GEORGIA SCHOOL OF TECHNOLOGY
ATLANTA
GEORGIA
To
JOHN W. GRANT
and
THE RETIRING BOARD OF TRUSTEES,
We, the students of Georgia School of Technology officially
dedicate this book.

The Georgia School of Technology from its beginning has been
fortunate in its Trustees. The different men, appointed to this
high position, have been marked by high character, business
ability, and that far-seeing vision that always characterizes states-
manship. Merely to call their names proves this fact, and shows
how much indebted the State is to these gentlemen for their
guardianship. The list of those who served from the foundation
until January 1, 1932, when the new Board of Regents superseded
the Trustees of the various institutions is as follows:

N. E. HARRIS  HARRISON HIGHTOWER
O. S. PORTER  S. M. INMAN
COLUMBUS HEARD  E. R. HODGSON, SR.
W. B. MILES  D. N. SPEER
GEORGE W. PARROTT  GEORGE WINSHIP
N. P. PRATT  WALTER M. KELLEY
E. R. HODGSON, JR.  HAL G. NOWELL
J. S. AKERS  GEORGE J. BALDWIN
GEORGE H. CARSWELL  JOHN W. GRANT
L. W. ROBERT, JR.  JOHN S. COHEN
E. R. BLACK  GEORGE G. CRAWFORD
JOHN H. PORTER  FLOYD FURLOW
G. M. STOUT  W. H. GLENN
JOHN S. COHEN  FRANK FREEMAN
FOREWORD

IT IS HOPED, THAT WITH THE PASSING OF THE YEARS, THIS BOOK WILL BE AN EVER PRESENT REMINDER OF THE DAYS THAT THE READER SPENT UNDER THE ENVIRONMENT OF HIS ALMA MATER. UPON OPENING THIS VOLUME, IF THE READER CAN RECALL THE SCENES AS WE HAVE TRIED TO PORTRAY THEM, OUR EFFORTS WILL HAVE BEEN REWARDED.

CONTENTS

Book One . . . . COLLEGE
Book Two . . . . CLASSES
Book Three . . . . PHOTOGRAVURE
Book Four . . . . FRATERNITIES
Book Five . . . . ATHLETICS
Book Six . . . . ACTIVITIES
Book Seven . . . . EVENING SCHOOL
Book Eight . . . . FEATURES
THEME

MOST APPROPRIATE IS A MECHANICAL THEME FOR A TECHNICAL INSTITUTION. IN PRESENTING THIS BOOK THE ART STAFF HAS INCORPORATED THE SIX FUNDAMENTAL PRINCIPLES OF MECHANICS IN THEIR SIMPLEST FORMS. PROBABLY THE GREATEST DEVELOPMENT IN THIS FIELD, TRANSPORTATION, HAS BEEN SELECTED BECAUSE IT DEPICTS THE TRUE SPIRIT OF MECHANICS AND TYPIFIES THE UNFOLDING OF NEW METHODS AS THE NEED ARISES. THUS THE GROWTH OF TRANSPORTATION IS PORTRAYED AS AN INTRODUCTION TO THE FOLLOWING BOOKS.
IN PUSHING THEIR WAYS ACROSS THE ROLLING PRAIRIES OF THE GOLDEN WEST, OUR FOREFATHERS' ONLY MEANS OF TRANSPORTATION WERE SELF-MADE, SELF-PILOTED COVERED WAGONS.
CAMPUS VIEWS
IN MEMORIAM
JOSEPH DAUGHTRY RHODES
died March 31, 1932, a cherished friend of every student of the Georgia School of Technology

KENNETH GORDON MATHESON, M.A., LL.D., Sc.D.
died November 29, 1931, Bryn Mawr, Pennsylvania, third President of the Georgia School of Technology, 1906 to 1922
SIDNEY PERKS

February 19, 1932

A. M. WHITEHURST
April 21, 1913
March 13, 1932
A MEMBER of our new State Board of Regents recently referred in terms of praise to the definite, purposeful aim and work of the students of the Georgia School of Technology. It is certainly true that there has been some uncertainty with regard to the curricula of other institutions, but none here. You, members of the class of 1932, have received careful and specific training for the work you propose to do in life. From Architecture to our newest department of Aeronautics, you have known what you want, and I believe that this same clear perception throughout the future will crown your labors with success and make your Alma Mater feel the same pride in you as in those forceful men who have gone from this institution in other years.

M. L. Brittain
REGISTRAR AND SECRETARY OF THE FACULTY

As officer of admissions, the Registrar passes on all applications and certificates of prospective students. His office receives and records in permanent form the scholastic standing of all students, and makes reports to the Faculty of those who are entitled to graduation. Thousands of reports are made annually, not only to parents and school principals, but also to other colleges which former students may wish to enter or to employers with whom they may be seeking positions.

This office is responsible also for certifying to the eligibility of each student who participates in inter-collegiate athletics. The Registrar's other duties include serving as Secretary of the Faculty and of several of its most important Committees.

Hugh Harris Caldwell
A.B.
Registrar and Secretary

DEAN WILLIAM VERNON SKILES

TREASURER

The office of the Treasurer combines the various business activities of the school together with the duties and responsibilities of all financial transactions. The Treasurer is appointed by the Board of Regents and acts as their agent. He is also Property Custodian and Purchasing Agent and is charged with the duties of collecting and disbursing all funds. The present Treasurer endeavors to conduct his office in such a manner as to promote friendly relations with everybody while at the same time maintaining financial integrity.

Frank King Houston
C.P.A.
Treasurer
THE DEPARTMENT OF CHEMISTRY

THE Department of Chemistry serves the School in several capacities. In the first place courses are offered in General Chemistry required of all engineering students, as Freshmen. Also, for those who elect Textile and Ceramic courses, additional advanced studies in Chemistry are given. Metallurgy is given to several of the engineering groups. A degree is offered in Chemical Engineering for which we have acquired laboratory and equipment facilities for fundamental studies in that specialty. The purpose of the Mathematics Department is to serve the student in this important twofold capacity for each degree course at Tech.

Gilbert Hillhouse Boggs
P.D.
Head of Department of Chemistry

THE DEPARTMENT OF CIVIL ENGINEERING

YEARS ago there were no engineers except those in military service. As citizens, not connected with the army, began to do engineering work they were called civil engineers to distinguish them from the army engineers, thus originating the title "Civil Engineer."

This field of engineering is so broad that no one can become expert in all its branches. It is the engineering of construction and building and comprises several divisions. There is the Railroad Engineer, the Structural Engineer, the Sanitary Engineer, the Hydraulic Engineer, and the Highway Engineer.

The Georgia School of Technology, in her course in Civil Engineering, joins with a basic training in mathematics and the sciences, fundamental training in all these divisions, thereby turning out graduates well equipped to handle work in any of them.

Thomas William Noel
M.B.A., C.P.A.
Head of the School of Commerce

THE SCHOOL OF COMMERCE

THE numerical growth of the Schools of Commerce has been the educational phenomenon of the past three decades. It is indeed heartening to find that the scholastic growth and development has kept pace with the numerical growth.

During the first decade the Schools of Commerce were compelled to devote most of their curriculum to the teaching of the "tool" subjects of bookkeeping, stenography, typewriting and penmanship. During the second decade an attempt was made to expand the curriculum to include the teaching of business principles as exemplified in the business practices of that period.

During the present decade the Schools of Commerce have assumed a leadership and they are today attempting to formulate and transmit business ethics and principles rather than to follow the present business practices.
THE CO-OPERATIVE DEPARTMENT

THE Co-operative Department offers engineering and commercial practice experience, at intervals, with large companies throughout the Southeast, thus giving a distinctive characteristic to the Co-operative Courses. During these trying days of unemployment and bad economic conditions the Co-op graduate, by reason of his having served his apprenticeship period, should be in more demand than the graduate who has had no practical experience.

Another distinctive characteristic to the Department is the rigid requirement both on the admission of applicants and on the scholastic standing of those students who have already been admitted. Only applicants who have high averages and only students who can maintain good grades in class may pursue the Co-operative Courses.

JAMES ERSKINE MCDANIEL
M.A., LL.B.
Director of the Co-Operative Department

THE DEPARTMENT OF ELECTRICAL ENGINEERING

THE Department of Electrical Engineering was established in 1896. In 1900 the Legislature appropriated $10,000 to be used toward the construction of the Electrical Building, provided the President and Board of Trustees raised $25,000 for the same purpose. This condition was promptly complied with. At that time there were only five other buildings on the campus: Academic, Shop, Knowles, Textile, and Swann.

At present, the second floor of the building is used for electrical laboratory work, while the third floor is used for class rooms.

THOMAS WITT FITZGERALD
M.E., E.E., M.S.
Head of the Department of Electrical Engineering

THE DEPARTMENT OF MECHANICAL ENGINEERING

WE believe that employers consider the following points in the selection of young Mechanical Engineers. Honesty is placed first, then ability and definiteness of purpose. They want them to have a mind trained to assimilate new ideas and to arrive at correct conclusions from given facts; to have the ability to express their ideas on paper in good English and to express ideas in public if need be; the ability to mix with their fellow-men; and a knowledge of organization and administration.

In addition to the above the young engineer is expected to have a sound general and technical education which forms the basis of Mechanical Engineering.

ROY STEVENSON KING
M.E., Sc.D.
Head of the Department of Mechanical Engineering

THE A. FRENCH TEXTILE SCHOOL

THE textile industry is one of the oldest in the world and one of the most necessary, as it supplies one of man's fundamental needs, clothing. The past twenty years have seen a remarkable growth in this industry in the South, so that now it far outnumbers the East in mills and in spindles.

The Textile Department at Georgia Tech was the first established in the South, and during a period of over thirty years it has built up a reputation for good work.

The course, leading to the degree of Bachelor of Science in Textile Engineering, gives a foundation in the basic engineering principles, with a very thorough study of the raw materials, processes, and machines peculiar to textile manufacturing. All work is the same until the Senior year, when the student may take one of several options offered, and thus specialize in the work in which he is most interested.

HIBBARD SPENCER BUSBY
B.S., M.E.
Director of the A. French Textile School
SUMMER SCHOOL

THE thirty-sixth session of the Summer School will begin July 18, 1932. This School was instituted for the purpose of preparing boys for entrance and continued that function for many years, but the increase in the number and the proficiency of the high schools have reduced the preparatory work to a minor roll. At the present time the chief function is to render assistance in college work for three classes of students: Those who are behind in their work; those who come here from other colleges and have not had subjects included in their courses; and those who wish to do advanced work in order to finish earlier or more easily.

ALLAN BENTON MORTON
M.A., Sc.D.
Dean of Summer School

THE DEPARTMENT OF ARCHITECTURE

THE Department of Architecture, with an enrollment of one hundred and twenty-five students, is probably the largest school in the South offering the straight architectural course. The normal number of graduates is about eighteen, but this year, 1932, thirty men are receiving degrees, the largest class on record.

Georgia Tech is a member of the Association of Collegiate Schools of Architecture and is accredited by the American Institute of Architects. Individual examples of student work have from time to time received high awards from the Beaux Arts Institute of Design in judgments held in New York in competition with the work of other architectural schools throughout the country.

HAROLD BUSH-BROWN
M.Arch.
Head of the Department of Architecture

THE DEPARTMENT OF CERAMICS

THE ceramic or clay working industry is an old, old industry. Its development and growth have been parallel to that of mankind itself. Imagine life today without tableware, glass, brick, sanitary ware, pottery, and a host of other equally important ceramic products! Of all Nature's resources, clay and earthy minerals, the basis of clay wares, are among those most indispensable to man.

Georgia, fortunately, has within its borders a wide variety of clays and ceramic materials. To make the most practical use of these resources, and to train men in the art of clay working, are the objects of the Department of Ceramics.

ARTHUR VAN HENRY
Cer.E., Ph.D.
Head of the Department of Ceramic Engineering

THE DEPARTMENT OF AERONAUTICS

THE work of the Daniel Guggenheim School of Aeronautics includes both teaching and research. An undergraduate course is offered leading to the degree of Bachelor of Science in Aeronautical Engineering. The first two years of this course are practically identical with those of the Mechanical Engineering course and at the beginning of the Junior year a limited number of students is selected to take the aeronautical work. Graduate courses leading to the degree of Master of Science are also offered.

Two wind tunnels have been built to provide the necessary basic apparatus for the research work which, for the present, will be chiefly of an aerodynamic nature. A well-equipped shop under the supervision of an expert mechanic has also been provided for building the models and apparatus used in the research.

MONTGOMERY KNIGHT
B.S. in E.E.
Head of the Department of Aeronautics

WITH THE CONCENTRATION OF POPULATION IN VARIOUS SECTIONS OF THE COUNTRY, A FASTER AND MORE DEPENDABLE MEANS OF TRANSPORT WAS FOUND IN THE LOCOMOTIVE.
Some of the boys seem to be getting a little suction with the members of the faculty as may be seen from the upper right hand picture.

Some prominent people and events that took place at Tech this past year. Honor day and the giving out of the President's gold T's.

Mr. Ivan Allen and Ivan, Jr., Dr. J. R. Mott, Mr. Chip Robert, President of Georgia Tech Athletic Association; President Brittain, Uncle Heinie, Mr. Winston Churchill and others.
The navy went Bermuda this summer and here we see them in action. Life on board ship is not very hard according to the pose of Syd Williams and Jack Glenn. Then we have a few snaps of the future admirals only they have been forced to navigate on bicycles.

Some of the snaps showing the army in action at Anniston this summer. Willis Greer seems to be taking life easy and enjoying the horizontal lab, while some of the boys are learning about the ways and means of combating the enemy.

A view of the Armistice day exercises and one of these well-known pass-in-review stunts that the army is so fond of giving.
Ye ole Editor and Business Manager of the Yellow Jacket seem to be enjoying themselves—maybe they made some money this year.

Mr. and Mrs. Williams at the dances this past February—seems as if they are enjoying themselves at any rate.

Some snaps of the various sports that may be seen during the early spring. Then some famous men, including Mike Chambers and Tubby Walton, not to mention Roosevelt the handy man. A snap of the stadium when it is not in use completes the round.
It seems as if the May Queen was elected in due form although military order had to be enforced in doing so, at least from the looks of the defenders of the ballot box.

Just a bit of fun in the life of an electrical engineer would be a fitting caption for the initiation that is being held by the boys carrying the telegraph poles around.

The time-honored custom of warming up applies to more than one place as well as the throwing of eggs at some one other than Rudy Vallee, in the annual May Day exercises.
BOOK
FOUR

FRATERNITIES
PARALLELING THE RISE OF THE LOCOMOTIVE OVER MORE PRIMITIVE LAND METHODS, SO HAS THE STEAMSHIP COME TO TAKE THE PLACE OF THE WINDJAMMER.
**INTER-FRATERNITY COUNCIL**

THE BASKET-BALL team under Coach Mundorf's leadership has become one of the leaders in Southern Basket-ball. Although being eliminated in the first round of the conference this year they had the honor of defeating some of the most outstanding teams in the South.

COACH WILLIAM A. ALEXANDER

COACH ROY MUNDORF
Basket-ball

HEAD COACHES

IN Coach Alex, Georgia Tech has one of the most outstanding men in Southern Football. We are indeed fortunate in having such a man to direct our athletics.

Due to Coach Alex's efforts the Southern Conference Track Meet was held here this year.

COACH ED HAMM
Track

HEAD COACHES

AFTER a very good season last year on the track, Coach Hamm brings us another fine track team. Although not as experienced as some of the other coaches, he has worked wonders for the squad.

COACH BOBBY DODD
Baseball

COACH BOBBY DODD has taken over the baseball team this year and although most of the best material has turned pro Bobby is doing very well. Bobby comes to us from the University of Tennessee.
Instead, the Yellow Jackets took early larrupings, got up grinning, asked for more, got it and finally hit a winning stride. They played themselves absolutely "out" physically in every game of a schedule that would have pressed the best team Tech ever had to win, yet every Saturday they gave the opposition fits. So gallant was their play against odds, that the Atlanta press hailed them as heroes even in defeat. And the Tech student body rallying loyally around them supported the team with a spirit rarely equalled from Carnegie Tech and got out creditably with a 13 to 0 defeat. They took a severe physical pummeling in this game and here came old Auburn with the best team the Plainsmen have had in many a year. Auburn won 13 to 0 and deserved the victory. The Tech folks could not complain.

There followed an invasion of New Orleans where Tulane, the coming champion, had been waiting. The Yellow Jackets with what later proved an unskilful line and a fair backfield opened with a 25 to 13 victory over a highly regarded eleven from South Carolina. Over-confidence seemed to grip the visiting firemen and the Yellow Jackets had no illusions at all. It was a heartening victory.

Then the Engineers waded into a powerful team...
And the Yellow Jackets limped back home to take a
terrific pasting from a Vanderbilt eleven, 49 to 7.

At that stage of the campaign it appeared uncer-
tain whether the squad could finish the season or not.
They were punch-drunk from a series of games that
would have staggered nearly any outfit in the Con-
ference.

Yet somehow the squad was rallied and keyed up
once more. And up in Chapel Hill they tied the
Tarheels of North Carolina 19-19 in a game that they
might easily have won with a break or two in their
favor. It was encouraging. The lads seemed to
have found themselves.

They invaded Philadelphia the next Saturday and
to the amazement of all their supporters played Penn-
sylvania off their feet and yet lost 13 to 12. That
was enough to have discouraged any club but this one.

They came home and beat Florida 23 to 0. These
same Gators had beaten Tech something like
55 to 7 the year before and the revenge was ample. Then
the Yellow Jackets went to work for Georgia.

Doped to lose by seven or eight touchdowns and
with a big crowd out expecting the worst, the Yellow
Jackets permitted an early touchdown by the Bears,
then rallied and scored one themselves.

And for three quarters of that game they battled
the Bears on equal terms and with a few minutes to
play its best game of the season against the old
enemy from Atlanta. The Bulldogs were letter per-
fect that day and scored five touchdowns while the
Engineers were floundering. Toward dark the Yel-
low Jackets pulled themselves together and forward
passed their way down the field to a lone counter to
save a shut out and make the final score 35 to 7.

What the Engineers needed most of all was a rest
it seemed. They had taken more punishment on the
practice field and in games than any team could
stand. They had their rest and then resumed train-
ing for the invasion of the University of California,
December 26.

Doped to lose by seven or eight touchdowns and
with a big crowd out expecting the worst, the Yellow
Jackets permitted an early touchdown by the Bears,
then rallied and scored one themselves.

And for three quarters of that game they battled
the Bears on equal terms and with a few minutes to
play the score was California 7, Tech 6. At last the
strength of the Engineers gave out. They had played
Tech subs were sent to relieve worn-out regulars, the Bears pushed over two quick touchdowns to win 20 to 6. That game, however, stamped the Yellow Jackets as a real team. They had learned their football in a hard school. And they will come back in the fall with nearly the whole team that played against California ready to go with more confidence than ever. Their schedule is tough, but they will have a better record at the finish as sure as shooting.

Varsity letters were awarded men who played 100 minutes or more. The awards went to Captain Neb...
A LARGE part of the success of the football team depends on a group of hard-working boys which is never heard of except in the roll of scrubs. It is this part of the team that the Varsity has to depend on for experience against the opposing teams' plays. Each week a new set of plays are turned over to them to learn and each week they are tried out against the Varsity.

This group of boys never gets the publicity that it deserves and for this reason we hope that in the near future they will get their just reward and be recognized as an integral part of the team.

The freshman team this year had about a fifty-fifty break as far as the games go. Although they were defeated in three out of the five games played they had some fine material to send up to the Varsity squad this spring.

In the game with Monroe A. and M. they were defeated in the biggest upset of the year, the score being Monroe A. and M. 6, Tech 0. This was the first time in the past seven years that this has happened. However after this defeat they came back to beat the Furman freshmen by the score of 20-12 on October 24.

In the next game which the baby Jackets played down at Florida they were defeated very badly by the Gators to the tune of 25 to 0. This was due to a shift in the regular line-up and to the fact that the boys were on their first trip from home.

The next game that was played was at South Georgia State College and the results were very favorable for the freshmen, they won this game by the safe margin of 20-7.

In the final game of the year which was played on Thanksgiving Day was against the Georgia Bullpups and they were defeated by the score of 20-7.

The Freshmen that showed up the best during the season were Dean, Williams, Susong, Shaw, Wilcox, Swift, Sacket, Ro'erts, Phillips, Thompson, Perkerson, and Morris.
BASEBALL
THE YEAR 1931 marked the beginning of the Dixie College League composed of Mercer, Florida, Oglethorpe, Auburn, Georgia, and Georgia Tech.

Georgia Tech's pre-season games began with three seven-inning contests with the Reading, Pennsylvania, team of the International League. The professionals' smooth-working team was a little too good for the Jackets who were defeated in all three games. In their next attempt Tech split a two-game series with South Carolina.

The initial game of the League schedule was played with the Mercer Bears in Macon. The Bears copped the opener with a score of nine to seven but Clay's proteges came back with a bang the next day and routed the Maconites taking the game to the tune of thirteen to one.

After a day's rest, the Tech Squad joined battle again with the Mercerites who came to Atlanta eager for the fray. The visitors' hopes were dampened somewhat when a hard-hitting Tech team took the first game with a score of seven to three. Mercer's hopes were completely smashed in the second game when the Denizens of the Flats overcame them with ten runs to their seven.

Florida was the next guest in the Jacket lair. They were welcomed at Rose Bowl Field with an eight-to-four defeat administered by a smooth-playing Tech nine. The Gators were revived sufficiently by the next day though to nose out the home team four-to-three.

Auburn, the most potential threat in the League, was met next on Rose Bowl Field. The Plainsmen were unable to advance against the barrage laid down by the Tech batsmen in the first game and were left at the short end of an eleven-to-seven score. The Tigers became incensed and brought their own heavy artillery for the second encounter, besting the Jackets by a margin of thirteen to eight.

As May brought in warmer weather, the Jackets trekked to Athens for the first two of their annual four games with Georgia. The wearers of the White and Gold lent joy to the Athenians' Homecoming by bowing to them in a game that was so hard-fought...
it seemed a tragedy to lose by the margin of a single run. The Tech nine refused to be awed by the galaxies on the second day and evened the count by winning with a five-to-three score.

The Yellow Jackets then returned to Atlanta for a few days training in preparation for an encounter with the Petrels. The first game of the Oglethorpe series was rained out, but for the second game the sun beamed down on Hermance Field with such force that the ground steamed. The Petrels were determined not to be shamed on their home lot so, in spite of valiant efforts, the Tech team was unable to tally more than five runs while Oglethorpe sent eight men across the plate.

On the Techsters' trip to the "Loveliest Village of the Plains," the first game was again halted by rain. The Tech Squad was unable to get under way in the second game, the result being that they were blanked by the powerful Plainsmen team.

Tech supporters began to lose heart when Georgia shut out the White and Gold in the first game of the last series of the season. They were not long in the vale of shadows, though, for the Jackets scored eleven runs in the last game to defeat the Bulldogs decisively.

Although Tech finished the season with her average slightly below five hundred percent, it was a hard-played schedule, furnishing a great deal of experience to the players who were developed on this team are now making good in professional circles. Notable among these are McKee and Farmer who advanced to the Cracker staff.

Freshman Squad
THE BASKETEERS of Coach Roy Mundorf completed a fairly successful season, winning seven out of twelve scheduled games. Team work was the outstanding achievement. The pass-work was excellent, and the defense of the Jackets clicked continuously.

The offense was led by Bill Perkins, rangy center, and Hugh Gooding, a most versatile forward. Perkins, although not reaching his high-point record of last year, shot baskets from any position. Gooding, with his accurate pass-work, fed the ball to his teammates and contributed many points himself.

Jimmy Slocum, sophomore forward, distinguished himself with his passing and in Macon, Mercer handed them a heartbreaking one-point defeat.

The team then returned to Atlanta where the boys were victorious over the Grayson Athletic Club and Georgia. In Birmingham, Alabama was the winner. The Jackets then met Auburn in Atlanta and were victors this time.

In Athens, Georgia was too tough for the basketeers, and the boys returned to Atlanta. Florida fell first, and then Georgia, the ancient rival, met defeat. This made it two out of three for the Jackets in the Georgia series.

In the S. I. C. tournament, Tech lost the first game, a hard-fought battle, to L. S. U.

DESPITE a bad beginning the Tech Freshmen completed a good season under the able leadership of Coach Bobby Dodd. Although this was Coach Dodd's first year as coach of the Freshman team he developed several fine players who are expected to add greatly to the strength of the Varsity next year. Among these are: Glenn, Woodall, Crawford, Phillips and Wilcox.

The Jacket yearlings lost their first game of the season to Tech High of Atlanta, Crawford being the bright star for the Frosh, scoring 13 of his team's points.

The Tech Freshmen avenged this by defeating Commercial High of Atlanta, 29 to 21. Next the Freshmen defeated Boys' High of Atlanta, 26 to 15. In this game Woodall led the Baby Jackets attack and was high-point man of the game.

The Tech Freshmen lost their second game of the year to Decatur High in a closely fought game with Decatur on the top of a 23 to 19 score.

The Freshmen then journeyed over to Athens and in a thrilling game overcame the Georgia Freshmen by shooting a field goal in a last minute rally to defeat them 25 to 23. Glenn proved to be the shining light of Tech Freshmen's offense, accounting for 9 points. He was ably assisted by Gibson and Woodall.

The Marietta Athletic Club proved to be too strong for the Freshmen and defeated them by a score of 30 to 27 in a closely fought game played in Marietta.

Peacock School was easily defeated by Baby Jackets to the tune of 55 to 17.

LaGrange High was beaten by the Freshmen and a victory over Lanier High followed this. Canton High was easily defeated in Canton and also in the return engagement played in Atlanta. G. M. A. was barely defeated by a 16 to 15 score.

The next game was with the Georgia Freshmen in Atlanta where the Tech Freshmen defeated them by the decisive score of 37 to 17.

As a climax to the season the Freshmen journeyed to Newnan where they defeated the Newnan Athletic Club and the Newnan High School in a double-header.

The shooting of Woodall and Crawford was outstanding throughout the season, and the defensive work of Glenn and Wilcox stood out in every game. Gibson starred in practically every game with his floor-work and defensive play. Orr shows promise of becoming one of the best centers in the South. Phillips, Hammond, Johnson and Burnett also played good when called upon.
1931 TRACK

NINETEEN hundred and thirty-one marked the first year of the Tech Track team under the tutelage of Ed Hamm, former Tech and Olympic star. The season was opened by a meet with Furman University which Tech won by the score of 91 to 35. The following week the team met the strong North Carolina aggregation and was defeated by the score of 89 to 37, which was a great improvement over the previous year’s score. The meet, which was to have been held at Clemson, was called off due to a quarantine in effect at Clemson and, instead, a meet was held with the strong Freshman team. The Varsity won by the score of 82 to 27. Tech took several prominent places in the Southeastern A. A. U. and then on May 2 faced her greatest rival, Georgia. After one of the most exciting meets ever held on Grant Field and in which the outcome was undecided up to the last event, Tech came through with a brilliant victory to the tune of 65 to 61. The season was closed by a meet with Auburn in which the Plainsmen were the victors.

The schedule for 1932 is as follows:
- April 9—Clemson, at Clemson.
- April 16—University of Kentucky, in Atlanta.
- April 23—Southeastern A. A. U., at Tuscaloosa.
- April 30—University of Georgia, in Athens.
- May 7—Auburn, in Atlanta.
- May 20-21—Southern Conference, in Atlanta.

Among the outstanding candidates for the team are:

- Foxhall—Ed is a sure point-getter in both high and low hurdles. His graduation will be a distinct loss to the team whose colors he has carried to victory during the past four years.
- Lafarge—Charlie is a star in the 440 and mile relay and will be hard to replace when it comes to selecting a team for next season.
- Galloway—Charlie carries Tech’s hopes in the 100 and 220. His ability is attested to by the fact that he was the only Tech man to compete in the Indoor meet at Chapel Hill.
- Williams—Herb was a star in the dashes and has added to his laurels by his ability on the low hurdles.
- Graydon—Doug is a star in the javelin throw and is also a good quarter-miler and relay man.
- Cain—Tom tosses the shot and discus for the team and adds many points to the final score by his efforts.
- Gegenheimer—A mainstay in the distance events. He is a Junior and will return next year.
- Gatlin—Gene comes up from the Freshman ranks to take his place as star in the pole vault and javelin throw.
- McCarty—George is the best of a large number of high jump aspirants.
- Spievak—His improvement in the broad jump has been marked in the last year and better things are expected.
Since the track season is not completed we will have to give the results that have been turned in so far.

The season opened with bright prospects for the year and it was with a great deal of pride that we were able to return most of last year's team to active service.

Under the guidance of Coach Hamm the team has had a very good season so far in that they have not lost a meet. The first meet was held at Clemson college and they were defeated very easily to the score of 85-41.

Morgan—Is a most creditable performer in the high hurdle and pole vault events.

Murray—Don who is credited with record-breaking performances has been handicapped by an injured leg.

Yarbrough—Tom is a star 440 man who has been converted into a half-miler.

Other outstanding members of the team include Ben Smith, Frank Wilson, Leonard, Pat Murphy, J. B. Baker, "Foots" Gatewood, Dean Kelley, W. D. McMichael, Edwards, Prater, Ray Miller, Wayne Archer, Bob Wardle and others.

1932 Track

Since the track season is not completed we will have to give the results that have been turned in so far.

The season opened with bright prospects for the year and it was with a great deal of pride that we were able to return most of last year's team to active service.

Under the guidance of Coach Hamm the team has had a very good season so far in that they have not lost a meet. The first meet was held at Clemson college and they were defeated very easily to the score of 85-41.

The next meet was held against Kentucky at Grant field and this meet was about the same as the Clemson meet, the score being the same. Kentucky was crippled in the meet however, by the loss of their star sprinter, Shipwreck Kelley. The track was slow and no records were set, but good times were turned in on all of the sprint events.

Charlie Galloway, the sprint man of the outfit has done a good job of it this year and has won practically all of the meets that he has entered; however, he was closely pushed by another one of Tech's sprint men, Dean Kelley, who has shown up very well this season.

The team travels to Georgia next week to compete with them and it is hoped that they will uphold the record set so far. The week following that, the Jackets meet the boys from Auburn, and the next meet will be the Southern Conference that is to be held in Atlanta.
1932 FRESHMAN TRACK

IT IS during the year spent on the Freshman squad that men get the foundation on which they build future championships. Competition with the Varsity and other Freshman and High School teams aids in developing men for the Varsity teams. During this period of training the Freshmen are under the care of Ed Hamm, former Tech star, Olympic and World's champion in the Running Broad Jump. Assisting Coach Hamm and having direct charge of all distance men is George Griffin, another former Tech star and now Assistant to the Dean of Men.

Among those who show promise of making the 1932 Freshman team a winner are: Hunnicutt, Tufts, Huguley, Kirkpatrick, Davenport, Cunningham, Braswell, Seay, Busbee, Dean, York, Moore, Smith, Anderson, and Brittain.

The schedule for 1932 is as follows:
- April 13—Tech High, Boys' High and Georgia Military Academy.
- April 16—Boys' High School.
- April 23—Southeastern A. A. U. in Tuscaloosa.
- April 30—University of Georgia Freshmen.
- May 3—Tech High School.
- May 7—Auburn Freshmen.

CROSS-COUNTRY

SHOWING marked improvement over the form shown in the past three or four years the Cross-Country team under the leadership of Captain Gegenheimer passed through a successful season during the past fall.

The first meet of the season was lost to Tennessee by 2 points, the score being 35 to 37. The next meet with Auburn who had shut Tech out the year before was won by the score of 17 to 30. Following this was the race with Georgia which Tech won 27 to 28.

The only disappointment of the season came during the Conference meet in which several unfortunate happenings robbed the team of its main strength and effectiveness. One man was placed on probation just before leaving for North Carolina and another was taken ill the day of arrival and could not give his best. The team finished sixth.

The Freshmen also passed through a winning season. Boys' High and Tech High were defeated in dual meets and the Freshmen were winners in a three-cornered meet with Georgia freshmen and Boys' High.
THE improvement shown by the tennis team of 1932 over that of 1931 has been nothing short of remarkable. In 1931 every match but one was lost. With return of all of last year’s men and with the addition of three new men, Maynard, Morgan and West, the three intercollegiate matches played so far this year have been won. Florida was defeated 6 to 1, Alabama 5 to 1, the first match that Alabama has lost in three years, and Georgia 4 to 2. All of these teams defeated Tech in 1931.

Matches left to be played are with Auburn, Furman, Maryville, Chattanooga, Tennessee, Suwanee, and Vanderbilt.

Captain Jack Conniff has proven his worth as a leader and indications are that Tech will end the season with a very good record.

The main strength of the team lies in its all-around ability, no one man being outstanding.

Following is the Varsity Squad: Conniff, Captain West, Morgan, Maynard, Jackson, Robertson, Pindar, Rivers, Brine and McGinty.

In the two Freshman matches played up to this writing, the Freshmen have returned victorious. Malcolm Keiser, old Tech High player, is captain and Billy Reese, Atlanta and Georgia State champion, is No. 1. The other members of the team are: Crawford No. 2, Glenn No. 4 and Holcomb No. 5. Others on the squad are Arrington, Johnson, Reid and Hemrick.

THE Georgia Tech Golf Team enjoyed a fifty-fifty season during 1931, winning four matches and losing four. The defeated teams held the rivals of Tech which added to its delight, those being Emory, Georgia, Alabama and Davidson. The defeats were at the hands of Florida, Tulane, Duke and North Carolina. In the tournament at Athens the team took fifth place, while Captain Hudson went on to win the first flight consolation.

Brown, Dannals, Harris, Ridley
SWIMMING

AGAIN Georgia Tech's Golden Tornado Swimming Team turned in a record of which we should all be proud. By virtue of their overwhelming defeats of Emory, Georgia and Florida, they again copped the Southern Conference Championship and set a new record for Southern collegiate swimming by bringing their total number of wins to thirteen in as many starts.

Beginning the season under great difficulties when Williams, Wagner and Kennickell, three of last year's stars, were lost from the squad, Coach Kenneth Thrash moulded a very formidable team from the coming sophomores and the few returning veterans of last year. They opened the season by swamping Emory 55 to 20, and not content with administering our friends from the Coca-Cola school their first defeat, ran rampage over our ancient rivals from Athens by the equally impressive score of 59 to 24. Following the Georgia meet, the State meet was entered, and, when the water stopped splashing and the final check-up was made, Tech had almost twice as many points as their nearest rival. Desirous of new fields to conquer, and tiring of the warm waters of the Athletic Club pool, the tankmen trekked to Gainesville in order to meet the mermen from the University of Florida. Tech was pushed hard in this meet, but emerged victor by the score of 52 to 32, thereby closing a very successful season for the wearers of the Gold and White.

To pick an outstanding man would be out of the question but special credit should be given where credit is due. Ed (Fish) Fain, captain of the team and champion in the 220-yard event, did exceptionally well and deserves special mention. "Snowball" Stover, captain-elect for next year, was high-point man for the year and shows promise of developing into something real big next year. Others showing up well and winning letters were: C. Ingle, Young, J. Ingle, Patton, Gowan, Hurst, Terrell, Brown and Austin.

BOXING

SINCE the appearance on the campus in 1930 boxing has enjoyed a steady growth. The boys have taken more interest in this particular sport than any other and it is hoped that in the next few years the school authorities will permit intercollegiate competition. This year two members of the squad were allowed to compete in the Southern Conference and in the National A. A. U. meet held in New York. These two men were Elmo Fryer and Quint Adams. Due to a bad ear Fryer had to default in the semifinals, but he is expected to go to the Olympics this summer.

Those men going to the final round in the competitive tournament this spring were: Norris Dean, who defeated Tarzan Lackey in the heavy weight division; Adams, who defended his title successfully against Slaughter; Hearne, who defended his title against Felton; Hatcher, who defeated Chambers for the lightweight title; Butler, who defeated Ferguson for the featherweight title; Touchstone, who defeated DeGoldian for the bantam title, and Fefferman, who beat H. Scordas for the flyweight title.

Letters were awarded to those who won their respective matches.
DURING the 1931-32 school year the Georgia Tech Rifle team fired sixty individual matches with other representative colleges throughout the country and won forty of them. The team for the above matches consisted of fifteen men, the ten highest counting in each match. Each man fired ten shots in the prone, sitting, kneeling and standing position.

The team won the Fourth Corps Area match for the fifth consecutive year, scoring 3,608 points out of a possible 4,000. They won third place in the William Randolph Hearst National trophy match and will receive individual medals and a plaque.

The team was coached and managed by Captain H. W. Robinson and Sergeant Patrick. The following men were outstanding in all the matches, making exceptionally high scores: Mulder, J. H., Johnson, C. G., Stapleton, C. D., Norris, J. M., Thomas, A. N., Lucas, J. W., Deichler, L. C., Veal, J. E.

THE STAFF of the 1932 BLUE PRINT has worked with the idea in mind of giving to the student an accurate review of the school year of 1931 and 1932. It is hoped that we have in a small way accomplished this. If, in the years to come, these events may be recalled as we have tried to portray them, then we will feel that our work has been a success.

May we express at this time to the various members of the staffs our appreciation for their efforts in compiling this volume.

To Misses Helen Morgan and Katherine Culbertson, of the Southwestern Photo-Process Company; Stanley Marques, of White Studios, and to Clayton Webb and Earl Sanders, of Foote and Davies Printing Company, the staffs wish to express their thanks for the help which was given to them in the preparation of this annual.
A rather novel column was introduced to the students this year, in the form of a write-up of the different fraternities that are to be found on Tech's campus. This was done in order to give the men an idea of the different fraternities.
WITH a change in policy that has encouraged more people to read it and also to discuss the
different editorials that have been published in it this year, the "Yellow Jacket" has grown to
such an extent that none will deny its place on Tech's campus. The humor that has been published
is of the best and it is hoped that it will continue to be such in the future.

ITTING IS THE THOUGHT THAT FUTURE GENERATIONS MAY BE HURLED THROUGH SPACE AT TERRIFIC SPEEDS, INCOMPARABLE WITH ANY NOW CONCEIVABLE, AS THE RESULT OF "MAD-MEN'S" DREAMS IN DEVELOPING THE ROCKETSHIP.
The Anak Society was founded on January 1, 1908. The first president was Mr. Geo. W. McCarty, now vice-president of the Ashcraft-Wilkinson Co., and also Alumni Member of the Georgia Tech Athletic Board, along with Mr. Chip Robert, another charter member of the society. The other officers were C. H. Vaughn, Vice-President, L. E. Goodier, Secretary, and C. A. Sweet, Treasurer. Mr. Goodier became one of the pioneer air officers of the army. He fell soon afterwards in a plane accident and was transferred to the infantry. Mr. Goodier later was attached to the R. O. T. C. unit here. The other charter members were G. A. Hendrie, C. A. Adamson, L. W. Roberts, S. J. Hargrove, J. E. Daveupord, W. R. Snyder, C. L. Emerson and G. W. H. Cheney.

The Anak Society has always been active in any movement for the forwarding of Tech and has initiated many of the most important activities on the Tech Campus. Among the important dates in the Society's history are as follows:

1908
The formation of the Honor system which was put into effect during that year and lasted until just a few years ago.

1910
The pulling of the Y. M. C. A. out of its dark days.

1911
October 5, 1911 the first discussion of the publishing of a school newspaper. It was decided to publish the first issue the day before the Georgia game of 1911. The name chosen was the Technique, and the first two editors were, E. A. Turner, then Y. M. C. A. Secretary, and Mrs. Bloom. Dr. Perry was the first faculty advisor and member of the staff. The other positions were filled by students. The society and the three faculty members above picked the first staff.

1912
The year of the Band's difficulties and the appointment of the first leader by the Society, Mr. Greenblatt.

1913
The movement for the correction of the medical conditions on the Tech campus, which later led to the building of the school hospital. The Freshman cap system.

1915
The beginning of the movement of the compulsory support of student publications.

1916
The combining of the two student publications, the old Yellow Jacket with the present Technique, and the increase of the Technique to its present size. The first six-page paper came out February 16, 1917.

1919
The first Tech Homecoming, to be held at commencement, 1919.

1920
Request of the formation of the first Publicity Bureau of the school.

1921
Fight against the appearance of the Klu Klux Klan on the Tech campus.

1922
Formation of Student Council.

1924
The fight against the abolishing of societies on the campus.

1929
The formation of the Yellow Jacket Club.

1931
The changing of the Pass Book for 1932-33 and the publication of the Senior Personnel History for distribution to firms throughout the country to aid in the securing of positions for the senior class.

It has been the policy of the society since its inception to turn over to the students any activity that might be formed by the society as soon as the activity has proven worth while and self-supporting. The society has control over the welfare of the class honor societies such as Skull and Key, Bulldog and Koseme. The society, with the aid of these three societies supports a scholarship which is known as the George W. Adair Scholarship. This scholarship was started in 1912 but its name was changed soon after the death of Mr. George Adair in 1921.
OMICRON DELTA KAPPA
Its Purpose and Accomplishments

In three years of existence on the Georgia Tech campus, Omicron Delta Kappa, or O. D. K., as it is more commonly termed, has attained the position of the leading democratic honor organization. This is only natural in that O. D. K. is a leadership fraternity, composed of leaders in the varying campus activities and is the only organization requiring both a definite scholastic standing and a fixed activity rating of the candidates as well as certain requirements of leadership as approved by the National Officers.

The following statement is taken from the National Constitution of the fraternity:

First, to recognize men who have attained a high standard of efficiency in collegiate activities, and to inspire others to strive for conscious attainments along similar lines.

Second, to bring together the most representative men in all phases of collegiate life and thus to create an organization which will help to mould the sentiment of the institution of local and collegiate interest.

Third, to bring together members of the faculty and student body of the institution on a basis of mutual interest and understanding.

The Alpha Eta Circle of Omicron Delta Kappa, which is the official designation given the Georgia Tech Circle, is the thirty-first of thirty-three circles representing the most outstanding institutions of higher learning over the entire United States. The organization was originally conceived at Washington and Lee University and was accordingly founded at that university in 1914. So great was its success at that institution, and such was the clamor for similar chapters in other schools that Omicron Delta Kappa has now come to its present position of esteem.

Omicron Delta Kappa is a member of the National Council of Honor Societies which includes in its eight members organizations such as Phi Kappa Phi, Phi Beta Kappa, and Sigma Xi, each being the most outstanding national in its field.

At Georgia Tech, the Alpha Eta Circle has fostered campus activities, planned and handled the dedication of the Aeronautical building, started a movement for constructing a school auditorium, sponsored the plan of school aid for graduates in obtaining employment, and has undertaken the record keeping of the extra-curricular activities of Georgia Tech students, and has made various recommendations to the Inter-fraternity Council and the Student Council concerning school problems.

Omicron Delta Kappa at Tech is proud of its faculty membership, including Dr. Brittain, Dean Skiles, Dean Field, Dr. Reade, Dr. Armstrong, Prof. Narmore, Prof. Wenn, Coach Alexander, and Mr. George Griffin. It is particularly proud of its honorary membership including the king of golfers, Bobby Jones; Mr. Howard Coffin, President of the Hudson Motor Company and foremost developer of the State of Georgia; Mr. George Crawford, who is the President of the Jones-Laughlin Steel Corporation; and George Marchmont, President of Graybar Electric Co.
GEORGIA SCHOOL of TECHNOLOGY

"A Technical School With a National Reputation"

THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of ability and ambition a training which will fit them for positions of responsibility and power. The national reputation of this institution is based not on claims, but on results. Its greatest asset is the record which its alumni are making in the productive work of the world. Georgia Tech graduates succeed because they have been trained both to think scientifically and to work efficiently.

Coast Artillery, Signal Corps, Infantry and Ordnance Units of the R. O. T. C., also Naval R. O. T. C.

George the Blood Threatens Gang War to Save Moll.

Campus Celebrity Stoops to Enlisting Help of Y Leaders.

She was my moll and they didn't do right by Nell, was the statement of George Cornell in connection with the recent Digamma Brawl.

The result being that he dashed over to the Kappa Sigma house and slew his rival, Elmer Willard Turnbull in Cold Blood.

When told he was a bad boy and that he shouldn't go about shooting people he answered that he didn't know that the gun was loaded.

With Maxie and Nahas as lawyers George was acquitted today on the Charges of Insanity. Clever these Yimker Boys.

Student Acquitted.

John Smith of the Digamma House was today acquitted by the Fulton County Grand Jury on the Charges of Murdering his fraternity Brother.

Witnesses testified to the fact that the deceased had used the Fraternity Phone One hour and a half just before the Murder.

Love-Lorn Advice.

By Countess Olga.

Dear Olga: I am going with a young soda Jerker that I love dearly and with a rich old Millionaire whom I despise in spite of his money.

Please advise me. Signed, Perplexed.

A.—Marry the Soda Jerker and send address of old Millionaire to the Countess Please.

Dear Countess: I Date two Betas regularly, and neither knows that the other is going with me. Would you call that leading a double life? Dot.

A.—No, go with two more and the equivalent will be a single life.

Lo, Olga: I have a date every site in the week and men are1 reassuring luridly on me. Would you call me a flirt?

A.—No, the word is genius.

Dear Countess: I am a college freshman, and my SIT simply loves orchids they are so rare. I can't afford them, what shall I do?

A.—Orehilds are scarcer than SYT's.

Olgey, Old Pal: I am a Professor at Tech and love my dear wife with all my heart—Yet the Co-eds at Nite school just try to make me pay attention to them. What shall I do?

A.—The English Professor Lies.

Kampus Kalander.

9 A. M. WOW, what a party, and a ten o'clock this morning ain't no justice.

10:30 A. M. Makes Ten o'clock class just in time for roll call and dismissal.

10:31 A. M. WOW, but this idle time is killing me, looks like lunch time will never come.

12 M—When are you going to have lunch? Gee but I'm joshed, hard day today.

1 P. M. Lab at Fox Theatre.

5 P. M. Hall Session.

6 P. M. Dinner.

7 P. M. And they call this General science a crip—What crust.

DEAR MA:

What a liar the Old man must have been when he told you about his days at Tech. The beautiful campus that he portrayed is paved city streets lined with boarding houses. The Bradley administration building is as far from the Cathedral of learning as is the Podunk Post Office from the National Capitol. And from rumors what hell raisers they must have been. The campus ranks with the history of the Class of '91, of which Dad was the illustrious President. They tell me that the biggest drinker back in those days got the Presidency, and the old man according to his reputation with the older Professors used to go on a sober, practical binge (Continued on Page 6)

Sigma Chi

Do we have the Butler? . . . And did we have the house mother? . . . Yep . . . but the Kappa Sigs took her, the vipers . . . Now that we can study, there should be an increased improvement in scholarship . . . Speaking of campus leaders, we have 'em; it isn't every chapter that has its Fain and McCove . . . Now that Vallee has made the Maine Stein Song popular, the immortal strains of the Sweetheart of Sigma Chi are not heard as much . . . never you mind, we are going to put on a campaign to revive it . . . Remember Etting still yodels .

Phi Epsilon Pi

THEY HAVE A CHAPTER on the Tech campus . . . Sure, it is a national . . . Look in Banta's.

Inter-Fraternity Rumblings

'Tis MID-YEAR AGAIN . . . Bernie Cummins is signed . . . Swell band this Cummins and his boys have . . . There is a couple rubbing noses; oh well, it's an old South African custom . . . There is Syd Williams, the man responsible for the swell band . . . The fascinating lady is Miss Louisa Howard . . . The vice-president is busy on the door . . .

KNITTING CONTEST CALLED OFF.

Emory Accuses Unfair Tactics.

The annual contest in the art of knitting has been called off, it was learned today. A howl was sent up by Captain Percival Blots, the stalwart Captain, who has never looked better, than lie did when groomed in the latest of orchid floss, a product of his own handiwork?

It isn't fair for the Agnes Scott team to institute boys' rules this year when they have never been so conducted before. Last year the girls won by a dropped stitch and a pearl two. Quitting winners, that's what it is, as the stalwart captain wiped a tear from his eye while relating the tragic epic in sports history we ducked—We'll take Vanilla—or cream puffs at ten paces every time.

the Dobbins take liberties. For a year they look over the dungeon and try to pick a Golden Fleece. For the past few years the shedding has been rough and there are many of past year's clubs that have as tint yet not cultivated their mass base.

Social life at Tech... Began with the entering of school of the freshmen. They were entertained, dazzled, wined and warmed by the various facettes. After this came an invasion of the Delta Phi and the Fresh had to pay and pay. After this a series of College Fraternity Dances... With the Chi Phi entering at the Lodge at a Tea dance after each of the football games... After came the Mid-term dances with Bertie Cameron and his swell band... a good time was had by all... After this another series of Fraternity and Club dances... some good and some not so good... and then the climax is yet to come... the Commerce merchant with Tal Henry furnishing the music... All in all... the year from a social standpoint despite the many disappointments has been as excellent one.

The bigger ups on the campus... Have made new conquests, while some of them have stuck by thick and thin to the SYT's that they started with... The big Posse-Hellman man went off at a tangent every once and a while and played around... however for the bigger and better socials the inspection was always the same... Cornell made many new conquests and seems to have ended them to one or maybe two, an ace in the hole is always good... However the Bobbins Ave in the hand counts a lot... Thus there was the feud between the two big editors... The editor of this book being the victor it seemed... and to one or maybe two, an ace in the hand counts a lot...

A WEDDING. By A Shot Revolver.

The church was lighted and so were the guests. The old gent gave his daughter away while there were several in the audience that could have made a much better job of it. The preacher carved him two burks and screamed. A Big Blonde yelled Love songs—and a little rust played the big violin.

The Best Man kissed the bride, she was a bit home fires burning as it were.

FLATFEET RAID DICK'S JOINT.
Faculty Members Found In Dirty Dive.
Goon ooc Dick, he was good while he lasted. But while trying to find another joint a Flatfoot stumbled into his alley . . . and alas; Pour Dick's place was raided. And did the Flatfeet gloat because not only did they find Joe but they found a room of Tech men . . . and did they smirk . . .

"We knew we would get you for not letting us in at the football game," one scouled and threw a chair, felling Professor Strongarm . . .

Dean Squires remained silent and offered an adjustment, in as much as he termed it he and a group of the boys were merely having some innocent fun . . .

"Fun, eh?" smirked the cop. "Offer us a bribe? Remember the student that you expelled for this."

In all of his best modesty the Dean answered that he did.

"Well, I'm de guy dat you expelled." At this the spring dance was whistled to the Dean after a clout from the Coppers Club.

"Now Young Gentlemen," said Doctor Rittman, "Let's don't be too hasty about this." (Continued on Page 18)

The cover for this annual was created by The DAVID J. MOLLOY CO. 2857 N. Western Avenue Chicago, Illinois

Que voulez-vous encore?

No, we haven't forsaken our good old American language (off with your hats—the flag is passing by). We are merely using an approved technique to lure you into reading this advertisement. Don't leave the room, please. You'll thank us for it before we're through. Yes, Corona Coronas will he all right if you simply must express your gratitude that way.

But to return to our subject. What more could you wish in a motor car than all that the new Chevrolet Six provides? You have doubtless thrilled already to the smartness of Chevrolet's long streamlines and spacious Fisher bodies. If you want speed, the new Chevrolet touches 65 to 70 miles an hour, with six-cylinder ease, quietness and smoothness. If you yearn for power—well, 60 horsepower is more than adequate for any demand you are likely to make. Marvelous handling ease is assured by combining the easy, quiet Synchro-Mesh gear-shift with Free Wheeling. And, any owner will tell you that Chevrolet operating and upkeep economy is unexcelled. Does that strike a responsive chord, or are you just an old cynic? If you are, we suggest a ride in the new Chevrolet Six. Once you take one, you'll agree with every point we've made. And you'll agree, too, that the best place to be these fine spring days is at the wheel of this smart, true, and remarkably inexpensive automobile.

ANNOUNCING.

The Yellow Journal Puzzle Contest—Big Prizes—No Red Tape—No Catches—Extra Prizes for Promptness

Pictured Below are four campus leaders of Georgia Tech. Pick the names viz: Wells, Whitfield, Fain and Williams. Of course these names may or may not be correct.

Put their names on the back of 4 Rolls Royce Name Plates, one name on each plate (If College Boys Print Plainly—If Architects Use Typewriter). And write an essay, Twenty Words, no more, no less, on Why an Egg Sandwich.

Simple, isn’t this; after you have completed this, throw your Answers in the Pacific Ocean.

First Prize—The Editor Posed as September Morn in July.

Second Preis (Note French)—September Morn Posed as the Editor in February.

From the above you can see that the prizes could go on indefinitely.

In the production of fine books, or for that matter, fine printing of any sort there must be an adequacy of understanding and experience to plan and interpret. Of workers who have mastered their crafts. Of materials of the best quality. And of modern equipment and exact skill in its direction.

These sales and service offices and this manufacturing plant are evidences of an inflexible rule that adequacy must be maintained at.
