The
BLUE PRINT
1930
Published by the students
of the
Georgia School of
Technology
DEDICATION

THE students of the Georgia School of Technology have honored themselves by honoring Governor Nathaniel Edward Harris with the dedication of the 1930 Blue Print. As our founder and the Chairman of the Board of Trustees of this institution, he was closely associated with its development and progress from its opening in 1888 until he passed away, September 23, 1929. As a Legislator, Governor, and Citizen of the highest type, he was a man whom all Georgia delighted to honor. To the young college man, he presents a worthy ideal for imitation, from his boyhood service in the Confederate Army, when he followed Lee and Jackson.

"The knightliest of that knightly race,
Who since the days of old
Have kept the lamp of victory
Light in the hearts of gold."
FOREWORD

INTO this volume of the Blue Print we have given our sincere efforts to print and reflect the varied activities of the campus. We have attempted to go further—we have tried to instill in the hearts of those to come, the true spirit which prevails at Georgia Tech and to enliven this spirit where it may be waning.

To the Members of the Class of 1930

Georgia Tech is proud of the men who have gone from us to represent this technical college. They have been marked by efficiency and have gained a reputation for this virtue throughout the world. We confidently expect the members of the Class of 1930 to measure up to the high standard attained by those who have gone before and to reach even new heights of success.

M. L. Brittain
THE aim of every student should be the mastery of his course of study. Success in this field just as success in other lines of endeavor will depend largely on his willingness to work hard and intelligently on the duties in hand. Experience has demonstrated that only about ten per cent. of failures in school work are due to conditions over which the student has no control. Whether he is successful or unsuccessful the reason for success or failure will generally lie within himself. He alone can decide what the issue is to be.

ATHANIEL E. HARRIS; the man whose "house" stood by the side of the road, who lent a helping hand to all who passed. The father of all who ever walked in the Halls of Tech.

For the past eight years his greeting to me ever was—"How are my boys, are you keeping them straight?" He planned and worked to secure for "his boys," the students of Tech, the best possible with the means at his disposal.

Grand old man, we greet you, we salute you, we pledge to "carry on" that the service rendered to the youth by Georgia Tech may be such a service as will bless all who come within her walls and thereby will bless the State and all the world.
N 1924 Georgia Tech established the first Department of Ceramic Engineering south of the Ohio River. In so doing, the institution has kept pace with the industrial times and has taken strides to encourage the development of the rich beds of ceramic materials found in Georgia and the Southeast.

Dr. Henry stresses throughout the course the necessity of combining the theoretical and practical aspects of the subject by research, laboratory work and inspection trips throughout the state. The degree of Bachelor of Science in Ceramic Engineering certifies that the student has a basic knowledge of prospecting for materials and of designing and manufacture of ceramic bodies.

THE Department of Chemistry, besides supplementing other courses in Engineering, gives advanced and specialized instruction which leads to the degree of Bachelor of Science in Engineering Chemistry. In recent years the number of candidates for this degree has increased at a steady rate and the school has become more and more diligent in advancing the pursuit of this important science.

Dr. Boggs has a most able staff of associates and laboratory facilities of the most modern type to assist him in carrying on his work in this department.

IN 1924 Georgia Tech established the first Department of Ceramic Engineering south of the Ohio River. In doing so, the institution has kept pace with the industrial times and has taken strides to encourage the development of the rich beds of ceramic materials found in Georgia and the Southeast.

Dr. Henry stresses throughout the course the necessity of combining the theoretical and practical aspects of the subject by research, laboratory work and inspection trips throughout the state. The degree of Bachelor of Science in Ceramic Engineering certifies that the student has a basic knowledge of prospecting for materials and of designing and manufacture of ceramic bodies.

THE course in Civil Engineering is so outlined as to fit the student to be of immediate value as an assistant and to enable him to continue his studies professionally and advance in any field he may choose. The department has advanced and broadened its scope to keep pace with progress.

The graduate in Civil Engineering finds the following fields open to him: Highway Engineering, Sanitary Engineering, Railroad Engineering, Irrigation, Construction, Power Development and any other line to which he can apply his knowledge of building and construction.
JAMES ERKINS ERSKINE MCDANIEL
M.A., LL.B.
Director of the Co-Operative Department

DURING the eighteen years of its existence, the Co-Operative Plan has grown by such steady strides that its enrollment is limited only by the number of positions available for students under this plan. This course extends over a period of five years, during which the student spends alternately four weeks in school and four weeks in practical engineering or commercial work in Georgia and neighboring states.

During the course of study extends over a period of four years, leading to the degree of Bachelor of Science in Commerce. The student may so arrange his course during the last two years as to specialize in fields of accounting, finance, salesmanship, or journalism.

THOMAS WILLIAM NOEL
M.B.A., C.P.A.
Head of the School of Commerce

IN the past quarter century the study of business has come definitely into national prominence. The body of experience and knowledge necessary to business success has grown so extensive that it is no longer possible to accumulate such information during the course of apprenticeship. It was therefore to study the human equation along with production that the School of Commerce was organized at Georgia Tech in 1912.

Dean Noel and the other members of the Commerce faculty are singularly able to interpret their courses from a physical viewpoint.

The course of study extends over a period of four years, leading to the degree of Bachelor of Science in Commerce. The student may so arrange his course during the last two years as to specialize in fields of accounting, finance, salesmanship, or journalism.

THOMAS WITT FITZGERALD
M.E., E.E., M.S.
Head of the Department of Electrical Engineering

A LARGER and larger percentage of engineering students are taking their degrees in Electrical Engineering, because of the growing emphasis of science on electricity and electrical appliances. Coupled with the study of such fundamental subjects as Chemistry, Physics, Mathematics, and Applied Mechanics, the Electrical student is given basic training in Constructive Materials, Steam Engineering and Hydraulics so that he may be better able to apply the principles of electricity to practice.

Professor Fitzgerald so conducts the laboratory courses as to enable the student to verify theory in performance of experiments and to develop in the student the powers of accurate observation and initiative.

THOMAS WILLIAM NOEL
M.B.A., C.P.A.
Head of the School of Commerce

The body of experience and knowledge necessary to business success has grown so extensive that it is no longer possible to accumulate such information during the course of apprenticeship. It was therefore to study the human equation along with production that the School of Commerce was organized at Georgia Tech in 1912.

Dean Noel and the other members of the Commerce faculty are singularly able to interpret their courses from a physical viewpoint.

The course of study extends over a period of four years, leading to the degree of Bachelor of Science in Commerce. The student may so arrange his course during the last two years as to specialize in fields of accounting, finance, salesmanship, or journalism.

THOMAS WITT FITZGERALD
M.E., E.E., M.S.
Head of the Department of Electrical Engineering

A LARGER and larger percentage of engineering students are taking their degrees in Electrical Engineering, because of the growing emphasis of science on electricity and electrical appliances. Coupled with the study of such fundamental subjects as Chemistry, Physics, Mathematics, and Applied Mechanics, the Electrical student is given basic training in Constructive Materials, Steam Engineering and Hydraulics so that he may be better able to apply the principles of electricity to practice.

Professor Fitzgerald so conducts the laboratory courses as to enable the student to verify theory in performance of experiments and to develop in the student the powers of accurate observation and initiative.

Roy Stevenson King
M.E., Sc.D.
Head of the Department of Mechanical Engineering

The four-year course in Mechanical Engineering aims to equip the student with a competent knowledge of mechanics and its adaptation to the existing means and opportunities, and to acquaint the student with knowledge of organization and administration. It is with these ideas that Professor King seeks to impress the student thoroughly with the basic principles of engineering, so that specialization will come later and naturally in the field of the student's endeavor.

The student may direct his studies toward either Automotive Engineering, Power Plant Engineering, Industrial Engineering or regular Mechanical Engineering. All of these options, however, lead to the one degree of Bachelor of Science in Mechanical Engineering.
The Georgia Tech Summer School has gradually grown, during its thirty-three sessions, until nearly every member of the student body at some time or other takes advantage of its opportunities. Its purpose is to help prospective Freshmen to get off admission requirements and to enable Tech men to round their schedules into shape by taking full-credit courses in the various departments.

Professor Morton is a specialist in doctoring up sick schedules, and his efforts along these lines have saved postponement of many graduations.

The Registrar succeeds to the two-fold assignment of investigating the qualifications of applicants for admission to Georgia Tech, and of keeping record of their courses and grades after they have become students. It is the Registrar, also, who mails transcripts of a student's record to another college upon his transfer, or it is his recommendation that counts much when a graduate is seeking employment after leaving school.

Mr. Caldwell has created a most efficient method of handling the records of the institution, and in his connections with the American Association of Collegiate Registrars he has done much to standardize practices among colleges.

In Memoriam
JOHN MELLON GRIFFIN
1909 - 1929
"His service to the people of Florida during the hurricane of 1928 was of outstanding importance in that it gave to the world the first news of the disaster and set in motion the machinery for relief by the Army and the Red Cross. "His excellent work in the Army Amateur System made him one of its outstanding figures. His successor may look with pride on his accomplishments and find in him an admirable example of the finest traditions of the American Amateur and the Army Amateur System."
(Signed) GEO. S. GIBBS

The Blue Print

This edition of the Blue Print brings to you the crystallized result of our efforts to chronicle the Tech campus of 1930. The story we have tried to render complete in every detail—to recognize scholarship, to portray society, to distinguish the individual, to appraise activities both literary and athletic—and all the while to gild the picture with a glamour such as that which time will bring to our memories.

The Board of Editors have recognized the growing tendency to break away from many of the conventional methods of journalism and design of the yearbook. In this particular we have combined the ability and originality of our own minds and resources to produce the new features which we submit for your praise or censure. In the main, however, we sincerely believe that the current fields of art and journalism present reaches of perfection as yet untouched by those who would divorce them.

It has been our zealous attempt to bring to final excellence these principles of technique—to paint a pleasant picture which directs attention to the beauty of the subject rather than to the method of the artist.

Our single hope is that our efforts will be well received by each member of the senior class, by the entire body of students, and by the friends of the institution we honor.
The Technique

The Technique has continued during 1930 to perform the indispensable duties of the official news publication of the campus. But more than a mere news organ—The Technique has, through its editorial influence, introduced and sponsored, and pushed through to realization many measures of lasting worth to the school. The quarter system was proposed and a student vote conducted by The Technique, an action which resulted in the favorable consideration of the measure by the faculty. To its further credit the paper has carried on definite editorial campaigns in behalf of school spirit, the seating of students at athletic events, the building of a new gymnasium, and the inauguration of the co-operative system for the school book-store.

The past school year has seen the influence of The Technique felt in every phase of campus life, nor will these constructive measures confine their benefits to 1930, but they will bear fruits many seasons hence.
Finishing what is generally conceded a banner year in its history, The Yellow Jacket of 1930 has definitely mounted to a place of national prominence among college magazines. And such recognition has not been without merit. The Yellow Jacket has departed from the old conception of the college comic publication—it now seeks to present articles of definite interest to student life, such as reviews of pictures, music, books and interviews with campus leaders. Favored with an abundance of worthy talent from the School of Architecture, the art work incorporated in the magazine is unsurpassed in its field, and is so recognized.

The Yellow Jacket of 1930 has distinguished itself by adopting a definite editorial policy—one that rationally interprets the mind of the college man and accounts for his habits and institutions—one that attempts to correct the public's 'rah-rah' idea of college life—one that endorses worthy and constructive moves relating to the campus.

In seeking to depart from the rather pointless composition of a joke periodical, The Yellow Jacket hopes to have entered a newer and broader field, one that will be of more interest and worth to students, and one that will depict more accurately to the public that oft-misconceived illusion—college life.

Every school has a distinct place on its campus for a musical club—an organization that provides a place for vocal talent that just will express itself, one that trains an orchestra—in short, one that gives the public a first-hand idea of the musical entertainment which it so loves to attribute to college life. To fill this dual of the student body and the public at Georgia Tech, we find a distinctly modern version of the old-time glee club in the Georgia Tech Troubadours.

The Troubadour Club sprang primarily from the dreams of these musical-minded men who lamented the absence of a glee club from the campus. They knew that an institution of the size of Tech was capable of producing a good club and that the public would turn out to see a good show. If the show were really worth while, it mattered little whether the school it represented taught engineering or liberal arts.

With such determined ideas these men set to work. Rather than just create "another glee club" they coined a new name for the infant organization, and the manner in which the public has caught the name "Troubadours" proves the wisdom of their choice.

The new organization took form, selected its personnel from a large list of entries, and this year, a program of real worth has rewarded their efforts. The reward falls where it is merited. Throughout a well-planned itinerary over the state, capped by a big windup in Atlanta, the Troubadours' aim to please the public has been thoroughly realized. In the short space of one season, the club has gained prominence, established a section-wide reputation, and laid the foundation for greater future accomplishments.
CAMP for the Army boys, but the sea for the Navy men. Top of the page shows Miss Cheatham and two of her boys. Below are some very intimate scenes. Big Bertha has on her nose bag for the time being. The bottom scenes show how busy the navy keeps its men while on cruise.

A CLOSE UP of the Student Robbery, and North Avenue in front of Grant Field. Coach Alexander and Prof. Narmore both seem proud of their motors. Then that famous character Alice and his trusty steed. Prof Irwin seems very busy with his reports. These and a few others are the galaxy of snaps presented on this page.
HERE we see the stadiums both football and baseball. Ed Hamm starting off the future track stars. The Ramblin' Wreck well known to the "Y" boys. Coach Clay and down below two of his proteges. The hospital is shown in the lower center and Mrs. Bean.

ON this page are views of the botanical gardens, and most unbelievable a Senior at rest on the Senior bench. The feet are those belonging to Fritz Roberts, whose manager, Frederick, is shown with Miss Heirs. The campus photographer seems busy too. An unusual view of the campus, and several other well-known characters. But down in the corner is the guy we all wish would forget his job, that of blowing the whistle.
These snaps include authentic pictures of future engineers in the embryo. Ranging from the fields of electrical, ceramic, and chemical. The guardian of the X. E. lab is shown in a characteristic pose.

On this side we see a wide variety of snaps. The greyhounds of the track; those worthies of Tech who make much "whoopie"; the hand ball courts; the opposing Alabama "whoopie" makers; a scene where many spectators see thrilling games. The picture of a well known fraternity house, and a group of belles and their boy friends.

Coach Alex has for ten years now, put on the field to represent the Tornado a team which all were proud of. It has been his aim that even in defeat, they were still not whipped. We are proud of him, and are looking forward to next season for even bigger and better teams.

Coach Mundorf is not one of the old ones, but came to us through the East. He got his early training at Pennsylvania where he was captain of the basket-ball team. He was also All-Eastern Forward for two years. Since coming to Tech in 1924, he has made a record but is endeavoring to increase his popularity each year as coach.

The "Kid" as he is always termed finished his college days down on North Avenue, where he received the degree in Electrical Engineering in 1915. He never left the school, but started his coaching the following year. He is now assistant football coach as well as head coach in baseball.

Coach Mundorf is another who came to us from the East. He graduated from Penn State where he succeeded in winning the national championship in the high hurdles. He was also a member of the 1920 United States Olympic Team and won second place in the high hurdles.
Coach William A. Alexander, more often called "Coach Alex," started his football career at Georgia Tech in 1906 under the guidance of Coach Heisman. After winning his letter and diploma, he returned to Tech as assistant coach and in this capacity, served, until his country called him to war. After the war he again returned, and in the year 1921 was made head coach.

His team records in past seasons speak for him. His teams hit hard, fight clean, are invincible in victory, and glorious in defeat.

Displaying that same spirit that carried him up through the ranks; first, as a freshman, then to the Grey Devils, on to the varsity, Captain William Harrell Rusk so fought his way into the hearts of those who saw his team this year. Cedar-town, as he was better known, fought hard, gave his best, and led his team as a veteran. He will be sorely missed next fall when the call is sounded.
Football

VARSITY COACHES

Bill Fincher, All-American in his time at Tech, by his ability, is rapidly gaining for himself a reputation as a mighty line coach. “Lines by Fincher” has become a password at Georgia Tech.

Captain Robinson, though stationed at Tech as a Military Instructor, has also made a place for himself on the coaching staff. To his lot falls the task of making ends, and his loss would be a hard dose for us to take.

Coach Miles fashions the backfield, that they might travel through the holes in the line, and around those ends, carrying with them the ball that they might score the points for which the others fight so hard.

Trainer Chambers comes to us from the U. S. Olympic Teams, and through his thorough training the boys reach that pink of condition which is so necessary to withstand the on-rush of the enemy.

Without the aid of these men, the teams cannot go on.

Closing his career as a player in 1926 at Georgia Tech, Mack Tharpe, not unlike Coach Alex, returned to Tech to resume his football as coach of the freshman team.

Sam Murray, another of the off-springs of the 1926 team ably assisted him, and through these two, come the reserves to fill the vacancies of men gone on.

After leaving the freshman squad, a man must serve on the Grey Devil Squad before becoming seasoned so as to take up the duties of the varsity. Martin here, is the professor and by his training do these men who come through do so.

Senior managers, Strickland and Shelnut, after four years of hard unselfish work, gain their just reward. Their long hard tasks are now over, but the success of the team depended greatly on their positions.
JACK GRIFFIN THOMASON  
ATLANTA, GA.  
Halfback  
Alternate Captain  
Age, 21.  
Height, 5 feet 8 inches.  
Weight, 183 pounds.

Stumpy, for four years has held the crowd in the stands spell-bound; whether running or diving; punting or returning them, he was always a threat. His loss will be keenly felt, both to the team and the spectators.

EARL OWEN DUNLAP  
SUMTER, S. C.  
Quarterback  
Captain-Elect  
Age, 19.  
Height, 5 feet 10 inches.  
Weight, 177 pounds.

Dunlap, a triple threat man, whose passes are bullet-like, true and fast; whose punts are long and high; whose runs are equally as good—made over from a halfback to a quarterback, was wisely chosen as the leader of the next year's Tornado. Steadily improving, year by year he should be at his best next season.

RAY CLEAVER ISAACS  
GRAVEL SWITCH, KY.  
Halfback  
Age, 20.  
Height, 5 feet 11 inches.  
Weight, 175 pounds.

Ray came through this year to gain his varsity letter. He has another year in the varsity and is expected to reach his prime in the season next Fall.

GEORGE LAVANCE MAREE  
SAVANNAH, GA.  
Tackle  
Age, 20.  
Height, 6 feet 1 inch.  
Weight, 213 pounds.

Shifted in the early part of the season to fullback, Maree did not completely find himself. Next year finds him back at his old position, and a great season is in store for him.
THOMAS GILMER JONES
MUSKIE, GA.
End
Age, 21.
Height, 6 feet.
Weight, 175 pounds.
Going down under punts at terrific speed, Tom hit his man and stopped him in his tracks. He will greatly aid next year's team by his ability to catch passes and run.

LUKE WARNER MIZELL
ATLANTA, GA.
Halfback
Age, 21.
Height, 5 feet 11 inches.
Weight, 176 pounds.
Consistency in his passing, running, and punt- ing; anyone of the three help to make up a threat to any team. May it be said of Warner, that he possessed all three. His loss is a blow to next year's team.

FRED LEE HOLT
LITTLE ROCK, ARK.
Tackle
Age, 21.
Height, 6 feet 1 inch.
Weight, 188 pounds.
Playing his first year on the varsity, Fred has shown that he has the qualities so necessary for a tackle. He hits hard, fights clean, and is a main stay in the pinches.

WILLIAM HUDSON EDWARDS
ATLANTA, GA.
Guard
Age, 19.
Height, 6 feet.
Weight, 181 pounds.
Edwards in his first year made the trip all the way to California and still did not get to play. This year he returned with the same fighting spirit. Next year should see him in his prime.
Brumby had the grit to stick. For three years he battled with the Grey Devils and then got his chance. He was a valuable reserve, and came through when called on.

Joe got his early training at the same place as did Mack Tharpe. He follows well in his footsteps. As a linesman, no matter what or who the opponent, Joe is in there, fighting for the advantage.

Sloan is another man who struggled up through the ranks. Getting down under punts, his great reach, and the strength of three men gained his letter for him this year.
SAMUEL WARWICK COLVIN
ATLANTA, GA.
Quarterback
Age, 21.
Height, 5 feet 10 inches.
Weight, 158 pounds.
Sam was another who graduated straight from the Baby Jackets to the varsity. He was a good reserve and will be a great help in the line-up next year.

ALBERT STONEY WILLIAMS
SAVANNAH, GA.
End
Age, 19.
Height, 5 feet 10 inches.
Weight, 168 pounds.
Playing for his first year on the varsity, he secured for himself a regular berth. His grit, headwork, and speed all contributed to his successful season.

WILLIAM JAMES MCKEE, JR.
ATLANTA, GA.
Guard
Age, 23.
Height, 6 feet.
Weight, 180 pounds.
Another newcomer added to the Tornado, and who will greatly aid them in future rambling. Duck is a hard hitting linesman and should be a valuable man next year.

ALLEN EUGENE HAUCK
QUAKAKE, PA.
Fullback
Age, 21.
Height, 5 feet 10 inches.
Weight, 172 pounds.
Gene is one of those boys who helped to make the past teams what they were. Unheralded during his days on the scrubs, he came in for his glory this year. He was a good reserve and will be needed next fall.
AUBREY BENNETT STRICKLAND
SIMPSON, A. C.
Fullback
Age, 20.
Height, 5 feet 10 inches.
Weight. 174 pounds.
Bob did not get to play a great deal until the 'Bama game, at which time he took up arms as fullback and now awaits the next year to show his stuff.

SAM WARREN FINCHER
ATLANTA, GA.
Tackle
Age, 20.
Height, 6 feet.
Weight, 195 pounds.
Sam is carrying on where his brother left off. Under the direct guidance of Bill, he should go far. Much is expected of him next season and for another after that.

JAMES RICHARD FRINK
MIAMI, FLA.
Quarterback
Age, 20.
Height, 5 feet 10 inches.
Weight, 162 pounds.
Jimmy, handicapped by his lack of weight, gave the best that he had. His willingness to work, and his ability gained for him a berth on the 1929 Tornado. He is another who will be missed next year.

HALBERT GRANT LAW
CHATTANOOGA, TENS.
Center
Age, 20.
Height, 5 feet 9 inches.
Weight, 183 pounds.
Traveling around on a tramp steamer was not enough to help Hobby displace the captain. However the distinction of being the captain's reserve for three years is a record hard to beat. He fought hard while playing and was a good reserve.
Harold Augustus Faisst
Little Rock, Ark.
Halfback
Age, 21.
Height, 5 feet 11 inches.
Weight, 168 pounds.

Dutch, the "Flying Dutchman" is a fast running back. Although troubled by bad eyes, his place will be greatly missed when a fast man is needed next season.

Edison Douglas Graydon
Little Rock, Ark.
Halfback
Age, 20.
Height, 6 feet 11 inches.
Weight, 168 pounds.

Doug is another sophomore who made good his first year on the varsity. He is a fast, shifty runner and is destined to be a valuable asset to the team for the next two years.

Clinton Shaw Ezell
Atlanta, Ga.
Center
Age, 20.
Height, 6 feet.
Weight, 195 pounds.

Clint, playing his first year of varsity football was handicapped by playing the same position as the captain. When called on in the Georgia game however he did his part. With two more years to go, his prospects look very bright.

Gordon Campbell Watkins
Atlanta, Ga.
Tackle
Age, 21.
Height, 6 feet 1 inch.
Weight, 205 pounds.

Coot, who once stiff-armed a freight train, is a tall and powerful man. His strength and speed made it possible to overtake a man and pull him down from behind. This feat saved several scores from the opponents, and makes him another loss hard to bear.
CHARLES WARE FITZGERALD
JACKSON, TENN.
Fullback
Age. 24.
Height, 5 feet 11 inches.
Weight, 169 pounds.
Fitz, another Yellow Jacket who took to the high seas during the summers, had a stormy path to his recognition as varsity material. Never a complaint from him though, who will he missing from the line-up next fall.

RAYMOND CAD LUNA
PITTSBURG, TENN.
Fullback
Age. 21.
Height, 5 feet 8 inches.
Weight, 160 pounds.
Moon was a steady player who waited for his chance, and finally got it. He did his best which is all that can be asked from any man. He will be listed among those missing next season.

Football

1929 Football in Retrospect
By ED DANFORTH
Sports Editor, Atlanta Constitution

One must go far behind the report of three games won, six lost properly to characterize the 1929 football campaign at Georgia Tech.

One must go to the sugar-bowl valley in the California mountains where the Yellow Jackets defeated California in the Tournament of Roses game on New Year’s Day and reached the loftiest peak to which a Georgia Tech eleven ever climbed.

One must trudge back down through the tumultuous welcome from a proud city and sit through excited testimonial ceremonies.

One must stand and watch a spring practice that was a tatting party to the gladiators who had plunged the sword into the necks of their foes.

One must go through a summer that saw the defection of the key man of the Tech offense and the assembly of a rather bored group of athletes to start another gridiron campaign that could not possibly have been aught but an anti-climax.

The experiences of the 1929 season that saw the Yellow Jackets cuffed and worried by nearly every traditional foe may have firmly established the present athletic regime at Georgia Tech. For student body and alumni took the defeats of their team like sports-
Football

There was little or no complaining over the coaching system; there were few indeed who groused over the sudden descent from gridiron pre-eminence.

It may be trite to say that the vast body that is Tech was finer in defeat than in victory but it resolves itself into just that. Those on "the outside" well situated to hear things sense that Tech men are glimpsing the truism that athletic success runs in cycles, where success is measured in terms of victories, and that a balance of power through the decades is best for the game.

Coach W. A. Alexander had expected to lose Paul, Drennon, Thrash, Waddy, Speer, Durant, Shulman, Smith and Randolph—one side of a line, three quarterbacks, a fullback and a spare tackle. In Spring practice he developed an offense around Roy Lumpkin, just coming into form as a really great fullback. Then in the Summer, Lumpkin left school and the Spring work was lost.

Coach Alexander hastily withdrew Vance Maree from the line and made a blocking fullback of him. Stumpy Thomason and Warner Mizell, two of the cleverest halfbacks ever developed at Tech, were given the load of the ball carrying. And Earl Dunlap, a fine halfback and passer, was made into a first string quarterback. The line was patched up as tightly as possible and the season began.

The Yellow Jackets opened with the Mississippi Aggies and won 27 to 13 mainly through an aerial attack with Tom Jones, veteran end, as receiver. Jones scored two touchdowns. Thomason and Graydon scored one apiece. Nearly every man on the squad saw service. The need for reserves was acute.

Grey-Devil Squad

The Yellow Jackets met their first reverse in 16 games when the strongest team that ever represented North Carolina came into Grant Field and won 18 to 7. The Yellow Jackets scored early on a long run by Thomason and kicked goal. Then injuries and officials' rulings changed the make-up of the Tech front. The Tarheel machine began to function and away they swept to score three touchdowns before half-time.

The last half was a bitter battle. The Tarheels dug in and protected their lead and the Yellow Jackets finished trying desperately to connect a forward pass for a touchdown.

Florida was looming just ahead. The 'Gators had returned the same team that missed a perfect record the season before by one point in one game. They had been carefully pointed physically and emotionally for the Yellow Jackets.

The Yellow Jackets worked feverishly all week and came back to winning form in a blaze of inspirational football. Before the largest crowd of the season they scored a touchdown in each of the first three periods and won 19 to 7. Florida's great backfield was a constant threat but the Yellow Jackets fought a canny defensive game toward the finish and limited the enemy to the one counter.

Mizell, Maree and Thomason each scored the touchdowns.

The Florida game, however, sapped the strength of the entire squad. They were stale and crippled in every bearing as they went down to New Orleans to meet the carefully prepared Tulane eleven, the ultimate Conference champions.

Tulane played superb football and scored three touchdowns in the first half. Then the steady pounding of the Yellow Jackets took its toll and in the last period Tech scored
Football

two touchdowns. But the rally came too late and the final score 20 to 14 fairly told the story.

Coach Alexander elected to make a determined fight of it against Notre Dame, the
coming national champions. Many critics declared that the Yellow Jackets played their
best game in some respects against the Irish. Long runs by the fleet Irish backs gave
Notre Dame a 26 to 6 victory.

Of all the defeats, probably the showing at Vanderbilt was the most disappointing.
The Yellow Jackets were outrun. literally, by a smoothly clicking Commodore eleven that
knew exactly what to do and had the power to do it. The Commodores won 23 to 7
handily.

Before the Alabama game, Coach Alexander was enabled to switch Maree back to
tackle when Bob Strickland developed ability as a fullback. The change and the prospect
of combat with the time-honored foe resulted in the development of great spirit. The
Yellow Jackets played the finest defensive game of the season against Alabama and the
Crimson Tide delivered its best. The Tide won 14 to 0 and Tech supporters could not
complain over the showing.

Taking advantage of the ten-day interval before Thanksgiving Day, Coach Alex-
ander gave his men an entirely new offensive set, featuring a balanced line and balanced
backfield. Maree was definitely assigned to tackle and Strickland to fullback. Using
simple formations, the Yellow Jackets defeated Auburn 19 to 6 and faced the coming
game with Georgia with better heart.

The closing game at Athens would have been a great spectacle but for rain which fell
in torrents from midway the first period to the finish. Georgia received the kick-off and
marched straight on to a touchdown, scoring on a long forward pass, Chandler to Maffett.
Goal afterward was missed.

Then the storm broke. In a few minutes the field was heavy and spectators drenched.
The Yellow Jackets played their best since the Florida encounter. The new formations
bothered the Georgia line no little with Thomason and Mizell breaking through time
and again for substantial gains. Georgia played grimly and used their fine repertoire of
plays smartly. The Georgia secondary defense was tackling perfectly.

In the third period the Tech rush line charged through in a body and blocked one of
Chandler's punts close to the goal line. Jim Brooke fell on it for a touchdown. Goal
was missed and the score tied 6-6.

Then with the two teams fighting it out on sheer nerve, "Fats" Bryant, a burly lin-
eman, broke through in the fourth period, blocked a Tech punt, scooped it to his chest and
ran 45 yards for the winning touchdown.

The score 12 to 6 was a fair expression of the difference of the two teams for the
day.

Outstanding players for the season according to selections of Southern critics were
Captain Rusk, Thomason, Mizell, Maree, Dunlap and Jones.

The Yellow Jackets had been figured to take a slump after their two victorious sea-
sions; but few imagined they would make such a thorough job of it. And the fine spirit
shown by students and alumni to the reverses presage better times immediately in spite of
another extremely difficult schedule.
Three thousand years ago Aesop said: The fish that is golden swims in the sun.

Or maybe we're wrong. Maybe it was only 2000 years ago. Or maybe it was Solomon who said it.

In any case, it is a pleasant thought, and may be true.

And in any case Georgia Tech's basket-ball team came gold-clad, like any well-bred member of the finny tribe, onto the basket-ball courts last winter. Unlike the more well-bred members, however, not a single member of the team boasted a fin. Wherefore traveling in the bright lights was forbidden by such gods as rule the courts.

Georgia Tech's basket-ball team, in fact, saw very, very little light during the course of their season. The Jackets won but six times in 14 engagements with Southern Conference foes. The Jackets won but nine times in the 24 engagements which appeared on their schedule.

Which is, so to speak, not so hot.

Coach Roy Mundorff opened his drive with a right sizable squad, among which were six letter men, a few others with some little previous experience, the class of the frosh outfit of 1928, and a group of prospects. There was no gold in these latter hills, but the final weeding out disclosed a crew which looked good for plenty of victories—on paper.

Wilson        Heeke        Wages        Flowers        Maree        Williamson

There were Captain Goldin and Wages for the guards. Veterans both, and capable of playing good ball. There were Tate and Warner and Maree for reserves. There was Raines at center. A promising sophomore, Raines. There were Tate and Perkins for replacements, if and when needed. There were alternate-captain Wilson and Williamson for forwards. There were Perkins and Heeke ready for emergencies.

Oh! And yes! The Jackets looked potent—on paper.

In combat, however, something was missing. Not that same something attributed to Clara Bow by the public mind, but something closely akin. The Jackets, good enough for almost anything, just failed to click. The spirit was willing, and the flesh was not weak. Not by several beefsteaks. Mechanically the Jackets showed few flaws. Yet they could not win. The reasons are listed among those things known only to James Branch Cabell. The Jackets started their endeavors on their annual Northern road trip. They were not expected to turn in a good record on the jaunt. It was for the purpose of gaining in experience, of shifting the line-up to a workable form.

The experience was gained, the line-up went through its changes. And the record was two victories in six games.

Opening their conference season, the Jackets won an easy one from South Carolina and dropped a heart-breaker to Clemson.

The Jackets stepped out of the conference to trim the Savannah J. E. A., and stepped back in to nosed out by Georgia. trimmed by Tennessee, and again—of all things—nosed out by Georgia. Vanderbilt fell an easy victim to the Tech wiles, and then the Jackets reached a peak to trim the rampant Atlanta Athletic Club quintet, breaking a winning streak which stretched back into the times of the ancients.
Basket-Ball

Vandy was again made a fall guy, this time a much more resistant kind. Kentucky, Alabama, and Clemson beat on the Jackets in succession. Being knocked down meant little to the lads from the Flats, however. They rose to smite Auburn twice.

And again—who suggested inviting them?—the Bulldogs staged their "nosing out" act. The Jackets closed by yielding to the A. A. C. in a return game.

That was all. The regular season had closed. After some discussion, which had no bearing whatever on the matter at hand, the Jackets entered the conference tournament. Entered with a conference percentage of .361, a grand average of .409.

The Jackets ran up the high score of the meet in sending Tulane back to home and friends.

The Jackets fought bravely against Duke's speed kings, but fell short of the victory and themselves sought solace.

Such, the books say, is life. Or who said anything about it being Tech's year.

Review of the 1929 Baseball Season

GEORGIA TECH'S Baseball Team opened the 1929 Baseball Season with the Atlanta Crackers on March 23rd. The yellow Jacket nine fought with the Professional team for ten innings of thrilling baseball, until darkness brought the game to a close with the score tied, 6 to 6. The team from the flats outhit the gang at Spillers getting 17 hits, while the latter got only 13. The spectators got a great opportunity to see what kind of a pitching staff Tech had for Coach Clay started John Jordan on the mound and before the hectic struggle came to a close he used Quinn, Powell, and Little. The one game played with the Crackers was the only one of the three scheduled games played due to the rainy weather which prevailed during the month of March.

Continuous rain hindered The "Kid" from holding practice very much before the intercollegiate season opened on March 29th and CAPTAIN TERRIEL with Oglethorpe. The Stormy Petrels ALTERNATE. CAPTAIN FRISK copped the City Title by nosing out the Yellow Jackets in a last inning rally to win the ball game by a 5-4 count. The first game resulted in a tie.

Jimmie Stevens playing his third year of varsity baseball in the role of catcher proved himself a hard worker and the possessor of a fighting heart. As Captain of the Yellow Jacket Squad he proved an able leader.

A two-game series with the Auburn tigers were the first out-of-town games for the Yellow Jacket nine.

The Series resulted in a double defeat for the boys from the flats. Coach Clay's gang then fought two battles with the University of Alabama and were defeated in both games, the Alabama clan chalking up 23 runs against Tech's 3 in the first fray and 16 runs against Tech's 10 in the second.

The four successive conference defeats handed the Yellow Jackets seemed to prove that the boys could not play ball away from home. The main difficulty lay in the pitching staff which up to this time proved mighty weak. However, undaunted by the miserable defeats handed them already on their road trip, the baseballers headed for Gainesville, Florida to meet the 'Gators in a two-game series. The 'Gators copped the first game but Tech came back strong in the second, and behind the excellent pitching of John Jordan defeated the boys in the state of sunshine with a score of 3-1. Jordan allowed the Florida bunch only three hits and two of those came in the ninth inning. For six full innings the 'Gators were unable to reach first base. The Jackets counted twice in the first inning when "Red" Terrell and Bob Parham hit safely and scored on Tom Jones' long drive into deep center, after both had advanced one base on an infield out.

Clay field was the scene of the next two battles of our baseball team, the result of which Tech split a two-game series with the Clemson Bears. With revenge in their hearts after the two defeats handed them at Auburn, the Tech boys looked forward to the two games at hand with the Tigers at Clay field. The tables were turned. The "Little Napoleon's" team defeated the boys from Auburn in two games, the scores being
Baseball

The first game was a see-saw affair, and with Auburn leading by a lone tally in the eighth frame. Tech broke loose with their bats and scored five runs before the inning was over. The second game was all Tech's. Jordan was on the mound for the locals and pitched a fine game, allowing but seven scattered hits. Up to this time, Jordan proved to be the Jackets' mainstay, for the pitching staff as a whole seemed to be showing up mighty bad, though the Tech basemen were doing their duty by backing that old rock to make up for the weak pitching.

Another attempt for sweet revenge were the two battles with the baseball nine from Alabama, but the Tech Diamondeers took only one of the two games, thus resulting in three defeats by Bama during the season.

The Georgia Bulldogs jousted Clay field and tripped the boys for two games. The Bulldogs packed a terrific batting attack, though the Tech basemen were in better form than in the first game. Basebroad baseball proved boys offered no ability, for they were whipped by a superior team from the nationally famous University of Alabama.

Brilliant Rallies gave Vanderbilt a 3-0 and 6-1 wins over the Yellow Jackets at Nashville to increase the number of defeats already handed the Georgia Tech Baseball Team by Conference Nines. It seemed that the numerous losses proved that Tech had only one dependable pitcher, namely John Jordan.

The 1929 Baseball season was closed by a two-game series in Athens with the Georgia Bulldogs. Again Jordan brought in a victory for Tech by his steady hurling. The Red and Black proved a little too hot for the Yellow Jacket nine in the last game and handed the boys a defeat, thus giving the Athenians three games out of the four played during the season.

Thus ends the story of the 1929 Baseball season. There were dozens of thrilling episodes during the season, but only a few of them caused the Tech fans to shout with joy. The team fought, and fought with undying spirit, for the handicaps under which they battled was too great to warrant a successful season. The team elected "Red Terrell," the ever fighting infielder, Captain of the Yellow Jacket Baseball Team for 1930.

TRACK
As this publication goes to press we haven't the final results of all the meets, but as far as we have them they are complete. Judging by the results that have been obtained so far this year, it seems as if the 'ole team is due for another gala year.

The results of the Meets are as follows:

In the first Southern Indoor Conference Meet Tech placed third after Washington and Lee and North Carolina. The other teams participating in the meet were: Maryland, Tulane, Virginia, Georgia South Carolina, N. C. State, and Duke. Each of these teams placing in the order named.

The next meet was against Furman, which we won to the tune of 97 1/2 to 35 1/2, taking ten of the available first places.

The meet following this one was with North Carolina in which we were completely swamped to the score of 104 to our 27. This was due to a large extent to an epidemic of pulled tendons, five of our men being on the side lines.

In the Southern Relays the Freshmen took three seconds, Doug Graydon took second in the javelin and Ed Hamm took first place in the broad jump, breaking the record in this. The relay team took third place in the one-half mile relay.

The S. E. A. U. came next on the schedule and in this Tech made two firsts, one second, two thirds, and three fourths. Shag Williams winning the 440 hurdles, and the relay team taking the high honors in their events. The team being visibly weakened by the absence of Doug Graydon and Ed Hamm who were at the Penn. Relays.

It is with great pride that we state that Doug and Ed did themselves proud at the Penn. Relays.

The success of the Track season is due to the following men:

**Harvey:** Jack is a high and low hurdle man and a good one at both. More power to you Jack.

**Coffee:** George has a pulled muscle at present but it is expected that he will be in shape soon.

**Crisfield:** Al is a long-distance man who has been with the Varsity now for three years and has been a great help all along.

**La Forge:** Charlie is the 220 and 440 man of the outfit and has been doing these in regular style. Charlie is a sophomore, and we will hear from him a great deal in the future.

**Graydon:** Doug is the utility man. He runs the hundred, the 220, throws the javelin, and broad jumps with the best of them. Doug is also a sophomore and more will be heard from him later.

**Williams:** Shag is holding his own in the high jump and the low hurdles, and we can look forward to bigger and better things from him next year also.

**Newcomer:** Just as his name implies, this young man is a newcomer to us. He is a fine low hurdler and much is expected of him this year.

**Smith:** A high hurdler of sterling quality, a broad jumper and discus-man as well.

**De Jarnette:** A consistent pole vaulter who will be with us again and to whom we are looking for honors in this field.

**Hicks:** This is another man with a long stick from whom we expect to receive our laurels in this field.

**Foxhall:** This is the young man who has been walking away with the prizes in low hurdles so far and we hope he will continue to do so.

**Hamm:** Last, but not least, by a long shot, comes Ed. Not only is he predominant in the field of broad jump but he is one of the best sprinters in the South. Look up his record and see for yourself, Gentlemen!
THE cross-country team of this year has had a better year than usual. Out of the four meets entered we came out with two first places, losing another by four points, and coming in fourth in the Southern Conference Meet.

The work of Captain Al Crisfield helped substantially in keeping the team on top. He could always be depended on for a first or second every time he took the field.

The results of the meets are as follows:

The first meet of the season was with Clemson. In this meet Tech made a perfect score, the first five men in were ours, then a Clemson man came in, then two more of ours. Crisfield placed first with a time of 19.36 minutes for the three miles. The score in this meet was 15-48.

Next on the horizon was Georgia. John Young of Georgia was the winner in this meet with Crisfield of Tech a close second.

Auburn came next and the score in this meet was as close as in the meet with Georgia, being 26 to 30 in their favor. Crisfield again took first place in this event. His time was 23 minutes 19 seconds.

In the Southern Conference meet Tech came out fourth, being beaten by North Carolina, V. P. I., and Florida. Georgia taking fifth place. The other participants in the Meet were N. C. State, Duke, Tenn., Washington and Lee, and Clemson.

With the Southern Conference Meet, Tech wound up its schedule.

Due to the lateness of the 1929 Track schedule we were unable to express our thanks to the following men of the Track team of 1929:

BEALL: Frog was elected to fill the shoes of Hamm as Captain, and he did a very creditable job of it. He is a half-miler and does it in record time.

ANASTASAS: Hank is one of the best runners the Varsity has seen in many a day and runs with the best in the conference.

SWAIN: A great asset to the squad this year as he is the best pole vaulter in this section of the country.

COFFEE: He can be said of George that never did a man work more to uphold the honors of his school. He runs the hundred in championship style, and competes with the best of them in the other dashes.

DUREN: "Dreamy" brings in the points in the high and low hurdles. More could not be asked of any man.

BOYD: It is with regret that we are not able to state that Jimmie hung up many records this year, but due to injuries he was unable to be in the line-up.

Crisfield: There is nothing very flashy about Al, but he is mighty consistent in his running and could always be depended on for a place at the finish. Al is also Captain of the Cross Country Team.

STEWART: Stacy is a pole vaulter and high jumper of note. He did his best at all times which show up mighty well on the score card.

BARRON: We could fill up an entire book on the good qualities of our Coach Hal Barron, but to put it in a few words, the entire outcome of the season depended on this master of the track. If you don't believe he did his job well, just take a look at the results.

REYNOLDS: This is the man who you never hear about. But it goes without saying that whenever anything goes wrong he has to fix it up. Lin is also the man who has to keep the other boys in the right frame of mind at all times, and see that they get their share of the eats. More power to you Lin, the worst is over.
The Tech net team enjoyed fair success during the 1929 season winning three games, losing four and tying one. In the conference tournament Captain Lewis and Goldin went to the Quarter finals as a pair while Captain Lewis went to the third round in singles. In the state tournament Williamson and Cabaniss won the doubles while Malon Courts carried off the honors in singles.

The losses of Captain Lewis, Cabaniss and Merkle will be felt in the coming season but with Captain Elect Williamson and Sid Goldin back and with numerous prospects from the freshmen the prospects for the 1930 season are very bright.

Team Personnel:
Lewis, Capt., Cabaniss, Williamson, Golden, and Merkle.

The Season:
Tech defeated Kentucky
Tech " Auburn
Tech " Sewanee
Tech tied Florida
Tech lost to Alabama
Tech " Tulane
Tech " North Carolina
Tech " Georgia
1930 Squad

With five wins, three losses and a fourth place in the S. I. C. tournament, the Tech Golf Team enjoyed a good year. Captain Shag Irvin and John Leach finished their college golfing careers in fine shape, playing good all through the season and winning honors at the S. I. C. tournament at the close of the year. Captain Irvin won fourth place while Leach won the second flight consolation. The other two members of the team, in the personage of Charley Brumby and Scott Hudson did their part in tip-top fashion, and are expected to carry their part again during the next season.

The prospects for the next season are bright, with Brumby and Hudson back and with Wilbur Oakes and Roger Parker coming up to fill the vacancies left by Irvin and Leach. With these four men Tech should not have so many troubles in the coming year.

Team Personnel:
Shag Irvin, Capt., Charlie Brumby, Scott Hudson, and John Leach.

The Season:
Tech . . . 14 1/2 Duke . . . . 3 1/2
Tech . . . 1 Florida . . . . 17
Tech . . . 3 1/2 Alabama . . . 14 1/2
Tech . . . 13 1/2 Vanderbilt . . . 4 1/2
Tech . . . 10 1/2 Sewanee . . . 7 1/2
Tech . . . 9 1/2 Duke . . . . 8 1/2
Tech . . . 9 1/2 North Carolina 8 1/2
Tech . . . 6 1/2 Georgia . . . . 11 1/2
S. I. C. Tournament Tech 4th Place.
1930 Squad
Swimming

THE Yellow Jacket Tankmen, under the excellent leadership of Captain Dick McKinstry and alternate "Red" Holleman, brought the Southern Conference Swimming Title to the Flats for the fourth straight season last year. Tech started the 1929 season during the early part of February by trekking to Princeton, N. J., where they fell before the Tiger's swift attack by a 49 to 11 score. After their defeat by the Orange and Black, the Jackett natators moved on to Annapolis and met the Navy and the University of Pittsburgh in a triangular meet. The Navy took first place with a total of 52 points, while Tech came next with a count of 21 points and Pittsburgh brought up the rear by gathering 17 points.

On the return trip to Atlanta from their Northern invasion, the Gold and White swimmers stopped off at Durham, N. C., and took the Duke Blue Devils into camp by an overwhelming score of 52 to 10. A little later, after their arrival home, the Jackets visited Knoxville, Tenn., and snowed under the "Y" team of that city with a score of 48 to 18.

The Gators of Florida were the next to taste defeat at the hands of the Southern Champions when they invaded the Flats and were returned home on the short end of a 48 to 13 count. In this meet Tech had an easy time by taking every first place, and with McKinstry and Holleman setting three new Southern records between them. McKinstry bettered his old mark in the 50-yard free style, while Holleman made new time in the 220-yard dashes.

The State meet followed and the story was the same. Tech captured this meet by running up a total of 41 points. Emory and Georgia came second and third respectively with a total of 19 points between them.

C. Y. House was elected to captain the 1930 team, and Flemming Cooper was chosen as alternate. The following men received letters. McKinstry, Holleman, Maier, Shackelford, Simpkins, and Harris.

The Freshmen squad also turned in a good record and numerals were awarded to Kennickell, Fain, Ingle, Wilkes, McCampbell, Wise, Parson, Payne and Sanders.

Each year, the different corps of the army and navy units form an Athletic League in order to further the building up of real men.

In this manner, several stars are discovered and it proves an advantage to the Athletic Association. They have representatives on the spot to see if any varsity material is present.

In order to pay its tribute to the services of such men who might be selected for the varsity, the Athletic Association allows the games to be played on Grant Field, the players wearing the regular Tech uniform, and at the end of the season, the Association awards to the winning team sixteen sweaters.

Below is shown a picture of this year's champions. They are members of the Coast Artillery Corps, coached by Captain Taliaferro.

Those receiving sweaters were:

- Anding
- Bergezay
- Brock
- Coffin
- Conley
- Hungerford
- Merry
- Lively
- McKinney
- McKion
- Magill
- Mathes, F. A.
- Mathes, E. S.
- Obeear
- Pickitty
- Summers
- Robinson
- Vann
- Yarborough

1930 Squad
The Coast Artillery Corps, not satisfied with their laurels won in football, came back with a rush and also copped the championship in basket-ball.

Not unlike the football league, each team, or corps, has a chance at one another. However, instead of one game, two are played.

The Athletic Association also does its part here, and allows the gym for practice and games. At the end of the season they give sweaters to the eight men most deserving on the winning team.

Below is a picture of the team composed of the following men:

- **Coach**: Jack Warner
- **Captain**: Gibbons
- **Payne, H. L.**: Rogers
- **Payne, W. K.**: Yates

The Rifle Team to represent Georgia Tech was selected from members of the Unit Team and old members of the last year's team.

The Team won second place in the Corps Area match, after having won this match for four consecutive years.

The Tech Team has been selected as one of the two teams to represent the Corps Area in the National Intercollegiate Match.

Two Teams have been entered in the William Randolph Hearst National Trophy Match. Last year the two teams entered in this match won second and fourth places in the Southern Division for Senior Units and were awarded a Team Trophy and individual medals.

Fifteen letters and suitable sweaters are awarded annually to members of the team. The Georgia Tech Association furnishes necessary funds for the purchase of sweaters and other expenses.

The Collegian Handbook of Etiquette

By that age-old guiding hand in the more delicate matters pertaining to home life, sex life, wild life, and night life, Emile Toast.

Editor's note: The author of this pleasing yet instructive bit of enlightenment—more affectionately known to those in her inner circle as "M"—is universally known for her ability on this subject of the preservation of natural resources. She has garnered this material from the far corners of the campus—even so far away as the Physics building, where anything might happen after midnight. She has many other distinguished works of literature to her credit aside from this masterpiece, not to mention three years as editor of the "War Cary."

Among other of her works are:

Is There a Doctor in the House? by Rube Goldberg.
The Specialist, by Chic Sale.
Pilgrim’s Progress, by John Bunyan.
Pepy's Diary, by Joan Lowell.

Chapter 9—EE Width

CLASSROOM NOTES

How to enter class late:
First rattle knob. Next try to open door inwards if it swings outward, or outward if it swings inwards. Kick lower panel of door and shout enthusiastically, "Is the prof taking cuts?"

By this time you will have focused the class' attention on the doorway and you are now ready for a Grande Entree, as the French say or would say if the y did not have a national debt of 57 billion francs. Anyway, walk in, slam door, and say "Hello Mac" to the A's, B's, C's, and D's who occupy the first row. Borrow a pencil and you are all set to draw pictures on the flyleaf of your roommate's book.

How to sleep in class:
Tell the man next to you to keep you awake. This will insure his going to sleep immediately, and you are now ready to proceed. Prop feet against back of man directly in front of you. Open mouth halfway. This practice is not absolutely essential and many of the best classroom sleepers do not employ it. However, when you are a beginner, keeping the lips well parted is an excellent measure of precaution. If you are awakened by the prof, it allows you to explain that you were merely practicing blowing smoke rings.

How to answer roll call:
There is only one thing to remember concerning roll call. Students must cooperate with one another. Each student should begin to answer a half dozen names ahead of his own, and continue to respond to three or four after his has been called. For example, a man by the name of O'Brien should commence answering for the Murphys and finish with the Sullivans. Each time he should be present in a different tone. This is excellent practice in increasing the pitch range of the voice, and too much stress cannot be placed upon the acquisition of proper technique in hearing.

Chapter 1

AT THE THEATRE:

To Boo or Not to Boo?

When to boo is taboo has been the source of embarrassment to many students, as well as a few sophomores. Campus custom decrees the following occasions as when those who know boo:

New Yorkers, at any mention of Chicago;
Chicagoans, at any mention of New York;
On mention of DeKalb County Jail;
Everyone, at pictures of prohibition agents;
Everyone at appearance of Wayward Rose;
Everyone, when authorized villains appear;
Everyone, when authorized heroes appear;
Everyone when "Glory, Glory to Ole Georgia" is played;
(Heroines may be cheered if they are comely*).

Everyone is to boo at the final clinch;
Everyone at showing of Washington Seminary Fashion show models, etc.
Everyone is to boo at any hard ridin' or hard shootin';
Incidental information: (free of charge).
Everyone must yell "what tha hell" when the reel breaks; must rise and cheer when "Ramblin' Wreck" is played; must rise at least three minutes before the end of the picture; must say "Ah-h-h!" when liquor is shown, or when a Packard or a beautiful woman appears on the screen.

Chapter 13—(Continued)

FROM TEN ON

OR

“A FEW TIPS ON DANCE ETIQUETTE”

How to ask a girl to dance:
Such time-worn phrases as "Dense?" "Canaf Nex Dance?" and "Howbout thissun?" are going out. In O'Keefe's better social groups, the femmes are adopting the jerking of the head as sufficient evidence that the male of the species has asked, while the acceptance is couched in the mumbled "Uh-huh," which interpreted in any language means "Yes."

(Except in Helligolian, where their Websters define "Uh-huh" as an age-old brandy made from T-bones and goose livers.)

How to answer roll call:
There is only one thing to remember concerning roll call. Students must cooperate with one another. Each student should begin to answer a half dozen names ahead of his own, and continue to respond to three or four after his has been called. For example, a man by the name of O’Brien should commence answering for the Murphys and finish with the Sullivans. Each time he should be present in a different tone. Georgia School of Technology

"A TECHNICAL SCHOOL WITH A NATIONAL REPUTATION"

THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of ability and ambition a training which will fit them for positions of responsibility and power. The national reputation of this institution is based not on claims, but on results. Its greatest asset is the record which its alumni are making in the productive work of the world. Georgia Tech graduates succeed because they have been trained both to think scientifically and to work efficiently.

Coast Artillery, Signal Corps, Infantry and Ordnance Units of the R. O. T. C., also Naval R. O. T. C.

Georgia School of Technology
ATLANTA GEORGIA

Etiquette -- continued

When being introduced to a girl,
(a) whom you think is a mess;
(b) whom you are expected to dance with,
bring both the heels together, place hand on your stomach, bow at a 90-degree angle, sing "Howdy!" and dance.

Chapter 7-11
PARLIAMENTARY RULES FOR THE CAMPUS CLUB MEETING

The meeting opens when the president upsets the water-pitcher over the vice-president, the secretary and the treasurer. All the members of the club except those in the three back rows rise and sing, forming a tableau around the treasurer. They sing: "Have a Little Faith in Me." As the final note dies away, the president swinging from the chandeliers, bellow, "Any new business, any old business, any monkey business, any kind of business?" As he waits for an answer, the trustees of the club stand guard in front of him with drawn pistols ready to fire if anyone speaks.

Chapter 8/30
INSTRUCTIONS FOR ROOM GUESTS

1. If you don't like the sketch in the corner, don't laugh—it may be Clara Bow. (***)
2. The blanket on the wall does not look better on the bed; nor does the one on the bed look well on the wall.
3. If the photographs don't please you, remember: they're only your family.
4. Borrow my cigarettes, break my lighter, scratch my stubbies on the locker, use my stationery, take my stamps, read my letters, kick my floor at our Scholarship dances is another thing. Consisting as it does of the potential robbers and robbees, they (the deposits) are due a certain amount of courtesy: they should not be thrown out of the hall, but that is about the only restriction.

Chapter 21
INTRODUCTIONS

How to introduce your Dean to an ex-S. A. C. chairman, the orchestra at the freshman frolic, a Glee Club tenor, a Luckie-Street car conductor, an English corrector, the oboe player in the band, the band director and the treasurer of the Cotillion Club:

"Dean, meet the boys!"

What to say when introduced to the rector, a scholastic editor or the janitor of freshman hall:

"Whatcha say?"

"... the informal introduction"

Forms of salutation on campus:

Dr. Brittin: "Good Morning, Young Gentlemen."

Dr. Perry: "How do you do?"

Hoot Gibson: "Howdy!"

Sophomore: "Howya goin'?

Cocky Freshman: "How bout cha?"

Senior: "Ugh!?"

Freshman: """
Etiquette -- continued

sons to assist you this is perhaps the best plan. The procedure is as follows:
Secure a hammer for each person boarding.
Secure twenty-pence worth of nails.
Secure boards.
Secure a street car.
Then using hammer and nails, secure boards to street car.

... how to board a street car

The second method of boarding a car is more expensive, but is a truly charming bit of de-
meanor. First look up all the better hotels and restaurants in the city classified directory. Then
get bids from all these catering firms. Now all you have to do is to accept the best offer, and the
restaurant will be glad to give the street car its
board three times a day for a nominal considera-
tion.

The third method is to wait for a car. When,
and if, one stops, hop on and immediately say to
the conductor, “Nice weather we’re having.” He
will invariably reply, “Fare, just fare.” Then
you must laugh, and laugh, and laugh at his pun
until he forgets to collect your token. If you
follow these instructions you can always board a
car without becoming bored yourself. (Thou
Shalt Not Kill.)

Chapter MCCXLV
TAKING CARE AT TABLE
How to regain possession of a fork:
The question of whether or not to call a waiter
to pick up a fork has baffled many of the better
people, including Ghunga Din. A little advice
regarding lost forks will therefore be included
herein. In the first place, it is best not to drop
the fork, unless you are doing so to see whether
your host or hostess will drop his or her fork
also in order that he or she may make you feel
right at home. But if you do drop the fork, you
still have two methods of regaining it. A fork
on the floor signifies that you’re gonna have com-
pany. You’re gonna have company! You gotta

FRATERNITY JEWELRY
—AT—
MUSE’S

Since this last method may take days and days to be completed, there is a scheme devised by the faster set to speed up the procedure. When the fork is lying on the floor, tap the front of it with the toe of your left foot. This will cause it (the fork, my dear public) to fly into the air. You can then catch it with your right hand and you are all ready to start pitching again. With a little practice you will be able to get so excruciatingly cunning that you need not miss a mouthful.

How to take olives:
If you can’t memorize the verse, you had best develop a strong dislike for the olives, and then hang around the La Salle instead. (And when the airplane motor stops, it will be exactly twenty-three and one-half minutes past twelve o’clock, Virginia time).

Chapter 8—****
FRATERNITY PINS
How to keep a Fraternity pin:
1. Make your date wear boxing gloves.
2. Place the pin in a deposit box at the nearest Federal Reserve Bank.

3. Wear a double breasted coat.
4. Give the girl up.
5. Get married.
6. Don’t buy a pin in the first place.

* Definition on receipt of self-addressed envelope.
** To boo or not to boo—This allusion is to Keats’ “Ode to a Chimney Sweep,” Chap. II, Verses 91-31.
*** Safety deposit—in 1914, the Ludowici (Ga.) Trust Co. had securities of $30,000,000.
**** Clara Bow—not to be confused with Ho-Bo, the Chinese taxidermist, or Yeah-Bo the battle cry of the Afghistanese.
***** Chapter 87—not to be confused with Chapter 78.
****** Date—Latin “datum” meaning “having been given.”

The End.

Frat Man (pricing wristwatches): "Fifty dollars, you say? How much is it without the gold band?"

Clerk (anxious to make sale): "Forty-nine dollars and ninety cents—only ten cents difference."

Pauper: "Very well, then. Here's a dime. I just wanted the band."

* * *

"There, I fooled you," said the newly-wed as he climbed into the upper berth.

Mountaineer to three-year-old son: "Ezry, quit pointin' that thar gun at your little brother. Hit might go off and kill one of them chickens he's playin' with."

She: "Mother said if you tried to kiss me I should call her."
He: "You mean if I should try to kiss you, Mother left word to be called."
She: "Exactly."
He (puzzled): "Whans matter? Don't you have an ice man?"

Chicago, Illinois

Every Molloy Made
Cover bears this trade mark on the back lid.
Where can a man buy a cap for his knee?
Or a key to the lock of his hair?
Can his eyes be called an academy
Because there are pupils there?
What gems are found in the crown of his head?
What travels the bridge of his nose?
Can he use, when shingling the roof of his house
The nails on the end of his toes?
Can the crook of his elbow be sent to jail?
If so, what did he do?
How can he sharpen his shoulder blades?
I'll be hanged, if I know, do you?
Can he sit in the shade of the palms of his hands?
Or beat on the drum of his ear?
Does the calf of his leg eat the corn
off his toe?
If so, why not grow corn on the ear?

Engineering Achievement

The young Engineers of today are the backbone and brains of our country's advancement.

Realizing the necessity of having trained men in our Research and Development departments, we have gathered together the best men available. We have now a highly trained Technical Staff—devoting their entire time to the Advancement of Textile Machinery.

The name Saco-Lowell comes to the front whenever new developments in textile machinery are discussed. We appreciate fully the responsibilities of our position in this important industry, and are not content to rest on any reputation we may have gained in the past, but rather are continually endeavoring to place before our friends new machinery and ideals that can be of assistance to them in their manufacturing problems.

SACO - LOWELL SHOPS are pioneers and builders in Textile Machinery.

Girl of fashion, when you're tired
Of your fad-chasing:
When your beauty has been fired
By cruel time's racing,
Don't come back when you feel blue.
Your tender passion
Wasted . . . . I've forgotten you—
After a fashion.

ROY LeCRAW, Agent
He: "Why wait till we get home to tell me whether you'll marry me or not?"

She: "I'm scared, this is the very spot where my father proposed to mother."

He: "What about it?"

She: "Well, on the way home, the horse ran away and father was killed."

---

He: "Mother, if I get married when I grow up, will I get a husband like my old man?"

"Why, yes, dear."

"And if I don't get married will I be an old maid like Aunt Susie?"

"Yes, dear."

"Well, all I gotta say is, that it's a pretty tough world for us wimmen, isn't it, mother?"

MODERN AS YOUTH ITSELF!

Within the space of a score of years, the scope of Southwestern Engraving Company has increased from the parent plant in Fort Worth to an organization of nine plants.

Pioneering the field in the introduction of modernistic art, a personal service bureau composed of former college annual editors and managers, the budget and dummy system, and field service men, the name "Southwestern" has become synonymous with art motifs that are distinctive, an understanding, helpful service, and printing plates that "print right."

THE SOUTHWESTERN ENGRAVING COMPANY
FORT WORTH TULSA ATLANTA DALLAS HOUSTON SAN ANTONIO BEAUMONT AMARILLO WICHITA FALLS

Many new staffs turn each year to SWECO'S corps of artists, personalized service, and engraving technicians for fresh ideas, newer layouts, and modern methods in year book production.
Over the Bayou

Brazen witches and stalwart blacks
Stalking the spoon of a spirit's tracks,
Singing shadily, drunk with blood,
Dancing in the sage of the gumbo mud,
Swimming aloud to a mystic note
And leading to slaughter a tethered goat.

(Ok, where would be this grisly black
If there were no moon and the night was black?)

Yellow the moon and clammy with dew,
Green the valley, and dripping, too;
Perfect the spell for un earthly things,
The lousy whip-poor-will brazenly sings:
Mellow the sky and mellow the earth—
Mad with the chaste and the terror of mirth!

("We are the dead of a savage past—
There is no death, but life comes fast!")

The bayou is black in the pit of the vale
And oaks overshadow the singing trail,
As the voodoo altar is Bent, the priest
He utter a wail, and on is the feast?
A dirk gleams brightly, the goat is bled
And the blood is drunk as a dirge is said.

(Like is a chaste—it is mad and gay,
Then breaks the dance of sobering day.)

Sick is the swamp and mud the moon
As he lers and sweats o'er the dismal bagoon;
The turning willows, heavy with mud,
Sweaty to the rhythm of pulsing blood,
Promising day, majestic and suave,
Under the oh no longer a slave!

(Chained with venom of the Golden East,
What would I give to join the feast.)

—LORD KNOCKEMOFF.
Calvin Coolidge, Xenophon O. Pindall (governor of Arkansas), and James Howard Snook, were in a bull session one day.

"I belong to two fraternal orders," said Coolidge, "Phi Gamma Delta and the human race. But burn my drawers, boys, there's some difference.

"I," said Xenophon O., "belong to Kappa Sigma and the human race, but I ain't noticed much difference yet."

"Well," Snook said, "I belong to Beta Theta Pi, but they won't let me join the human race."

Identity of the young lady is withheld, but the memory of her answer lingers on with the instructor of science at a local high school. One of the requirements on a written quiz was "Define a bolt and nut and explain the difference, if any." The girl wrote:

"A bolt is a thing like a stick of hard metal such as iron with a square bunch on one end and a lot of scratching wound around the other end. A nut is similar to the bolt, only just the opposite, being a hole in a little chunk of iron sawed off short with wrinkles around the inside of the hole."

The startled prof. marked that one with a large "A."

IT HAD TO BE GOOD TO GET WHERE IT IS

Jim Tech: This year as a genii, (a quaint East Indian word meaning magician) anyhow, Jim is doing his stuff, conjuring up his impressions of FAMOUS COLLEGES.
He: “Hello, my flame.”
She: “Hello, Hot papa.”

One hour later:
He: “Come here ashes of love, and kiss your cinder.”

Love Through the Ages
At birth—“Isn’t it cunnin’. Looks just like its mother.”
At four—“But muvver, I is in love wif Lena.”
At thirteen—“I’ll Axes everything for my wife and you will too, won’t you?”
Freshman in College—“Say, how about stepping out for a walk in the park?”
Soph Ditto—“Wench, you nerve have me in an uproar.”
Jr. Ditto—“Listen kid, your mother did.”
Sr. Ditto—“Now I know all about it, after you have been at it so long as I have—we, just one more—”
Tired Business Man—“What do you think I’m paying you for anyway—that’s better.”

The Grain of Our Spinning Rings contributes to Their Smoothness

Because the grain runs the same way that the travelers run, we are able to give you the utmost smoothness in “Diamond Finish” Spinning Rings. This is NOT a small or insignificant point; extra smoothness means a lot during years of wear from millions of revolutions of the travelers.

Whitinsville (Mass.)
Spinning Ring Co.
Devoted to Making Diamond Finish Spinning and Twister Rings Since 1873

Portrait of a Sigma Nu Being Stand-Up By His Date.

* * *

Very Tight: “Sweetheart, I love you, I adore you, I can’t live without you.”
She: “Well, I think we can arrange that, darling.”

Very Tight: “Oh, that’ll be wonderful.”
She: “Sober up, fellow, I’m your wife.”

This shows how the grain of the steel runs in “Diamond Finish” Spinning Rings, because the grain of the steel runs in spinning rings punched out of a flat bar of steel.
She: "You certainly have a filthy mind."
He: "You would, too, if you didn’t change
it so often."

[AUTHOR’S NOTE:—An innovation in English prosody is Analyzed Rhyme—a simple invention brought into use and cleverly utilized by Frank Kendon in Great Britain but given little or no notice (save a meager essay by Edward Davison and a notice in America. This unique method of departing from true rhyme seems to present a new sphere in poetic development which is far more satisfying to the “conservatives” than the lamented Miss Lowell’s “Polyphonic Prose.” In the following specimen (a technical essay in Analyzed Rhyme) it should not require a mathematician to solve the method used.]

Comes all too soon
The morning tide;
Old thoughts resign
To newer mood.

When darkness fell
I knew the road;
From pit to pole
The highway led.

Up through the sky
And into space—
Up! Up! Away,
To paradise.

I wandered there
An overlord,
And wept no more
Or even cared.

But this dawn:
I know it well
It rises—then
It swallows all!

Comes all too soon
The morning tide;
Old thoughts resign
To newer mood.

—LORD KNOCKEMOFF.

FORWARD

Today's perfection is beyond the one of past years--behind the one of years to come.

With study and experiment, maintenance of proven processes, vigilance in sales, service and manufacture, we are seeking an Ideal—an Ideal that we move ahead with the progress of our industry.

Thirty years' experience in Annual printing and binding is our background. Our restless urge is ever FORWARD.
