THE BOY WHO FOUND RAINBOWS

TECH BLUE PRINT
To

GILBERT HILLHOUSE BOGGS, B.Sc., Ph.D.
B.S., University of Georgia
Ph.D., University of Pennsylvania

Director of the Department of Chemistry and Chemical Engineering and Dean of the Graduate School

Omicron Delta Kappa, Phi Beta Kappa, Phi Kappa Phi, Alpha Chi Sigma, Sigma Xi, Phi Kappa Tau, Scabbard and Blade, American Chemical Society, American Association for the Advancement of Science, American Association of University Professors, Georgia Academy of Science, American Men of Science

who, by reason of his unfailing loyalty, service, and courage throughout his thirty-three years at the Georgia School of Technology, has done much to advance that institution to its present high national standing; and who, by reason of his unfailing courtesy, friendliness, and school spirit has become one of the most beloved members of the faculty among them and the student body, this,

THE 1936 BLUE PRINT

As Respectfully Dedicated

Dedicated to
GILBERT HILLHOUSE BOGGS
Following a policy instituted several years ago of carrying a theme which would typify the work of one of the major departments at Tech, the 1936 BLUE PRINT has chosen for its subject the Department of Chemistry and Chemical Engineering to which it offers as a tribute to the growth and accomplishment of that department "The Romance of Chemistry."

To this end we have attempted to illustrate, with color-process photography, the importance of chemistry to the daily life of the individual by taking actual views of some of the major industrial plants of the nation representing food, clothing, building, transportation and fuels, and amusement. The part which chemistry has played in the development of each of these necessities is truly a romantic one, and it is our hope that in some small way this book may instill in the reader an appreciation of these scientific romanticists, the chemists, who have made possible our civilization with their "Spirit of Research," the concluding illustration of the series.

College
To begin our story of Chemistry in Industry we have chosen as an illustration a typical scene from one of the great steel plants located near Birmingham, Alabama, one of the most important iron and steel centers of the world.

The progress of civilization is closely linked with the development of Iron, but it has remained for the chemists of more modern times to refine and produce it in the form in which it is most useful, Steel. In addition, the mass production of steel is essential, and here again we find the chemists, or metallurgists, as the vital factor of plant control and operation. Such is the case with all metal industries, and it is to chemistry that each turns for the discovery and production of new and better alloys than are now possible.

The foregoing views are from original paintings by John A. Houser, Art Editor, whom we feel has admirably portrayed Georgia Tech as the student knows and loves it in his distinctive woodcut patterns. To him the BLUE PRINT staff wishes to express its appreciation here.

—The Editor.
During his fourteen years as director of the destinies of Georgia Tech Dr. Brittain has held the love and esteem of the school as perhaps none other of its presidents. Preeminent as an educator and civic leader, he is never too busy to be the student's friend and counselor, and is justly called the "Best loved educator in Georgia."
William Vernon Skiles, Dean

B.S., UNIVERSITY OF CHICAGO
A.M., HARVARD UNIVERSITY
SC.D., UNIVERSITY OF GEORGIA
Beta Theta Pi, Phi Beta Kappa, Omicron Delta Kappa
Georgia Academy of Science

Throughout his twenty-nine years at Georgia Tech, twelve of which he has served as Dean, a position second only to the presidency, Dean Skiles, like President Brittain, has held the admiration and affection of the student body. It is to him they come, individually and collectively, with their countless problems and difficulties. Upon his advice and decisions far more than one student has founded a career of success, and as advisor to the Student Council, Dean Skiles has been instrumental in the achievement of many outstanding improvements in campus life.

Secretary to the President

MRS. JAMES HENLEY CROSLAND
Librarian
In March, 1930, the Guggenheim Fund for the promotion of Aeronautics awarded Georgia Tech the sum of $300,000 for the establishment of an aeronautical center of learning and research in the South. Housed in one of the newest buildings on the campus; equipped, in addition to classrooms and offices, with two wind tunnels, a model shop, a large drafting room, a branch library, and a 300-horsepower autogiro for flight testing, this department has made perhaps more rapid strides since its birth than any other at Tech, and is today one of the recognized leading schools of its kind in America.

The Department of Architecture was established in 1908 as one of the full professional courses in the Georgia School of Technology. In 1934 a new five-year curriculum in Architecture was installed which leads to the degree of Bachelor of Architecture. For those who may not wish to become practicing architects, but who may wish to enter into the building industry, a four-year course leading to the degree of Bachelor of Science in Architectural Engineering is available.

In the Department of Biology courses are offered in conjunction with the curricula of other departments but no degree is given by it alone. Subjects taught are Bacteriology, Zoology, and Physiology.

The Department of Ceramic Engineering was installed in 1924 and leads to the Bachelor of Science in Ceramic Engineering degree. In addition to training students this department concerns itself with direct service to the ceramic industries, and is using its facilities to encourage logical industrial development of these in the South.

This department is very important in that every student is required to take two years of Rhetoric and Literature. In addition, advanced courses in Literature, Public Speaking, Poetry, Drama, the Novel, and Technical English are offered to upperclassmen.
HEADS OF DEPARTMENTS

GILBERT HILLHOUSE BOGGS, B.Sc., Ph.D.
Director of the Department of Chemistry and Chemical Engineering

The Department of Chemistry was established in 1901, and at that time a course in Engineering Chemistry was offered. Later, in 1906, a four-year course in Chemistry was installed for those wishing to study Chemistry as a pure science. In 1931, departmental expansion made possible the offering of the degree of Bachelor of Science of Chemical Engineering, which hitherto had been impossible because of a lack of equipment. During the past year the department was subdivided into the Department of Chemistry and the Department of Chemical Engineering with Professor J. L. Daniel and Dr. H. A. Bunger as respective heads and Dr. Boggs as director.

FRANKLIN C. SNOW, C.E., Sc.D.
Head of the Department of Civil Engineering

The Department of Civil Engineering was established in 1896, the second oldest course at Tech. The curriculum leads to the degree of Bachelor of Science in Civil Engineering. It is so designed as to fit the student for any of the branches of civil engineering which might become his specialty. Thus it is that the curriculum is composed largely of purely fundamental subjects rather than more highly specialized ones.

JAMES ERSKINE McDANIEL, A.B., M.A., LL.B.
Head of the Co-operative Department

Since 1912 the Georgia School of Technology has offered a five-year co-operative course for those students who wish to combine practical experience with technical theory. Mechanical, Civil, Textile, Electrical, and Chemical courses are open to students in this department. Under the co-operative system the students are divided into two sections. While one is on college work for twelve weeks, the other is at work for the same length of time in various shops and industries in the southeast. At the end of the twelve-week period the two sections alternate.

HUBERT E. DENNISON, B.A.
*Acting Head of the Department of Economics and Social Science

This department does not offer any degree, but performs much as the departments of English and Mathematics in that nearly all students take courses in it. Courses taught include: Economics, Business Law, Accounting, Statistical Methods, Government, Insurance, Finance, Marketing, History, and associated subjects.

*Prior to appointment of Dr. A. M. Wiemer effective January 1, 1936.
HEADS OF DEPARTMENTS

THOMAS WITT FITZGERALD, B.S., M.S., E.E.
Head of the Department of Electrical Engineering

The Department of Electrical Engineering was established in 1896 which makes it, together with the Civil Engineering Department, the second oldest course at Tech. Today it is recognized as one of the leading schools of its kind in America and is one of the largest departments at Tech. Courses leading to the degree of Bachelor of Science in Electrical Engineering are offered.

WILLIAM BEN JOHNS, JR., B.S.
Acting Head of the Department of Engineering Drawing and Mechanics

The Department of Engineering Drawing and Mechanics, while in itself offering no degree, is a very important one at Tech in that all engineering students must take these subjects.

COUNT DILLON GIBSON, Ph.B., M.S. in C.E., C.E.
Head of the Department of Geology

The work of the department of Geology is designed to give the student a thorough training in the basic principles of Geology and Mineralogy and their application to the particular field of engineering the student is preparing to enter.

WILLIAM VAN DUNKIN, B.S. in M.E., M.E.
Director of the Industrial Management Course

This course is designed to provide adequate training for those who intend to do executive work in industry. The first two years are devoted to a liberal education with basic physical sciences, while the latter two are composed of necessary courses in business and economics. The degree of Bachelor of Science is offered.

DAVID M. SMITH, Ph.D.
Head of the Department of Mathematics

At a technical school mathematics is probably the basic subject. It is the foundation that all engineering is built upon. So it is that every engineering student is required to take at least two years of mathematics, consisting of Trigonometry, Analytical Geometry, and the Calculus. Advance courses are offered in many specialized forms of the subject.
HEADS OF DEPARTMENTS

ROY STEVENSON KING, M.E., M.Sc., Sc.D.
Head of the Department of Mechanical Engineering

Founded in 1888, the Mechanical Engineering Department offers the oldest course at Tech. During its forty-eight years of existence more than 1,000 degrees of Bachelor of Science in Mechanical Engineering have been awarded by this department, and it counts among its graduates many of America's greatest engineers. In its curriculum no attempt is made at specialization, although a graduate year is offered for that purpose.

JOHN BASCOM CRENSHAW, A.M., Ph.D.
Head of the Department of Modern Languages

For the engineer a knowledge of contemporary languages is extremely important as often he will find it necessary to refer to texts and references written in some other tongue than his own. In addition the cultural advantages gained in the study of modern languages need not be pointed out. The Department of Modern Languages at Tech offers courses in French, Spanish, and German in which syntax, translation, and conversation are stressed.

JESSE BOLAND EDWARDS, B.S., E. and M.E.
Head of the Department of Physics

As a basic subject for engineering, all students in the engineering school are required to take at least one year of elementary Physics. The courses are designed to present the fundamental principles of Physics, the experimental work upon which they rest, and the mathematical reasoning employed in the deduction of various axioms.

CHARLES ALFRED JONES, B.S. in T.E.
Head of the Department of Textile Engineering

The Textile Department gave the first instruction in textile education in the South in February, 1899. This was made possible largely through the gifts of Mr. Aaron French, of Pittsburgh, for whom the Textile Department is known as the A. French Textile School. Its value to a rapidly expanding textile industry in the South which demands an ever increasing number of skilled employees and engineers is immeasurable.

Book Two

CLASSES
CHEMISTRY today is not only performing an indispensable service by either directly or indirectly guarding every bit of food we eat, but it is continually widening the variety of foods and drinks. Modern synthetic colors and flavors have done much to make many of our foods more colorful and appetizing. Not only have new and purely synthetic foods been developed, but we can also thank chemistry for the knowledge of how to properly preserve almost any natural food. In the production of food no single thing has been more important to our nation than the fertilizer industry which has become more and more dependent on synthetic production of fertilizers, the direct outgrowth of chemical experiment and investigation.

To illustrate this important branch of chemistry we have chosen a photograph of a chemist at work in one of the nation's largest food organization's laboratories.

- G. F. Smith - West Palm Beach, Fla.
- J. G. Smith - Haines City, Fla.
- W. M. Smith - LeGrange, Ill.
- W. P. Snyder - Sharon, Pa.
Book Three

FEATURES
CHEMISTRY'S greatest contributions to the Textile Industry have been the development of an almost limitless series of dyes and the introduction of substitutes for natural textiles. Organic chemistry is directly responsible for the tremendous strides taken by this industry in dyeing. Never before has it been possible to produce beautiful colors in textiles so inexpensively as now. Chemistry has also made possible a synthetic product, rayon, that is rapidly influencing the wearing apparel of the world. It has made possible the production of substitutes for silk, wool, and even cotton, and as such who can say that tomorrow we may have at our disposal products far superior to any of those natural ones.

Here we have pictured a scene from one of the South's great rayon plants located near Nashville, Tennessee. The girl is sorting skeins of entirely synthetic origin.
Explanation

The foregoing favorites were selected by eight prominent Seniors as it was felt that in this manner a representative group could best be assembled. In presenting them, the BLUE PRINT staff wishes to express its appreciation to Mr. Charles Young, of the Foote and Davies Printing Company, for his efforts in planning and executing the sketches.

The Editor.
Here are pictures which shall be forever framed in the student's memory. They are reminiscent of happy hours spent in toil and drudgery in the many shops and laboratories with which Georgia Tech is blessed. From left to right: (1) Freshman drafting. (2) In the power house. (3) The E. E. lab, as every electrical thinks it ought to be—empty. (4) Textile lab. (5) Physics lab. (6) Prof. Wycoff with the frog stickers in Biology lab. (7) The Architectural night club. (8) Another textile scene. (9) Testing lab. (10) Still another textile lab. (11) Junior Chemistry lab. (12) Another shot in the power house. (13) Final textile. (14) Engine lab.
No student will ever forget the good times of the football season. Here we have attempted to collect a group of representative snapshots taken during the 1935 season. *From left to right:* (1) "Stooge" and Anderson. (2) Kay Bowen. (3) Joe and Joe. (4) Touchdown Tech! (5) Our wide awake cheer leaders? (6) The Tech and Georgia bands play together during the half. (7) Sully and Kay. (8) Dave and Miriam. (9) "S" for Sewanee. (10) A little loving. (11) Burning the Bulldog before the game. (12) Jig-time and Gladys. (13) Dan's date seems camera shy. (14) The freshmen welcome the team at the start of the game. (15) At the gate. (16) The band plays on.
These snapshots show some of Tech's Co-operative students at work on their various jobs. Co-ops are employed in their off periods by many of the South's largest industries as we have tried to show here with scenes in machine shops, railway shops, chemical laboratories, power plants, radio and telephone stations, drafting room, and surveying on the road. This is a little known and little publicized side of our student life, and the Blue Print is pleased to use this page to emphasize it.
One of the biggest parts of college is the Reserve Officers Training Corps, and the summer camps and cruises taken by the trainees are bright spots in the humdrum of school life. Here are scenes taken at the infantry camp at Anniston, Alabama, the coast artillery camp at Pensacola, Florida, and many of the spots visited by the Naval R.O.T.C. on their summer cruise in the Caribbean. They show the boys at work and at play—some of the latter are not to be taken too literally as they were posed for the cameraman.
Book Four

ACTIVITIES
HE science of photography, beginning with the preparation of the original film to the finished picture, is directly associated with chemistry. Recently the improvements in this field have been remarkable. The development of high-speed and color photography have greatly widened the industrial, amusement, and cultural uses of picture making. Experiments have produced new chemicals for the treating of film which have made it possible to achieve a range and reliability hitherto thought impossible. It is obvious that the advancement of this science is dependent almost entirely on chemistry, and here again are we made to realize the great contributions chemistry is making to our civilization and welfare.

Here pictured is a chemist investigating the structure of samples of film in one of the nation's largest plants for the manufacture of film.
The Student-Faculty Honor Committee

The Student-Faculty Honor Committee was founded in 1932 at a joint meeting of faculty and student representatives as a step to curb dishonesty and cheating, which, due at first to a lax honor system and later to ineffectual faculty control, had grown to an intolerable extent at Georgia Tech. It was decided that the committee should be composed of three members of the faculty, appointed by the President, and three students, elected by the Student Council. Its functions, as outlined in its constitution, are designated as follows: "Any faculty member who suspects a student of dishonesty on school work must report such a student, together with the evidence, to the Student-Faculty Honor Committee. This committee investigates the case and determines whether the student is guilty or not guilty as charged. If, in the opinion of the committee, the student should be disciplined, it remands the student to the Executive Committee of the faculty."

Since its inception a considerable improvement appears manifest. Both students and faculty seem to approve the work of the committee and cases of dishonesty have steadily declined. It is hoped that such an improvement will continue until a fine spirit regarding intellectual integrity will be built up at Georgia Tech.

The Georgia Tech Student Council was organized in 1923 by Dean W. V. Skiles, with the expressed purpose of representing the whole student body in matters affecting student interest; affording a suitable and convenient medium of communication between the students and the school authorities; and, in general, creating and preserving the customs and traditions of the school.

The Council is composed of twenty-four members, five of which are elected from the Senior Class, four from the Junior Class, two from the Sophomore Class, two from each section of Co-operative students, and nine ex-officio members. These latter nine consist of the President of the Interfraternity Council, the President of the Y. M. C. A., the editors of the Blue Print, Technique, and Yellow Jacket, and the presidents of each class. The Council takes office at the close of each school year and serves intact the following year. Its officers are elected by the Council at the first meeting in September.

During the past year the Council has been extremely active in matters of student and school concern.

One of the most commendable actions of the Council of 1936 was its timely contribution to the swimming team. Because of insufficient funds the Athletic Association was unable to finance this sport, but with the aid of a Student Council appropriation the swimming team was able to complete a very fine season.

Among the various student conventions to which the Council sent delegates were the Intercollegiate Press Association at Chicago during October, the National Y. M. C. A. conference in Indianapolis, the National Student’s Federation at St. Louis, the Georgia Collegiate Press at Athens, the Southeastern Collegiate Press at Memphis, and several others of equal value to the students and the school.

Another matter which the Council handled admirably was the student visitor relationship at our most important football game. With the assistance of the Student Government of the visiting school, what might have been an unhappy climax to an intense rivalry, was turned into a beautiful example of friendly spirit.

To close its period of office, the Student Council conducted the election of members for the 1937 Council, elected the heads of the student publications for the coming year, and awarded the contract for senior rings.

Those groups at Tech classed as Honor Societies are both national and local organizations to which membership is limited by standards of excellence set up by them in their respective fields to which a student must qualify in order to become eligible for election. They are not to be thought of as simply rewards, however, for most of these organizations are among the most active on the campus, and as such play not only a stimulative but also an operative part of student life.

The honorary society of Phi Kappa Phi offers membership to those members of the Senior Class each year who are shown to have stood consistently high in scholarship during their first three years. Election falls at the beginning of the school year, and is by vote of the faculty. The fraternity was founded in 1897, and installed at Georgia Tech in 1914, the first honorary fraternity to make its entrance upon the campus. An annual award of a scholarship cup is made by the local chapter to the senior with the highest average in all departments.
Tau Beta Pi, the national honorary engineering fraternity, was founded in 1885 at Lehigh University, to mark in a fitting manner those who have conferred honor upon their Alma Mater by distinguished scholarship and exemplary character. Scholarship, while the primary requisite for admission, is not the sole criterion; integrity, adaptability and unselfish activity are other qualifications considered.

Since its installation in 1924, the Georgia Alpha Chapter has initiated approximately three hundred seniors and juniors. On Honor Day each year it presents a scholarship cup to the senior with the highest four-year average in the engineering school.
Phi Eta Sigma, a national freshman honorary scholastic fraternity, was installed in 1930. Only those men in the Freshman Class who made an average of 3.5 or better for the first semester or the entire freshman year are chosen for membership.

Each spring Phi Eta Sigma presents a loving cup to the freshman having the highest average for the first semester. Being the only freshman honorary fraternity, it has done much to produce an incentive to study among the first-year students.
The national chemical fraternity of Alpha Chi Sigma was founded at the University of Wisconsin in 1904, and is today the second largest chemical society in the world. Men whose primary interest is in Chemistry are united in Alpha Chi Sigma for the mutual advancement of their social, professional, and scientific ideals.

The Alpha Omega Chapter was installed at Georgia Tech in 1932, and has since endeavored to foster on the campus an interest in chemical affairs by sponsoring chemical movies, exhibits, news sheets, and essay contests. In addition, it awards a handbook annually to the junior chemist or chemical engineer with the highest scholastic average.

Kappa Eta Kappa, a national professional electrical engineering fraternity, was founded at the University of Iowa in 1923. The local chapter, which had formerly been known as the High Tension Club, was installed in 1928. Membership in Kappa Eta Kappa is offered to those junior and senior electrical engineering students who possess the required qualifications of scholarship, character, and leadership.

Each year, in order to encourage high scholastic attainments among the electrical engineering students, Kappa Eta Kappa awards the sophomore in the Department with the highest average an engraved log-log slide rule.

Phi Psi, Honorary Textile Fraternity, was founded in 1903; chapters of the fraternity have been established at nearly all of the leading textile schools of the country. The Georgia Tech chapter was established in 1921.

Sophomores in the textile engineering department are elected to the society in the spring, and upperclassmen of the department in the fall. Phi Psi has as its aim increasing good fellowship among its members and encouraging advances and interest in textile engineering. The annual Linthead Ball of the fraternity is one of the big social events of the season.

Pi Tau Sigma is a national honorary mechanical engineering fraternity founded in 1915 at the University of Illinois. In 1932 the U. R. G. Society of Tech was given a charter to the national organization.

Some of the activities sponsored annually by the Georgia Nu Chapter are: The presentation of an Honors Day award to the sophomore having the highest average in the Mechanical Department, the collection and framing of pictures of each Mechanical Engineering Senior Class, and the orientation of freshmen by conducting tours of the shops and laboratories.
The National Aeronautical Association was founded in 1922 as a professional organization. In 1930 when the Daniel Guggenheim School of Aeronautics was established at Tech, the Association installed a student chapter known as the Tech Aero Club. The members are chosen from the prominent students of the Junior and Senior classes of the Aeronautical Department.

This organization has regular meetings at which talks are given by prominent men in the profession to acquaint the members with their future problems. They discuss current events of progress in the air among themselves.
The Architectural Society, as its name implies, is composed of members of the Architectural Department who have completed three semesters of work in the course. The Society meets monthly, and seeks to create a more intense interest in Architecture and its applications. Quite frequently members of the society present their work for national competition. Each fall a reception is held for the incoming freshmen in the department to introduce them to their classmates and to the upperclassmen.
THE BRIAEREAN SOCIETY OF GEORGIA TECH was founded in 1912, with the primary purpose of offering membership to the outstanding members of the upper three classes of the Co-operative Department in recognition of their attainments on the campus and in the class room. Although the scholastic requirements of the Society are among the highest on the campus, outstanding character and leadership are considered essential for membership.

Among the annual activities of the organization are an annual Smoker held in honor of the Co-op freshmen, an award to the freshmen in the Department with the highest average, and the presentation of a cup to the outstanding senior Co-op.

Kappa Kappa Psi is an honorary fraternity for professional and student musicians. The national fraternity was founded in 1919, and the Tech chapter was installed in 1924. Membership is limited to those men who have been outstanding in the band or other school musical organizations, and who have been prominently associated with other school activities.

The purpose of Kappa Kappa Psi is to encourage and improve the band, and to promote a spirit of co-operation and mutual interest among the musicians of the school. In its twelve years of existence it has served this purpose admirably.
Pi Delta Epsilon, a national collegiate journalism fraternity, was founded at the University of Syracuse in 1909, as a means to stimulate interest in student journalism. The Tech chapter, installed in 1922, is one of the strongest members of the national organization in addition to being one of the most active groups on the campus. In the fall of each year it sponsors the Fashion Show held at the "Y," to which local merchants contribute. Membership in Pi Delta Epsilon is limited to juniors and seniors who have worked for a minimum of two years on a Tech publication. Initiations are held during each semester, at which times dinner dances are given.

Reading from top, left to right:

The Scientia Club was founded in 1927 as an honorary General Science fraternity, filling the need for a social group in that department. Formerly only members of the General Science Department were eligible; but with the abolition of that course beginning with the class of 1937 members of the Industrial Management Department, established in 1933, were taken in. The Club has been very active, and consequently, is outstanding among the social groups on the campus.
THE CIVIL CREW is the name of the Georgia Tech Student Chapter of the American Society of Civil Engineers. It was organized in 1909. The purpose of the organization is the enrichment of the student's college courses by beginning those professional associations and contacts which, continued through life, are most helpful to the practicing engineer. These associations and contacts are obtained by means of luncheons, investigation of practical construction work, and talks by practicing engineers. The members of the Civil Crew are chosen from the Senior and Junior classes of Civil Engineering.
The American Society of Mechanical Engineers is one of the largest groups of professional men in the world, and offers membership to all men pursuing that line of work. The Georgia Tech Student Branch was installed in 1916, and is composed of juniors and seniors in the Mechanical Engineering Department. The Society meets weekly, at which time movies and lectures by prominent men are presented and discussions held upon subjects pertinent to the profession. During the year the members of the organization make several inspection tours to local power plants and mills.
THE GEORGIA TECH CHAPTER of the American Institute of Chemical Engineers was established on this campus in 1933. It is composed of men from the Chemistry and Chemical Engineering departments who are interested in furthering their knowledge of the field in which they propose to enter.

The organization offers lectures, tours, motion pictures, economic surveys, and talks by prominent men in the field of chemistry during the course of the school year, and since its installation on the campus has been very active in stimulating the interest of the individual in the chemical industries.
The American Institute of Electrical Engineers was founded in 1884, and the chapter at Tech, which is a student branch, in 1915. Membership is offered to junior and senior students in the Electrical Engineering course who have been outstanding in scholarship as well as school activities.

Regular meetings are held at which lectures are given the society by practicing engineers. Also motion pictures are presented, and informal discussions are held concerning electrical engineering topics.
Since time immemorial, men have bound themselves into bands of friendship which we define as clubs. At Tech these organizations are numerous in character and purpose. While predominately social, not all can be classed under that heading and so we have limited our sub-title to "Clubs." Membership in any of these clubs is an indication of a man's personality, adaptability, and co-operativeness, and as such they are in fact honorary organizations.
In 1930 when the flame of Tech school spirit seemed about to die, Coach William Alexander, with the aid of a group of spirited students, formed the Yellow Jacket Club. The organization was founded with the aim of developing clean school spirit and loyalty throughout the student body; and since its appearance on the campus, the students have shown an increasing interest in school activities both on and off the athletic field.

The club is composed of eight seniors, eight juniors, and sixteen sophomores, eight of whom are elected to junior membership at the end of the year. The club elects cheer leaders and sponsors all pep meetings. Professor Winn is the faculty adviser.
Debating at Georgia Tech has been formally conducted since 1924, but it was not until 1927, principally through the efforts of Professor E. H. Folk of the English Department, that the M. L. Brittain Debating Society was founded. It was named in honor of the man who, by his personal efforts and kindly interest, has ever striven to aid Tech men in obtaining the benefits of forensic training.

The society, rather than concentrating on a small select team, affords every member an opportunity to develop poise, clear thinking, and forceful expression through the discussion of current problems of vital interest. Each year the society conducts debates and open forums in conjunction with other educational institutions of Georgia and neighboring states.

The Co-op Club was founded in 1915 to fulfill a long-felt desire for unity among the students of the Co-operative Department. Since its organization, it has functioned as the social group for the Department, and has exerted a vital influence upon the social and political life of the campus. The club is divided into two sections, with separate sets of officers for each. During the year, each section gives a dance for its members and their guests.
THE CLUB HAS UNDERTAKEN, as one of its major activities, the establishment of a Co-op Loan Fund. The need for this movement has been felt for a number of years in order to assist those members of the department who might otherwise be forced to leave school. In the course of a few years, it is hoped that this fund will build up so as to prove exceedingly beneficial to the students of the Cooperative Department.

In 1923 Professor C. E. Coolidge recognized the need of an honorary society in the Mechanical Engineering Department and organized the Free Body Club. Juniors in the department who have been proficient in scholarship and prominent in school activities are eligible for membership.

The club promotes co-operation among the students in the study of the mechanical engineering profession with discussions among themselves upon recent advancements. They originated "Founder's Day," and have taken charge of its observance ever since.
THE OIL CAN CLUB is strictly a social organization for mechanical engineering students. Founded in 1914, its purpose is to promote good fellowship among its members. Meetings are held regularly, and several social functions are given during the year, one of which is the annual dance. In addition the club has assisted in freshmen orientation.

The Oil Can Club is unique in that its membership is limited to thirteen, usually chosen from the Senior Class, although juniors are eligible. Professor Kennedy is faculty advisor for the club.

The Bulldog Club selects its members from the most outstanding juniors and seniors. The original senior Bulldog Club was founded in 1910, but in 1933 a union with the junior Koseme Society resulted in the formation of the present organization.

This year the Bulldog Club increased its activities by sponsoring the "Homecoming" house decorations contest. Among the other activities that the club sponsors are the Freshman Cake Race, the tennis tournament, and the bowling tournament. Its main purpose is to serve Tech in any manner possible.
SKULL AND KEY is the honorary social society for sophomores. It was founded in 1912 with the idea of forming closer relationships among the leaders of the Sophomore Class. It is modelled after the Bull Dog Club and assists that organization in carrying out its program. This year its members were appointed by the Student Council to act as a vigilance committee at home football games to prevent rowdyism in the stands.

The membership of the society is limited to twenty-four men, twelve of which are elected at the close of their freshman year and the remainder during the fall of their sophomore term.
The Georgia Tech Cosmopolitan Club is a branch of the international organization of Cosmopolitan Clubs. All students at Tech from foreign countries are members and in addition several American students are included in order that the club may be truly cosmopolitan in nature.

The primary purpose of the club is the assistance of foreign students in orienting themselves to American college life. At Tech this is done by carrying out a definite program which includes monthly meetings, social gatherings, discussion groups, and the presentation to the group of prominent local speakers, campus leaders, and the faculty.
One of the leading college theatrical groups of the South, the Marionette Club this year enjoyed the most successful season in its history. For the first time in fourteen years, Tech was treated to musical comedy when, in the fall of the year, the club presented an original piece, entitled The Shooting of Dan McGrew. This farce, based on the Robert Service poem of the same name, was written and composed by Chester Russell and Edwin Peeples, members of the Marionettes. It was so enthusiastically received all over Atlanta that the authors were obliged to create another which was presented during the spring entitled Wharf Street. In addition to giving these two melodramas the club sponsored its annual "Stunt Night" in a search for talent.

THE SIGMA GAMMA CLUB of Georgia Tech has for its primary purpose the banding together of men of similar interests for mutual aid and encouragement in their social, intellectual, and recreational activities. The organization of the Club is along the lines of a social fraternity, and the members are pledged towards activity in campus organizations and movements. The Sigma Gamma Club was founded in 1927, and has had a steady growth since that year. For the past several years, the club has held a formal dance annually, and numerous smaller group functions at intervals throughout the school year.

The Foil and Mask Society is composed of students interested in fencing, whether members of the varsity team or not. In the past, until school recognition of the sport was obtained, membership in the society served as a reward for those who by their diligence and skill aided or participated in the matches fought against teams from neighboring schools. Each year the organization sponsors an intramural fencing tournament, and includes among its annual affairs several banquets and informal functions. The society’s most outstanding honorary member, Professor Richard Morenus of the Architectural Department, holds the position of Fencing Coach, and has been instrumental in the maintenance of a fencing team, and in the organization of the society.
The following section which has been classed under the heading "Religious Societies" is devoted to those organizations whose main purpose is to foster and maintain the moral and spiritual tone of the campus on a high level. In general, their activities are concerned with school welfare.

The Y. M. C. A. Building was erected in 1911 through the generosity of John D. Rockefeller and other friends of Georgia Tech for the benefit of all students. It is equipped with dormitory facilities for forty students, parlors, recreation rooms, an auditorium, student publications offices, club rooms, and the school postoffice. During the past year, through the efforts of Mr. W. J. Procter, executive secretary, the "Y" building was almost completely renovated and now provides an ideal center for campus life.

The Y. M. C. A. Cabinet aids the General Secretary of the "Y" in carrying out the program of that institution. Any upperclassman is eligible for membership in this body, and from it are chosen the student officers of the "Y."

The Cabinet meets regularly to plan programs, entertainments, and to engage in study and discussion on religious, social, and economic problems. At the beginning of the school year it promotes several entertainments to introduce freshmen to the faculty and student leaders. Since nearly everyone at Tech comes in close contact with the Y. M. C. A., the Cabinet does much to infuse a true feeling of school spirit into the student body with its moral and spiritual influence.
The "Y" Singers have completed one of the most successful years in the history of the organization and have advertised the school throughout the South on their trips. The group this year was larger than ever before, with over fifty members enrolled, and has been fortunate in having Mr. Bob Mell to direct the club and arrange the tours.

Among the cities visited during the year were Chattanooga, Macon, Athens, Clemson, Daytona Beach, and Savannah. The last two cities were included in an extended tour which the club made soon after Easter. On Sundays during the year, the club sang at various churches and institutions in Atlanta, and occasionally pay performances were given at the school auditorium to defray the expenses of the longer trips.
THE GEORGIA TECH NEW MAN CLUB was founded in 1931 as a chapter of the Federation of College Catholic Clubs. The club serves to unite the Catholic students on the campus, and to present a series of religious programs made up of open discussions and talks. In sponsoring a number of functions, both of a spiritual and a social nature, the Newman Club offers an interesting and essential activity for those students, in attendance at Tech, of the Catholic Church. This is accomplished by providing them with an opportunity to meet and become acquainted with other students of like denomination.

The major purpose of the Baptist Students' Union is to provide a connecting link between the career of the student on the college campus and his religious life in the church. The Union is governed by a council composed of the officers which promotes numerous social and religious programs throughout the year.

The Baptist Students' Union held two student retreats this year, in addition to a week of religious meetings and several social gatherings. Five members were in attendance at the National Baptist Students' Union Conference held at Ridgecrest, North Carolina, last year.
The "Army and Navy" section is devoted to Tech's Military and Naval Reserve Officers Training Corps, a vital part of school life. In it we have attempted to portray the regimental organization and the various activities carried out solely as a part of the R. O. T. C.
MILITARY ADMINISTRATION

**Lieutenant-Colonel Jones**

The War Department has placed equipment valued at four hundred and fifty thousand dollars at Tech for the use of the R. O. T. C. Four years of specialized training in the Infantry, Coast Artillery, Signal Corps, or Ordnance is made available by a staff of fourteen army officers. Two years of training is required of every student who is physically fit, the advanced course being optional. Upon the successful completion of the four-year course, the student receives his commission as second lieutenant in the Officers Reserve Corps.

One of the six schools in the United States which has a Naval R.O.T.C. unit, Tech offers a four-year course qualifying students for appointment as officers in the Naval Reserve. Although the unit is, at present, limited to two hundred students, the Navy Department has been generous in supplying this unit with a splendid corps of instructors, and equipment valued at several hundred thousand dollars. The Corps headquarters is located in one of the finest naval armories in the country, recently erected by the government on the Tech campus.

The National Society of Scabbard and Blade was founded at the University of Wisconsin in 1904. It is organized at present into seven regiments, each regiment composed of twelve companies, and each company representing a school. The Georgia Tech group, which is designated as “M” Company, 2nd Regiment, was established in 1921. The society has for its purpose the stimulation of an active interest in the military affairs of the country, and the development and preservation of the essential qualities of efficient officer material. These objects it attempts to achieve by electing only those student officers who have shown a sincere and lasting interest in the military work of the college, and who possess those qualities which will make them efficient officers and upright citizens.

FRATERNITIES
Oil is the life blood of industry. Without the development and use of the oils of today, industry would be at a standstill. Here again we have a purely chemical industry. Through the ingenuity of the organic chemist, nature's raw hydro-carbons have been broken up into an almost infinite number of petroleum products. Certainly no industry plays a more important part in this, the "machine age," and the part which chemistry is playing in its development is as vital if not more so than in any other.

We have pictured here a part of one of the great petroleum refineries located near Tulsa, Oklahoma, a world center in the production of oil.

Alpha Tau Omega
From left to right: (1) Some of the pledges. (2) Two sullen sophomores, Vaughn and Robeson. (3) You figure this one out. (4) Bynum, Smith, and Jacobs proudly sport numerals. (5) Some more of the same. (6) Big military men at rest—the boys seem to be prepared for a Japanese invasion or maybe just the bill collector. (7) Robeson looks lonely. (8) Captain Eddie. (9) Sergeant Cook. (10) Fletcher, Jones, Burroughs, and Martin just after taking baths. (11) The war's over.

ATHLETICS
IT WOULD be impossible to close our story of chemistry, brief as it has been, without some mention of those men who, by ceaseless toil and struggle, have made possible its marvels. Accordingly we have chosen as our subject here, "The Spirit of Research," which we feel typifies the courage and the love of chemistry of those often forgotten men, the research chemists. To them who shall create it we dedicate the future. For it is they who are the authors of "The Romance of Chemistry."

COACH ALEX, as he is affectionately known, is a true product of "The Flats," having gained and given all of his athletic experience at Tech. From scrub, to varsity, to assistant coach, to head coach, and now as athletic director and head football coach, Coach Alexander has held the love and esteem of the student body for more than two decades. As head coach of football, he molds into one unit the products of the various special coaches and directs the general plan of attack. It is from his dynamic personality that Tech teams have imbibed a fighting spirit so famous throughout the sport world that they are known as "the team that never quits." A member of the official All-American Football Board and former President of the Football Coaches of America, "Alex" is indeed a national figure of whom Tech is justly proud.

GEORGE GRIFFIN
Coach George Griffin, Assistant Dean of Men, directs the track team. A former Tech track man, he is an enthusiastic student of the sport, and under his guidance several outstanding stars of the cinder paths have been developed.

ROY MUNDORFF
Roy Mundorff takes time off from his mathematics classroom when basketball time comes. A former star at the sport, he is well qualified for his position. Former President of the Basketball Coaches of America, Roy is another national sports figure that Tech is proud of.

BOBBY DODD
Former All-American, Bobby Dodd is recognized as one of the greatest football players in southern football history. His Alma Mater is the University of Tennessee. Bobby's duties include the training of the backfield, coaching the freshman basketball team, and, until its discontinuance this year, the coaching of the baseball team.

MAC THARPE
Mac has the instruction of the line on his hands and in addition he does the important work of a scout. Mac is a former Tech hero, who, like Alexander, has spent his sport years solely at Tech.

ROY MACARTHUR
Coach of the freshman squad, Roy is an integral part of the sports picture at Tech. He entered the coaching ranks immediately following his graduation from Tech in 1933.

JOE WESTBROOK AND DAVE WILCOX
Assistant football coaches, these are the newest additions to the coaching staff. Joe is a former hero on the Rose Bowl team of 1928; while Dave, who handles the Grey Devils, finished his four years, during which he won All-Southern honors as a guard, just last year.

FOOTBALL
FOOTBALL

THE "RAZZLE-DAZZLE BOYS." So said the sports writers. And that became their password. So it is that this daring and courageous young squad will live in Tech football history. It was a team to be proud of, this 1935 edition of the Yellow Jackets. Fifty per cent. of its members were sophomores, yet it came back after four disheartening defeats in succession to achieve something which no Tech team had been able to accomplish since 1928; it beat Georgia.

With a smashing, running attack that couldn't be stopped and a passing attack the superior of which had never been seen at Grant Field, this band of youngsters, before a roaring throng of 34,000 hysterical fans, literally tore a highly favored Bulldog to pieces. To start the game they gave Georgia a seven-point lead when nervousness got the better of them, but even before the cheers of Georgia's supporters had died away the Jackets, with a rapid fire succession of powerful line thrusts, had swarmed their way over the goal. In quick order they repeated and the half ended with Tech leading 13-7. The reopening of the battle found Georgia making a mighty effort to catch up. Three times they battered to the very shadows of Tech's goalposts. To no avail; it was the White and Gold's day. Late in the fourth quarter the Jackets again took the offensive. With a razzle-dazzle collection of passes, laterals, and trick plays, they smote Georgia the final blow. The game was over.

This much can be said for Georgia. The Bulldog played a magnificent game, giving all it had, but from the very beginning she was doomed to fall before this wild young band of engineers who had forgotten the meaning of the word defeat.
FOOTBALL

We might go on to list the season's record, game by game, of the 1935 'Ramblin' 'Recks.' Certainly their conquest of Duke, picked by many experts as the Rose Bowl choice, deserves a history all of its own. However, rather than do this, we feel that an annual is more personal in nature, and so instead we present a brief sketch of each man as he is known to his team mates, in order that in future days these heroes may be better remembered, each in his own personality rather than as a unit in a team.

R. W. EUBANKS, Captain

"Lefty" Eubanks is a senior and was captain of the team. His home is Macon, Georgia, where he attended Lanier High School. In his high school days he was chosen as All-Southern tackle. During his stay at Tech he was handicapped by injuries, but despite them became one of her stars. His lovable disposition made him a great favorite with his fellow players, who bestowed upon him the greatest possible token of their esteem by electing him to his captainship. Besides playing football he was on the basketball team and an officer in Military.

E. H. GIBSON, Alternate Captain

"Hoot" Gibson is a senior and was alternate captain of the team. Besides playing end on the team he played baseball for three years as a star first baseman. He was mentioned on the All-Southern football team last year. His home is Atlanta where he attended Tech High School.

J. F. BRITTAIN

Fulton Brittain is a senior and a guard on the team. His home is in Birmingham, Alabama, where he attended Phillips High School. He was especially valuable because of his ability to play guard and tackle effectively. In addition to football he was on the track team. At high school he set a state record for the discus throw.
FOOTBALL

P. M. CHANCE

Phil Chance is a senior and comes from Florala, Alabama, where he was football captain of his high school for two years. Six feet, four and one-half inches in height, he was easily the tallest man on the squad. Played tackle on the team.

J. B. LINDSEY

"Bud" Lindsey is a senior and played tackle. Bud attended G. M. C. at Milledgeville. His home is at Irwin- ton, Georgia. He played baseball and was an officer in Military, and belonged to Skull and Key and Scabbard and Blade.

J. E. McKINLEY

John McKinley is a senior and played halfback on the team. His home is in Decatur, Georgia, where he attended Decatur High School and was an outstanding star. He is a member of the Bull Dog Club at Tech.

O. H. THOMPSON

Oscar Thompson lives in Atlanta, but attended Riverside Military Academy for his prep school. He played end on the team. On the campus he is one of the most popular seniors, being president of Anak, a member of Bull Dog, Skull and Key, and other honorary groups.

J. R. WILCOX

John Wilcox is a senior and comes from Tyler, Texas. He was preceded at Tech by brother Dave, now a member of the coaching staff, and is followed by a younger brother, Allen, who was a star on this year's freshman squad. John was prominently mentioned as All-Southern last year, but was handicapped greatly this year by a knee injury. He is a member of the Bull Dog Club and was vice-president of his freshman class.
FOOTBALL

H. H. APPLEBY

Harry Appleby comes from Nashville, Tennessee, as a transferee from Vanderbilt. Previous to this he attended Boys High in Atlanta, where he was voted the best all-around athlete in his senior year. Although handicapped by poor eyesight, he also plays baseball and basketball effectively, and last year caught for the varsity nine. On the campus he is very prominent, having held class offices in both sophomore and junior classes, in addition to being on the Student Council and in the Skull and Key Club.

R. A. BEARD

Dick Beard is another product of Boys High in Atlanta, where he, like Appleby, was an outstanding athlete. Dick has an enviable record on the campus, having been president of his freshman, sophomore, and junior classes, a member of the Student Council for three years, on the Interfraternity Council, and a member of Skull and Key and Bull Dog Clubs.

J. M. FITZSIMONS

Mit FitzSimons is a junior and also a product of Boys High. Mit was preceded at Tech by his father, who captained the Jackets some twenty years ago. In addition to his football he is a track man. Outside of school FitzSimons ranks as one of Atlanta's leading bowlers.

L. C. HAYS

Larry Hays is still another Boys High product. At that institution he was All-Southern in 1932. Besides football, Larry is on the basketball and track teams. On the campus he was vice-president of his freshman, sophomore, and junior classes, President of the Skull and Key Club in his sophomore year, a member of the Bull Dog Club, and several other organizations.
McKINLEY
Halfback

MOORE
Quarterback

MORGAN

NIXON
Guard

Hays intercepting a Georgia pass behind his own goal line to protect Tech's 13-7 lead

FOOTBALL

C. B. PRESTON

Charley Preston is a junior and yet another Boys High graduate. In addition to football he is out for track. On the team he is first string center and is perhaps the biggest man. Last year he was a marvel of endurance. In Military, he tied with Jack Nixon for best drilled cadet this year. Charley happens to be a married man.

W. O. STREET

Billy Street is a senior who now lives in Miami Beach, Florida. He attended Tech High in Atlanta, where he was captain of his team. In addition to his football Street is an excellent golfer and a member of the golf team. He was president of his freshman and vice-president of his sophomore classes. Member of Skull and Key and other groups.

E. R. COLLINS

Red Collins is a sophomore living at East Point. This year he was understudy to Charley Preston and is considered an excellent prospect. Red came to Tech from Florida Military Academy. He is also on the track team.

G. L. EDWARDS

George, "Scrappy," Edwards is the smallest player on the team, weighing only 150 pounds, but he makes up for it in ability. His home is Macon, Georgia, where he was All-Southern at Lanier High School. Scrappy is a halfback where his favorite trick is eluding opposing ends.

A. E. JONES

Ed Jones is another Lanier High product. A sophomore and classmate of Edwards, the two have played football together for over six years. Jones is considered one of the finest prospects in the Southern Conference at end. In addition he is an excellent basketball player.
FOOTBALL

W. H. JORDAN

Bill, "Fatso," Jordan lives in Anniston, Alabama, but he attended McCallie in Chattanooga before coming to Tech. There, besides being an outstanding star on the football team, he was boxing champion of his High School district. He is another one of Tech's sophomore ends of whom much is expected by the experts. Bill is an outstanding basketball player and is also a track man.

M. J. KONEMANN

"Dutch," or "Coon," to his friends, Marion Konemann was the mainstay of Tech's backfield last year. Only a sophomore, he established himself as one of the leading backfield men in the Southern Conference. He is from Columbia, South Carolina, where he attended Columbia High. There he was All-Southern fullback for three years and a four letter athlete. "Dutch," is also a track man, and despite his 190 pounds is an excellent sprinter.

J. P. MORGAN

Jimmy Morgan, another of Tech's star sophomore ends, comes from West Plains, Missouri, where he played football, basketball, and ran on the track team, and was an honor graduate. He entered Tech as a Co-op, but was persuaded to go out for the team this year, and consequently changed to a regular. Despite the fact that he did not play any during his freshman year, he made the varsity and became one of its mainstays. Jimmy surprised his friends this spring by marrying a popular Atlanta girl.

J. U NIXON

Jack Nixon, from Augusta, Georgia, is a product of the U. S. Navy, where he made the All-Navy team. He was also wrestling champion of his ship, the Arizona. Last year he acted as captain of the freshman football team. He seems certain to hold down a guard post next year. He was president of his freshman and sophomore classes, President of Skull and Key, and a member of the Student Council for two years.
FOOTBALL

T. F. SIMS

Fletcher Sims is a sophomore and, like Jordan, a product of McCallie in Chattanooga, Tennessee, his home. At McCallie, he was a star at football, basketball, and baseball. This year he was first-string quarterback. He is also a member of the basketball team. Fletcher is another of the married members of the team.

J. S. MOORE

Jimmy Moore is a junior from Atlanta. Last season he saw service often as quarterback. Despite his lightness, he weighs only 150 pounds, Jimmy's speed makes him a valuable man to the team. In school he is an honor-roll man. Jimmy prepped at Boys High.

R. E. HOOD

Ralph Hood is another Atlanta boy and a sophomore in school. This year he served as understudy center and took part in several games, despite never having played high school or college football before.

E. S. THARPE

Ernie Tharpe is a brother of Coach Mack Tharpe and is the third Tharpe brother to play on Tech teams. He is a sophomore and this year played quarterback. His home is Moultrie, Georgia.

L. B. GLEN DENNING

Louis Glendenning is from Macon, Georgia, another Lanier High product. He is a guard and a sophomore at school.

R. W. HACKETT

Roger Hackett, from Rome, Georgia, is a sophomore. He plays halfback. Went to Darlington Prep.

J. M. RAINE

John Raine is a sophomore from Atlanta. He is a halfback.
FOOTBALL

J. E. CARMACK

John Carmack lives in Decatur, Georgia. He is a sophomore and plays guard. This year he served in several games as understudy to Wilcox.

S. A. ROBERTS

Sam Roberts is also from Decatur, Georgia. He is a sophomore and plays tackle on the team. Sam tips the beam at 200 pounds and is one of the biggest men on the squad. He came from Decatur High.

T. R. ALLEN

Tom Allen is a sophomore and plays end. His home is Atlanta, where he attended Boys High.

S. G. RONEY

Sam Roney is a sophomore from Macon, Georgia, and Lanier High. Sam is another of the team's married men. He plays tackle.

F. B. AVERY AND W. I. ROSAMOND

Bruce Avery and Bill Rosamond were senior student managers. They took charge of equipment and financial matters to perform an invaluable service to the team.

GREY DEVILS

Each year those candidates for the Georgia Tech football team who have not quite reached the par of varsity competition are grouped together as a separate team under the title of Grey Devils. To these industrious players is due much of the credit for the successes which come to the first team. Every week they learn the plays of Tech’s next opponent and run them against the varsity, taking everything that the first string players have to offer. Never in the headlines, playing often solely for a love of the game, these men, with determination and courage helped to build the fine gridiron material of last year into a winning team.

Although many of the Grey Devils will never play in a varsity contest, there were several during the past season who showed enough promise to warrant a varsity tryout. Therefore during the spring practice period these were groomed for permanent varsity berths. Dave Wilcox, who graduated from Tech last year after three years of starring at guard, was coach of the Grey Devils during the past season.

FRESHMAN FOOTBALL

The Georgia Tech 1935 freshman football team was one of the most powerful first-year elevens to represent the White and Gold in many years. Under the expert tutelage of Roy MacArthur and Joe Westbrook, former Jacket stars, these future varsity players were organized into a smooth-running unit that was often able to hold the varsity in check. During the year the team engaged in frequent scrimmages with the varsity and played games against the frosh teams of Auburn and Georgia.

On Columbus Day the team traveled to Auburn for their annual contest with the Baby Tigers. Auburn won, but it was not until a fumbled ball found its way into the hands of the Tiger center who, entirely unmolested, raced down the field for the lone score of the game which ended 6-0.

On Thanksgiving Day, before a crowd of ten thousand highly excited spectators, the Baby Jackets lost one of the most bitterly contested games ever played on Grant Field to the Georgia Bull Pups. Nervousness got the better of the yearlings and many opportunities to score were missed, despite the fact that the Georgia squad was slammed around much at will. The final score was 7-6. The proceeds of this game each year are given to the Scottish-Rite Hospital for Crippled Children. It is rapidly gaining in popularity to the extent that it is the most publicized freshman game in the South.

We wish to use as a close for the football section the names of those men who this year completed their football days at Georgia Tech: Eubanks, Gibson, Thompson, Chance, Street, McKinley, Wilcox, and Brittain, of the varsity, and Crichton and Marshall of the scrubs. These men have engraved their names alongside of Tech's immortals of the past as worthy of the name "Yellow Jackets."
BASKETBALL

Boulware scores against Vanderbilt
Georgia Tech's up-and-coming sophomore aggregation, after a slow start, finished up the season in whirlwind fashion, winning six out of the last eight games. Experience turned out to be the deciding factor in several of the early contests. The green sophs had worlds of ability, but required several games to get into suitable style for conference play. By mid-season Coach Mundorff had molded a team which no opponent could take lightly.

The Jackets opened the 1936 season away from home, meeting the University of Florida. The 'Gators, due mainly to the diminutive Eppert, who shot twenty points, defeated Tech 36-25. On January 8th, Tech journeyed down to Macon where Jimmy Slocum's Mercer basketeers were defeated 59-42. Ben Jones, the Canton sharpshooter, kept bringing the crowd to its feet with his brilliant play. He netted twenty-five points for the Jackets.

In their first home stand the Jackets let a thriller slip through their hands. Clemson won by a score of 35-32. Hyde and Boulware handled the ball in fine fashion. Tech defeated Mercer again in Atlanta on January 15th by a score of 42-20. Bo Johnston was the outstanding man on the floor. On January 17th, Tech won her first home game on the new Naval Armory court, defeating Tennessee 33-30. Ben Jones, Ed Jones, Bo Johnston, Sims, and Kidd played well together.

Traveling to Nashville on January 18th, Tech's quintet was beaten 42-25 by Vanderbilt. Clemson made it two
straight over the Jackets on January 25th at Clemson, the score being 39-31. Ben Jones made a gallant fight in the last half, scoring fourteen points. The Georgia Bulldogs came to town on February 1st, only to go home the loser by 29-21. Bill Jordan, in the role of a forward, played exceptionally well. The first half was marked by flawless play on the part of the Mundorff basketeers.

The Jackets next opponent was Auburn at Auburn. This game took place just following exams, and our boys were completely worn out. As a result, the Tigers out-pointed Tech 31-29. With renewed spirit the Jacket hoop-sters went into the Vanderbilt game on February 8th at the A. A. C., only to lose a tough one 42-40. Ben Jones' performance was excellent, shots from every angle of the court being made good.

At this stage of the season, Tech had won two conference games, and lost four. In order to qualify for the Conference Tournament, a percentage of better than 500 was needed. Six conference games remained. The boys really put on the pressure to win five of the six. Sewanee was defeated in Atlanta on February 12th to the count of 34-16. The Jones boys, Ben and Ed, were outstanding. Three days later Sewanee was again licked 58-35 at Sewanee. Every man on the squad played a part of the game. On February 17th, the Jackets avenged a former beating by taking Florida 39-22. Boulware exhibited a fine defensive game. He also sank nine out of ten free
BASKETBALL

throws. Auburn was next in line in Atlanta. Ed Jones, Johnston, and Boulware led the attack which ended our way 46-22.

On February 22nd, the Jackets went over to Athens for a tilt with the Bulldogs. This affair was a characteristic Tech-Georgia game in Athens. Led by Ben Jones, the Jackets won out 24-22. Tech dropped the final game to Tennessee 33-21 in Knoxville.

The Jackets finished their pre-tournament schedule well up in the Conference race. Tech drew Vandy in the first tournament game. The inspired Jackets met Vandy, who was favored to win the S. E. C. Tourney, and came off victorious at 42-37. The following night Alabama's Crimson Tide, led by Jim Whatley, defeated Tech in the semi-finals 43-34.

The University of Tennessee won the Southeastern Conference Tournament by defeating Alabama. Among Tech's laurels was the placing of Boulware on the second All-Conference Team as a guard.

Varsity letters were awarded Bo Johnston, Ben Jones, Ed Jones, Fletcher Sims, Lawrence Hays, Whack Hyder, Culver Kidd, Burtz Boulware, Bill Jordan, and Hank Crawford.

The freshmen played good ball to win the majority of their games. Freshman numerals were given George Smith, Bill O'Callaghan, Gus Lott, Doyle Butler, Bruce Reed, Byers, Gilmer and Munford.
The Varsity

TRACK
COMMANDING THE ATTENTION of all the track colleges of the Southeast from the outset, Tech assumed a role strikingly different from that of former years. The Clemson meet is the only one that has been held as this goes to press, but it is a good enough "indicator" to bear up our prediction that this year is Tech's big year in track.

Notwithstanding the losses of the scintillating Jim Davenport and Norris Dean, the team has shown remarkable strength in almost all departments. Norris Dean is back this year as an assistant coach to Coach Griffin. Perrin Walker, returning after a year's lay off, is burning up the track, and has already been mentioned for this year's Olympics in Germany.

Captain Harvey West is Tech's crack miler. Due to a leg injury received during the training period, West has not attempted to bear down in the mile yet, but it is confidently expected, in view of past performance, that he will be one of the outstanding milers of the South. In the Clemson meet he showed his versatility by capturing second place in the quarter mile, and running anchor man on the relay team, nosing out the Clemson man in a hair-line finish.

Start of the 120-yard high hurdles in Alabama was the winner. Tufts and Hyder are the Tech
Chick Aldridge, the lad with never a hair out of place, is proving to be a sensation in the two-mile event. He was the big gun on the cross-country team in the fall, and when track opened up the "experts" expected him to do very well in the two-mile jaunt. However, he proved to be better than even the most optimistic of them predicted. After the preliminary warm-ups, Chick astounded Coach Griffin by breaking the Southeastern Conference record in a time trial. He won the event at Clemson, and is expected to officially break the record before the season is over.

Batson, Fambrough, and Kestler are fighting it out for second place in the two-mile, and between these three points can always be depended upon.

Jack Pearce is the half-miler of the squad. During the Clemson meet Jack turned in a stupendous feat by running the mile in the remarkable time of 4:37 and turning around and running the half in the good time of 2:04. For this time of the year, the time was excellent, and it is expected that he will better the Tech record set by Jim Davenport.
Ed McLain and Jim Rankin are both consistently good half-milers and can always be depended upon for points.

Too much praise cannot be given Perrin Walker, alternate captain of the team, and the biggest point-gainer on the squad. His versatility has placed him as one of the highest scorers in this region in years, and as he scored 21 points in the Clemson meet to top all, the same is predicted for this year.

"Sundial" Martin took up throwing the javelin for the fun of it, and has turned out to be one of the best javelin throwers Tech has had in recent years. "Dutch" Kone-mann, of football fame, is also one of the guns of the track team, heaving the weights, and running the dashes. John Tufts, John Hyder, and John McKinley share like honors in the hurdles. John Tufts holds both freshman hurdle records, while McKinley and Hyder are newcomers in the art of timber topping. Taylor, Staples, Goldman, Bickerstaff, and Halman run the 220 and 440 dashes. Ben Jones does the high jump assisted by Walker.

Perrin Walker equaling his Southeastern Conference dash against Alabama. At the right is a study of
Gordon Wallis, along with Jimmie Moore, manages to garner points in the broad jump. Wallis and Charley Calhoun take care of the pole vault. Jack Rhyne, a sophomore, shows great promise of being a crack miler, along with Everett Johnson.

Jack Petersen is beginning to look like an excellent shot putter, and also takes some places in the broad jump. York and FitzSimons take care of the other weights, and are very dependable.

Coach Griffin has high hopes of his relay team, composed of Buzz Jones, Norman Vaughn, Jack Pearce, Harvey West, and Perrin Walker, winning the Conference Mile Relay. Performances of these men already indicate that Tech's relay team is one of the best.

All in all, Tech has a well-rounded and formidable outfit not lacking in individual stars, which are essential to any outstanding track team. It is probably the best team we have put out in recent years, and we hope to hear from it at the Conference meet in Birmingham, Alabama, this year.

Ice record of 9.6 seconds in the hundred-yard walker's stride.
As this goes to press the freshman track team has engaged in only two meets, one with Boys High, and the other with Georgia Military Academy. The Baby Jackets were successful on both occasions, having defeated the former by the score 71-50 and the latter 62.4-59.6.

Although at present no outstanding star has developed there are good performers in all events, and it is expected that the team will fare well in succeeding meets.

CROSS COUNTRY

After winning in succession dual meets with Auburn, Tennessee, Alabama, and Georgia, the 1935 Georgia Tech cross country team completed a perfect season by defeating all teams that entered the newly-formed Southeastern Conference meet which was sponsored by the Atlanta Journal. The winning of the Conference meet was characteristic of the other victories in that the team as a whole ran together and took places successively.

Under the excellent instruction of Coach George Griffin, the team was at all times in good shape, and able to turn in some fast times on Tech's new cross country course. Contrary to previous years, the team performed best against Georgia, defeating them with almost a perfect score.

The sophomore star, Chick Aldridge, led the scoring with a total of 38 points, followed by Captain Batson, whose score was 34 points.

Those graduating this year are J. K. Rankin, H. A. West, E. W. McLain, R. M. Jones, and J. B. Batson. However, strengthened by the addition of several outstanding runners from this year's freshman squad, the team is expected to continue its winning streak and again win the Southeastern Conference championship.

FRESHMAN CROSS COUNTRY

The freshmen, although they did not enjoy as many victories as the varsity, had a fairly successful season. Coach Griffin uncovered several runners of promising talent who will be a great aid to the varsity cross-country squad next year. The Baby Jackets defeated the Georgia Military Academy and Tech High School, lost to Boys High School, and placed second in one quadrangle meet.

MINOR SPORTS
FENCING

FENCING AT TECH first received official recognition at the end of the 1934-35 season. It was begun in 1929, through the efforts of Professor Morenus and Paul Wimberly, a student at Tech holding the Southern Amateur Foils Championship. Sponsored by the R. O. T. C. and the Foil and Mask Club, the team participated in intercollegiate matches and three Southern Intercollegiate Tournaments.

The 1935-36 season began with only one letter man, R. H. Hutcheson, returning. However, a team gradually took shape, until an excellent season was foreseen. The first two matches were lost to South Carolina and Rollins. The team then struck a winning streak, and came out ahead against Alabama, College of Charleston, Vanderbilt, and the Atlanta Fencing Club. In return matches with Alabama and South Carolina, the team suffered two defeats. The season closed with decisive victories over the College of Charleston and the Atlanta Fencing Club.

In the annual intramural contests sponsored by the team, R. A. Conklin finished as victor, with the Navy squad winning the team matches.

ON GUARD.
THE SWIMMING TEAM, under the direction of its new coach, Professor Hartzell, began the season with an unusually well-balanced line-up. The schedule opened with a practice meet with the Atlanta Y. M. C. A., the Jackets winning by a 47-37 score. The first intercollegiate opponent was Emory, who went down to a 52-32 defeat, House and Plage scoring the high points for Tech. The next meet was between the Tech and Auburn varsities and their respective freshmen squads. The Jackets won both contests by scores of 48-36 and 42-33.

In a triangle meet held between Tech, Emory, and Tennessee, the team came off second, with Plage, in the 150-yard backstroke, starring. In a second triangle match between the Atlanta Y. M. C. A., Emory, and Tech, the squad finished in the middle position. The last two weeks of the season saw Georgia go down to defeat twice before the superior power of the Jackets. The schedule ended with House and Plage holding the high point positions for the year. Letters were awarded Coley, Haile, Holst, House, Milligan, Plage, and Presilla.

TENNIS

Under the able tutelage of Coach Earl Bortell, Georgia Tech's tennis team has continued to set the pace for Southern tennis laurels by winning twenty-three consecutive matches in the past three years to the date of this writing.

Burtz Boulware, who stepped into the Number One position vacated by Billy Reese, himself one of the leading tennis stars of the South, has performed with excellent ability as is shown by his ranking of Number Thirteen in the Intercollegiate rating. In line behind Boulware are Fernandez-Morrell, the Cuban ace; Tommy Tumlin, a finished player performing exceptionally well in doubles play; Bill Moore, the lanky southpaw from Arkansas; George Silva, another outstanding player; and Henry Swift. These players make up a well-balanced team, and have thus far proven too strong for any of their opponents.

The season opened with Davidson, who gained only one point, when Lewis proved to be too good for Morrell. The following week, the University of Tennessee was sent home with a complete shut-out at the hands of the Tech racquet-wielders, and a return engagement at Knoxville proved decisively that the Tech team was much too strong for the Tennessee aggregation. The University of Florida gave the stiffest opposition to the Jackets when the Florida men won two matches, defeating Silva and Swift after three hard-fought sets in both matches. As this goes to press, the boys have three more matches, Georgia, Alabama, and Emory, but it is expected that the end will see another undefeated season.

GOLF

Despite the loss of almost the entire 1935 team, which had gone undefeated for three years and last year placed third in the National Intercollegiates, this year’s team, composed chiefly of sophomores, has shown up remarkably well, due in a large measure to the able coaching of Professor Dennison.

The name of Tommy Barnes has long been associated with the best in southern golf. He is a former Southern prep champion, and is always a threat in any tournament. Stanley Holditch came to Tech from Darlington School, where he was the mainstay of the team. He has won many tournaments, including the Columbus and Albany Invitations. Billy Street, a senior, previously handicapped by spring football practice, has this year played well in every match. Ben Jones, besides playing basketball and highjumping for the tracksters, still has time to play a fine game of golf, which features his long driving. Billy Eager, from Valdosta, a great golfing town, is one of the better players of South Georgia. Billy Ginn, the only member of the ’35 team to return, has played consistently good golf during his entire college career, and in particular during the ’36 season.

With several fine victories already won, and the series with Georgia and the Southern Intercollegiate coming up, the team is looking forward to completing a very successful season.

In closing, the 1936 BLUE PRINT staff wishes to extend its appreciation to Mr. Marion Ware, Mr. Henry Gaspar, and the Gaspar-Ware Studios; to Miss Helen Morgan, Mr. Bill Bradley, and the Photo-Process Engraving Company; to Mr. Charlie Young and the Foote & Davies Printing Company; for their efforts and their invaluable assistance in the preparation of this volume.
Book Seven

ADVERTISING FEATURES
As the bustling center of a dynamic new South, Atlanta has a definite metropolitan personality.

Humming wires constantly flash messages throughout the world over lines centering in Atlanta. Trains filled with passengers, and cars loaded with freight, shuttle to and from the city over gleaming ribbons of steel; paved highways into Atlanta are filled with motor vehicles while high overhead, airplanes point racing engines toward the Atlanta airport, as the business of a widespread territory is directed from Georgia's capital city.

Atlanta has still another personality, reminiscent of the old South. Her people are the same soft-spoken southerners. Many of her homes are tall colonial mansions, and she still is a center of southern culture. Here are five of the South's leading universities and colleges, and seven professional schools. Broad estates, palatial homes, artistic gardens, shaded streets and parkways present colorful pictures such as are seldom seen in a city its size.

Parks and playgrounds with facilities for many forms of sport are to be found throughout the city. Golf, baseball, swimming, and boating vie with tennis and football in popularity.

As an integral part of this progressive metropolis of the South, Georgia Tech offers to its students many opportunities not found at other institutions of higher learning which are not so happily located.
THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of ability and ambition a training which will fit them for positions of responsibility and power. The national reputation of this institution is based not on claims, but on results. Its greatest asset is the record which its alumni are making in the productive work of the world. Georgia Tech graduates succeed because they have been trained both to think scientifically and to work efficiently.

Courses in Civil, Electrical, Mechanical, Textile, Chemical, Ceramic, Aeronautical and General Engineering, Architecture, Industrial Management and Chemistry.

Coast Artillery, Signal Corps, Infantry and Ordnance Units of the R. O. T. C., also Naval R. O. T. C.

The staff has taken the liberty of departing from the usual custom of making the ad section the humor section of the book. Instead we have attempted to present a group of unusual and interesting views of the city in which the industries represented by our advertisers play such an important part. The aerial photographs were all taken by the BLUE PRINT'S aerial photography staff composed of Tech students. All other views were taken especially for the BLUE PRINT by Tech students and Gaspar-Ware Studio.

The BLUE PRINT urges each student to remember that the advertisers in this book not only offer outstanding goods and services but have shown themselves to be interested in Tech and Tech Students. Each of these firms deserves your attention when buying in any of the many lines represented, as they have contributed much towards making your annual a success.

THE REASON WHY

That MOLLOY-MADE covers have been used on so many of the nation's leading annuals over a long period of time is testimony to the fact that they really do represent more value.

The Blue Print, like many other leading annuals, started using MOLLOY-MADE covers "way back when"—and the MOLLOY trademark on the cover of this 1936 issue is the best evidence of an eminently satisfactory standard of quality and service throughout the years.

Atlanta ranks third in the air traffic of the nation, being surpassed only by Newark, N. J., and Chicago in the number of scheduled flights. Two of the country's major airlines make Atlanta their terminal. Last year 31,604 people, not including through passengers, made Candler Field their destination or point of departure.
Success In Life

depends on selecting a career which combines financial rewards with unlimited opportunities commensurate with one's ability.
Both are assured to the college graduate whose ability and earning power measure up to the standard required for successful life underwriting today.
College men selected by The Penn Mutual Life Insurance Company can start their careers on a fixed compensation basis, or on a commission basis if they prefer.
Send for booklet: "Insurance Careers for College Graduates."

Students come from all over the country and from many parts of the world to attend six of the South's leading universities and colleges located in Atlanta. Almost every conceivable type of education is offered by these schools, and they are rated among the nation's best.

Visitors to Atlanta never fail to be impressed by the colorful beauty of the residential sections of the city. Every style and period of architecture may be found in beautifully landscaped settings. Green lawns, artistic gardens, and shady parks may be seen in every part of the city.

LAKEWOOD PARK
One of the South's largest amusement parks. Site of the great Southeastern Fair, Atlanta's annual agricultural and industrial exposition. Many of the country's finest drivers meet on the Lakewood track, thrilling the crowds with their skill and daring, in competition for the "Golden Helmet," symbol of the "dirt track" championship of the Southeast.
