is notable that this fraternity has confined itself to the Southern States with the exception of three chapters in California. It is understood that one of its fundamental policies is to remain within its “chosen limits.”

Phi Delta Theta was founded at Miami University. Its founders intended that the organization should expand, and this policy was followed until checked by the Civil War. At the close of the war, the policy was resumed. During the fourth decade, by establishing chapters in the East, it became national in extent.

Phi Kappa Sigma

ALPHA NU CHAPTER
Membership 10,000
Founded 1840  Installed 1904
37 Chapters
Colors: Gold and Black

The Phi Kappa Sigma Fraternity was founded at the University of Pennsylvania in 1840. Due to the many Southern members of the Alpha chapter, Southern expansion resulted. The Civil War, however, destroyed much of this work. The closing of the war instituted a more conservative policy. Local clubs are required to exist several years before being granted a charter.

Chi Phi, as it exists today, is the result of successive unions of three older organizations, each of which bore the same name. The idea of expansion was early manifested, and chapters were rapidly organized. However, the Civil War killed all but the parent chapter, but at the cessation of hostilities, new chapters rapidly sprang into existence. At present the roll is thirty.

The Beta Theta Pi Fraternity was founded at Miami University. It was the first fraternity to originate west of the Alleghenies. At the time of its inception fraternities existed in New York, New England and Ohio only. Much of its growth was obtained by chapters formed from existing organizations and by union with two other fraternities.

Sigma Chi originated at Miami University in 1855. It existed for a short while secretly under the name of Sigma Phi. When its existence became known unfriendly parties made attacks upon it and caused the members to change the name and ritual. The present name of Sigma Chi was adopted in 1856.
Phi Sigma Kappa was founded at the Massachusetts Agricultural College at Amherst. For several years after its inception the fraternity had no exoteric name and was generally known as The Three T's. The organization became national in 1888, and since that time its growth has been steady.
Theta Chi was founded at Norwich University in 1856. Forty-six years later, in 1902, the fraternity recognized the first of several petitioning bodies, and the Beta Chapter was formed. After an elapse of five years the third chapter was installed. Since that time the fraternity has expanded steadily though conservatively.

PHI KAPPA TAU

Colors: Orange and Black

Flower: Peony

The Phi Kappa Tau Fraternity was founded at Miami University in 1906. For a number of years, the fraternity maintained the hope that an organization of its nature could exist without a Greek letter name. In 1916, however, the decision to adopt the name of Phi Kappa Tau was approved.

Phi Epsilon Pi was founded at the College of the City of New York in 1904. One year later the second chapter was formed, but the third was not chartered until 1911. Starting in this year a steady but conservative growth is seen. At present there are twenty-five chapters.
Tau Epsilon Phi was founded at Columbia University. In the early stages of its life membership was limited to Jewish professional college men. Soon after the addition of the chapter at Cornell in 1913 the policy was changed from professional to general collegiate. The fraternity has shown conservative growth until at present there are twenty-nine chapters.

WILLIAM ALEXANDER
Football Coach

Football
DON MILLER
Notre Dame
Member of Famous Four Horsemen
Backfield Coach
Coach Miller came to Tech with the fame of being a member of the renowned "Four Horsemen." He is leaving this year with an almost equal fame as a coach of one of the best backfield combinations seen on any field.

BILL FINCHER
Georgia Tech
All-American
Line Coach
Coach Fincher is well known throughout the country for his power on the football field while at Tech and he is rapidly becoming known as one of the best developers of linemen that any school is able to boast of.

CAPTAIN ROBINSON
Auburn
All-Southern
End Coach
Captain Robinson, while stationed at Tech has taken a deep interest in the football team and his love of the game and natural ability have shown in the wonderful work done by the ends this year.

BUSTER HARRIS  
John Leach
Financial Manager  
Equipment Manager
The two managers have worked four long years without the praise and adulation which serves as an incentive to the players themselves. They have performed tasks which are monotonous and tedious and have aided greatly in making the team comfortable on the trips which is a necessity in a successful football season. They deserve credit for the admirable manner in which they have executed the myriad details connected with the management. Their services have been indispensable.

EXPLANATION OF FOOTBALL SECTION
The thrill of having played in the Rose Bowl in Pasadena is to the football player what the Olympic Stadium is to athletes of other sports. It is a goal toward which all players look, most of them without a thought of ever attaining it. There were sixteen men of Tech to play in the Rose Bowl this year and they have been honored in this section by devoting to each a full page. The other letter men are not a bit less deserving of honor, but by the fortune of the day they did not get in the game. Each one of them was fighting, in spirit and mind, as hard as the men on the field. Each man whose picture appears in the following pages, is a "letter" man, and all that goes with the words.
A LEADER in every line of activity into which he throws himself, "Peter" Pund lead his team as a true sportsman. He was universally acknowledged as the best center on any college gridiron, and not once during the past season was there a mention made of unfair tactics or actions not becoming a real Southern Gentleman. He succeeded admirably in continuing the line of great centers for which Tech has become famous.

RALEIGH DRENNON is a man possessed with a cheerfulness and a fight seldom seen. His consistent work during three years was well deserving of his mention on Rice's All-American and his place on the All-Southern Team.
FRANK ORUM WADDEY is naturally gifted with all the requirements of a good end. His aggressiveness, speed and headwork all contributed toward his undisputed success in filling a flank position on the Golden Tornado.

GLENN AUGUSTUS HOLLAND is one of the brainiest ends ever to come to Tech. Despite the many injuries which have befallen him, Glenn has come through with brilliant playing and is well deserving of the honors accorded each member of the National Championship team.
KENNETH MATHESON THRASH
Orlando, Fla.
Tackle
AGE 22
Height
5 Feet 10 Inches
Weight
190 Pounds

KENNETH THRASH is a chip from the old block, having for a father an ex-captain of the Golden Tornado. Thrash has come to be known as one of the smartest and hardest hitting linemen on the squad. He will be heard from again in his duties as coach.

LUKE WARNER MIZELL
Atlanta, Ga.
Halfback
AGE 20
Height
5 Feet 11 Inches
Weight
170 Pounds

LUKE WARNER MIZELL is a constant threat to any team. His running, passing and punting are all exceptional and consistent. His ability to “get lose” is phenomenal and his energy never seems to give out. Warner was mentioned on several All-American teams and next year should see him even more flashy and dangerous.
Ronald Joseph Durant

Ronald Joseph Durant
New Martinsville, W. Va.
Quarterback
Age 21
Height
5 Feet 9 1/2 Inches
Weight
163 Pounds

DURANT has been a field general in every sense of the word. He sums up quickly the weakness in the opposing team and knows just which player is capable of advancing the ball. He is deadly as a backer and tackler. His place will be hard to fill next year.

Jack Griffin Thomason

Jack Griffin Thomason
Atlanta, Ga.
Halfback
Age 22
Height
5 Feet 7 Inches
Weight
165 Pounds

"STUMPY" is known throughout the country as a little man made of iron. Once loose, he can not be "out-smarted" and is sure to have the stands as a whole on their feet by his spectacular and unexpected plays. The foremost writers and coaches of the country have heaped praises on Stumpy continually and still his head remains unturned.
JOE WESTBROOK has a fighting heart and the power that goes with it. Though not as heavy as many guards, Westbrook has played consistently well and has been a great factor in maintaining the center section of the stone wall so necessary to the success of a great team.

SHULMAN has developed through hard work and the force of brains into a capable substitute for quarterback. He knew how to run the team and had the cooperation of every man. His personality helped materially in building a fine spirit during the whole season.
Earl Owen Dunlap

DUNLAP is another triple threat man who is capable of a long run, or a bullet pass. There is not a cleaner nor harder player on the team. It is expected that he will be the man to fill the vacant quarterback position for the next two years and his qualifications are perfectly suited for the job.

Gordon Campbell Watkins

OOT WATKINS couples with his size the advantage of speed. Time and again he is the first down under punts. Any opposing player can vouch for the strength in his long arms and his cleverness on the field.
THOMAS GILMER JONES
Monroe, Ga.
End
Age 20
Height
5 Feet 11 Inches
Weight
180 Pounds

TOM JONES played his first year on the varsity this season and secured for himself a regular berth. He made the All-Southern and with two years more to play, his prospects are mighty bright.

JIM OSCAR BROOKE
Columbus, Ga.
Guard
Age 18
Height
6 Feet
Weight
181 Pounds

JIM BROOKE is another Sophomore who has made his mark his first year on the varsity. He is a hard, fast hitter, and is destined to be a power in the lineup of the Yellow Jackets for the next two years.
**George Lavance Maree**

*GEORGE LAVANCE MAREE*
Savannah, Ga.
Tackle
Age 19
Height 6 Feet 3 Inches
Weight 210 Pounds

*MAREE has already shown what may be expected of him in years to come. He loves the game, plays with his whole heart and body and it is doubtful whether an ordinary tackle can last a full game with such opposition.*

**Roy Lumpkin**

*ROY LUMPKEN*
Dallas, Texas
Fullback
Age 21
Height 6 Feet 1 1/4 Inches
Weight 198 Pounds

*FATHER LUMPKEN hails from the great open spaces of Texas. His greatest joy in living seems to be to romp through the line of an opposing team and drag at least three men with him. He is a spectacular player and keeps the stands in a continual uproar.*
Clyde Simpson Smith
Cartersville, Ga.
Quarterback
Age 21
Height 5 Feet 7 Inches
Weight 153 Pounds

"SHORTY" SMITH is a smart field general. He can call signals with the best results, drop kicks with almost unfailing accuracy and can run the ball.

William Harrell Rusk
Atlanta, Ga.
Center
Age 23
Height 6 Feet
Weight 174 Pounds

RUSK will captain the 1929 Golden Tornado and his character speaks that he will have no trouble in securing faithful cooperation from his team-mates. He is a fighting center and is destined to carry on the line of great Tech centers.

Robert Smith Parham, Jr.
Greenville, Ga.
Halfback
Age 23
Height 6 Feet 2 Inches
Weight 175 Pounds

PARHAM has long been known as one of the foremost punters in the South. He can also run with the ball and pass and his loss will be felt severely next year.

Harold Augustus Faisst
Little Rock, Arkansas
Halfback
Age 21
Height 5 Feet 10 1/2 Inches
Weight 163 Pounds

FAISST is a fast, shifty runner. Handicapped by poor eyes, it is remarkable to watch him speed away from outstretched arms. Next year should see him at his best.
Robert Lee Randolph
Atlanta, Ga.
Fullback
Age 22
Height
5 Feet 9 Inches
Weight
175 Pounds

RANDOLPH has played football steadily at Tech for four years. He has always been good for a gain and it is regrettable that he was unable to play in the Rose Bowl, an ambition he had carried for years.

Edward Daniel Herron, Jr.
Chattanooga, Tenn.
End
Age 21
Height
5 Feet 10 1/2 Inches
Weight
176 Pounds

IN his Sophomore year, Herron has shown himself to be an aggressive and speedy end. With the benefit of a year of experience on the varsity, he should do wonderful work in 1929.

Ervin Leon Keener
Attalla, Ala.
Guard
Age 22
Height
5 Feet 11 1/2 Inches
Weight
179 Pounds

LEON KEENER has worked steadily for four years. He has filled in capably at practically every position in the line and has proven his ability as a fighter.

Charles Ware Fitzgerald
Jackson, Tenn.
Fullback
Age 23
Height
5 Feet 10 1/2 Inches
Weight
164 Pounds

PLAYING football in the same hard manner that he subdued unruly crews on a tramp schooner, Fitz has made a name as a reliable fullback. He still has a year to play and should go well, providing he is not drowned in mid-ocean during the summer.
Von Weller has played the end position for three years, and showed up exceptionally well this year. His speed is unusual and he knows how to use it to the best advantage.

Edward is still another Soph to show promise early in his career. He played well every chance that he had, and good work is expected of him in years to come.
The most glorious football season Georgia Tech's Yellow Jackets have ever experienced came to an end on last New Year's day, when the gallant sons of the red clay hills won the national championship by a brilliant victory over the University of California at the famous Rose Bowl in Pasadena, California.

Previous to this battle Tech had won the Southern conference championship by sweeping through a very strong field. In addition the Jackets finally conquered their old foes, the pesky Irishmen of Notre Dame.

It was the second straight conference championship for Coach Alex and his noble band, and the Yellow Jackets were worthy of all the laurels that they won. A great and invincible spirit prevailed on the team. It was this spirit that carried them to victory in the Rose Bowl game, when after having their ranks riddled by influenza followed by a long trip to the coast, and a hard week's practice under a tropical sun, they took the field and conquered a previously undefeated team of great physical power. The score was 8 to 7, Tech having the enemy blanked until the last minute of play when one of those long passes clicked to California. The Jackets had the game in hand all the way. After getting an eight point lead the aim of course was to prevent California from scoring twice. This strategy was successful.

The Tech-California game will be talked about as long as football exists in this land of the free, due to probably the weirdest plays ever pulled in a major game. It was that reverse run by Roy Riegels, captain-elect and center of the Golden Bears. This play is so well known that it is not necessary to review it here. Riegels made a long run the wrong way towards his own goal and was only halted on the two yard line. A moment later Vance Maree, Tech tackle, blocked a punt by Benny Lem and Tech scored a safety. In the third quarter Tech scored a touchdown on two plays from midfield, Mizell running 15 yards and Thomason carrying the ball over for a touchdown after a fifteen yard sprint. California's touchdown came in the closing seconds on a long pass from Lom to Capt. Phillips.

To win the Southern conference title the Jackets won seven games from strong opponents, defeating Virginia Military Institute 13 to 0; Tulane 12 to 0; Vanderbilt 19 to 7; North Carolina 20 to 7; Alabama 23 to 13; Auburn 54 to 0, and Georgia 20 to 7. Oglethorpe, an S. I. A. A. team was beaten 33 to 7, and Notre Dame fell before the might of the Tornado 13 to 0.

According to their usual custom the Jackets started off their season without any particular splash. They won a two touchdown victory over V. M. I. in a boiling hot sun, and then they invaded New Orleans for a battle with Tulane. The Greenbacks on the previous Saturday had slaughtered the Mississippi Aggies, and the Pelican fans were all excited over what they figured would be a victory over the famous foe from the Empire State. Tech however was too much for the Louisianaans, and stopped the brilliant Banker colder than he was ever stopped in any other game during the season. Two touchdowns were scored by the Jackets both on forward passes. The Jackets' running attacking had not started to function well. The passes that scored the touchdowns were from Mizell to Jones, and Dunlap to Thomason.

The next Saturday the Notre Dame Irishmen, with six straight victories over Tech to their belts, came to town and thousands of visiting fans joined the local enthusiasts in the stands to see the great intersectional game. The Jackets started off with a burst of offensive speed which included two beautiful passes, and swept over a touchdown in the first few minutes. Shortly afterwards Bob Randolph made a long run taking the ball within the enemy's five-yard line. It looked like a rout at this stage, but the Irish made a gallant stand and took the ball away on downs. From that point on, or up to the last few minutes Tech waged a defensive fight against the traditional brilliant and versatile attack of Rockne. Three times the Jackets, fighting like wild mountain men, took the ball away from the enemy within the five yard zone. Finally in the closing moments one of the desperate passes of the Irish was intercepted by Father Lumpkin, who ran in back to within a few yards of the goal, from which point the Jackets pushed it over to make the assurance of victory doubly sure.

The following Saturday Tech went to Chapel Hill to play North Carolina. In the first half Coach Alex gave his regulars, worn out from the hectic Notre Dame encounter a rest. He sent in to the field a team composed largely of sophomores, and it was in this first half, that Tom Jones, Earl Dunlap, and Father Lumpkin gained eternal fame. Three touchdowns were scored on the Tarheels in the first half. One came on a pass from Dunlap to Jones. Another came when Dunlap passed to Glenn Holland who carried the ball to the seven-yard line, from which point Dunlap scored on the first play, and the third came on Fitz Fitzgerald's long run. At the end of the first half it seemed like a rout, a complete rout for the Tarheels. But the second half was different. In this half Coach Alex sent in his older heads, but instead of completing the massacre the Jackets found themselves face to face with an infuriated and inspired Tarheel clan. Not only did the Jackets fail to score again but they had their goal line crossed for the first time during the season. It was a brilliant comeback on the part of North Carolina but it was futile as Tech had too big a lead.

The next game was with the plucky Petrels of Oglethorpe. These boys gave the Jackets a big scare in the first half, the teams going to recess in a 5 to 7 tie. But in the next half the Jacket juggernaut began to rumble and the Petrels were smothered under a 33 to 7 score.

Then came the game with the Vanderbilt. McGugin's men had a great record and a large delegation of fans followed them to Atlanta expecting to see them take the Jackets into camp. It was a desperate battle with honors about even up to the last few minutes of the first half when Tech pulled that famous quadruple pass Mizell to Thomason to Jones to Mizell. It resulted in a long gain for a touchdown, and completely bewildered the Vandy team. In the second half Warner Mizell went wild and ran the Commodores rugged. In this game he advanced the ball over 200 yards himself, which is a new Southern record. The other touchdown came on a pass to Stumpy Thomason from Dunlap. The Jackets rushedemale, Bull Brown picked up the ball and ran almost the length of the field for a touchdown. Tech, however, came right back and scored the third time. Vanderbilt never threatened through her own offensive.

In the Alabama game on the next Saturday, Tech got a real scare. The Crimson Tide came to town with reports of a long line of cripples. But for three quarters the enemy appeared pretty healthy and dangerous. It was a weird fantastic game, full of both brilliance and boneheadness and mechanical bunglers by both teams. At the end of the third quarter the teams were tied 13 and 13. Then Stumpy Thomason, the little giant broke the tie with one of the most brilliant runs he had ever pulled in which he bowled over five tacklers between him and the goal. The Alabama defense crumpled after this and Tech made two more touchdowns, before the final whistle. Warner Mizell continued his brilliant running and piled up a total of over 200 yards again.

The Auburn game on Thanksgiving day was a rout, the Plainsmen being unable to stop the furious throns of the great Tech backfield. The Tigers fell 24 to 0.

The greatest crowd of the local season was, of course, on hand to see Georgia play Tech on Grant Field in the final game of the regular season. The Bulldogs were not given a chance but they set their supporters crazy with joy when they scored the first touchdown of the game on a pass from Hooks to Maffett. Was the dope to be upset at last? Tech had already accepted the Rose Bowl for the second straight year.
The Football Season of 1928—Continued

Bowl invitation and a defeat would have ruined the season. The Jackets however refused to get excited. They went about their business in their usual cool and effective manner, and scored three touchdowns before the game ended. Georgia did not score again.

Then came the California trip and the National championship.

Not only did Tech have a brilliant and resourceful backfield, but the Jackets had one of the greatest lines the South had seen. Capt. Peter Pund was practically the unanimous choice of every critic for all American center. Warner Mizell was almost as popular a choice for All American halfback and Frank Spear, tackle, won the Associated Press composite selection for All American tackle. Raleigh Drennon received prominent mention. Mizell, Thomason, Spear, Jones, Pund and Drennon made all Southerners in their positions, and the only reason that Maree, Washley, Thrash, Woodbrook, Lumpkin and Durant didn’t make it was because the critics figured it would look too bad to have everybody on the Tech team on the mythical eleven.

The season’s success was a great triumph for Tech’s mighty coaching staff headed by Coach William A. Alexander. Don Miller was backfield coach, Bill Fincher, line coach and Capt. Robinson, end coach. Hal Barron, trainer of the team also deserves much credit for the wonderful physical condition of the team all the year.

The 1928 Freshman Football Team

The 1928 Freshman Football Team had at the start of the season all the evidences of a championship team, but the Georgia Freshmen blasted all their hopes in the last game of the season.

The Junior Jacket stars were quite numerous, and from the material much is to be expected in the future Tech teams.

The first-year men started out the season by playing the Monroe A. & M., a strong Prep school organization coached by Red Barron, and they defeated the Aggies by 19-0.

The Auburn Freshmen were the next victims, and they also fell by the same score, 19-0.

The baby Jackets then journeyed down to Macon and there defeated the Mercer Freshmen by the score of 12-0 in a good game.

The last game was the one with the Georgia Freshmen, where the Athens boys gave our Freshmen a terrible lashing by the score of 33-6.

Pat Barron, despite the fact of his ineligibility for some games, showed great promise of upholding his family reputation as a football player. Pifer, Graydon and Farmer were all stars who helped to give the Junior Jackets a fairly good season.

Frosh making their numerals were: Pifer, Lanier, Weatherford, Graydon, Farmer, McKee, Syd Williams, Shug Williams, Ezell, Goldsmith, Pippen, McKinney, Greer, Wagner, Ryalls, Bryant, Hungerford, Moore, Vietz, Adams and Daniels. These men were awarded silver T’s for their valiant endeavors. Bryant Shelnutt was Manager of the team.

Basket-Ball Coach

Roy Mundorff
Fifteen victories out of twenty-one starts, and a total score of 732 points to their opponents' 599, was the record set by the Jacket basketers for the 1929 season. Two of the six defeats suffered by Tech were by the hands of the Atlanta Athletic Club five, who boast of a bunch of star players who have been playing the game together for a number of years, while another of the set backs was administered by the Penn-Dixie quint who became professionals soon after taking the Jacket's scalp.

Coach Roy Mundorff, basket-ball coach of the Flats, deserves a great deal of credit for the way he developed a team of practically green material. At the first practice of the season, only two letter-men reported for practice. The Jackets opened their season during the Christmas holidays by defeating the Y. M. C. A. team in LaGrange by a 33 to 31 verdict. Moving from LaGrange to Citadel, the Gold and White took the Cardinal five of that city to ride 41 to 35 to chalk up the second win of the season. During the trip, the Jackets were successful with five wins out of six attempts, losing only to the Penn-Dixie five in Chattanooga.

Soon after the Christmas vacation was over, Georgia Tech opened its 1929 regular schedule by taking the Clemson Tigers from Clemson College to ride 37 to 24. Florida was next to invade the Flats and the Jackets turned the Gators back in both of the two-game series. The University of Kentucky proved to he the next victim of the Gold and White onslaught and the lads from the Blue Grass state fell 33 to 19. The next week-end, Coach Roy Mundorff's charges took their first journey of the collegiate season, trekking to Nashville and taking Vandy into camp with a 48 to 28 slaughter. The Atlanta Athletic Club was next on the Jackets' schedule.

Quite a severe blow was dealt Coach Mundorff when Sid Goldin, stellar guard and alternate captain, was forced to quit the squad due to a serious leg injury. After Goldin's retirement, the Jackets fell before Tennessee, 30 to 25; barely won from the Plainsmen in Auburn, 40 to 41; and were crushed by the A. A. C. and Georgia, by scores of 35 to 26 and 27 to 22, respectively.

After Goldin's loss, the Tech five fell from first place to third in Southern Conference standings and entered the tournament as seeded No. 3. Josh Cody's Clemson lads met Tech in the first round and flattened the Jackets 28 to 24. The Gold and White led at the half by a 20 to 14 count, but were unable to cope with the furious attack of the Tigers in the last frame and left the court nursing a 28 to 24 defeat.

But, taking all in consideration, Tech's basket-ball season was very successful and Coach Mundorff and his Jacket crew are in line for hearty congratulations.

### Baseball

**Alva Clay**  
*Baseball Coach*
Review of the Season—1928

The Yellow Jacket nine opened the 1928 season with the Atlanta Crackers as their first opponent. After nearly a month of strenuous practice, with much rainy weather as the greatest obstacle, the Tech Team was whipped into shape, to start the season in which twenty-three collegiate games and one professional game were played. The Jackets widened through the season winning sixteen games out of twenty-three. The entire season was quite successful and very exciting from the start to the last inning of the final game with the Georgia Bulldogs. The entire team was ever alert and fought with everlasting spirit and excellent co-operation throughout the season.

The defeat of the Tech baseballers by the Atlanta Crackers served to urge the team on, and a two-game series with the Clemson Tigers was brilliantly snatched by the Jackets. It was in one of three games that the excellent arm of Dick Florrid was first displayed. The Jackets invited the Oglethorpe warriors to a two-game duel and successfully scalped their Atlanta rivals. The Tech squad was looking mighty good at this time of the season and great hopes for many conference victories were launched by all.

Maryland University marched into Clay Field and baffled the Yellow Jackets into their second defeat of the season. One game with Mercer University followed, in which the Yellow Jackets again bit the dust. A couple of defeats, however, have never discouraged a Tech ball team, nor did they take the fighting spirit out of the boys from the Flats. Brilliant playing by the Tech boys netted them two out of a three-game series with the Auburn Bears. Captain McCash cracked the apple for his first home run of the season, scoring Mizell from second base.

A three-game series with Alabama netted the Jackets but two victories. Excellent hurling was, however, displayed by both Florrid and Carney. The strength of the Tech pitching staff kept increasing from the start of the season. The two-game series with Tennessee undoubtedly netted the spectators more thrills than any of the other contests. Both games were captured by the Yellow Jackets. One of the games was turned into a victory after defeat was almost apparent. In the last half of the ninth inning with Tennessee leading by one run, Bob Parham came to bat. There were already two outs and the count was three and two on Parham, but as the next ball came over the plate the famous Tech batsman drove the ball into the horizon for a home run, scoring Waddey from second base, thus ending the game, another victory for Tech.

The defeat of the Tech baseballers by the Atlanta Crackers served to urge the team on, and a two-game series with the Clemson Tigers was brilliantly snatched by the Jackets. It was in one of three games that the excellent arm of Dick Florrid was first displayed. The Jackets invited the Oglethorpe warriors to a two-game duel and successfully scalped their Atlanta rivals. The Tech squad was looking mighty good at this time of the season and great hopes for many conference victories were launched by all.

As Tech closed the season of 1928 with Georgia, Captain Arthur McCash bid his fellow players adieu. Jimmy Stevens, star catcher for the season, was elected captain of the 1929 team, with Frank Waddey, the rapid center fielder, as alternate captain.

Track Coach

HAL BARRON

Track
The 1928 Cross-Country Team returned most of the members of the 1927 season. However, the loss of Captain Tom Wright of the 1927 squad was keenly felt throughout the meets.

The first meet was run on November 3rd against the University of Georgia. Tech won the meet by the score 24-31. John Young, of Georgia, was first, and Roy Brewer, Tech's Captain, was a close second. Young's time was twenty-six minutes and thirty seconds for the five miles.

On November 16th the Auburn team defeated Tech's team by the score 22-33. Captain Brewer won first place in this race with a time of twenty-eight minutes, ten and three-fifths seconds for the five mile course.

In the Southern Conference Cross Country Race held in Atlanta on November 24th, the North Carolina team ran away with the meet. John Young, of Georgia, coming first; Penn of V. P. I. second; Barclay of North Carolina third, and Brewer of Tech fourth. Tech finished fifth in this meet. Members of the team were: Brewer, Crisfield, Summerour, Owen, Morgan, Coker, Bryan and Furlow.

Edward Barton Hamm, of Loaves, Arkansas, broke the record that was said to be unbreakable. In the National Championships of the year before the Olympic trials, Ed learned how easily a few feet could be chopped off one's record.

From that day, a whole year in advance of the Olympics, Ed began to train for the final try-outs. While others were waiting to be called out for track, Ed was working on fundamentals and getting his heart, lungs and muscles in shape for great efforts. He was advised, more than coached by Hal Barron, a former Olympic place winner himself.

The problem of the coach was to place Ed at the final try-outs in shape as far physically and mentally as possible. Advice as to physical condition consisted mostly of warnings about how and when to "let out" without fear of pulling a tendon. The mental condition was building up confidence of his ability to make the team and thereby overcome the mental hazard—"A trip to Europe if I make it". This has caused the defeat of so many athletes in the Olympic try-outs. For Ed, the try-outs were just another meet. The runway was so perfect, he was in such good shape after months of training, that it was inevitable that he ran and left the take-off board and landed twenty-five feet, eleven and one-eighths inches away from where he started. Because of his thorough training and application Ed will place the record over twenty-six feet before he hangs up his shoes.
The 1928 Track team of Georgia Tech had a gala year. Captain Ed Hamm's performance with the broad jump and the dashes were by far the outstanding features of the season. Kontz, Beall, Brewer, Wright and Crisfield ran some good races, while Papa Hood tossed the shot for a consistent place in conference dual meets, Southern Relays, and Southern Conference Meet. As a whole, the Gold and White team was one of the best and most successful that Georgia Tech has ever had.

The Gold and White track schedule records follow:

In the Southern Relays Ed Hamm won first in the broad jump and third in the 100-yard dash. Papa Hood was third in the shot-put; Duren third in the High Hurdles and Nash tied for first in the Pole Vault.

In the North Carolina dual meet held at Chapel Hill, Tech was defeated by the score of 72 to 53. Ed Hamm was absent during this meet as he was attending the University of Pennsylvania Relays where he won the first place in the broad jump.

In the University of Georgia dual meet, Tech defeated their ancient rivals by the decisive score of 80 to 46.

At the State Meet held at Emory University, Georgia Tech ran away with almost every event, winning the State Championship with 97 points. Emory, their nearest competitor, placed second with 80 points while Oglethorpe University took third place with 10 points.

In the dual meet with Auburn, Tech defeated the Plainsmen by the score 67 to 59. This marked the first time that an Auburn Track Team had been defeated in six years.

At the Southern Conference Meet held at Birmingham, Alabama, L. S. U. won the conference title with 43 1-4 points. Georgia Tech took second place with a score of 34 1-4. Auburn, third, with 33 3-4. North Carolina fourth with 30 3-4. V. P. I., Georgia University and Mississippi A. & M. tied for fifth place with ten points.

In the S. E. A. A. U. track and field meet, Georgia Tech won the event with a score of 29 points. Georgia University was a close second with 27 points.

At the Chicago National Inter-Collegiate Track Meet, Captain Ed Hamm won first place in the broad jump and Ernest Kontz, who running from an outside position in the 440-yard dash, was able to place in sixth place with a record time of 48 4-5 seconds.

In the Olympic try-outs at Boston, Ed Hamm in the broad jump made a World's record of 25 feet, 11 1-8 inches. In the Olympics held in Amsterdam, Hamm won the broad jump with a jump of 25 feet 4 3-4 inches.
The 1929 edition of the Gold and White Track team, coached by Hal Barron, master strategist of all track mentors, will compare with anything in the Conference league.

As this publication goes to press at the time of this writing we are unable to state the real strength of the squad but with the following prospects in view, Georgia Tech followers should see a championship grabbed off by the White and Gold clad team in the coming title scramble:

**COFFEE: A sprinter of high calibre and a place man. 'Nough said! He is an Atlanta boy.**

**WITWER: He has great natural ability but lacks experience. With one more year on the varsity squad he is bound to click as one of the fastest sprinters in the conference. He hails from Boonsboro, Md.**

**GARDENHIRE: A very good sprinter but doesn't come out enough to be much of a contender. His home is in Chattanooga, Tenn.**

**HICKS: A pole vaulter as well as a sprinter. Hicks placed in the Southern Conference Meet last spring. An excellent man for the Varsity. He is from Calhoun.**

**BOYD: Jimmy had a good year last season but injuries have played havoc with his track career this year. He is a high and low hurdler and also an entrant in the broad jump. A pulled tendon has laid him off but it is hoped that he will be able to compete in the dual meets of the year. Boyd's home is in Philadelphia.**

**DUREN: "Dreamy" is a point man in the high and low hurdles. He is also entered in the broad jump. A mighty nice competitor. He is an Atlanta boy.**

**FAIST: At the time of this writing "Dutch" is engaged with spring football. If he comes out for Varsity track he will enter in the quarter-mile event. Dutch is fast and good. Little Rock, Ark., claims him.**

**BEALL: For three years "Frog" has upheld the track prestige of Georgia Tech on the cinder path. He is a mighty consistent half-miler and despite severe competition he has been a regular ever since he became eligible for the Varsity. Much is expected of Frog this season in the half-mile event and probably the quarter. He hails from Memphis, Tenn.**

The official track schedule for 1929 follows:

**April 12 and 13**, Southern Relays at Grant field.

**April 20**, North Carolina at Grant field.

**April 22**, Georgia State meet at Emory.

**April 27**, Penn Relays at Philadelphia.

**May 4**, Georgia at Athens.

**May 11**, Auburn at Auburn.

**May 17 and 18**, Southern Conference meet at Birmingham.
The Freshman Cross-Country Team held two meets and were successful in both of them. The first on November 9th when they defeated the team from Tech High School over a three mile course by the score 24-30.

On November 22nd they again met Tech High Team and defeated them 22-33 over a two and one-quarter mile course. Members of the Freshmen Team winning numerals were: Lanier, Kennedy, Fagan, Terry, Smoot and Seasholtz.
1928 Tennis

The Tech Tennis Team of 1928 battled down all opposition in dual meets and their doubles team went to the Semi-Finals in the Southern Intercollegiate meet.

The Team was composed of Captain "PeeWee" Merry; George Lewis, Captain for 1929; Burr Cabiness; Red Williamson; and Sydney Goldin.

**RECORD OF 1928 MEETS**

Florida at Gainesville .... Tie
Alabama at Home .... Tech
Tennessee at Knoxville .... Tech
Georgia at Home .... Tech
Southern Intercollegiate at New Orleans.

1928 Golf

The spring season of 1928 was an exceptionally successful one for Tech's Golf team. Captained by the well known Watts Gunn, and rounded out by Shag Irwin, Charlie Brumby and Joe High Williams, the team lost only one dual meet and that to Yale at New Haven. Shag Irwin was selected to captain the 1929 team.

**RECORD OF MEETS**

Vanderbilt at Nashville, March 17th .... Snowed Out
Alabama at Home, March 31st .... Tech
Florida at Home, April 7th .... Tech
North Carolina at Home, April 14th .... Tech
Georgia at Home, April 21st .... Tech
Univ. of Pennsylvania at Philadelphia, April 28th .... Tech
Princeton at Princeton, April 27th .... Tech
Yale at New Haven, April 28th .... Yale

S. I. C. Meet at Nashville won by Georgia Tech, won 3rd place.
1929 Swimming Team

Tech's Swimming Team for this year lived up to the reputation it has had for the past several years by winning the Southern Conference Championship, and also the State Championship.

Early in the season the Team took the Northern trip and found the competition up there too strenuous to meet. They fell before Princeton in a dual meet and came third in a triangular meet with the Navy and University of Pittsburgh.

Three dual meets followed and Tech won all of these, and then finished the season by winning the State meet.

Captain McKinstry and Ex-captain Holleman, by setting quite a few records, established themselves as the stars of the season. Simpkins, Haggerty, Shackleford, Maier, Harris, Cooper and House helped to uphold the name and reputation of Tech as the best swimmers in the South.

The results of the meets were:

<table>

The R. O. T. C. and the Naval R. O. T. C. at Tech each year sponsor athletic contests between the different branches of the service and between the units of these branches.

A regular football schedule is arranged, uniforms are loaned by the Athletic Association and the use of Grant Field is permitted. Players showing up exceptionally well in Battalion athletics are invited to come out for the Varsity teams. Many good players have been "discovered" by this means. The Infantry won the R. O. T. C. football championship this year, after several very close games.

A similar schedule is arranged for basket-ball and much interest and rivalry is displayed. Below is shown a picture of the Coast Artillery basket-ball team, which won the championship of the military units in that sport.

An R. O. T. C. track meet is an annual event. Fast time is recorded in the running events and the field events attract considerable interest. The Infantry carried away high honors in the track meet this year.

The Georgia Tech team won the Fourth Corps Area Intercollegiate Match with a score of 3596 out of a possible score of 4000. This year is the Fourth consecutive year that the Tech team has won this match. Each member of the team will be awarded a medal and the team will receive the Corps Area cup, awarded annually.

The Tech team was selected to represent the Fourth Corps Area in the National Intercollegiate Match. Last year the Tech team placed tenth in this match, with a score of 7552 out of a possible of 8000.

Naval R. O. T. C. Cruise

The Annual Summer Cruise for the Naval Unit was made to Northern Waters in the Summer of 1928. The Georgia Tech Unit embarked at Charleston, on the Battleship WYOMING and proceeded to Boston, where the NORTHWESTERN, YALE and HARVARD Naval Units were taken on board. With the same size units, Georgia Tech had a far better representation on the cruise than the other colleges, as follows: GEORGIA TECH, 72; NORTHWESTERN, 51; YALE, 43; HARVARD, 24.

The WYOMING proceeded to Halifax, Nova Scotia, where shore leave was granted over a period of three days. The noteworthy feature of this visit was the prolonged daylight in the evening. This was caused by the high latitude of the place coupled with daylight saving, making it still daylight when student officers were returning to the ship at 10 P. M.

Portland, Maine, was next visited and student officers enjoyed a week-end of delightful enter-

tainment, prepared by a Citizen’s Committee. Dances were attended ashore and a Tea Dance was given on board ship prior to departure, both at Portland and Halifax.

On leaving Portland, the Honorable Curtis D. Wilbur, Secretary of the Navy, came aboard and took passage with the Naval Units to Boston, arriving there July 4th. The Secretary inspected the student officers, and gave them an interesting informal talk. He also posed for a picture in the midst of a large number of student officers.

The cruise ended at Charleston, S. C., July 8th.

For the coming Summer, 1929, the Navy Department has announced a cruise on board the U. S. Battleship NEW YORK from Charleston to Boston, Bermuda and Havana, and the Tech Unit expects to send some 115 student officers on this cruise.
EDITORIAL BY THE EDITOR

Throughout the tedious months when the year-book has been in a state of preparation, we have endeavored to prepare a comic section that would be consummate in its field. There is an abundance of humor and that amelioration of sarcasm by means of comedy which is an unfailing source of amusement.

I have been chosen as editor of this section because of my buoyant personality and unfailing wit, which has attracted so much attention in the fashionable salons and clubs of Atlanta and Hollywood.

Social Notes

Chaperoning at dances is a duty that must be performed by some older and more settled person and the qualifications are many. To be a model chaperone, one must be content to sit quiet and look pleasant during the whole of an evening and to talk pleasantly to any student who may come up and wish to enter into friendly conversation. This is often a bore, especially when you know in your mind that you will be forced to give a failing grade to the student. So we have used our imagination a little and have succeeded in securing photographs of several of our faculty members in company with some of the season's debs, when it was agreed to let the chaperones enjoy themselves for a dance and let the younger social boys sit out a dance. The expressions on the faces of the dancers is an indication that they are not yet used to the public eye, but we know they are really enjoying the dance.
As Some People Visualize Tech Fraternity Life

As Others Like to Believe It
Georgia School of Technology

“A Technical School with a National Reputation”

THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of ability and ambition a training which will fit them for positions of responsibility and power. The national reputation of this institution is based not on claims, but on results. Its greatest asset is the record which its alumni are making in the productive work of the world. Georgia Tech graduates succeed because they have been trained both to think scientifically and to work efficiently.

Coast Artillery, Signal Corps, Infantry and Ordnance Units of the R.O.T.C., also Naval R.O.T.C.

Consolidated Calendar

Thursday, September 19 . First six weeks of rushing starts.
Friday, September 20 . Most all Freshmen pledged now.
Thursday, September 27 . Daily naps in class begin. Student supply declares first dividend.
Saturday, October 6 . Hot sun, football and Georgia Lightning don’t mix.
Saturday, October 13 . School adjourns to New Orleans.
Tuesday, October 16 . Junior class elects—bitter disappointments.
Friday, October 19 . Each frat reports they have best men pledged.
Monday, October 22 . Annual three and one-half mile fresh dog-truth.
Monday, October 29 . Dating of fresh officially starts.
Rumors of Beta house for sale.
Monday, November 12 . Back-slapping continues, only slightly lower down.
Saturday, December 8 . “You’ll play hell with rocking Tech!”
Thursday, December 13 . Trustees scared to trust the band so far from home as California.
Friday, December 21 . Frat houses take on the aspect of sororities.
Tuesday, January 1 . Day of Days for Tech.
Monday, January 7 . A royal welcome to the National Champs.
Monday, January 28 . Biggest joke of the year starts—the Mid-Term dances.
Thursday, February 7 . Basketball Tournament starts.
Wednesday, March 1 . Inter-Eternity basketball finals.
Tuesday, March 28 . First baseball game.
Friday, March 29 . Pi Delta Epsilon Fashion Show starts.
Monday, May 27 . Memorial Day—Tech spring holidays.
Monday, June 10 . Good-bye forever.

Below we have a scene taken in a typical Tech Fraternity House or Boarding House. The weary students are taking a well-earned rest between classes. The obliging butlers are busily supplying lemonade and cold drinks while the boys relax for a few brief moments.

A little minute for a big rest

Work long enough, walk far enough, play hard enough—and you've got to stop. Good workers know it's good to pause a minute now and then to relax and refresh yourself. With an ice-cold Coca-Cola, a little minute is long enough for a big rest.

Once upon a time, back in that quaint old age when children still respected their parents and parents acted their age, there lived a very rich man whose wife died, leaving him with one little girl, Cinderella, who was born at a very young age.

Being a bear for punishment this man married again, his second ball and chain being a widow with two active charge accounts named Kate and Duplicate.

The widow was as proud and haughty as a hired girl, and the rich man's own little girl was as happy as a flapper locked up in a room with a thousand French hats and no mirrors. Her step-sisters were very jealous of her, for she was so beautiful that she made all the Hollywood spare ribs look like something the cat dragged in out of the rain. They silk-hatted her to a fare-you-well and finally sent her out to the kitchen and made her chief engineer of the fire place.

Now these sisters had a perverted sense of humor. They were the kind that would get a kick out of soaping the steps to a gallows, or putting a bent pin on the electric chair. In fact, their natures were so small that they could go horse-back riding on an ant, and because our heroine was forced to wear ragged clothes and sit by the cinders in the grate they labeled her Cinderella.

It so happened that the King of the country had a young crap-shooter whom he was more anxious to marry off than a fat woman to losing ten pounds without exercising or dieting.

So the King decided to throw a big party which was to last three nights, unless all the guests went under the table sooner. Everyone was anxious to get an invitation, for it was known that the King had one of the six best cellars in all the world. It was rumored that he had more pre-war stuff than a bound has fleas.

Cinderella's sisters received bids to the shindig and when the great day arrived they started off to the castle in the family Ford, all dressed up like Mrs. Vanastors Pomeranian Poodle on Easter Sunday.

After they had gone Cinderella started to cry. Suddenly she heard a voice calling her name, and when she looked up she found a little old lady who introduced herself as Cinderella's Fairy Godmother.

"Why the leaky face? Are there no Georgia Tech Sheiks around?" asked the old lady.

"Because I can't go to the big Jamboree, and it's been so long since I had a real drink that I'm as dry as a fish in a keg of nails," responded Cinderella.

(Continued on Page 346)
A Novel Affair

The night was perfect—the moon was full and shining with a mellow glow as the cars loaded with picnickers started out on their expedition into the wilds outside the city limits. An honored alumnus of one of the campus societies had invited the members to be his guests at a dance and supper at a fashionable country club, whose name sounded a little strange. Upon arrival at the destination, there was no country club in sight and no orchestra was blaring forth its strains of jazz. But in the place of club house and orchestra, there was a rustic cabin with hardwood floors and a wonderful radio. And in the kitchen there was the most sumptuous of picnic lunches. A barrel of Coca-Cola reposed on a bench under the old apple tree in the front yard. In fact, the details were complete and the joyous laughter and harmonious singing during the evening were heard for miles around.

The debutantes who were lucky enough to receive invitations to the affair and their escorts were loud in their praises of an honest to goodness old time dance right in the heart of Mother Nature herself.
"Shut off the water works and go out and get me a tin can, four bottles, a bunch of rattles and squeaks and I will make you a flivver that will make Henry Ford dive off Brooklyn Bridge," said the old lady.

After the car was completed she waved her magic wand over Cinderella and her rags turned into frocks which would make the local Society Queens look like an empty gas tank forty miles from a filling-station.

"But get this straight," said the Fairy Godmother, "if you don't do a fade-out promptly at midnight, Old Man Luck will descend on you like an installment collector and you will look like a straw hat in a snowstorm.

Cinderella promised to obey and left for the castle.

When the Prince saw the i8k kid and compared her with the rest of the Dime Store Phoneys, he welcomed her like a burglar welcomes sundown.

For the rest of the evening he was right on her hand like a finger-nail, and while they were Charlestoning he told Cinderella that either she would be his Sweet Mama or he would be an orphan for life.

Cinderella, noting that it was only fifteen minutes until midnight, asked the Prince to get her another highball and a fresh package of lung destroyers. While he was gone, she beat it for home.

The next evening when she arrived at the party, she made them all pause, observe and listen, for she was decked out like Al Ringling's horse on Circus Day.

Again she danced with the Prince five straight no-breaks and had him hanging around like a gate. Once more she remembered her Fairy Godmother's warning and got home before the clock struck midnight.

But when the third night came Cinderella forgot to watch the Big Ben. Suddenly the clock started to strike and Cinderella feeling as guilty as a poker chip in a missionary offering, did a Nurmi out of the Castle.

The Prince started to pursue her, but he was behind like the tail of a coat and all he got for his efforts was one of Cinderella's tiny glass slippers, which had fallen from her foot as she ran down the Castle steps.

The Prince was disconsolate. After being with Cinderella he could get no more thrill with being with some other Dame than Noah could get out of a spring rain.

Finally, he decided that he would take the slipper and if he could find a Dame in all the land with a pair of dogs that it would fit, he would marry her.

At last the Prince arrived at Cinderella's house. The eldest sister tried it on first. But her feet were so big that she rested easier standing up than sitting down.

As the Prince was about to leave, Cinderella stepped timidly forth and asked to try on the slipper. Her step-mother and sisters gave her the raspberries and asked her how she got them ways.

But the Prince was one of those big-hearted guys who would give you his straw hat in December and ordered that she be given a chance.

She slipped into it easier than a fat woman slips on the top step. Then drawing the other glass slipper from her pocket, she put it on, and her rags changed to the swell lay-out she had worn to the party.

As the Prince was about to leave, Cinderella stopped timidly forth and asked to try on the slipper.

Her step-mother and sisters gave her the raspberries and asked her how she got them ways. But the Prince was one of those big-hearted guys who would give you his straw hat in December and ordered that she be given a chance.

She slipped into it easier than a fat woman slips on the top step. Then drawing the other glass slipper from her pocket, she put it on, and her rags changed to the swell lay-out she had worn to the party.

The Prince was happier than a member of the Tuesday Afternoon Club who had just heard a brand new scandal on Monday Eve.

When the step-sisters realized that Cinderella was to be the Prince's sweet patsy, they saw that there was a horse from a different garage and they started to Sister her.

But Cinderella told them not to slam the door on the way out, and she and the Prince were married and lived as happy as two strange bull-dogs in the same kennel.

—J. Boyd.
Steve Meadows

*Exalted Grand Master of So Q*

Meeting of the local chapter of So Q
Being composed of butlers and cooks
of the houses on our campus.

The brethren file into the chapter hall, singing lustily, "We Meet Once Again."

Exalted Grand Master, Steve Meadows, bangs fifteen times on the table for order. The brethren come to rest.

The Sergeant-at-Arms, Eb Ellegen, arises and loudly acclaims, "Let it be hereby and henceforth known that this Chapter, the Alpha of So Q, is come to order and let it furthermore be known that all actions and words done and spoken in our halls be done in good order. Hola! Hola!"

"The scribe will call the roll."
The roll is called, three men are absent.

"Brother Johnson, Brown and Henney are hereby counted absent and simultaneously fined two-bits."

"Excuses will be heard for last meeting."

"Brother Stebbens, what is yo' scuse?"

"Exalted Grand Master, I've got no scuse, 'ceptin' I was sick and the doctah proscribed some medicine which I took too much of. I beg the brethren to accept this scuse and delinquish me from the two-bit fine."

"Brethren, what is yo' will on this matter?"

"Exalted Grand Master, Brother Stebbens ain't been sick in two years. He wasn't sick last meeting. He was drunk and he got my bes' gal drunk."

"Brother Stebbens, what is yo' got to say to that?"

"Exalted Grand Master, his bes' gal is my bes' gal and she was musing me and took some of my medicine."

"De fine remains."

(Continued on Page 355)
CRITICISM

It's easy enough to pick out flaws
In the work that others have done,
To point out errors that others have made
When your own task you haven't begun.

It's easy enough to fuss and find fault
When others are doing their best,
To sneer at the little they have achieved,
When you have done nothing but rest.

It's easy enough to cavil and carp,
To criticise, scoff and deride,
For few of us, ever have done perfect work
No matter how hard we have tried.

It's easy enough not to speak of the best,
And to dwell all the time on the worst,
And perhaps it is proper sometimes to find fault
But be sure that you've done something first.

The Grain of Our Spinning Rings
Contributes to Their Smoothness

This shows how the grain of the steel runs in "DIAMOND FINISH" Spinning Rings, because made from a steel bar bent into a ring.

Because the grain runs the same way that the travelers run, we are able to give you the utmost smoothness in "DIAMOND FINISH" Spinning Rings. This is NOT a small or insignificant point; extra smoothness means a lot during years of wear from millions of revolutions of the travelers.

WINKS
There's the wink of the flirt
That says "How do you do,"
There's the wink that you use
Telling jokes entre nous,
But the one wink that I
Very rarely see fail
Is the wink that means "rye"
When you say "ginger ale."

There's the wink of the babe
As he coos in his crib,
There's the wink that implies
One is telling a fib,
But the wink that I watch
With much glee, is displayed
By the man who means "Scotch"
When he says "lemonade."

Love Epigrams

Love is a fire for which there is no insurance.
Love was woman’s invention, but man has exploited it.
Love is the greatest of conquerors or destroyers.
In love, man’s love of self increases, woman’s vanishes.
A first rate intellect is a third rate lover.
We may as well love ourselves, for we shall never find sufficient love elsewhere.
A man falls in love with a woman’s mind and heart. When he turns to claim them he finds nothing but love.
Men devote themselves to work to impress women, but they end by preferring the work to the women.
It is sad to admit sometimes that the object of life is not love.
We envy the successful lover and despise in him the qualities which make him successful.
We conquer by lies and then believe that we are loved for our real selves.
Marriage is not a word—it’s a sentence.
Silks and satins put out the kitchen fire.
It is not until late in life that one becomes really resigned to love.
The greatest benefit which love has ever brought us is to have made us believe in it.
Marriage envelops love in so thick a shell, that its movements are concealed. The husband no longer keeps watch, believing that his security is secretly gaining strength with time. A shock cracks the shell, and he learns that it was empty.
A woman is old when she does not care how she looks. A man is old when he does not care whom he looks at.
To be justly judged, women must be judged by appearance.
Marry in haste and repent indefinitely.
Silence is golden, but many a man has been talked out of his silver.
Women do not want fair play; that is why they prefer love to friendship.

CHEMICAL ANALYSIS OF FAIRER SEX

Element—Woman.
Symbol—Member of human family.
Occurrence—Found wherever man exists.
Qualifications—Depending on state in which it is found. Usually the United States is preferred.
Physical Properties—All colors and sizes. Always appears in disguised condition. Surface seldom unprotected by coat of paint or film of powder. Boils at nothing and may freeze at any time, however, melts when properly treated. Very bitter if not used properly.
Chemical Properties—Very active. Possesses great affinity for gold, platinum, and precious stones of all kinds. Has great ability to absorb all kinds of expensive foods. Undissolved by liquids. Activity greatly increased when saturated with spirit solutions. Turns green when placed near better looking specimen. Fresh variety has greater attraction. Highly explosive and dangerous when in inexperienced hands.

KING FOR A DAY!
High's versus Ga. Tech!

THE students of the School of Commerce of Georgia Tech are alert and progressive even in their student days—that was the verdict rendered by the general manager of High's when the Senior Class took entire charge of the store for a day. And the Georgia Tech men enthusiastically endorsed High's progressive methods of storekeeping.
