the staff has attempted something new in themes. in our effort to make this book a real living memory --- a reminder of the happy days left behind, we have used as an introduction to the various books the artists' conception of student life. a theme of real campus life has been our objective. we hope you like it.
"Yet all experience is an arch wherethro'
Gleams that untravelled world..."
"But let my due feet never fail
To walk the studious cloister's pale,
And love the high embowéd roof,
With antique pillars massy proof."
"Saw the heavens filled with commerce, argosies of magic sails,
Pilots of the purple twilight, dropping down with costly bales . . ."
"... Most blest
He who has found our hid security."
"And storied windows richly dight,
Casting a dim religious light."

"Turrets and pinnacles in answering files,
Extended high above a dusky grove."
"This is the wey to al good aventure."
ADMINISTRATION
President of Georgia Tech for the past thirteen years, Dr. Marion Luther Brittain has become renowned as a leading educator. He received his A.B. degree from Emory University, his LL.D. from Mercer University, University of Georgia, and Emory University.
WILLIAM VERNON SKILES

Kindly, learned, austere, possessed of the dignified reserve of a scholar and the sympathetic geniality of a gentleman, Dean William Vernon Skiles has achieved the highest of rewards, the love and admiration of both student body and faculty. He received his B.S. at the University of Chicago, his A.M. at Harvard University, and his Sc.D at the University of Georgia.

Treasurer
In March, 1930, the Guggenheim Fund for the Promotion of Aeronautics awarded the Georgia School of Technology the sum of $300,000, for the establishment of an aeronautical center of learning and research in the South.

The Aeronautical Engineering curriculum offers opportunities for both undergraduate and graduate study. Courses are offered in Aerodynamics, Theory of Flight, Airplane Design, and Aeronautic Laboratory (Wind Tunnel Practice). The curriculum in addition contains a background of general studies which are essential to the engineer no matter what his specialty.

The Department is well equipped for its work having in addition to classrooms and offices, two wind tunnels, a model shop, a large drafting room, a branch library, and it has also recently acquired a 300 horsepower autogiro for flight testing.

As this is the only Guggenheim School in the South, much is expected of it from the standpoint of aeronautical research and the present program places particular emphasis on the problems of safety in flight and streamlining of high speed vehicles both of which are subjects of vital importance in this new and rapidly growing branch of engineering.

MONTGOMERY KNIGHT
Director, Daniel Guggenheim School of Aeronautics
In 1901, with the growth of the Georgia School of Technology, a course in Engineering Chemistry was established. Purposely it was not called Chemical Engineering as it is now because of the lack of facilities to offer studies recognized as essential to that degree. In recent years department expansion has made it possible to change the title of the course to Chemical Engineering.

In 1906 there was first offered a four-year course in Chemistry for those more interested in Chemistry as a pure science than its industrial applications. However the engineering course has always been the more popular.

In normal times industries absorb our Chemical engineers who enter their profession in chemical manufacturing plants with the hope of becoming managers, control men, or operators, while others take up the design of machinery. Chemists are usually inclined toward laboratory and research, while many continue their studies in various graduate schools.

It is our belief that the growth of industrial activities in the South will offer an attractive field for our graduate holding either degree.

GILBERT HILLHOUSE BOGGS
Head of Department
Obviously the main objective of the course in Architecture is to train men to become architects. As designers and supervisors of construction, architects are called upon to take a leading position in the building industry, and must possess a wide variety of knowledge and capabilities. The school course is necessarily of considerable breadth and duration. In addition there is a secondary objective based on a recognition of the fact that an architectural education may serve as a good preparation for certain occupations outside the profession of architecture.

Architecture is a creative field and combines the imaginative and the practical. Those who have a leaning towards both the artistic and the scientific find this an absorbing course of study.

The problem method used in design, by which each student works out his own solution of a given problem, parallels certain phases of actual practice and serves as the best possible preparation for the all-important role of designer in an architect's organization.

HAROLD BUSH-BROWN
Head of Department
GENERAL SCIENCE

The General Science course leading to the degree, Bachelor of Science, was established in 1923. It was designed for three classes of students: (1) for students who wish a broad training in general scientific subjects, (2) for students who have the time and means to secure a general education before taking up professional curricula, and (3) for students who plan to go into business or industrial activities that do not require highly specialized training. In this course science predominates, but provision is made, however, for a wide choice of electives in business, engineering, and general studies. It is the only course offered by the institution in which this wide choice of electives is permitted.

The General Science course will be discontinued with the class graduating June, 1937. To replace this course have been established courses in General Engineering and Industrial Management.

DEAN W. VERNON SKILES
Director

DEAN W. VERNON SKILES,
B.S., A.M., Sc.D.
B.S., University of Chicago; A.M., Harvard University; Sc.D., University of Georgia.
Beta Theta Pi, Phi Beta Kappa, Omicron Delta Kappa, Georgia Academy of Science.
Civil Engineering is the profession of construction. Its story needs no writing for it is engraved on the earth itself. Modern canals, dams, highways, water systems, bridges, and sky-scrappers picture civil engineering achievement as likewise do the pyramids of Egypt, the aquaducts of Rome, and the centuries of intervening construction. As long as construction work is required to further civilization, so long will there be a field of endeavor for these builders who will serve for the most part, as they have in the past, unknown and unrecorded.

The early engineers did not have the advantages of an engineering education for engineering colleges have been developed, with few exceptions, in the last two generations, and, even now, the science of how to build cannot be taught permanently since methods change rapidly as research increases knowledge.

The Civil Engineer needs a thorough understanding of fundamental data which he can use on each project rather than specialized information of extremely limited application, therefore the Civil Engineering students at Tech are drilled thoroughly in basic subjects.

FRANKLIN C. SNOW
Head of Department
Mechanical Engineering was the first course to be established at the Georgia School of Technology. This course was given several years before any other course or degree was offered. The purpose of the Mechanical Engineering curriculum is to teach the student the fundamentals of engineering so as to best fit him for entering the profession. No attempt is made at specialization, although a graduate year is offered for those who wish to specialize in some particular field. The opportunities for graduates are many. They may enter the field of management, manufacturing, transportation, power production, research, and many other fields of like nature. The "New Deal" specifically contemplates the removal of several million acres of land production in the South—this means that the industrial development of the South will be pushed, and the opportunities for graduates in Mechanical Engineering are therefore greatly increased. Out of the class of '34, 48 men of 56 are already placed in engineering work, which is unusually good for a depression year.

ROY S. KING
Head of Department

ROY STEVENSON KING,

Sigma.
Funds for the Electrical building were provided in 1900, at which time the Department was founded, although degrees in Electrical Engineering had been given in 1898.

The curriculum is planned to give one who pursues it an excellent foundation in chemistry, physics, mathematics, economics, English, and public speaking, as well as the fundamentals of radio, hydro-electric, steam power, and electrical engineering in general. Parallel with the theoretical work are carefully planned laboratory courses, beginning with the first year in Chemistry and continuing throughout the four years in the various engineering branches studied. The laboratory work is so conducted as to enable the student to verify theory by performing fundamental experiments. The engineering subjects together with the others give an excellent mental training as well as a first-class ground work for the graduate, so that, even though he does not follow electrical engineering, his college education is found to be as good as any he could have taken for general purposes.

THOMAS W. FITZGERALD
Head of Department
CERAMIC ENGINEERING

Organized in 1923, the Department of Ceramic Engineering is the oldest in the South and one of the relatively few in American universities. The courses of instruction are designed to give a basic theoretical and practical knowledge of the mineral and clay-working industries, with emphasis placed upon the development of our native resources.

Favored with advantages in raw materials, labor fuel, and climate the South has logically encouraged ceramic industrial growth. Many branches of the industry are represented in satisfactory numbers, and these are turning to technical guidance for better control of cost and quality. Other ceramic industries such as those producing dinnerware, electrical porcelain, sanitary ware, and fire brick are either not represented or are not in the numbers the market or industrial advantages justify. In this direction the future is promising. Through its graduates, research, and facilities the Department of Ceramic Engineering is taking a leading part in southern clay-working progress.

ARTHUR VAN HENRY
Head of Department
The Textile Department gave the first instruction in textile education in the South in February, 1899. In December, 1897, the Legislature made an appropriation for the establishment of the Textile Department, provided that the friends of the school contribute a like amount. Largely through the gifts of Mr. Aaron French, of Pittsburgh, it was possible to raise these funds. In commemoration of his generosity, the Textile Department is known as the A. French Textile School.

The course of instruction leads to the degree of Bachelor of Science in Textile Engineering, and includes a sound foundation in engineering subjects, in addition to the purely textile branches. The work of the first three years is uniform, but during the senior year, the student may have the choice of several options.

Textile manufacturing has, during recent years, become the leading industry in the South, and offers unusual opportunities for the technically trained man. Our graduates are filling positions of responsibility in the various mills and branches of the textile industry throughout this state and section.

CHARLES A. JONES
Director, A. French Textile School
In Memory of

C. A. Summerlin, Jr.
CLASSES
SENIORS
Senior Class

It seems as only yesterday that the Graduating Class of 1935 entered Tech, and were buying chapel seats, paying rent on the radiators and contributing to a fund to erect a canopy over the sun dial. Indeed it has been a pleasure to have been here for the past four years. There are times when the sledding has been hard it is true, but if the friendships we have acquired were our only accomplishments we could still look back on four happy years.

The span of years from 1931 till 1935 have wrought many changes with the group of Freshmen that entered Tech from the wilds of their native Climes, riding street cars for the novelty of it and learning to cope with the complications of the dial phones, believing we were the only thought of the local girls as they so adequately described it, learning year by year the discount current in all the girlish prattle.

From the beginning with an enrollment of 600 the scythe of the faculty, the sting of the depression, and circumstances too innumerable to reiterate here, have cut the class to 340, who, in June, will march to the tune of Onward Christian Soldiers, all capped and gowned, to receive the goal of our endeavors, the sheep skin.

It is our hope that the class has etched on the escutcheon at Tech a record worthwhile for our having been here.

As you scan the pages of this volume we know that the accomplishment compiled will speak for itself. We hope that as the pages of this book have yellowed with time that we
Senior Class

can look back upon a work that is well done—one that will reflect credit upon our Alma Mater. We are positive that its pages will constantly remind us of the happy moments that we have spent with each other laying the foundation for what is to come. To cope with adversity, at its best is a herculean task, however, we cannot help but feel that our contacts in college, in the social life, the classroom, in the labs, the shops, on the athletic fields, and in every phase of college endeavor, have helped us to build up the proper foundation for coping with the most intangible of forces—the future.

No resume of the activities of the class would be complete without a word to the faculty and administration. There have been times that all of us have been prone to be all but complimentary to these groups, but looking back we find they have been most lenient, human and understanding. We believe that under the same given conditions we ourselves would have been prone to act very unwisely in cases that they have handled without flaw or imperfection, that at the time were very hard to cope with or understand.

The Class of 1935 makes no glaring or glamorous statements as to the future. We make no predictions for future presidents, or revolutionists of the Universe. However, we do believe sincerely that whenever, wherever one of the class may be seen in the future, regardless of the field of endeavor, we are positive we will find men that are giving 100% to make our Alma Mater proud of our ever having entered its portals as meek Freshmen in 1931. When the sea of life gets roughest and the sailing seems impossible, memories of school days at Tech will make the calm. After all, the score is minor, the way the game is played counts, and we are sure that every man of the Class of 1935 will always play a game of which Georgia Tech will be proud.

* "Billy," Sigma Alpha Epsilon, presents a very diversified list of activities. President of the Student Council, Lieutenant Commander of the Navy, Anak, and activity in practically every field of student life, speak for themselves, and "Billy" Glenn's ability.
Mac Keiser has found plenty of time for activities after a hard day of learning to become a Mechanical Engineer. As a member of the tennis team he is outstanding. His work on publications, Pi D. E., and his fraternity, Pi Kappa Phi, have made Mac a very popular student.
Chris Irby, Sigma Chi, Senior Football Manager, and countless other activities, has given more than his share of time to Georgia Tech. Accomplishment with a pleasant personality is hard to beat.
Hoke is a true southern gentleman, and a member of Kappa Alpha fraternity. His activities include many hours on the publications, a member of Bulldog, Skull and Key, Scabbard and Blade. Hoke Smith Simpson is an ardent worker, admired by his fellow classmates.
"Bucket-Head," a member of Phi Delta Theta, Inter-Collegiate Golf Champion, Anak, O. D. K., Phi Kappa Phi, Business Manager YELLOW JACKET, coupled with scores of other honors, a most pleasing personality and an aptitude for accomplishment makes Charlie Yates a truly outstanding student.

GENERAL SCIENCE

Mr. "Dog" Dawson, O. D. K., Student Council, and President of the Scientia Club, combined with other honors makes Pierre Dawson well in the know of things at Tech. However, without his cheery disposition and his pleasing personality, we would have missed lots from his association. His fraternity is Kappa Sigma.
Marion Moody is a Phi Sigma Kappa. His activities and his interest in school life has brought him many friends all over the campus. His O. D. K. and Tau Beta Pi keys are a result of hard work, leadership, and ability.
"Tony" comes to us from the Alpha Tau Omega's. His activities are outstanding, and Thornton Dees, if he had only the Art work of this volume to his credit, could be justly proud of a work well done.
John Gray Commins is President of the Non-Fraternity organization. In other words, you political fraternity men beware. Gray has piled up a bunch of honors for himself in publications, Kappa Eta Kappa, and Pi Delta Epsilon.
Jay Cannon, a member of Beta Theta Pi and Editor-in-Chief of the BLUE PRINT—who hopes that he has portrayed the activities of your college days at Georgia Tech in a fashion that will give you many pleasant memories.
Phi Kappa Tau gives us Bob Eley. His many school activities linked with a pleasant smile, a cheery greeting, and the asset of being a good mixer makes Bob a very popular member of the Senior Class.
Charlie Sumner is the Business Manager of this book, and, needless to say, his extended trip to Europe this summer will be the envy of many a student. Delta Tau Delta claims "Foolie" and is proud of his activities.
"Pogie Joe," Inter-Fraternity Council, Phi Eta Sigma, Scientia, Bulldog, faithful worker in the cause of Kappa Sigma, with his wit, pleasing personality, and aptitude to be a real fellow at all times has made Joseph Hall a stand out.
Charlie Hoyt from Jacksonville finds his course very interesting and has made a big success in it. His scholastic honors, all the way from four years of Honor Roll to Phi Kappa Phi, his work with the band, and many other honors put him high in the list of outstanding students.

Fredric Holloway, has turned in an excellent account of his having been here four years.
"Freddie" is Business Manager of the TECHNIQUE, O. D. K., Varsity Baseball Manager. Presents a well-balanced account in activities for his having been in our midst for four years. A conscientious worker, a man who can be depended upon; Sigma Chi is Fred Coward’s fraternity.
First row: McClanahan, J., McClanahan, W., McCready.

Third row: McNair, M., McNair, S., Meehan.

Artist, cartoonist, and student are only a few of the words which describe Aben deAlmar. His participation in a variety of school activities and his membership in the leading organizations on the campus will be missed when he leaves us.
John Ridley brought us the most successful series of dances ever seen at Georgia Tech. Besides devoting most of his time to his job as President of the Interfraternity Council John is Anak, O. D. K., and participant in many other school activities. His fraternity is Phi Delta Theta.
Chi Psi gives us Chester Smith. Even the morning after the night before Chester can always give us a big smile. His work for his fraternity and for the organizations on the campus have made him a very popular member of the lodge.
"Al," who hails from far away Minnesota, Red Wing, to be exact, has made a record that is plenty worthwhile during his four years at Tech. Anak, Senior Vice-President, Non-Fraternity Executive Committee, Debater, Y. M. C. A., and Yellow Jacket Club. His work on the Yellow Jacket Club has been one of the years standout.
Before giving brickbats or bouquets to the editor, please see this gentleman, or architect if you prefer, at the Chi Phi House. He drew our cartoons for the subdivision pages. We like them, don't you? Thanks, Hal Greer.
"Pee Wee," Tackle par excellence for four years on the tornado, making All-Southern conference selection. Alternate captain this year's varsity squad. A cheery hello and a smile for everyone have made many friends for Clyde Williams, Sigma Nu, at Tech in the four years he has been with us.
May the BLUE PRINT take the pleasure of formally introducing Mr. Albert "Hoot" Gibson, or just "Socially Speaking" if you prefer. To him we owe much of the credit for the success of the three publications, a fine set of dances, and for his help in every phase of school activity.
Charlie Smith—a really dependable guy that seems to know what it's all about. A member of Sigma Alpha Epsilon fraternity and 0. D. K. His scholastic and track record is one to be mighty proud of.
First row: Stanaland, Steedman, Steele.
Second row: Stender, Stevens, H., Stevens, R.
Third row: Stevenson, Suarez.

Honor Roll; 2nd; 4th; President's Cup; 21st; Kappa Eta Kappa; Tau Beta Pi; Phi Kappa Phi; E.A.I.; Non-Fraternity Organization.

"Gordon," Anak, O. D. K., Tau Beta Pi; Phi Kappa Phi; Sigma Nu President, Varsity Swimmer, Blue Print; Yellow Jacket and campus honors in practically all phases of student life, have endeared Gordon Catts to the class of '35, a four years well spent, a man that will be missed greatly.
"Rut," Track man, honor man, a loyal worker in his Fraternity, Chi Phi. A pleasant smile, a hello for everyone has made a name for him while in our midst. Among the fairer sex whether or not they be Debutante, High School, Seminary or College girls, all know Rutledge Tufts.
Sidney McNair comes to us from Macon. A member of Sigma Alpha Epsilon and a valuable asset to the military department where he is Cadet Major. His many campus honors and a pleasant congeniality have won him a place in the realm of things at Tech.
Vin," Yellow Jacket Editor, Tau Beta Pi, President, O. D. K., Phi Kappa Phi, and campus honors in diversified fields belong to Phi Gamma Delta, Vincent Millen. These coupled with the idea that school really is a place for an education have accomplished lots for Vin.
Jere Perkerson says that conventions are quite the thing and that Boston is the place. Jere plays football, is a member of Anak, and is a leader in student activity. His fraternity, Sigma Alpha Epsilon.
Chick Meehan is President of the Y. M. C. A., Lieutenant Colonel of the Regiment, Member of the Student Council, and many other honors, all of which his fraternity, Phi Sigma Kappa, is justly proud.
JUNIORS
Junior Class

One morning in September, 1932, Dean Floyd Field found himself face to face with 494 new faces,—boys, who in the preceding June had graduated with high honors, or what not, from a great variety of high schools in the South, East, North, and West, but who now were insignificant freshmen in the campus life of Georgia Tech. Dean Field himself will probably admit that they were not a very intelligent looking group, but in their three years of higher education the members of the Junior Class have proved their merit in all student activities.

It was not long until the class was organized, and officers for the year elected: Billy Street, President, John Wilcox, Vice-President, and Ernest Lindsey, Secretary-Treasurer. During the year numerous members of the class turned their bountiful supply of energy towards accomplishment in scholarship, student activities, and athletics. The most outstanding successes of the year were made in scholarship, for probably no class can boast of as many good scholars as this one with Ralph Cole, Fred Cox, James Brown, Sam Gibson, Vernon Lyons, Don Salmon, and many others who have upheld efficiently the name of the class over a three-year period.

The class officers of the Sophomore year, Sundial Martin, President, Culver Kidd, Vice-President, and Billy Street, Secretary-Treasurer, were ably succeeded in the Junior year by Dan Holsenbeck, President, Culver Kidd, Vice-President, and Mason Williams, Secretary-Treasurer.

Now in the Junior year we find the class of 331 members divided among the various departments as follows: Architecture, 16; Aeronautics, 21; Ceramics, 2; Chemical Engineering, 47; Chemistry, 7; Civil Engineering, 33; Electrical Engineering, 50; General Science, 76; Industrial Management, 11; Mechanical Engineering, 58, and Textile Engineering, 10.
Junior Class

Outside of regular studies we find many Juniors lending their talents to many school activities. Among the outstanding workers on school publications we find Allen Morris, Harvey Fell, DeWitt Worrell, Culver Kidd, Fred Cox, Delos Spring, Phil Harr, Pop Siegel, Ed Sack, D. L. Echols, Dave Luntz, Charlie Lokey, Harvey West, and George Smith. Foremost in the activities of the debating club we find Sam Gibson and Rayford Kytle. To the work of three Juniors, Johnny Williams, Jimmy Simmons, and Rayford Kytle we owe much of the increasing importance of the Y. M. C. A. in the daily lives of Georgia Tech students. Representing the class on the Student Council we find Dan Holsenbeck, Culver Kidd, Mason Williams, John Wilcox, and Jack Rountree.

In the field of sports the Junior Class is remarkably outstanding. Among our football heroes we have John Wilcox, Lefty Eubanks, Hoot Gibson, Oscar Thompson, Pug Boyd, Phil Chance, Kitty Katz, Billy Street, Sundial Martin, Fulton Brittain, Bud Lindsey, Gilbert Stacey, and John McKinley, while the Senior managers for next year have been announced as Willie Rosamond and Bruce Avery. In basket-ball Gilbert Stacey, Kitty Katz, Hank Crawford, and Culver Kidd are leaders, while on the diamond such stars as Pug Boyd, Hoot Gibson, Mucho Lyons, Bill McNenney, Sundial Martin, Carl Waits, John McKinley, Jerry McDonald are juniors. Lee Mingledorff is junior manager. Track claims Harvey West, Jimmy Rankin, Gilbert Stacey, and Julian Watters; swimming has Mason Williams, Avery Austin, and Frank Chapman; Billy Ginn is our representative on the tennis court; and Hank Crawford, Fernandez-Morrell, and Tom Tumlin are fencers.

Last but not least the Junior Class is proud (?) to possess such outstanding social successes as the following group. There is no need to give details as everyone is quite familiar with the activities of Billy Ginn, John Oster, Pop Siegel, Charlie Grace, Dan Holsenbeck, Freddy Fuchs, Allen Morris, Charlie Lokey, George Felker, Ed Spivey, Dick Wentz, Dave Echols, Culver Kidd, Delos Spring, Harvey Fell, Avery Austin, Bill Finch, and others.

MASON WILLIAMS

Honor Council

C. R. Yates
W. H. Glenn
R. P. Dawson

R. A. Hefner
G. H. Boggs
N. C. Ebaugh

Left to right: Yates, Glenn, Dawson, Hefner, Boggs, Ebaugh.
The Georgia Tech Student Council was conceived and organized by Dean W. Vernon Skiles in the year 1923. His primary purpose was to establish a connecting link between the faculty and the student body in order that the latter might have a medium through which they could voice their opinions and complaints to the school officials. Generally speaking, the Council was given the job of supervising all phases of the campus life except the work of the Y. M. C. A., the Athletic Association, and the social fraternities. More specifically, it has charge of all student elections; it directs all branches of publications work; it takes action on all suggestions of students and rules on their complaints; it disciplines cases of student misdemeanors, represents the student body at all student conventions and other meetings of student leaders and serves in all other branches of work as may arise under the duties prescribed by its constitution.

The Council is composed of twenty-four men. Five are elected to represent the senior class, four for the junior class, two for the sophomore class, and two from each section of co-op students. The other members are the president of the Interfraternity Council, the president of the Y. M. C. A., the editors of all publications, and the presidents of each class. This group takes office at the close of each school year and serves intact the following year. Its officers are elected by the Council at the first meeting in September.

During the past year the Council has been extremely active although there have been no outstanding instances of extreme legislative or judicial work. This was due perhaps to the absence of rival political cliques on the campus this year.
Student Council

The Council has proved itself worthwhile to the students in that it has given financial aid to practically every organization and society in the school. The perpetuation of several groups has been contingent on loans and gifts from the Student Council treasury. All through the year the council has seen that Georgia Tech has been well represented at both press and governmental conventions. Certain of the employees of the school, usually paid from other funds, have been carried this year by the Council.

This year the Student Council has shown an interest in the youth movement of the nation by actively participating in the National Student Federation of America. Tech was host to the president of that organization early in the year in order that the students might get first hand information to the purposes and workings of the Federation. Also, plans were laid to form a city-wide student forum to discuss pertinent campus and national problems with other local school leaders.

Then too, the Student Council put a stop to all suggestions of graft in connection with the running of the Interfraternity Dances. A rigid investigation was conducted by the Council and everything was shown to be above board.

In addition to all of these accomplishments the Council has handled the usual routine of matters which arise yearly very successfully. Problems from the publications, selection of new editors and business managers, suggestions of moves beneficial to the student body were all carried out or disposed of in a satisfactory manner.

In general, it may be said that the Georgia Tech Student Council has just completed one of its most progressive and harmonious years.

Among the prizes offered for scholarship by the Georgia School of Technology is membership in the honor society, Phi Kappa Phi, to which a limited number of seniors representing all departments are elected annually. Phi Kappa Phi is a national organization with chapters in many of the leading universities and colleges, and wherever it has been established it has proved a stimulus not only to scholarships but to all-round manhood. The society was founded in 1897 and installed here in 1914. The local chapter of Phi Kappa Phi awards annually a scholarship cup to that member of the senior class who has made the highest average on the basis of all work taken in this institution.

Tau Beta Pi

Tau Beta Pi is a national honorary engineering fraternity founded in 1885. The Alpha Chapter of Georgia offers membership to twenty-five engineering students of each graduating class who can qualify according to standards of scholarship, character, loyalty, personality, leadership, and school activities. The fact that Tau Beta Pi is the second oldest honorary fraternity in the country and numbers among its members many of our leading engineers, makes membership in the society a coveted honor. The local chapter of Tau Beta Pi gives annually a scholarship cup to that member of the sophomore class in Engineering or Architecture, who has made the highest average on the basis of the work of three terms.

Phi Eta Sigma

Phi Eta Sigma, honorary scholastic fraternity devoted to the promotion of scholarship among students of the freshman class, was founded at the University of Illinois by Dean Thomas Clark. The chapter at Tech was established in 1930 and has since done much to encourage study among the first year men. In 1930 only two per cent. of the freshman class were eligible for membership, while in 1933, more than ten per cent. were able to become members.

Pi Tau Sigma

Pi Tau Sigma was founded in 1915 and installed at Georgia Tech in 1932. A National Mechanical Engineering Fraternity which elects to membership outstanding mechanical engineering students in the junior and senior years. An annual reward of an engineering handbook is made to the sophomore mechanical engineering student who has attained the highest average on the basis of three terms' work.

Pi Delta Epsilon

In 1909, Pi Delta Epsilon was founded at Syracuse University in an effort to stimulate interest in collegiate journalism. Since then it has grown to an organization of forty-six chapters and 6,000 members. The local chapter, founded in 1922, is one of the strongest of the fraternity.

The Pi Delta Epsilon Fashion Show is a feature of the collegiate year, interesting merchants in advertising in Tech publications. Two dinner dances are held annually after each initiation. Requirements for membership are at least two years' equivalent work on a publication.

The Briaerean Society is an honorary fraternity which was founded at Georgia Tech in 1912 for the purpose of promoting high ideals in scholarship, as well as in campus activities, among the students of the Co-operative Department. Its membership is selected from the members of the three upper classes in that department who have a general average of three or more. Among its activities are included the presentation of a scholarship award to the sophomore Co-op having the highest grades for his freshman year; the presentation of a scholarship cup to the senior Co-op having the highest average for his entire five years at Tech; and the Briaerean Annual Formal Ball.
Kappa Eta Kappa

Kappa Eta Kappa, a national professional electrical engineering fraternity, was founded at the University of Iowa in 1923. The local chapter which was first known as the High Tension Club, received its charter in 1928. Its membership is offered to those junior and senior electrical engineering students who possess the required qualifications of scholarship, character and leadership.

In order to encourage high scholastic attainments among electrical engineering students Kappa Eta Kappa each year presents the sophomore in electrical engineering who has the highest average with an engraved log-log slide rule.

Phi Psi, honorary textile fraternity, was founded at Philadelphia College of Textile Engineering in March, 1903. In 1905 it was incorporated under the laws of the State of Pennsylvania, and since has established chapters in the leading textile schools of the country. The chapter at Tech was installed in 1921. The purpose of Phi Psi is to promote good fellowship and to encourage an interest among its members towards the field of the textile industry.

Alpha Chi Sigma

An honorary chemical fraternity founded in 1902 and installed at Georgia Tech in 1932. Alpha Chi Sigma is a professional chemical fraternity founded with the idea of creating an interest in chemistry and at the same time recognizing achievements in that scientific branch. Its membership is drawn from students of chemistry and chemical engineering who intend to make some phase of chemistry their life work. At Georgia Tech this organization presents industrial moving pictures, lectures, keeps up a chemical display, etc. in an effort to encourage those who are interested in chemical engineering.

National Aeronautical Association

In 1930, after the establishment of the Daniel Guggenheim School of Aeronautics at Tech, the National Aeronautical Association, founded in 1922, installed a student branch known as the Aero Club. This organization is devoted to introducing the students of the Aeronautical department into their field of engineering by means of discussions of current events and progress in the air and talks by prominent local and national authorities which feature the year's program.

Civil Crew

The student chapter of the American Society of Civil Engineers at Georgia Tech is known as the "Civil Crew." It was installed on the campus in 1909. Its members are selected from the Senior and Junior classes in Civil Engineering, with especial emphasis on good scholastic standing. The activities of the Society include the establishing of personal contact with practicing engineers by means of luncheons and informal talks, the investigation of practical construction work, and the showing of films on engineering projects.

Architectural Society

The Architectural Society was founded at Georgia Tech in 1910. All Architectural students who have completed the first term of the sophomore year are eligible for membership. Prominent local architects frequently address the monthly meetings. Prizes are offered for the best work in design, and a creditable library of drawings from architectural books has been formed. Quite frequently student members of the society submit their work for judgment in national contests.

American Institute of Electrical Engineers

This society founded in 1884 and installed at Georgia Tech in 1915, is a student branch of the American Institute of Electrical Engineers. Senior and junior students in the Electrical Engineering course are eligible for membership. Original papers are presented and articles from current electrical literature are abstracted and discussed. Lectures are given the Society by practicing engineers.

American Society of Mechanical Engineers

The American Society of Mechanical Engineers is a student branch of this well-known professional society which was founded in 1881. The chapter at Tech was installed in 1916 and includes as members all junior and senior Mechanical Engineering students. Regular meetings are held at which prominent Mechanical Engineers of industry and schools speak, motion pictures are presented, and a general discussion of mechanical topics held. Inspection trips are often taken to local industrial plants.

American Institute of Chemical Engineers

The Georgia Tech Branch of the American Institute of Chemical Engineers was installed in 1933 for the purpose of stimulating student interest in the profession of chemical engineering. The organization is composed of seniors, juniors and sophomores in the Chemical Engineering and Chemistry Departments. Since its installation the chapter has been active in such projects as economic surveys of various chemical plants and talks on chemical engineering subjects by various students and professors.

CLUBS
Bulldog Club

The Bulldog Club, founded at Tech in 1910, is a society whose members are selected solely from the most representative juniors and seniors. The present organization resulted from the union of an original senior Bulldog with a junior society, Koseme, in 1933. It is a non-scholastic society the purpose of which is to bring together the outstanding leaders of the upperclasses. The fraternity cake race, and the annual tennis and bowling tournaments are sponsored by Bulldog.

Skull and Key

Skull and Key, a sophomore honorary social society, was founded in 1912. Modeled after the Bulldog Club its aims and purposes are very similar to those of that organization. The main purpose of Skull and Key is to promote a closer relationship between the leaders of the sophomore class.

Each fall twelve new men are initiated, and the total membership is increased to twenty-four in the spring.

Free Body Club

The Free Body Club is an honorary mechanics society organized at Tech in 1923 through the efforts of Professor C. E. Coolidge, head of the Department of Mechanics and present faculty advisor to the club, with the purpose in mind of promoting study along the lines of the Mechanical Engineering profession. Membership is limited to outstanding juniors in the Mechanics Department. The originator of "Founders' Day" at Tech, the club annually acts as sponsor for this outstanding occasion.

Oil Can Club

The Oil Can Club is a mechanical social society founded in 1914 with the purpose of promoting good fellowship among its members. The organization is composed of seniors in the Mechanical Engineering Department with a limited membership of thirteen, two or three of whom may be selected from the junior class. Meetings are held frequently throughout the year and a dance is usually given in the spring.

The Co-op Club is one of the oldest and most active social clubs on the campus. Founded in 1915, its purpose is to promote interest in college activities and to foster a friendly spirit of co-operation among the students of the Co-operative department. Its members are selected from outstanding upperclassmen of the department. During each of the semesters a dance is given. As there are two sections of co-operative students this organization is divided into two sections.

Yellow Jacket Club

The Yellow Jacket Club for the promotion of school spirit was organized in 1930 under the supervision of Coach W. A. Alexander. Members are pledged during their freshman year and at the beginning of the senior year those who have shown the greatest interest and enthusiasm are elected to the final order of Yellow Jacket. This organization serves as the Vigilance Committee, the purpose of which is to see that students are properly respectful of school traditions.

The Marion Luther Brittain Debating Society was founded in 1930, through the efforts of Professor Edwin Folk of the department of English, and has since made rapid strides towards becoming the outstanding collegiate forensic society of the South.

During this year these debaters engaged in an open Forum with six teams representing Agnes Scott, Mercer, Georgia, Brenau, Emory and Tech; and in individual debates with the following: Mercer, Brenau, Emory, North Carolina, Davidson, Alabama, Tulane, South Carolina, Auburn and Agnes Scott.

Cosmopolitan Club

This society is a chapter of the international organization of Cosmopolitan Clubs. Its members include all foreign students at Georgia Tech as well as a number of native Americans, whose inclusion makes for the truly international nature of the society. The activities of the club include the maintenance of correspondence with other chapters, the sending of delegates to annual and sectional meetings, and especially the rendering of assistance to incoming foreign students in establishing satisfactory school relations.

Marionettes

Since its foundation in 1925, the Marionettes Club has been known throughout Southern colleges for the quality of its productions on the stage. This year the club has been re-organized with increased interest. During the spring of 1935, the club presented Oscar Wilde's, "The Importance of Being Earnest," an outstanding play for amateur actors. For this comedy the dramatics club of Agnes Scott College and The Marionettes co-operated with one another. Several one-act plays were given also at club meetings.

Sigma Gamma Club

The foundation of the Sigma Gamma Club on the Tech Campus in 1927 was primarily for the encouragement of social, recreational, and cultural activity among its members. Participation in campus activities and the encouragement of all progressive movements are two of the objectives to which the members of the club are pledged.

Non-Fraternity Organization

The Non-Fraternity Organization was formed in the spring of 1934 to provide a medium through which men unable to join a fraternity could act in matters pertaining to campus life. This body is devoted to encouraging non-fraternity students to take part in campus activities and as such its success has been noteworthy. A secondary motive is to give to the non-fraternity alumnus a connecting link with the campus, a need long felt at Georgia Tech.

Foil and Mask

Members of the school fencing team compose the Foil and Mask Society as its name implies. Under the direction of Professor Richard Morenus, who has acted as coach and advisor to the fencers, this sport has won new popularity at Tech and a schedule of matches is played each year with teams from Alabama, Virginia Military, City College of Charleston, and other Southern schools.

RELIGIOUS SOCIETIES
The Y. M. C. A. building was erected in 1911 through the generosity of John D. Rockefeller and interested friends of Atlanta for the benefit of the students of Georgia Tech. The "Y" constitutes the center of student life and activity, for, in addition to its auditorium and recreational parlors, rooms are maintained for various clubs, the Student Council, and the school publications.
Y. M. C. A. Cabinet

The purpose of the Young Men's Christian Association is to minister to the development of the moral, social and spiritual needs of each individual in the school community. There is scarcely an organization on the campus that does not in some way come in contact with the Y. M. C. A. In this way it has an opportunity to touch the entire life of the school. The activities of the Y. M. C. A. are carried out entirely by the students with the co-operation and counsel of the Y. M. C. A. Cabinet and the General Secretary. This brings the students to realize that the Y. M. C. A. program is their responsibility and makes for a vital organization functioning for the benefit of the whole student body.

One of the successful organizations on the campus is the "Y" Singers. Their services are in demand both in and out of the city. Largely through the untiring leadership of Mr. Robert E. Mell, Director, the "Y" Singers have achieved a state-wide reputation. In addition to making trips to various colleges throughout the South, this organization sings in almost every church in Atlanta sometime during the year.

Newman Club

The Georgia Tech Newman Club, founded in 1931, is the local chapter of the federation of College Catholic Clubs. Its purpose is to promote the mutual interests of Catholic students at Tech, whether those interests be of a spiritual, intellectual, or social nature. Its activities consist of a program of religious education in the form of talks and open discussions, supplemented by social functions of a recreational and fraternal nature.

Rifle Team

Early interest in rifle marksmanship resulted in giving Tech a large number of students from which to choose a rifle squad. This squad constitutes the Varsity, R. O. T. C., and Freshman teams. Any regularly enrolled student is eligible for the varsity team, but to be eligible for the R. O. T. C. team he must, in addition, be actually enrolled in the Reserve Officers' Training Corps.

Seventeen challenges for Varsity, thirteen for R. O. T. C., and three for Freshman matches, in addition to the Corps Area, National R. O. T. C. Hearst Trophy, and the National Intercollegiate, were accepted to be fired on week-ends, beginning February 2, and ending April 13, 1935. The season began with a shoulder to shoulder shoot with Alabama Polytechnic Institute and the University of Georgia in which we lost to Auburn but easily defeated Georgia. At date of this article Tech has won all except two matches and these by very close scores. The Rifle Team was one of the four senior units designated by the Commanding General to represent this area in the National Intercollegiate Match.

Team Captain J. W. Lucas, senior, ably assisted by H. H. Rogers, junior, G. M. Hope, sophomore, and J. R. Childs, freshman, class representatives, are very pleased by the fine record made by the squad.

FOOTBALL
It was a team to cheer, it was a team to love, this one which represented Georgia Tech in football for the season of 1934.

It won one game and lost nine.

Yet such was the quality of its spirit, and such was the caliber of its courage that it was never a team to forget or to forsake.

These are the usual things said of a team which loses. Yet of this Tech team it is a true thing to say. Because the team knew football. It played hard and well. It played intelligently.

And each Saturday it set its face against heavy odds and went into the game as though they were even. It came to be an inspiration, that team. Callous newspaper men, who like to write victories, began to forsake winning teams to follow it around and report on its fight.

It won one and lost nine. Yet it was a successful team.

The teams of W. A. Alexander have at least one quality, which is perhaps a double quality although his teams make them one.

They know football and they fight. Their weapons may be dull. They may be giving away
FOOTBALL

10 pounds per man. They may have inadequate reserves. But they know football. And they fight.

Georgia Tech's string of victories since the National championship won by the 1928 team on January 1, 1929, in the Rose Bowl against California, has been a relatively thin one. But in all those years Georgia Tech has yet to have a team which was not worthy of the cheers given it.

The 1934 football team had five veterans around which the team was built. They were, in a sense, key men. Football writers knew what Coach Alexander said early in the summer, before the season began:

"If one of our key men gets hurt we will be in a bad way and cannot expect to make a very good showing."

A week before the season began Jack Phillips, captain and all-Southern fullback, hurt a knee. He was the passer. He was the chief ball carrier. He was the man who backed up the line. He was, one might say, a great part of the team.

He never recovered. He played. But his knee never was well. He was slowed up. His passing was affected.

Other injuries followed. The five key men never got to play as a well and fully-effective unit. The result was not unanticipated.
FOOTBALL

It is not good policy to mention names. Yet there were some men who seemed to lead. There was "Shorty" Roberts, 132 pounds of personality and skill; the best football player for his pounds the game ever has seen.

There will be many football writers who saw this team play who will wish, in a thousand football conversations to come, they could have seen Shorty Roberts run behind a great line and skilled interference.

There were the two Wilcox brothers, the Texans; John and Dave, who played at guards; Pewee Williams, the giant tackle; Hoot Gibson, the splendid end, and others. They all had a part.

There was "Sundial" Martin, who was ill all season, playing a small part when he should never have had on a uniform had he not demanded it. There were others. It was a unit, this team, a crippled unit but a unit in spirit and loyalty.

They closed out this season in a most amazing way. Defeated eight consecutive times they went in to meet Georgia on Georgia's home field at Athens. Georgia had, after a slow start, gathered speed and reached the peak expected. Yale had been defeated.

Yet for more than three quarters the score was nothing and nothing and an hysterical crowd saw Georgia slip over one touchdown in the closing
minutes to win by a single score when they had been expected to win by at least four.

The first game was with Jess Neely's smart, powerful Clemson team. Tech won it 12 to 7. Clemson went on to finish as one of the leading teams in the Southern Conference. But that was Tech's lone victory.

Vanderbilt came next to Grant field. And Tech's ill luck began. Two passes were batted into the hands of Vanderbilt men by Tech players trying to break them up. Each time a touchdown resulted.

The unique feature of this was that in the 1933 game at Nashville Tech lost to Vanderbilt when a Tech player batted a pass into a Vanderbilt man's hands.

Vanderbilt won 27 to 12 with the ill-fated destiny of this Tech team, which was to have injuries and bad luck in games, helping out.

Duke was next. Tech had defeated Duke the year before. Duke had come to Atlanta undefeated and with an invitation to the Rose Bowl assured with a victory over Tech. The Georgia Tech team, doped to lose by a wide margin, won 6 to 0.

This year Duke was set with one of her best teams. The game was played in Durham at the
FOOTBALL

Duke stadium. Duke, using a great pass attack, out-sped the slower Tech backs and won a convincing 21 to 0 victory. But it was a ball game all the way, Tech stopping the running game, which had been expected to win. But the pass game was something which worried Tech all season.

Michigan was next. Tech, playing her first game against Michigan, had to dispense with the services of her best end, Hoot Gibson. Michigan had a colored player. Tech did not protest the player but Michigan, in removing him, suggested that Tech, to do the sporting thing, would remove one of her players. The man removed was an end and so Tech removed the man from the same position on her team.

It was fate, or something, that Michigan's one touchdown, scored in a cold, driving rain which fell all through the game, should have been scored around the end where the sub was playing. Michigan won at Ann Arbor by a score of 9 to 2.

Tulane was next. It was a long journey, from Ann Arbor to New Orleans, with a few days' stop in Atlanta. It was a most amazing game. For most of the game Tech outplayed Tulane. And then Tulane pushed over a touchdown to win 20 to 12. The last touchdown came when Tech was throwing passes desperately trying to score, gambling everything to overcome that 13 to 12
FOOTBALL

score against them. Roberts, Lawrence Hays, and Sundial Martin turned in great games as did Gibson. Gibson dropped one pass for a touchdown. This was one of Tech's three really great games against superior odds.

North Carolina's great team, defeated but once, came to Tech next and beat the tired, reserve-lacking Jackets, 26 to 0. The game was played at Grant field. It was a question of too much power. And a tired team trying to meet it.

Auburn came next and on a muddy field blocked two kicks which led to touchdowns and scored another which gave them a 19 to 6 victory on Grant field.

And then came Alabama, the team which closed the season with a smashing 29 to 13 victory over Stanford in the Rose Bowl to finish with as good a claim to the National title as possessed by any other team.

Alabama won on Grant field, before a great crowd, 40 to 0. Yet it was Tech's finest game, unless the Georgia game matches it. Tech stopped Alabama's running game. The pass combination of Howell to Hutson, which was to smash Stanford's undefeated team, beat Tech, Dixie Howell and Don Hutson were bad medicine.

Yet Dixie Howell was to tell this reporter, coming back from the Rose Bowl game:
"The two hardest games I ever played in my three years at Alabama were the Georgia Tech game of this (1934) fall and the St. Mary's game at San Francisco in 1932."

Tech's line and backfield, led by Shorty Roberts, played magnificently. But those passes, the best in the nation, were too much. Yet the game was a contest, not a rout as the score indicated.

Florida was next, the game being played at Gainesville. Florida won 13 to 12, coming from behind with the aid of a blocked kick and passes after Tech led 12 to 0 at the half.

And then came Georgia—at Athens.

It was an inspired Tech team. It was a team which had been well-coached and well-instructed in the play of the Georgia team.

For more than three quarters a stunned crowd saw the Jackets play the Bulldogs even, match them run for run, tackle for tackle.

In the end it was a questionable decision by an official which gave Georgia the break and a
FOOTBALL

7-0 victory. Georgia would have been satisfied with a tie in this game despite the pre-game dope which gave Georgia a four-touchdown victory.

And that was the end of the trail for as gallant a team as ever wore Tech colors. It won one and lost nine yet it never lost its courage and its spirit and its knowledge of the game.

At the end of the season it was announced that Coach Alexander would have as his chief assistants for next fall, Bobby Dodd, backfield coach for three seasons and one of the finest coaches and gentlemen in the game and Mack Tharpe, a Tech boy and an all-Southern tackle of some seasons ago, a loyal warrior and a fine coach.

Coach Alexander is one of the great figures in the game. His players and newspaper men who know him realize his worth. He is worth more to Georgia Tech than all the victories to be won.

His team knows it. They play for him and for Tech—with that vital spark which Tech has developed through years of gallant, clean, hard-playing, and real sportsmanship.
GREY DEVILS

The success of Georgia Tech's football teams year after year is due mainly to the hard fighting boys known as the Grey Devils. They go out day after day and take without thanks the roughest treatment that the first team has to offer. Each week they learn the plays of the next opposing team, and run them against the varsity. Anyone connected with the team knows what hard fighters these men are, and it takes the best the varsity has in determination and co-operation to make any headway against them. Whatever skill and strength the first team possesses has been tried and developed by the Grey Devils. Coach Mack Tharpe is in charge of them.

This year, as in the past, the freshman football team was combined with the "Grey Devils," most of their time being spent in scrimmage with the varsity. The team, however, did have a chance to show what it could do as a unit when it played the regular number of games as allowed by the Southeastern Conference.

In the initial game with Auburn, which was played in Auburn on October 26, the freshmen showed the potentiality of developing into a fine team in spite of the fact that the score indicated a 7 to 7 tie.

At the annual Thanksgiving Day game with the Georgia Bullpups, the Baby Jackets ran wild on muddy Grant field to take the game 20 to 14. The proceeds of the game, obtained from the several thousand spectators who braved the threat of rain and the wet seats of the stands, were donated to the Scottish Rite Hospital for crippled children.

Among the outstanding freshmen who showed up well in the games and the practices were: Nixon, Glendenning, Adams, Carmack, Collins, Roberts, Jordan, Jones, Allen, Chivington, Edwards, Hackett, Sims, Konemann, Johnson and Raine.
BASKET-BALL
BASKET-BALL

Climaxing a season, which might otherwise have been termed mediocre, with a thrilling extra period victory over the Georgia Bulldogs, the Tech Yellow Jackets brought their basket-ball season to a dramatic close. After a slow start in which the first four games were dropped, the team was re-organized by coach Roy Mundorff to become a formidable opponent to any team.

The season opened with the Jackets playing an exhibition game with the world's champion Celtics of New York. The Celtics, showing a marvelous display of passing and ball handling, were of course able to win, but not until Tech had put on a second half rally that brought the final score to 27-23.

The regular schedule of fourteen games began with Clemson at Clemson where the Jackets were defeated by this outstanding Southern Conference aggregation 43-29. Swails, a six foot-four center was the outstanding star, shooting twenty points for Clemson.

On January 16, Tennessee came to Atlanta with their basket-finding eyes apparently trained a little better than those of the Jackets to win 36-26.

Next, Tech met Georgia in Athens before a crowd of 1800, the largest ever to attend a game at Woodruff Hall, only to lose decisively, 33-23.
On January 25, the Vanderbilt Commodores came to Atlanta expecting an easy victory, but much to their surprise they found Coach Mundorff's new line-up, consisting of Glenn, Hyder, Kidd, Boulware, and Hays, almost too strong for them. An extra period was necessary and the Commodores were able to win 33-32.

The Yellow Jackets on February 2 were visited by the Georgia Bulldogs intent on ending the series with a quick victory. The Jackets, however, continuing to exhibit their brilliant play of the preceding week, were able to avenge the defeat of earlier in the season with a 32-27 victory. Hyder and Glenn were outstanding for Tech.

For the final home game of the season the Jackets defeated Auburn in a very close game 25-24.

The following week the Jackets began a trip which carried them to Vanderbilt and Kentucky. Hyder was unable to make the trip, and although Stacey was an able man to fill his place, the team was outclassed, losing to Vandy 53-24 and to Kentucky 57-30.

On February 12, the squad travelled to Auburn to win an excellent victory 32-19, in which Hays was high scorer with eleven points.

Mercer University, coached by Jim Slocum, last year Jacket star, next entertained our team in Macon. Despite the illness of several regulars Jimmy's team put up a fine fight, and Tech was pressed to win 42-28.
To decide the supremacy of the state, Georgia and Tech met in Athens on February 23, in what proved to be the most thrilling game of the year. At the end of regular game time the score stood 38-38. During the extra period diminutive Hank Crawford made Tech basket-ball history by scoring nine points. Hank sunk tosses from all angles for a total of three field goals and three free shots. However it was the remarkable work of Captain Billy Glenn that was largely responsible for Tech's victory. He was a continual driving force when Tech was behind, while himself rising to supreme heights as a player in his final game for Tech. Hyder, season high point man for Tech was also high man for the Jackets this night with sixteen points.

In the concluding game of the season Tech defeated Sewanee 42-31. The success of the freshman team was inspiring. These youngsters made it apparent that the basket-ball future of Tech is assured by winning every game on a twelve game schedule by top-heavy scores. Ben Jones was high season scorer with 158 points, followed closely by Ed Jones and Sims with 115 and 109 points respectively.

Varsity letter men were:

Freshman numerals were awarded Ben Jones, Ed Jones, Jordan, Johnston, Sims, Aldridge, and Trask.
BASEBALL
"Sundial" Martin was elected captain of the 1935 Baseball team. "Shorty" Roberts was elected alternate captain.

Martin, a Senior this year, has been very active in athletics at Georgia Tech, this being his fourth year on the baseball team. He also completed three years on the football team this past season. His excellent throwing arm and a good season last year make him a good prospect for the coming year. Roberts, also a Senior, is finishing up his career as a most successful player at center field position.

The team, after two weeks of practice, opened the season with a practice game with Buford at Rose Bowl Field. The more experienced semi pro team won over Tech by a 6 to 1 score, but which was much tighter than the score indicates. A second game with Buford the same week showed a big improvement in the team's strength when Tech held them to a 6-4 score. Two days later another practice game was played with Cartersville in Cartersville in which the Tech team began
BASEBALL

to show their real strength and came out victorious with a 7 to 4 score. Carpenter, a Junior this year, showed fine prospects of becoming a star pitcher. The team as a whole looked very good, not an error being made by any of the players. Shorty Roberts, Hoot Gibson, Pug Boyd, and Harry Appleby led in the hitting.

Fifteen Jacket diamonders, two managers, and Coach Dodd left Atlanta the following Monday night for Tuscaloosa, Ala., where they opened the 1935 Baseball season in a tilt with the Crimson Tide. Alabama has one of the strongest college teams in the south. Virtually every member of the outfit which won three out of four games from the Jackets last year is again on the squad. Behind the five-hit pitching of Lee Rogers, veteran Tide hurler, Alabama defeated Tech 10 to 3.

There are four substitute pitchers, McKinley, Lefty Thomas, Carpenter, and Edenfield, one understudy first-baseman, Sparky Adams, a sophomore; Bob Matthews, a substitute infielder, Bud
Lindsey, a substitute outfielder, and McDonald catching.

The line-up is as follows: Carl Waits, pitcher; Harry Appleby, catcher; Hoot Gibson, first-baseman; Bill McNenney, second baseman; Carmen Grossi, shortstop; Sundial Martin, third-baseman; Pug Boyd, left-fielder; Shorty Roberts, center-fielder; and John Hyder, right-fielder.

The season, well filled with home games, opened with the first game of the year being played with Alabama at Tuscaloosa on April 2, followed by Clemson at Clemson, April 5 and 6. The remainder of the schedule follows:

Auburn, here, April 12, 13; Auburn, at Auburn, April 19, 20.

Oglethorpe, here, April 22, 23; Clemson, here, April 26, 27.

Georgia, here, May 3; Georgia, at Athens, May 4 and 10.

Georgia, here, May 11; Oglethorpe, here, May 17, 18.
FRESHMAN BASEBALL

In the past few years it has become a policy to use the freshman baseball team only as a stepping stone to the varsity. The coaches do not schedule any games for the team so their only practice comes in scrimmages with the upperclassmen. However, there is a great deal of interest taken in the team throughout the freshman class because of the fact that it is the first glimpse of future stars, near the first of the season the most promising men are picked, and Coach Mundorff begins to teach them the secrets of Tech baseball. The future varsity team has a promising outlook in these men: Jesse Bradshaw, and Willard James, catchers; Jack Chivington, Charles Trask, and Louis Gulley, pitchers; Joe O'Neil, first base; Jack Petersen, second base; Bill Jordan, short stop; Warren Tierce, third base; Bill Jenkins, Dick Hearn, Herman Adams, outfielders; John Sisley, and Harry Beck, utility.
TRACK
The track team has had only one meet, defeating Clemson $67\frac{1}{2}$ to $63\frac{1}{2}$, as this goes to press. The rest of the schedule calls for meets with Alabama, Kentucky, Vanderbilt, Georgia, Auburn and the Southeastern meet at Birmingham.

The team was hard hit as the practice started losing Perrin Walker, Pee Wee Williams and Bill McKay. But, as the Clemson meet indicates Tech will give any of the schools scheduled a race for the points.

Norris Dean will be one of the big guns of the team. He is one of the best hurdlers in the South. He also puts the shot, throws the discus and runs on the mile relay team.

Coach George Griffin has had to fill Walker's place in the dashes. He had John McKinley and Jerry Taylor running in the Clemson meet. Jim Dent will also run the dashes.

The team seems to be strong in the distance and middle distance runs. Harvey West, Jim Davenport, E. L. Battson and Irving Kodel have all turned in commendable times in the mile and two mile runs. West and Rankin won the mile
and two mile races in the Clemson meet. Jim Davenport, W. E. Johnson and Ed McLain have been running the half mile. Davenport won it in the first meet. Ralph Jones and John Seay are running the 440-yard race.

In the hurdles Norris Dean has able support from John Tufts. Both of them will be point winners during the season.

Gordon Wallis and Jimmie Moore will be point winners in the broad jump. Jack Phillips and O. A. Korf will win places in the javelin thrust.

In the discus throw and shot put, Norris Dean, Charlie Preston, Gilbert Stacy and Mit Fitzsimmon will participate. Dean and Preston are sure point getters.

Jim Davenport was elected captain of the team before the season started. Norris Dean and Harvey West were named alternate captains at the same time.
As the first meet has been the only one run so far this season it must be used in commenting on the team.

Tech was doped to lose the Clemson meet. But, they ran nip and tuck with the Clemson team and when the final event of the day came, the mile relay, they were one point back of the Tigers. The relay team of Harvey West, Ralph Jones, Norris Dean and Jim Davenport put on the pressure and averaged 52 seconds apiece for the mile run to win the race and the meet.

All during the meet the Tech team was pulling stunts like that. They may not be the best in the world and break many records, but they certainly are a great bunch of competitors and that is the thing that counts in sports.

Coach George Griffin should be congratulated for the fine spirit he has put into the team. He was faced with the unexpected loss of his star trackman when the season began, but he has built up a very fine team which should win several meets.
FRESHMAN TRACK

Unusual interest was taken in freshman track this year because of the large number of promising stars on the team.

The year is divided into two seasons: Cross country in the fall, and the regular events in the spring. Bob Aldridge was the outstanding man last fall, never failing to take a first place for the freshmen.

When this article was written, two meets of the spring season had been held. A triangular meet ended in a victory for the Jackets with the score: Tech Freshmen 72, Tech High 49, and G. M. A. 32. The next meet was lost to a strong Boys' High team by the score of 55½ to 66½. Another meet with Boys' High, one with the Georgia Freshmen, and one with the Auburn Freshmen still remained on the schedule.

The outstanding men of the spring season were: Konemann, Moon, Hull, Collins, Ben Jones, Ed Jones, Fambrough, Goldman, Aldridge, Kenimer, Fincher, Pearce, McCathern, Staples, and Vaughn.
The Cross Country Team under the direction of Coach George Griffin completed a very successful season last fall. With no outstanding individual stars, but consisting of a number of men of marked ability, the team registered wins over Alabama and Auburn by comfortable margins. When Auburn won from Florida, however, Tech lost the conference championship as our team was defeated by Tennessee at Knoxville in a thrilling battle.

The Freshman Team won with ease from Boys' High and Georgia Military Academy.

The Varsity will lose by graduation, F. A. Jones and Irving Kodel, but with the addition of a number of valuable men, including the outstanding freshman star, Robert Aldridge, the future of the team looks very bright.

Those men awarded letters were:

MINOR SPORTS
Georgia Tech’s swimming team, considered one of the best in the Southeast by virtue of its ten year’s unbroken series of victories, started the 1935 season with a triangular meet with the University of Tennessee and Maryville College. Tennessee had been undefeated up to this time; however, the Tech team took the lead from the start by winning the four hundred yard relay and steadily forged ahead to win six out of nine events. The final score was: Tech 53, Tennessee 33, Maryville 27.

The next meet with Clemson in South Carolina proved to be very close. Tech won five of nine events; however, with the loss of the relay to Clemson and despite the valiant efforts of the Tech Tankmen the final score stood, Clemson 46, Tech 39.

At the time that this is written the team is preparing for a meet with Auburn, to be followed by the final one of the season with our traditional rivals, the University of Georgia.

The team, ably trained and conditioned by Coach Kenneth Thrash, had turned in good individual performances. Richardson lowered the record that he had set the previous season in the two hundred yard breast stroke. Hart has shown great improvement in this event also. Plage, a sophomore, has been consistently good in the backstroke event. Perry and McKinstry, newcomers this year, represent the team in diving. Coley and R. M. Williams, sophomores, in dashes and in the relays, while Berry, a senior, proved to be a real "find." House, LeRoux, and R. J. Martin swam the distance events. Catts, the captain of the team, was the high point man for the season. Benton served as the team’s manager, while Dougherty, aided by Gottisman, coached and managed the freshman team.
GOLF TEAM

The Golf Team, coached by Professor H. E. Dennison and composed of Captain Charlie Yates, Berrien Moore, Charlie Dannels, John Ridley, Billy Ginn, and Billy Street, is well under way in an attempt to complete its third undefeated season in collegiate teamplay competition.

Duke, Davidson, and Furman have already been defeated although return matches have yet to be played with these colleges. There also remains a match with Georgia and the Southern Intercollegiate Championship before the team leaves in June for Washington to compete in the National Intercollegiate.

Last year's team had an average per man each round of 74 although the matches were played over the hardest courses in the South, including the Augusta National, where Tech defeated Georgia by a wide margin.

In June the team went to Cleveland for the National Intercollegiate. Charlie Yates, Berrien Moore, and Frank Ridley, present Atlanta City Champion, qualified for the Championship flight, while tough luck managed to keep the remaining member, George Harris, just outside the low thirty-two. Moore lost in the second round to the medalist, Chuck Kocsis, of Michigan. Ridley and Yates continued on until, when the time came for the semi-final round, Tech was assured of a place in the finals as these two had to meet one another. Yates was victorious, and the next day he defeated Ed White of Texas for the Championship. This is the second Intercollegiate Champion Tech has had. The first being Watts Gunn.
TENNIS

At the time this article is being written the Georgia Tech Tennis Team has played three matches. The team won the first match of the season with Fort Benning Officers, nine to one. In the second match, played with Davidson, Tech won easily to a score of seven to nothing. The last match to be played, with Mississippi State, was won by Tech, five to one.

That Tech has one of the best teams in the South was evidenced by the fact that it was invited to play an exhibition match against Alabama at the Sports Carnival held in Savannah during Easter.

Members of the team include Billy Reese, Captain and Number Five man in Intercollegiate ranking, Burtz Boulware, Hank Crawford, Fernandez-Morrell, Tommy Tumlin, Mac Keiser, Henry Swift, George Silva, and Marion Moody, Manager.

Left to Right: Moody, Keiser, Reese, Boulware, Morrell, Swift, Silva, Crawford.

Esquire, Jr. THE MAGAZINE

Thanks to the real Esquire The staff wishes to take this opportunity to thank the publishers of Esquire for the use of many of their cuts and for allowing us to parody the magazine that has won its place in every home, club and rendezvous by its uniqueness in the presentation of fiction, humor, and genuine human interest. To Esquire we are deeply grateful for their kindness and cooperation.

To the students The Blue Print wishes to urge each student to keep in mind the advertisers in this book when buying in any of the many lines presented by the above firms. Each is a Tech supporter and has contributed much toward making this book a success.
THE RESONANCE AND THE WRATH

I DID IT

I am getting tired of being talked about the way I have in the last few months. I think that now is the time to put my foot down and admit that I did it or that I didn’t do it.

Ever since the ballot boxes were burned in an election of class officers or ‘sumpin—I have been the target for a great number of cutting and sarcastic remarks—accusing me of the terrible crime. If I did it, I would be proud of it and if I didn’t do it I would say that the accusations were monstrous. Now does that satisfy you.

I might as well say now that I’m quite a notorious character, but also a man who has background.

I have been at Tech for—let me see—I believe for about fifteen years. I’ve heard some of the finest lectures in the Chemistry and Physics and other of the ‘rubbish’ arts. In fact, I believe I did pass one of those chemistry courses of Dr. Boggs or Dr. Daniel—Chem 18 or 28 sometime in ’28 or ’29.

I expect to break into the limelight most anytime now. I’m sure that my many friends will be glad to hear this and will help place me in a position of responsibility.

As for the “ballot box affair”—I did it—I did it, and I’m proud of it. I’ll use it in my forthcoming campaign.

I just thought I’d take this opportunity to get things straight with you fellows.

Yours sincerely
George P. Burdell

IS MY FACE RED?

I must answer the party who called me from Wa. 7000 or Vernon 1400 or Jackson 1300. I am humiliated. Can you imagine the ingratitude of it all? And to the one man who is the best customer that any of them ever had, the man who for fifteen years has sipped the dregs of all the fine beverages from “Gilbey’s” to “Two Naturals.” What I’m trying to say is that this guy left a sample of his “new stuff” at one of my favorite houses. It was labeled: “Bottled in Bond-Bourbon.”

ME FOR PRESIDENT

Tech men, here’s your chance to have a man in politics. Well, we do need a few friends in the upper crust, don’t we?

I, George P. Burdell, do hereby and hereon declare myself a candidate for President of these here United States. I intend to run on a platform which is bound to please everybody.

I propose a platform of wet-dry principles. My suggestion will be to have everybody who wants prohibition to go to a state where they have “don’t have it,” and those that crave it should move to a state that “has it.”

This should please everyone. All the bootleggers—and I am their friend—may move to a dry state and they’ll be satisfied. You see, things are not so complicated after all.

My only regret is that I’m afraid that with my new affiliations I’ll have to leave my Alma Mater—Good Ole Tech. But my son, George P. Burdell, Jr., seems to have taken hold where I left off. I guess he’s just an anonymous like his papa.

Me for President—more for Tech.

Till we count the votes,
George P. Burdell, ’35

The Finals Maestro

Disclosing the merits of the Orchestra-Ozzie Nelson and Harriet Hilliard. The Organization selected for the final Dances---June 5, 6, and 7

by GEORGE P. BURDELL

As this issue of the Blue Print goes to press all eyes at Tech are turned to the final set of dances with Ozzie Nelson and his orchestra with beautiful Harriet Hilliard.

The dance committee headed by John Ridley is to be commended on two swell sets of dances. The first with Kay Kyser and now Ozzie Nelson, a work well done fellows.

OZZIE—is a graduate of the New Jersey Law School and Rutgers University. At Rutgers he was a member of the swimming and lacrosse teams, quarterback on the football team, and intercollegiate welterweight boxing champion. He was art editor of his college paper, president of the student council and held honors galore. He plays every instrument in the orchestra except the violin despite the fact that the violin is the only instrument that he ever had a lesson on.

HARRIET—is regarded as the tops in torch singers — her beautiful voice — her blonde loveliness and the best figure in radio are only a few of the things that have made her the top of the tops among female vocalists everywhere.

HARRIET—is regarded as the tops in torch singers — her beautiful voice — her blonde loveliness and the best figure in radio are only a few of the things that have made her the top of the tops among female vocalists everywhere.

THE BAND—The present fourteen men include the eight of the original Nelson Orchestra. They are featured Sundays over the NBC chain with Joe Penner, on the Bakers Broadcast. They are likewise featured twice a week over the entire CBS chain. They record for Brunswick and Vocalion. Their rise has been justly deserved. At present they are on top of the heap and are staying there.

THE STAFF—only hopes that this article will help to recall the happy moments at finals this year, or mayhaps help you to contemplate the best set of dances thus far at Tech. If we succeed in this we justly believe that our efforts in presenting the finals line-up will be more than justified.
“Brothah, you ain’t confessin’, you’s braggin’!”
