Professional Societies and Clubs—the backbone of the school—always doing something. . . .
The Engineering Council was formed last year as a governing board for the professional societies and fraternities on the campus. It tries to regulate and somewhat standardize those societies and bring them closer together. Each professional organization on the campus chooses from its membership a representative to the Council. The Council sponsors an Engineers' Fair on St. Patrick's Day. At this fair every department holds open house for prospective Tech men and any one interested in engineering and in learning more about work that is being accomplished on this campus. On the night of St. Patrick's Day they sponsor an Engineers' Ball at which every true engineer kisses the Blarney Stone.

Alpha Chi Sigma is a professional chemical fraternity and is today the second largest society of its kind in the world. It is composed of chemists and chemical engineers who unite themselves for the mutual advancement of their social and professional ideals.

The chapter at Georgia Tech tries to promote an interest in chemical affairs by sponsoring movies, exhibits, and lectures. In addition, it awards a handbook annually to the junior chemist or chemical engineer with the highest scholastic average.

Eta Kappa Nu is a national honorary electrical engineering fraternity founded in 1904, the local chapter being installed in 1941. The membership is composed of those junior and senior electrical engineering students who are outstanding in scholarship, character, and leadership.

Their activities include a program of lectures, discussions, and movies to create interest in electrical engineering. In order to encourage high scholastic achievements among electrical engineering students, Eta Kappa Nu awards annually an engraved slide rule to the sophomore in the department having the highest average.

PI TAU SIGMA

Mechanical Engineering Fraternity

Pi Tau Sigma is an honorary mechanical engineering society composed of outstanding members of the junior and senior classes who have proved themselves worthy in scholarship, leadership, and character. In order to promote interest in high scholastic achievements, the society presents an engineering handbook to the sophomore in the department who has the highest average, and has the name of the most outstanding mechanical engineering senior engraved on a plaque.

Civil Engineering Society

The Civil Crew is a local honorary society for outstanding students in the junior and senior classes of the department of Civil Engineering. It boasts one of the largest memberships for an honorary society on the campus.

The Civil Crew has monthly banquets, guest speakers from the Alumni Chapter, field trips, and movies for the pleasure and enlightenment of its members. In the spring the Civil Crew was host to the Southeastern Convention of A. S. C. E. Outstanding among its social events is the Annual Pirates’ Ball.

The Architectural Society, composed of architectural students who have completed three semesters of work, strives to increase interest in architecture and its applications. Each year it enters the work of outstanding students in a national contest. In the fall it holds a reception for all freshmen desiring to take architecture in order that they might become acquainted with the department and their fellow students.

The local chapter of the American Ceramics Society, organized in 1926, tries to create interest among Ceramics students and to promote Ceramics as a science. By taking numerous trips to nearby centers of ceramic activity and by sponsoring lectures and motion pictures, this chapter has prompted great enthusiasm for ceramics in Georgia.

The Georgia Tech chapter of the American Institute of Chemical Engineers was established on this campus in 1933. Its membership consists of juniors and seniors from the department of Chemical Engineering who are interested in furthering their knowledge of the field in which they propose to enter.

Through the medium of motion pictures, tours to plants, and lectures by prominent chemical engineers during the school year, the local organization has done much to stimulate the interest of the students in the chemical industries.

Skull and Key is the honorary social society for sophomores. Its membership is limited to twenty-four men, twelve who are elected at the end of their freshman year, and twelve who are elected during the first term of their sophomore year. The purpose of this organization, which was founded in 1912, is to form a closer relationship between the leaders of the sophomore class. Skull and Key is modeled after the Bulldog Club and aids the Bulldog Club in its activities. The entire student body looks forward to the hilarious Skull and Key initiations—the boys with the aid of their pillows do make very charming belles.

The Second Lieutenants' Club was established to encourage leadership and proficiency in the various branches of military. In the two years that this club has been on the campus, it has done much to raise the standards of the officers of the lieutenant's rank.

Each year the Second Lieutenants' Club presents medals to the most outstanding Second Lieutenants in the various military units. These men are picked by the military personnel for their ability and showing in leadership as well as their attitude and showing in classroom work.

**Second Lieutenants Club**

**Military Club**

The Second Lieutenants' Club was established to encourage leadership and proficiency in the various branches of military. In the two years that this club has been on the campus, it has done much to raise the standards of the officers of the lieutenant's rank.

Each year the Second Lieutenants' Club presents medals to the most outstanding Second Lieutenants in the various military units. These men are picked by the military personnel for their ability and showing in leadership as well as their attitude and showing in classroom work.

The Yellow Jacket Club is one of the best known clubs on the campus—especially by the freshmen. In 1930, when school spirit at Tech had reached an exceedingly low ebb, it became apparent to a group of spirited students that some kind of an organization to regain this spirit was necessary. As a result of this, the Yellow Jacket Club was founded. The club is composed of eight seniors, eight juniors, and sixteen sophomores, eight of whom are elected for junior membership. The club acts as a protector for the freshmen against the upper classmen; yet, at the same time, requires the freshmen to attend all pep meetings, which it sponsors. The cheer leaders are chosen from the membership of the club. Since the Yellow Jacket Club has been functioning the school spirit and loyalty of the student body has greatly increased.

The Yellow Jackets keep the freshmen under control.
The Bulldog Club is one of our best known local organizations. It was founded by a group of seniors in 1910 to promote college spirit and interest. The club merged with the Junior Koseme Club in 1933 to form the present organization, whose members are selected from the most outstanding juniors and seniors on the campus.

Every year the Bulldog Club sponsors a Thanksgiving cake race for freshmen; the homecoming decorations, awarding a loving cup to the winning fraternity; a Thanksgiving dance; and the bowling tournament. The Bulldog Club is best known, however, for its colorful initiations—the sight of the boys, dressed in tails and knickers, leading a dog around the campus always gets a laugh.

Alpha Phi Omega. honorary scouting fraternity, is chartered by the national council of Boy Scouts of America. Its purpose is to assemble college and university men in the spirit of the scout oath and law, to develop friendship and promote service to the youth of America.

Active membership is granted only to students who previously have been affiliated with the Boy Scouts of America, either as scouts or as scout leaders. The chapter at Tech is a recent establishment; however, they have already sponsored several noteworthy projects. Best known among these projects is the blood bank whereby the charity patients of Atlanta hospitals may receive free blood transfusions.

Sections I and II of the club have worked during the last few years toward the establishment of a Co-op Loan Fund. This fall a charter was granted to the club making it possible to set the Loan Fund on a firm footing.

Section II sponsored the Touch Football League during the fall and a softball team and tennis tournament in the spring.

The feature event of the fall term was the annual Masquerade Ball.

Pi Delta Epsilon is the honorary journalistic fraternity. Its membership is composed of students who have been outstanding on one of the four publication staffs for at least two years. The organization has talks and open discussions so that all members can express their views concerning the publications. As its major activity, Pi Delta Epsilon sponsors an Easter Fashion Show in the spring.

Foil and Mask Society is an honorary club for all students interested in fencing. The purpose of the club is to unite all the students who are interested in fencing, whether or not they are members of the fencing team, and to create more interest in fencing among the student body at large. The society sponsors a tournament each year among the battalions of the R. O. T. C. unit—a cup being presented to the winner.

The Y. M. C. A. at Tech is made up of two separate units—the Freshman Council and the “Y” Cabinet. The “Y” Cabinet, being the more important unit, is composed of upperclassmen who have shown their desire to enter an extra-curricular activity of a religious nature.

The “Y” strives to show the students the part that religion plays in school life as well as in business. This is done by means of retreats, discussions, and lectures. The “Y” also sponsors a program of activities that consists of movies, receptions, and tournaments in table-tennis, handball, and horseshoes.
