Dedication

Expressing the gratitude of free men everywhere, the editors dedicate this 1944 edition of the Blue Print to the armed services of the United States.
In training and in battle, the men of Georgia Tech have worked and fought for the victory of their country and of their country's ideals. To those who have died in the service—and to those who yet must die before the day is won—we feel that there is no more fitting way for us to do honor than to pledge ourselves to the values which they symbolize—the personal values of courage, devotion, and integrity and the national values of tolerance, justice, and freedom.
To our beloved president, Dr. Brittain, whose devoted interest and efforts have served as a grand inspiration to us all, go our most ardent gestures of admiration. The twenty-one years of his popularity with everyone have exemplified the faith of the students of Georgia Tech in his integrity and guidance. His retirement is a loss upon which we look with the deepest feelings, for his record of service and devotion have always been a source of pride to Tech. We are glad that he shall remain with us as president emeritus of Tech.

Dr. Brittain is a member of Phi Beta Kappa, Omicron Delta Kappa, Phi Kappa Phi, and of the Kappa Alpha social fraternity. He is one of the South’s most outstanding educators.
DEAN OF SCHOOL

DEAN WILLIAM VERNON SKILES,
B.S., A.M., Sc.D.

During the initial week of every semester, the office of the Dean becomes overflowing with activity, for that is the time when so many students come to the Dean for advice and adjustment. Dean Skiles, during his thirty-eight years of faithful service to Tech, has always showed his willingness to help everyone by devoting his time to the careful and exacting consideration of the student's every problem.

Dean Skiles is a member of Phi Beta Kappa, Omicron Delta Kappa, Georgia Academy of Sciences, and of the Beta Theta Pi social fraternity.
OTHER ADMINISTRATIVE OFFICERS

JOHN LAURENCE DANIEL
M.A.
Dean, Division of Graduate Studies

WILLIAM GILMER PERRY
A.M., LITT.D.
Dean of General Studies

KING

SNO
The Student Council, which has control over the majority of campus activities, is composed of the most representative and outstanding men of Georgia Tech. The Council represents the whole student body in matters affecting student interests and serves as the intermediary between the student body and the school authorities. The Council regulates all publications, supervises the elections of class officers and Council representatives, governs student affairs, and expresses the sentiments of the student body in dealings with faculty committees. The Student Council is composed of the presidents of the senior class, the Interfraternity Council, and the Y. M. C. A., the editor of the Technique, and, until the recent reorganization to accommodate the Navy dormitories, of eleven elected members of the student body.

Composed of three faculty members and three students selected by the Student Council, the Student Faculty Honor Committee was formed in 1932 to administer just and impartial rulings in cases of infractions of the honor system rule. The Committee has been valuable in the formation of better standards of honesty at Tech.

A. S. C. E., 1, 4; S. A. M. E., 1, 4; I. R. C., 1, 2, Treasurer, 3, 4; Alpha Phi Omega, 1, 2, Treasurer, 3, Vice-President, 4.

Class of forty-three
WILLIAM HOWARD EDWARDS - New Plymouth, Idaho
Mechanical Engineering
A. S. M. E.; A. S. M.

ROBERT CARL ELDER - Alexandria, La.
Mechanical Engineering
Beta Theta Pi
Anah, 4; Pi Tau Sigma, Secretary, 4; A. S. M. E., 3, 4; Interfraternity Council, 3, 4; Pi Delta Epsilon, 2, 3, President, 4; Honor Roll, 1, 1; Student Lecture Association, 1, 3; Blue Print, 1; Yellow Jacket, 2, 3; Engineer, 2; Techniques, 1, 2, 3; Editor, 4; Cadet Ensign, N. R. O. T. C.

AARON SAUL EPSTEIN - Atlanta, Ga.
Chemical Engineering
A. I. Ch. E., 4; Wrestling, 3, 4; Corporal, R. O. T. C.

EUGENE HAROLD FARRIS - Williamson, W. Va.
Electrical Engineering
A. I. E. E., 3, 4; I. R. E., 4; Band, 2, 3; Lieutenant, R. O. T. C.

AL JEROLD FAULKNER, JR. - Jacksonville, Fla.
Industrial Management
Phi Delta Theta
Bulldog Club.

MELVIN SEYMOUR FEDER - Brooklyn, N. Y.
Mechanical Engineering
Tan Epsilon Phi

JOHN LOUIS FENTON - Atlanta, Ga.
Mechanical Engineering
Kappa Alpha

WILLIAM MOSLEY FITCH - Tampa, Fla.
Electrical Engineering
Sigma Nu
A. I. E. E., 3, 4; I. R. E., 4.

BENJAMIN DAVIS FITZGERALD - Atlanta, Ga.
Industrial Management
Phi Delta Theta
Bulldog Club.

WILLIAM LOVETT FLETCHER - Jackson, Ga.
Public Health Engineering

JOSEPH ERNEST FLOWERS - Columbus, Ga.
Architecture
Kappa Alpha
Architectural Society.

JOSEPH FREEDMAN - Rosbury, Mass.
Public Health Engineering
Phi Eta Sigma; Honor Roll; Phi Eta Epsilon; Engineer, 4.

DAVID LESTER FRIEDMAN - Plymouth, Pa.
Industrial Management
I. M. Society; Ceramic Engineering Society; Honor Roll, 2, 4.

JOE MARTINO FRISCA - Tampa, Fla.
Mechanical Engineering
Newman Club; Y. M. C. A. Cabinet,

CHARLES GOODWIN FULTON - Atlanta, Ga.
Electrical Engineering
Pi Kappa Phi
A. I. E. E.; Techniques, 1, 2; Yellow Jacket, 1; Cross Country, 3; Lieutenant, R. O. T. C.; Treasurer of Pi Kappa Phi.
DONALD HAROLD FURST
Brooklyn, N. Y.
Electrical Engineering
Tau Epsilon Phi

HARRY FREDERICK GEORGE
Dawson, Ga.
Mechanical Engineering
A. S. M. E.

JAY KENNETH GINBURG
Atlanta, Ga.
Textile Engineering
Tau Epsilon Phi
Phi Psi, 3, Secretary, 4; A. A. T. C. C., 2, 3, 4.

ALAN EDWARD GREEN
Florence, S. C.
Aeronautical Engineering
Kappa Sigma

ROLAND FRANCIS GRINER
Albany, Ga.
Aeronautical Engineering
Kappa Sigma

HENRY GRITZ
Lula, Miss.
Electrical Engineering
Sigma Gamma
Eta Kappa Nu; A. I. E. E.; I. E. E.; Honor Roll, 2, 3; BLUE PRINT, 1; Swimming Manager, 1; President of Sigma Gamma.

EDWARD B. GROSS
Lakehurst, N. J.
General Engineering
Pi Kappa Phi

JOSEPH BROOKS HAAS
Jacksonville, Fla.
Architecture
Sigma Chi
BLUE PRINT, 1; Fencing, 1, 2.

JAMES RICHARD HALL
Clewiston, Fla.
Chemical Engineering
A. I. Ch. E.

ROBERT ADAMS HALL
Social Circle, Ga.
Industrial Management
Sigma Chi

JOSEPH THOMAS HAMRICK
Carrollton, Ga.
Mechanical Engineering

JEROME BEAUCHAMP HAMMACK
Atlanta, Ga.
Aeronautical Engineering
Sigma Chi
I. A. S.

HUGH ERNEST HARDAWAY
Atlanta, Ga.
Electrical Engineering
A. I. E. E.; Technique, 2, 3; Lieutenant, R. O. T. C.

JOHN FLYNN HARDY
Waycross, Ga.
Industrial Management
Sigma Chi

WILLIAM ZANE HARPER
Villa Rica, Ga.
Mechanical Engineering
Football, 3, 4; N. R. O. T. C.

CLASS OF FORTY-THREE
WILLIAM B. HARRELL .......................................... Eastman, Ga.

Here we have our student body shown in a much more mellow mood. These are the familiar scenes which go to make a college what it is. Here is what will constitute a good part of our memories in days to come. Pictured here are the visit by Miss Jane Withers when she auctioned off the football used in the Tech-Tulsa Sugar Bowl game for five million dollars in war bonds.
Also the familiar "duties" of the new co-op students—"our product direct from Loveable." The painfully familiar scenes of those long afternoon labs. The joyfully familiar scenes of the five
minutes between classes spent in the Robbery, or the time spent in the Personnel Office with Miss Griggs trying to find our latest draft classification. The Navy smokers presented for civilian students as well as Army and Navy trainees. Whether of guzzling beer at the neighborhood store, or shooting pool at the Y, or of the librarian finding that special reference book for us, these scenes serve to remind us of our class days at Tech, which were what we made them to be.
Upon the retirement of Colonel R. W. Collins in October of 1943 Colonel O. I. Gates of the Field Artillery assumed command of the combined ASTP and ROTC units here at Tech. Thus far the colonel has done a good job with his assignment. When the ASTP unit was removed in April of 1944 the colonel with his reduced staff continued the training of the Army ROTC unit.

Until his retirement in October of 1943 Colonel R. W. Collins served forty-four years of a very active military duty. His many years of experience enabled him to shape, with the aid of his very competent staff, one of the best Army ROTC units in the country. The enviable record established by the ASTP unit here at Tech points toward another outstanding achievement by the colonel. His retirement was a loss to the school and its department of Military Science and Tactics which can not be easily replaced.
And the boys left Tech
And the women wept
And Robbery sold no more pocket editions
And the girls at O'Keefe pined away
And the women wept
And Carter's closed up shop
And Shorty's west went
And the women wept
And Professor Anderson couldn't smash his lips
And Techwood was deserted except for the dogs
And the women wept
And there were empty seats at the Fox
And no more cowboy thrills at the Techwood
And the women wept:
And there were gigless Saturdays
And no more quivering lips
And the women wept:
And Freddie Lanoue got flabby
And the C. S. O. died of starvation
And so did Hildegarde
And the women wept:
And Prof. Rainey held no more seminars
And the boys left Tech
And they went back to the Army
And the Army wept.

(To be buried underneath the one hundred thousand blue and gold octagonal patches on some lonely hill between Atlanta and Birmingham, so that it will be resurrected in the year 2144 by some historian of that day, who will read it as a feeble protest against the blundering powers that were.)

"O where hae ye been, Buck Private, my son?"
"O where hae ye been, my earnest young man?"
"I have been to Georgia Tech, mother, where:
Shivering lips and threatening brows ruled supreme."

"But were ye in the Army, Buck Private, my son?"
"What did ye do at Tech, my faithful young man?"
"Mostly, mother, I remember parading each month
Before a wee, wee man in a gymnasium room."

"But what did ye study at Tech, Buck Private, my son?"
"Did ye nae study useful, my sincere young man?"
"Yay, mother, we studied hard doing six inches raise,
Spread, down six, together, up six, drop 'em."

"But what hae ye accomplished, Buck Private, my son?"
"What talents hae ye acquired, my hard-working young man?"
"Mother, cut me a skillet, and build me a fire,
And then sit ye down to wait, for I hae learned to cook."

ELEGY WRITTEN OVER A BROKEN SLIDE-RULE

With apologies to Thomas Gray

The curfew tolls the knell of A. S. T.
The mourning world cries out a sobbing "Why?"
Ten thousand soldiers ponder what's to be,
And wander dazed, and grieve and cry.

Now fades the glamour in that patch of blue and gold,
Ten thousand soldiers lose their last farthings:
The sword is blunt, the flame of the lamp's gone cold;
Sardonic laughter shakes each side, each face is full of scorn.

Beneath a Physics text, beneath a slide rule's shade,
Ten thousand shoulder patches he is a melody heap.
There, lying in the lamp, stabbed by the sword, is laid
That most glorious of all gold bricks, in eternal sleep.

Recent victim of some peculiar blunt instrument. Death was instantaneous, since the assassins did a skilled job. The body was held in state during the entire month of March, until the stench became too great, and the last rites were held on April 1st. The ceremony was brief and simple, since nothing much could be said over the body of an infant that was never allowed to reach maturity and find its place in the world. Pallbearers consisted solely of octagonal patches showing a broken sword piercing a leaking lamp, all upon a goldbrick background.
The Army Specialized Training Program (ASTP) was organized by the War Department in collaboration with a number of the universities and colleges with the express purpose of supplying to the army a steady flow of high grade technicians and specialists under an accelerated program. A unit was established here at Georgia Tech on March 12, 1943 as one of the first of many and continued in an active existence until the program for the training of engineering specialists was abolished on April 1, 1944.
The original group consisted of five hundred trainees and was known as SCU 3408 AS and in June was augmented by an additional company. The unit was under the command of Colonel R. W. Collins until October at which time Colonel O. L. Gates assumed command. To take care of the expansion additional officers were assigned to the unit.

In general the program consisted of varying numbers of twelve week terms, depending upon the particular curriculum. The basic curriculum consisted of three such terms, at the completion of which there awaited three terms of advanced work in civil and mechanical engineering, or four terms of advanced work in chemical and electrical engineering. In addition to the strict scholastic work a thorough and equally strict military training was included as well as the physical
training given under the direction of Coach Alexander and his staff, which was adjudged to be the "number one P. T. staff in the nation."

The informal photographs accompanying show a pictorial record of the stay of A. S. T. P. here at Tech, starting with their arrival in March to their departure in April one year later. The sort of life led here by the A. S. T. P. trainees is very typically an army one.
A strict scheduled program was outlined for each man, utilizing their every moment from reveille till taps. The boy's week-ends was his own, and each used his to advantage. The only complaint about these week-end "liberties" was the fact that they started at 6 P. M. Saturday and were over at 8 P. M. Sunday.

Deeply enrooted in the memories of all concerned were the weekly drills and parades, the drill presented by the crack platoon of Company "C" at the Atlanta premier of "This is the Army," and the many contributions to the school's activities by their participation in the school
A. S. T. P.

Glee Club, publications, and intramural sports.

The men of A. S. T. P. gained for themselves, during their short stay here at Tech, the respect of faculty, students, and native Atlantans as well as their comrades in arms. These "wearers of the golden lamp" accepted their tasks—some against their desires, many more in accordance and thankful of the opportunity for the additional training—but they accepted their tasks and did more. Perhaps
not conscious of it, the A. S. T. P. left Tech a different school, a wiser school, a more appreciative school. When the national decision to abandon the phase of the A. S. T. P. program which brought the unit here to Tech was put into force during the last week of March, 1944, the faculty, Atlantans, members of the unit, and fellow students—civilian and navy trainees alike—were conscious that an important part of the school was leaving. And we all tipped our hats, and saluted, and paid our respects to the men of the A. S. T. P.
CADET ARMY STAFF

Lieutenant Colonel T. J. Withhorn, Battalion Commander
Major C. E. Hutchins, Battalion Executive Officer
Captain P. A. Yates, Battalion S-1
First Lieutenant James F. Park, Battalion S-2
Captain R. M. Berry, Battalion S-3
Master Sergeant A. H. Cary, Battalion Sergeant Major
Staff Sergeant I. M. Weiner, Battalion Intelligence
Staff Sergeant W. B. Daniel, Battalion Operations

COMPANY "A"

Captain B. B. Blackburn, Company Commander
First Lieutenant J. C. Perry, Second in Command
Second Lieutenant B. J. Taylor, Platoon Leader
Second Lieutenant L. D. Stables, Platoon Leader
Second Lieutenant J. W. Wallace, Platoon Leader
It is really hard to describe the feeling of all hands to Captain Babcock. He has grown to be a symbol of the true Navy to all Tech Navy students during his brief stay here. The Captain has served in the Navy for 47 years—and one can tell by his yarns that he is truly an "old salt." He has worked very efficiently with his capable staff of officers here and has built the Tech Navy Unit into one of the best if not the finest Training unit in the country. Many a Tech Navy Officer can truthfully say that Captain Babcock has been the example of what a Naval Officer should be.

Perhaps no one has been better known, respected and liked here at Tech than has been George Griffin. His deep interest and patient consideration of everyone's problem—no matter whether he be a Captain in the Navy or just one of the students—has made him beloved by all. Commander Griffin served in the Navy in the last war, was called to active duty as a reserve officer in 1940, and has now left for more active duty after fifteen years of service to Tech as Assistant Dean of Men, Track Coach, and mathematics teacher.

NAVY V-12

Marines
NAVY V-12

NAVY V-12

On July 1, 1943, close to one thousand boys from north, south, east and west gathered together at the Georgia Tech Naval Armory to be introduced to the U.S. Navy. To these young recruits everything seemed to be in a state of confusion. There was a line for room assignments, a line for clothing issue, another line for typhoid or tetanus shots—in fact there were lines everywhere.

Such was the auspicious beginning of the V-12 officer candidate program, not only at Georgia Tech, but also in hundreds of other colleges all over the country.
The mission of the college Navy Training Program is to insure a continuous supply of officer candidates with a college background in the various special fields of the U.S. Navy and Marine Corps. Without doubt V-12 is the best opportunity ever offered the youth of any country in any period of history. As Captain J. V. Babcock, commanding officer, expressed it to the unit at its initial gathering:

"In no other country in this wide world could such a program occur."
"You are to be fed, housed, clothed, furnished with medical services, your tuition and books paid for, and in addition paid $10.00 per month—all of this at the expense of your country."

It naturally follows that if so much is given, much is expected in return. V-12ers are at all times expected to uphold the exacting traditions of the Navy just as if they were officers. The very strictest principles govern the personal cleanliness of the trainees as well as the tidiness of rooms in dormitories. High scholastic standards must be maintained and unlike civilian days class attendance is compulsory. Although there is a great deal of discipline, excellent opportunities are provided for the sailors to gain experience in leadership in the various dormitory organizations. The student duty officers, mates of the deck, orderlies, battalion, company, and platoon commanders are alternated as soon as possible in order that every man is given the opportunity to advance himself.
After only a few days of beginning adjustment
the unit rapidly began shaping into a well function-
ing team as Captain Babcock prefers to call it. Now
a year old, V-12 has definitely proven to be a suc-
cess. The scores of valuable new officers turned out
constantly are already taking their places alongside
other officers and crewmen on the ships of the Navy
and in the ranks of tried Marines to make the
United States Navy the greatest fleet in the world.
Anak is the highest honor to which twelve of the most outstanding members of the senior class are selected. Founded in 1910, it is the oldest honorary organization on the Tech campus, and is dedicated to the promotion of interest in all campus activities. New members are tapped from the senior class at the mid-term and final Interfraternity Council sponsored dances.

One of the greatest honors that can be awarded to a student of Georgia Tech is membership in ODK. Members are selected by a system of awarding points on the basis of the student's participation in campus activities, a certain number being required for selection. The Tech Chapter of ODK was established in 1930 and is one of the outstanding honorary fraternities in the country.

Phi Kappa Phi honors those members of the senior class who have distinguished themselves on the basis of scholarship and leadership. Next to the oldest honorary society on the campus, Phi Kappa Phi, a national scholastic fraternity, was established at Tech in 1914. Members are selected from the upper seven percent of the senior class including all departments. Phi Kappa Phi awards a cup to the senior having maintained the highest scholastic average while at Tech. Phi Kappa Phi also sponsors the annual Honor Day Exercises at which recognition is awarded the deserving students.

**OFFICERS**

The officers of Phi Kappa Phi are chosen by the faculty members from the faculty members.

Tau Beta Pi, national honorary engineering fraternity, was installed at Tech in 1925. Students are selected on the basis of character, scholarship, and leadership, and membership in Tau Beta Pi is considered one of the highest honors to engineering students throughout the country. Tau Beta Pi awards a cup to the senior judged by the faculty from a selection by Tau Beta Pi.

The Briaerean Society, honorary organization for Co-ops, selects members of the Co-op Department who have distinguished themselves in leadership, scholarship and character. Membership in the Briaerean Society is the highest honor given to Co-op seniors and juniors. The society is divided into two sections to accommodate both sections of the Co-op Department. The Briaerean Society offers scholarship cups to an outstanding Co-op freshman and senior at the Annual Honor Day exercises.

Alpha Chi Sigma, national chemical fraternity, was founded at the University of Wisconsin in 1904, and the Georgia Tech chapter, Alpha Omega, was installed in 1932. It is the second largest chemical society in the world and is devoted to the advancement of the social, professional, and scientific ideals of men interested in chemistry. The organization draws its members from the juniors and seniors of the Chemistry and Chemical Engineering Departments. Alpha Chi Sigma offers a handbook annually to the junior having made the best record in Chemistry and Chemical Engineering courses.

The national honorary electrical engineering society of Eta Kappa Nu was founded on the Tech campus in 1940. Outstanding electrical engineering juniors and seniors are elected into Eta Kappa Nu. The society promotes scholarship by awarding a handbook to the electrical engineering sophomore having the highest scholastic average for his first three semesters at Tech. It is considered one of the highest honors for an electrical engineering student to be elected to Eta Kappa Nu.
The national honorary mechanical engineering society of Pi Tau Sigma was founded in 1915 and the local chapter was installed at Tech in 1932. From the junior and senior classes of the Mechanical Engineering Department outstanding students are selected for membership on the basis of character, leadership, and scholarship. At the Annual Honor Day exercises Pi Tau Sigma presents an engineering handbook to the highest ranking mechanical engineering sophomore, and engravses the name of the most outstanding senior on a plaque which rests in the Mechanical Engineering Building.
Devoted to the purpose of encouraging interest and furthering knowledge of the field of electrical engineering among students, the Georgia Tech chapter of the American Institute of Electrical Engineers was installed on this campus in 1915. The society is composed of members of the Electrical Engineering Department and offers lectures and papers on electrical engineering subjects as part of its activities.

[Members' portraits]
The American Institute of Chemical Engineers, national society of professional chemists, established a student chapter on the Tech campus in 1933 for the purpose of stimulating interest in the field of chemistry. Students in the senior and junior classes in the Chemical Engineering Department comprise the membership of the society. Motion pictures, surveys, and lectures by prominent men are part of the programs presented by this organization during the term.

In addition the AIChE also annually awards a key to the junior ChE maintaining the highest scholastic average, and also presents a handbook to another outstanding junior ChE.
Membership in the Georgia Tech student chapter of the Institute of Aeronautical Sciences is open to aeronautical engineering sophomores, juniors, and seniors. The Society promotes interest in aviation and aeronautical engineering by giving lectures and pictures and various social activities throughout the year.

Students of the Civil Engineering Department are eligible for membership in the student chapter of the American Society of Civil Engineers, which was established at Tech in 1939. The society has as its purpose the enrichment of the student's college life by increasing his knowledge of civil engineering and by forming contacts which will prove valuable in his later professional life.
Since its establishment at Georgia Tech in 1916, the American Society of Mechanical Engineers has been one of the most active departmental honoraries. Membership is open to seniors and juniors of the Mechanical Engineering Department who are interested in the advancement of their knowledge and the creation of better interest in the field of mechanical engineering. The society affords the opportunity for the young engineer to make valuable associations with his fellow professional engineers. Movies, lectures, and discussions are offered as part of the semester’s program.
Membership in the Industrial Management Society is awarded to outstanding non-engineering students on the basis of their scholarship and leadership. The Industrial Management Society was formerly known as the Scientia Club, the name being changed because of the fact that the industrial management course replaced the general science course. As part of the activities of the society, it awards annually a certificate of scholarship to the senior in the Industrial Management Department who ranks first on the basis of his scholastic record at Tech.

The M. L. Brittain Debating Society was founded at Tech in 1927 for the purpose of affording the opportunity for men interested in public speaking to display their abilities in debates. The society arranges debates and forums between Georgia Tech and nearby educational institutions and maintains an active program throughout the year. The society was organized principally through the efforts of Professor Folk, of the English Department, and was named in honor of Dr. M. L. Brittain, president of Georgia Tech, whose interest and efforts have meant so much to this institution.

The "T" Club is a Tech organization formed for the purpose of further honoring those athletes who have earned varsity letters in a major sport or who have won a conference championship in a minor sport. The club has its own clubroom and lounge in the Naval Armory.
During a period when Tech spirit seemed lax, Coach Alexander organized the Yellow Jacket Club for the purpose of promoting greater interest and enthusiasm in Georgia Tech sports. That was in 1930 and the club has continued its activity ever since. Among its activities is the authority to enforce the traditional rules regarding Tech freshmen, and the club is the sponsor for pep meetings during the football season and the annual "Rambling Wreck" contest. Members are elected from the freshman class at the end of each year.
One of the most active organizations on the campus is the Bulldog Club, which is composed of twenty outstanding members of the junior and senior classes. At the beginning of each second semester these men are selected to be initiated. The distinct nature of this initiation has made it one of the traditions of Georgia Tech. The Bulldog Club sponsors the interfraternity tennis and bowling tournaments, the Freshman Cake Race, and the Homecoming Decorations contest as part of its activities.
The Camera Club was established at Georgia Tech in 1940 for the purpose of creating and furthering interest in the art of photography. The club has its own dark room and sponsors photograph contests among its members.

The Glee Club has had to curtail its trips out of town to various colleges due to the war, but has had a number of concerts in Atlanta and its vicinity. The club has produced two of the Gilbert and Sullivan operettas in collaboration with the Glee Club of Agnes Scott under the direction of Walter Herbert. These past two operettas were "The Gondoliers" and the "H. M. S. Pinafore." This last operetta was first shown in Presser Hall of Agnes Scott and then in the Tech Naval Armory with extraordinary success as the first show of its kind ever shown on the Tech campus. "Pinafore," the most famous of the Gilbert and Sullivan operettas, is a satirical comedy about the British Navy. The Naval Armory lent quite a nautical air to the show.

The Glee Club gave a memorial concert with Josephine Antoinette, star of the Metropolitan Opera Company, in the early part of the winter, and received much praise from this famous singer.

Many of the concerts in Atlanta have been at the various churches around Atlanta: the North Avenue Presbyterian, the Ponce de Leon Baptist, where they sang negro spirituals and other appropriate selections.

One of the most active groups around the campus, the Glee Club has done much to spread the name of Tech in good favor wherever they go. It remains active as one of the only cultural organizations alive on the campus.
The members of the Baptist Student Union include all members of the Baptist church who are students at Georgia Tech. The Baptist Student Union Council directs the activities of the Union on the Tech campus. The group plans a Student Evangelistic Week, Vocational Training Week, student night services, and courses in church and Bible training. The council sends delegates to the state and Southern Baptist Student Union conventions. The council affords the connecting link between the student and the neighboring Baptist churches and takes an active part in promoting the religious activities of the student body.

As a chapter of the Federation of Catholic College Clubs, the Newman Club was established at Georgia Tech in 1913. The club is devoted to the unity of the members of the Catholic faith at Tech and to the presentation of religious and social functions for the enrichment of the student's life outside classes. The Newman Club has until recently maintained a house for the use of its members.

Each year the student body elects to represent them in the Georgia Tech Y. M. C. A., a group of men who they think are interested in the ideals and purpose of the Y. M. C. A., so that these men can help present the "Y" program in a better and more appealing manner to the students. This group is called the Y. M. C. A. Cabinet. The Tech Y. M. C. A. seeks to help each student to find friendships and has many activities to make his college life more wholesome. Discussions, lectures, social and church functions are part of the activities of the Y. M. C. A. in addition to the sponsorship of many clubs on the campus.

Founded as a local fraternity in 1927, Sigma Gamma played an energetic part on the campus until 1939, when the organization became inactive.

In February of 1942, Sigma Gamma was reorganized as a social and athletic club for Tech students without fraternity affiliations. Under the leadership of Bob Finkelstein and Alan Kurtis, a new organization evolved, consisting of twenty-two charter members. Many of these men graduated soon afterwards, but the others built up the club to unexpected strength, having forty-five members and pledges one year later.

Since then, the never-to-be-forgotten advice, "keep calm, study hard, join the E. R. C.", has had telling effect on us, as on everyone else. But despite the war, Sigma Gamma has remained on its feet, and will, we sincerely hope, continue to do so.

In the memory of all Sigma Gams are recollections of the Indian Springs picnic, our Blue and White annual dances, and the many small, but always lively, parties. Also, our own B. T. O.'s. In October, we lost "Boss" Gritz and room-mate Lee Burton, plus Jerry Teitelbaum and Art Shalloway. And this June we bid fond farewell to Prexy Cenker and V.-P. Bob Stein, the inseparable Capelouto and Rousso, "Goldbricks" Jaffe, Ruback, and Weinberg, along with Stan Itscovitz and Billy Silverman.

One of the most active organizations on the Tech campus is the national service fraternity, Alpha Phi Omega, which was installed at Georgia Tech in 1940. One of the requirements for membership is previous association with the Boy Scout movement, upon which the ideals and purpose of Alpha Phi Omega are based. The fraternity is dedicated to the promotion of friendship between its members and of service to humanity. One of the outstanding activities of the society has been the forming of a band of blood donors here at Tech.

This BLUEPRINT, the thirty-seventh annual of Georgia Tech, is in truth a two-year book. As a direct result of the existing national emergency it was necessary to effect this change. For the two years its three sets of editors, business managers, and staffs have worked continuously so that this record of the school and the school life shall be an accurate and well integrated one.
In spite of the War, the *Technique* has remained one of the most active and popular publications at Georgia Tech. Edited weekly by Tech students, the *Technique* has full coverage of all campus news. This publication has been one of the outstanding college newspapers in the South and provides valuable journalistic experience for its staff members.

Since the Navy came to Georgia Tech, the Nautilus has become more and more popular with everyone. By replacing the Yellow Jacket, which has been discontinued for the duration, the Nautilus has brought to the boys in the Navy much of the spirit and traditions of Tech, and made Tech seem more their own college while stationed here. The Nautilus is published monthly and has its office in the Naval Armory.

The Yellow Jacket was traditionally known here at Tech for the variety of humor which each issue displayed. In 1943 three regular issues and one farewell issue appeared before its publication was curtailed for the duration because of war restrictions, but the day of its return to Tech is looked forward to by all.

Here are presented snaps of the selection into membership by the three most honored societies on the Georgia Tech campus. We see the tapping by ANAK, the initiates of Tau Beta Pi, and those men selected by Omicron Delta Kappa.
The Interfraternity Council, which is composed of two representatives from each national fraternity on the Georgia Tech campus, holds jurisdiction, in conjunction with the Dean of Men, over the local activities of the various chapters. The Council imposes the general house rules, rushing rules, and pledge and membership regulations for all fraternities. The Council sponsors a dance each semester for which the most popular dance bands in the country are secured. The orchestras of Tony Pastor, Bob Allen, and Jerry Wald have been the most recent ones to play. These dances are the highlight of the social season and have continued in spite of the war.

This is somewhat our impression of what collegiate fraternity life is. In this small space no one could adequately describe these moments of fraternity life. These pictures can only serve to remind you of your fraternity days. The trip back to school from that lengthy vacation of six days. Your freshman education, the interfraternity
softball games for the trophy or the beer party with the frat down the street. Work periods, and repairing the house. Quiz weeks, and cramming for the tests. The weekly fraternity meetings, and the friendly games afterwards. The times you had to clean the upperclassman's car, or chase after his laundry. The week-end functions—house dances, and parties, and the fraternity formal. The Sunday morning after, reading the funnies, or seeing how we did in that game up at Annapolis. Sitting a dance out with your favorite girl, and rush week with all of its hulla-bloo. These serve but to point the way to our remembrances of our fraternity life at Tech.
Alpha Tau Omega was the first Greek letter college fraternity organized after the Civil War. It was founded at Richmond, Virginia, September 11, 1865; and its first chapter was established at the Virginia Military Institute at Lexington, Virginia. It was the first fraternity at Georgia Tech, having been granted a charter before the school opened, on September 18, 1888. Alpha Tau Omega was the first fraternity to incorporate and to establish a placement service.

The Beta Iota chapter sold their old house on North Avenue pending the building of a new house after the war, and is now temporarily located at 694 Cherry Street, in the heart of the campus. Alpha Tau Omega has always had its full share of leaders on the campus.

Beta Theta Pi was founded at Miami University in 1839, and enjoys the distinction of being the oldest social fraternity in continuous existence in the United States. The national fraternity at the present time has ninety chapters in the leading colleges and universities over the country. Since its beginning Beta has initiated over forty thousand men, many of whom have risen to fame in varied fields.

The Gamma Eta Chapter of Beta Theta Pi, an outgrowth of the local club Alpha Phi, was founded at Tech in 1917.

In 1943, the Beta House on Fowler Drive was leased to the school for the duration of the war. It is now being used by the school as a freshman dormitory.

During the past two years, the elaborate social functions such as the Beta Kid Party and the Beta spring formal have been considerably streamlined so as to fit in better with our war effort.
Chi Phi, the oldest national college fraternity, was founded at Princeton University, December 24, 1824. The Omega chapter was established at Georgia Tech in 1904, being the first fraternity on the campus to own its own house.

Now located in a temporary house, Chi Phi continues to be one of the most active fraternities on the campus. During the past season the Chi Phi's had several house-parties at Lake Burton, a Christmas formal, and many other functions.

The Alpha Gamma chapter of the Delta Sigma Phi Fraternity was founded on the Tech campus in 1920. First known as the "Soldier's Club," because it was formed by Tech men returning from World War I, it soon petitioned and became a chapter of the nationally known fraternity. Now, in the midst of World War II, the chapter is suffering its darkest days, but hopes to stay active.

Although many of our biggest functions, including the Shipwreck Ball, have been ended for the duration, Delta Sigma Phi plans to continue with bigger and better activities after the victory is won.

With men returning from the war, the Delta Sigs hope to figure greatly in Tech's postwar plans.
Delta Tau Delta was founded at Bethany College in 1859 and now has seventy-six chapters with a total membership of over thirty-five thousand. In February, 1920, Pi Phi Delta, a local fraternity, was granted a charter as Gamma Psi of Delta Tau Delta and has since grown to be one of the strongest chapters in the fraternity. The annual Artists' Ball is its notable contribution to Tech social affairs.

Delta Tau Delta always produces outstanding leaders in campus activities. Her honor has been upheld this year by C. A. "Benny" Roush and E. D. Rucker, members of Tau Beta Pi, the Co-op Club, The Briarane Society, A. I. Ch. E., and K. M. "Cozy" Cole, president of Alpha Chi Sigma and member of The Briarane Society and A. I. Ch. E. Roush was also Editor-in-Chief of the Nautilus and member of the M. L. Brittain Debating Society and Alpha Chi Sigma and on the staff of the Yellow Jacket and the Engineer.
The Kappa Alpha Order, founded in 1865 at Washington and Lee, established Alpha Sigma Chapter at Georgia Tech in October, 1899. It is a Southern fraternity and has 67 chapters, all below the Mason-Dixon line. With over 38,000 alumni, Kappa Alpha is one of the seven largest fraternities in the country. Alpha Sigma Chapter at Tech has always been most active in campus activities. During the past year, K. A.'s have participated in almost every campus activity, including Anak, O. D. K., and class officers.

In the last year Alpha Tau’s activities have been greatly curtailed, but we have not been altogether idle. We have been having parties and dances at the house as often as possible, and are carrying on as well as possible considering that most of our boys are in the services. Fortunately Tech has a V-12 unit, and in the V-12 are Kappa Sigmas from all over the country. These boys from other chapters constitute the main body now. Among various chapters represented are: Lambda, U. of Tenn.; Kappa, Vanderbilt; Beta, U. of Alabama; Beta Eta, U. of Auburn; Delta Alpha, Carnegie Tech; Delta Delta, U. of Florida; Alpha Upsilon, Millikin College; Delta Chi, Mississippi State; Epsilon Gamma, Louisiana Tech; Xi, U. of Arkansas; and Delta Upsilon, Occidental College.

Alpha Tau is also proud to point out the fact that it is represented in every branch of the service and in every theater of the war, and that eighty percent of them are officers. For them Alpha Tau is carrying on. It survived one world war and will survive this one.

Alpha Tau is also proud to point out the fact that it is represented in every branch of the service and in every theater of the war, and that eighty percent of them are officers. For them Alpha Tau is carrying on. It survived one world war and will survive this one.
The international fraternity of Lambda Chi Alpha was founded in 1909 at Boston University, and is now one of the largest social fraternities. The Beta Kappa chapter at Tech was established October 16, 1942, after achieving an enviable record during its thirteen-year affiliation with Beta Kappa.

Lambda Chi has contributed many of its members to the armed forces, but their foresight and efforts while in school have made it possible for the chapter to continue its activities on the campus. An active social committee aided by a lively pledge class has added variety to the numerous Saturday night parties at the chapter house.

In the last fifteen years the fraternity has won nine scholarship cups and placed second six times. Graduation takes from the chapter three seniors: Rock Canaday, chapter president, Co-op Club, Briaerean Society, Eta Kappa Nu, and the Technique; John Hammond, Co-op Club, Briaerean Society, Eta Kappa Nu, Phi Eta Sigma, Gold T, Tau Beta Pi, and Phi Kappa Phi; and Edmund Hankinson, Phi Eta Sigma, Alpha Phi Omega, Kappa Kappa Psi, Briaerean Society, Pi Tau Sigma, Gold T, Tau Beta Pi and Phi Kappa Phi.

Phi Delta Theta was founded at Miami University, Oxford, Ohio, on December 26, 1848. It has grown until it now comprises one hundred and six chapters in the United States, Canada, and Nova Scotia. The Georgia Tech chapter, Georgia Delta, was founded in 1902.

Today Phi Delta Theta, as have many other lodges, has lost many of its members to the armed forces. Phis are making a great name for themselves on all the war fronts. Those who are still here are carrying on in a typical Phi fashion . . . four members in Anak are Manning, Fitzgerald, Merts, and Paxson. Captains of both the football and basketball teams, Manning and Paxson. President of the Senior Class, secretary-treasurer of the class of '44 as well as many other outstanding campus activities. Boosted out of its home on Fraternity Row, Phi Delta Theta has made its home for the duration in the old Phi Sigma Kappa house on Williams Street.

Phi Epsilon Pi was founded on November 24, 1904 at the College of the City of New York; and Xi Chapter here at Tech was established January 15, 1916. Always leading among activities Xi chapter has remained active throughout the existing national emergency. Though many of Xi's members have left school to take their places in the army and navy, the chapter has been able to maintain a successful and active existence upon the campus. During the last graduations Xi has lost George Sellers, chapter president, and Rudy Bunzl, editor of the Blueprint, and one of the scholastic leaders of the campus, and Paul Lee, chapter president, Editor of Blueprint, and president of A.I.Ch.E., Anak. Those many fraters lost to the services during the past several semesters and not having completed their scheduled curriculum plan to return to Tech in the post-war years, and maintain Xi chapter on the Tech campus.

The fraternity of Phi Gamma Delta was founded at Jefferson College in 1848. Although founded primarily as a Southern group, it became national in scope after the Civil War, and now numbers 74 chapters.

The Gamma Tau chapter was installed at Georgia Tech in 1926 when Gamma Tau Delta, a strong local, organized expressly for petitioning Phi Gamma Delta, was granted a charter.

Phi Kappa Sigma was founded at the University of Pennsylvania October 19, 1850. The Tech chapter, the first on the campus to own its own house, was installed January 15, 1904. Several of the chapters on other campuses have suspended operations for the duration, but the chapter here has very good prospects for remaining active.

Outstanding through the year were: Bob Williams, A. I. R. E., A. F. E., Yellow Jacket staff; Dan Pulley, A. I. Ch. E., Yellow Jacket staff; Stan Krysiak, Bulldog Club, N. R. O. T. C. Rifle Team, Cadet Lieutenant, Nautilus staff; Tom Edwards, Bulldog Club, Nautilus staff, Navy Wrestling Team. All of these men have served the chapter on the Interfraternity Council.
Pi Kappa Alpha was founded at the University of Virginia on March 1, 1868. For some time the fraternity was definitely Southern, but now has expanded all over the country. At present, the fraternity has eighty-two chapters, with a membership of eighty thousand. The Alpha Delta chapter was installed at Tech in February, 1904.

Every year the chapter holds its annual Possum Hunt, Christmas Party and Senior Party. The annual Black and White Ball has been discontinued for the duration.

Founded on December 10, 1904, Pi Kappa Phi was incorporated as a national fraternity in December, 1907. The Iota chapter was established in October, 1913. Even with serious losses to the armed forces, Iota has kept a large membership. Iota alumni are scattered over the whole globe keeping the tradition of Pi Kappa Phi.

Founded at the University of Alabama, March 9, 1856, SAE has expanded to one hundred and fourteen chapters with a membership of sixty thousand. This year we won the annual Cake Race for the third straight time, and are now permanent owners of the Golden Gaboon for winning the Ramblin’ Wreck Contest three times. A number of outstanding seniors were taken out of school in February by the Navy. Among these are Locke Thomison, ANAK, ODK, and editor of both BLUE PRINT and Yellow Jacket, Gordon Colledge, Secretary of ANAK; Russell McGee, ODK; Buddy Sanders, President of the Student Council; and J. Y. Arnold, chapter president for the fall term. Outstanding seniors graduating are Henry Reid and Hugh Caldwell, chapter president, Vice-President of ANAK, and president of both Pi Tau Sigma and ASME. Leading social events of the year were the Christmas Formal and traditional Marietta Picnic.

Sigma Chi was founded June 28, 1855, at Miami University, Oxford, Ohio. Since its founding it has expanded to 101 active chapters in the United States and Canada. The Beta Psi chapter was installed at Tech in 1922 by the absorption of Pi Alpha Sigma, a local fraternity.

Over half of the Sigs are in the V-12 or N. R. O. T. C. units and the Battalion Commander of the latter group for two consecutive semesters has been a Sigma Chi. Fortunately chapter membership has continued at its prewar level, which has enabled Sigma Chi to retain its chapter house and to remain a leader in campus and social activities. At the formal Sweetheart Ball Miss Thelma Jo Kerr was elected Sweetheart of Sigma Chi.

Sigma Chi is on the Student Council are Scott Campbell and Lawrence Gellerstedt, representing the Junior class, and Frank Gurry, representing Harrison Dormitory. Gellerstedt is Vice-President of the Student Council, President of the Junior class, member ODK, Tau Beta Pi and Phi Eta Sigma.

Founded at Virginia Military Institute in 1869, Sigma Nu was installed at Tech in 1896, the fourth national social fraternity to reach the campus.

The year 1944 marks Sigma Nu's seventy-fifth year of activity. During these years it has grown from one to ninety-eight chapters in 46 states, representing a total membership of over forty thousand men.

Gamma Alpha Chapter at Tech presented a banquet and dance at the Piedmont Club in commemoration of its seventy-fifth anniversary. This was its outstanding function of the year, being attended by alumni and chapters from Emory and University of Georgia. Numerous other functions and socials were presented throughout the year.

The Sigma Phi Epsilon Fraternity was founded in November, 1901 at the University of Richmond. There twelve friends who joined together for the sole purpose of friendship, and with their far-sightedness founded a fraternity that has now taken its place among the great organizations of the fraternity world. Since 1901 the fraternity has grown until at present there are seventy-five chapters spread throughout the nation with a total membership of over twenty-five thousand.

Georgia Alpha Chapter was founded at Tech in 1907, being the seventh fraternity to be established here.

Phi Chapter of Tau Epsilon Phi has just completed its twenty-second year on the Tech campus and one of its most successful with respect to activities and pledges. Were these not war-time years, we would be assured of a bright future. However, an increasing number of fellows are leaving for various branches of the service. Among these are our three graduating seniors—Harvey Lee Cohen, Gordan Stine, and D. R. Levin. Harvey is bound for Fort Benning; Gordan, Parris Island, and D. R., destination unknown. To the three we wish the best of luck.

Those of us who remain at Tech will endeavor to continue with the same high standard—in the classroom, on the campus, and socially.

Alpha Nu Chapter of Theta Chi was established on the Tech campus in 1923. Its conservative policy toward membership and activities has produced gratifying results.

Through the present changing conditions, men of the usual "Alpha Nu" calibre have been served at the chapter home. Social functions of the past year included a hay ride, Christmas party, house dances, house party, and host to the Rebel Division of Southern Theta Chi Chapters. The first place award in the Homecoming Decorations Contest of 1943 represents the latest addition to the chapter trophies.

Graduates of the last year include: Tony Navarro, Hugh Lewis, Charles Burress with the class of October, 1943 and Jim Keith, Bill Johnson in June, 1944. A large contribution of members to all branches of the service marked the premature departure of many good brothers.

Backed by a sound financial system, Alpha Nu looks forward to weathering the wartime storm in excellent shape.
In war as in peace time the long awaited social event of the school year is the Interfraternity Council dances. On this and the following pages we present scenes from these dances—those of Jerry Wald, Tony Pastor, Bob Allen, and the Coca-Cola sponsored Richard Himber dances.
Departing from previous practices, this edition attempts to focus its attention upon the dances in general rather than upon separate couples. We focused our camera on the podium and watched the bands and their featured players. We looked on and watched the ANAK tappings, and the Senior and
IFC lead outs. We also looked on and watched our fellow students and dates dancing and sitting one out. We also see some of the faculty enjoying our dances with us. Here we have a simple reminder for years to come of some of our prized collegiate social events.

"BEST OF THE SOUTH"

The winning of the Southeastern Conference Championship and the receiving of an invitation to represent this conference in the famous Sugar Bowl classic by the 1943 Yellow Jackets climaxed one of the most successful seasons in the history of Georgia Tech.

Army and Navy occupation of the campus made the development of a strong grid eleven difficult. Rigid scholastic requirements of the Navy caused practice to be limited to about an hour each day, and during this single hour Coach Alexander and his staff of coaches had to weed out the best players and the best combination of players from a field of seventy "unknown" candidates.

Civilians were all but non-existent on the team which was composed mostly of Navy ROTC and V-12 transfer students. The Army did not permit its ASTP students to participate in inter-collegiate athletic events. The transfer students had all missed spring practice, further complicating matters, and had to adjust themselves to a new method—the Tech method—of playing the game.

Members of the 1942 Cotton Bowl team were missing, most of them going into active duty when the Enlisted Reserve Corps and the Army Air Corps Reserve were called out in the Spring of 1942.

The troubles, however, were somehow ironed out and the Jackets developed into the "best in the Southland" as the season progressed.

The success of the 1943 Tech grid outfit operating under extremely difficult conditions is a testimony of the effort put forth by each and every member of the team—a credit to the players themselves, to their coaches, and to their school.

During the run of the season two captains led the Engineers through a successfully scheduled season and to the Southeastern Conference Football Championship. George “Mutt” Manning and John Steber, captain and alternate captain respectively at the beginning of the season, shared honors as being the captains of the same great team. John became the team leader after “Mutt” was called to active duty as an Ensign in the Navy last November at the close of the 1943 Summer semester.

Manning, who was an honor roll student in the Mechanical Engineering Department, played three years of varsity football at the pivot position while at Tech. An excellent line backer, “Mutt” was especially noted for his ability at knocking down enemy passes. He was voted the most valuable player on the 1942 team and was recognized as one of the outstanding centers of the nation.

Steber, who took over the captaincy around the first of November, came to Tech from Vanderbilt as a Navy V-12 student. Quick to catch on to new methods of playing the game, Steber almost immediately clinched a first-string guard position, at which he played throughout the season in a fashion as to rate him the recognition as the outstanding lineman of the year by sportsmen over the nation. The record book shows that Steber’s total time of actual play exceeds that of any other member of the team during the ’43 season.
WILLIAM A. ALEXANDER  
Director of Athletics and Head Football Coach

The story, in a nutshell, of the life of Coach Alexander is that of a man who played scrub football for four years while in college and later became one of the greatest football mentors in the history of the game.

Coach Alex entered Georgia Tech in 1906, played scrub football in 1907-8-9, and served as student assistant coach in 1910. He taught in the mathematics department after graduation and was named assistant coach. In 1920 he relieved the late John W. Heisman as head football mentor.

Under his regime, the athletic program has expanded at a constant rate to one of the best rounded programs in any school, having won conference championships in football, basketball, cross country, swimming, fencing, track, and tennis.

Year in and year out, Coach Alex has put a strong eleven on the field through many times lacking even fair material, due to the rigid scholastic requirements of the school. Every year it has become necessary for him to devise new plays to utilize the available material.

Alexander coached teams have won six conference championships and three bowl titles. At the close of the 1942 season he was selected by the coaches of the nation as the Coach of the Year, the selection being based on "Skill as a football teacher, reputation for sportsmanship, achievement in competition, influence for the welfare of football, and ideal relationship to his players."

Along with being one of the best-known and best-liked men in the game, Coach Alexander has served as a member of the National Football Rules Committee, and is a former president of the American Football Coaches Association.

Bobby Dodd  
Assistant Football Coach and Backfield Coach

An All-American from the University of Tennessee, Coach Dodd has received nation-wide acclaim for the work he has done in developing the Tech backfield each year into a fast-moving, smart playing, colorful unit.

Coach Dodd attended Kingsport, Tennessee, High School, where he participated in four sports and was a member of the "Pony Express" backfield which scored 643 points in seven games. At Tennessee he played football, baseball, and basketball. In football he was an excellent field general and one of the greatest passers in the history of southern football.

Beginning the season after one and a half months of hard, earnest practice during rationed time, the Yellow Jackets of Georgia Tech went into the opening game with their strength unknown, untested, and doubted. The season ended with the Engineers winners of eight games, losers of three. The Tech eleven went down in defeat before Notre Dame, Navy and Duke, rated as the three strongest teams in the nation in the order listed.

During the progress of the 1943 season, two players were seen to come before the eyes of the nation to be recognized as All-Americans; the captaincy of the team was seen to change hands when the Navy called to active duty several essential players; and the team was seen to develop from an untested, doubtful outfit composed almost entirely of transfer Navy V-12 students and third and fourth string players of the Tech '42 team into the grid powerhouse of the South.

An individual account of each of the games that made up a season of upsets and unusual occurrences follows in the only style possible to give proper color to the coverages of the battles—that of a typical daily newspaper.

**THE GAMES**

ATLANTA, Sept. 27—Led by big Eddie Prokop, who made a brilliant 79-yard touchdown run to put the game safely on ice, the Georgia Tech Engineers defeated a favored North Carolina team 20-7 here today in the Jackets' first test of the season.

Only during the last few minutes of the game were the Engineers certain of victory over the Navy V-12 aided Tarheel "dream team," a team reported to be four and five deep at every position in experienced gridmen who transferred to North Carolina from schools all over the South.

In the first five minutes of the tilt, Tech recovered a Carolina fumble and immediately scored on a pass from Broyles to Hill. Tech's second score came early in the third period when Prokop bucked the line to move the ball over the double stripe after a perfectly executed fake play, featuring Logan and Broyles, had moved the ball into scoring position.

The Tarheels scored late in the third quarter and were threatening again late in the fourth when they lost the ball on downs deep in Tech territory. The next play, after the Jackets took possession of the ball, Prokop hit off tackle, cut sharp to the right and outran the entire North Carolina backfield to pay dirt.
NOTRE DAME RUNS WILD TO WIN 55-13

SOUTH BEND, IND., Oct. 2—The old Model T, with Bertelli at the wheel, ran wild today as a slightly favored Notre Dame eleven trounced a tired Georgia Tech team 55-13 at Carrier Field before a capacity crowd in one of the most exciting one-sided battles on record.

Not until past intermission when a long train trip began to show on the Jackets, who arrived here only a few hours before game time, did it become evident that the Irish were to be the winners.

Early in the second period the Irish led by two tallies. Tech then began to move through the air lanes with Prokop tossing and Dorough and Kilzer receiving, moving the ball into enemy land where Scharfschwerdt bucked over the final sixty-first yard for the touchdown. A few minutes later, the Engineers scored again by virtue of a blocked Notre Dame kick, followed by a pass from Broyles to Logan in the end zone to tie up the tussle.

Taking the kick-off, the Irish moved 70 yards for another six points. The Jackets then came, and they had the ball on the Notre Dame eight when the Engineers rushed for time, lost the ball on downs as the half ended.

The second half saw Leary's team steadily build for ahead to hand Tech the worst defeat since 1930 when Florida beat the Ex-Rose Bowlers 50-7.

TECH BEATS FLYERS 35-7

ATLANTA, Oct. 9—Bouncing back from the Notre Dame catastrophe, the Tech Engineers easily defeated a Georgia Pre-Flight eleven 35-7 here today in the Jackets' first service team encounter of World War II.

Credit for Tech's five scores goes to Logan, Prokop, Furchgott, Scharfschwerdt and Bourne. The Skycracker's lone tally came in the fourth period when the Flyers took to the air to drive 71 yards against third and fourth stringers.

The Jackets seemed to be in top condition, contrary to what was expected by Coach Alex, who feared that the Notre Dame loss would cause a drop in the morale of the players to the extent that their playing ability would be harmed.
ATLANTA, Oct. 16—An air attack proved superior to ground movements today as the Jackets of Georgia Tech passed their way to a 27-0 win over the 300th Infantry of Fort Benning.

Believed to be one of the strongest service teams in the nation, the Benning Soldiers threatened to score only once—when Joe Routt, outstanding Infantry guard, recovered a Tech fumble on the Engineers' 19. Before today, the Infantry team was undefeated.

Passes from Prokop to Kilzer set up two scores, while Dorough took a Prokop tossed ball and raced 29 yards for another tally. Harrison backed over from the seven for the third score.

MUNICIPAL STADIUM, BALTIMORE, Oct. 23—In a fast moving, at times ferocious, football game, Hal Hamberg led the Midshipmen of the United States Naval Academy to a 28-14 revenge over the Jackets of Georgia Tech here tonight before 16,000.

The Jackets had discontinued practice during the past week due to final examinations at the school. Even under this handicap, the Jackets played one of the sharpest games ever seen on this field. Sheer power and reinforcements with a streak of luck gave the undefeated Admirals the victory.

Tech scored first in the second half after Hamberg sliced a punt out of bounds on Navy's 16. The Midshipmen tied up the game and went ahead in the second period by one touchdown. Shortly after intermission the Jackets marched 52 yards to again tie the score as Prokop passed to Gaston twice to set up the score.

The Navy then steamed ahead, however, to score two more, largely through the utilization of Hamberg's passing arm.

ATLANTA, Oct. 30—In a hard fought, conservative football game, the Duke Blue Devils passed their way into a 14-7 win over the Tech Engineers here today.

The Blue Devils took the lead in the first quarter on a 50 yard pass from Loper to Blount, which moved the ball to the four, from where they bucked over.

Bill Smith blocked a Duke punt in the second period to give Tech a potential touchdown.

The winners went into the lead again in the third quarter by virtue of an intercepted Tech pass at the Jackets' 31. Carver outjumped a short Tech halfback on the next play to pull down a slow, high, looping pass for the winning score.
Classes have been out at both Tech and Duke during the past week, and apparently nothing has been done at either school in the form of serious practice. Duke did not lose any graduating Navy V-12 players before the Tech tilt as was expected, and was at top in manpower strength.

On the other hand, the Jacket squad was minus the services of Gene Hill, Bill Harper, Harry Morton, Eddie Atkinson, Dick Lowrey, Al Faulkner, Ed Ryckley, "Duck" Smith and Al McDonald. Due to this loss of personnel because of Navy orders, an almost complete reorganization was necessary in the Tech camp prior to today's game.

Outnumbered 7 to 1, this Jacket continues to push forward.

Tech runs over civilian Tigers

ATLANTA, Nov. 6—A young, none too big, inexperienced civilian L. S. U. eleven went down in defeat 42-7 before the mighty Tech Yellow Jackets here today in the Engineers' first conference encounter of the season.

The meeting of a team of Tech's calibre for the first time this season simply proved too tough for the civilians. The Tiger's only offer was 200-pounder Steve Van Buren. "Moving Van" performed in the manner credited to him even with little help from his teammates, who ran against a smashing defensive force which seemed bent on deflecting a reputation.

In Tech's backfield, Prokop, Broyles, and Jack Faulkner turned in a good day's work, while Steber and Hoover were outstanding on the line.
NEW ORLEANS, Nov. 13—With an impressive 33-0 victory over the Tulane Green Wave here today, the Georgia Tech Engineers clinched the Southeastern Conference football championship and a possible bid to the Sugar Bowl classics, while Eddie Prokop established a new S. E. C. passing record by completing 13 consecutive tosses.

The Sugar Bowl Committee of the New Orleans Mid-Winter Sports Association viewed the Tech-Tulane tilt and afterwards expressed pleasure in the Jackets’ colorful performance.

Tulane, the only other Navy aided school in the conference, put up a brilliant fight during the first half, holding the Jackets to a single score at half time. The second part of the game, however, saw a better organized Tech team surge rapidly ahead, running and passing for four more touchdowns.

ATLANTA, Nov. 20—Tech defeated a fighting but outclassed civilian Clemson team, a peace-time powerhouse, here today 41-6 before 16,000. Tech’s second and third team played most of the game, seventy-five Engineers being used during the run of the contest. Tech led at the close of the first quarter, 25-0.

ATLANTA, Nov. 27—With apparently little trouble, the Engineers of Georgia Tech handed their traditional rivals, the Georgia Bulldogs, their worst defeat in the history of the series by a score of 48-0 here today before 30,000 at Grant Field. Tech beat Georgia 46-0 in 1904.

With today’s victory Tech officially became the 1943 S. E. C. champions. The spirited Georgia team was no match for the experienced Tech eleven who took an early lead and increased it steadily until the final whistle sounded.

Eddie Prokop flew in from Cleveland, where he attended the funeral of his mother, to write the final chapter in a great grid career. Eddie ran for 121 yards, threw for 33 and returned punts for 74 to total 228 for the day. Six extra points are also to his credit.

The game, as expected, saw a superior Tech team run wild over an old rival. Even after it became evident that the Jackets were to win, the game held a surprisingly large amount of traditional spirit, even down to a pre-war short tailed parade which was formed by Tech freshmen upon orders from upperclassmen following the tilt.

PROKOP PASSES TO A 33-0 TECH WIN

ENGINEERS WIN 25-0 OVER CLEMSON TIGERS

JACKETS HAND BULLDOGS WORST DEFEAT OF SERIES
Tech produced some of the nation’s best gridiron during the 1943 grid season according to the fans, coaches and sport writers over the country who named two members of the Jacket team to All-American berths.

John Steber was unanimously chosen as the outstanding guard of the year when he was selected to all of the 21 All-American teams picked each season. Steber was also awarded the Jacob’s Trophy, an award presented to the selected best blocker in the Southeastern Conference.

The selection of John Steber to all of the mythical teams of stars was a just recognition of his ability as a linesman and as a team leader.

Eddie Prokop was selected to several All-American teams and to the Associated Press’ second team. The A. P. further revealed that Prokop ended the season in second place in total offense with 1,440 yards gained in 269 running and passing plays from scrimmage, and in third place among passers with 66 out of 133 attempts completed for a total yardage of 806.

Six Tech gridmen were selected by players in the Southeastern Conference to the I. N. S. Players’ All-Southeastern Team.

E. Phil Tinsley, Georgia Tech.
T. G. E. Jones, Tulane.
G. John Steber, Georgia Tech.
C. Bob Cummings, Georgia Tech.
G. Mike Castronis, Georgia.
T. Bill Chambers, Georgia Tech.
E. Ray Olsen, Tulane.
B. Frank Bradley, Georgia Tech.
B. Johnny Cook, Georgia.
B. Eddie Prokop, Georgia Tech.
B. Steve Van Buren, L. S. U.

A. P. sports writers selected four Tech players to their All-Southeastern Team.

E. Phil Tinsley, Georgia Tech.
T. Joe Hartley, L. S. U.
G. John Steber, Georgia Tech.
C. Buddy Gatewood, Tulane.
G. Gaston Bourgeois, Tulane.
T. Bill Chambers, Georgia Tech.
E. Ray Olsen, Tulane.
B. Joe Renfroe, Tulane.
B. Eddie Prokop, Georgia Tech.
B. Johnny Cook, Georgia.
B. Steve Van Buren, L. S. U.
NEW ORLEANS, Nov. 27—The New Orleans Mid-Winter Sports Association announced today, following the Tech-Georgia tilt, that the Georgia Tech Engineers have been invited to play in the annual Sugar Bowl classic on New Year's Day. Tech's opponent will be the University of Tulsa team, the Sugar Bowl Association stated.

ATLANTA, Nov. 27—Coach William A. Alexander said today that the Tech team had voted unanimously to accept the Sugar Bowl bid.

ATLANTA, Nov. 27—Coach Henry Frank, Tulsa's head coach, viewed secretly the Tech-Georgia game today. Frank learned of Tech's acceptance to play in the Sugar Bowl earlier this week. Tech coaches had no chance to scout Tulsa since the announcement of the teams selected was not made until after Tulsa's scheduled season had ended.

ATLANTA, Dec. 9—The Sugar Bowl bound Tech team resumed practice today after a lay-off of two weeks in preparation for the Engineers' New Year's Day encounter with Tulsa in New Orleans.

Tulsa's undefeated, but once tied, grid outfit is at work daily preparing for its New Year's Day encounter with the powerful S. E. C. champions.

Amazing is the fact that Tulsa's team is composed entirely of civilians. Out of a squad of 41, twenty-four are classified 4-F and nine are either 17-year-olds or undrafted 18-year-olds. Just how Coach Frnka collected this group of football-minded cripples is his secret, he says. The Oilers' team has outscored opponents 251 to 32, with an average of 36 points per game. Only a 6-6 tie with the Southwestern (Texas) team mars a perfect season.

Tulsa also ranks high among the nation's gridiron leaders in several departments of play. In forward passing offense Tulsa ranks third in the nation while Tech is in ninth place. Tulsa attempted 141 and completed 69 for a total of 931 yards in seven games, or an average of 133 yards per game. Tech attempted 159 passes and completed 79 for a total of 1,011 yards in nine games, or an average of 112 yards per game. However the difference in class of competition faced must also be taken into account. In total offense Tulsa averaged 16.6 yards per try.

ATLANTA, Dec. 31—An expected 70,000 fans will witness the tenth annual Sugar Bowl classic here tomorrow when the powerful physically fit Navy, Marine, and engineering deferred students of Georgia Tech, S. E. C. champions, battle the undefeated civilians of Tulsa University in the most attractive bowl game of the day.

Both teams have been in close range of the stadium for the past week. Tech has limited practices to a few hours each morning, leaving the afternoons for sight-seeing; the Tulsa squad has gone through rigid practice every day.
THE FIRST GRAND SLAM

The 1943 Jackets played the final hand required to achieve the first grand slam in bowl-game history. With the Engineers' participation in the Sugar Bowl on January 1, 1944, the Georgia School of Technology became the first school in the nation to have been represented in all four major bowls, and Coach William A. Alexander, likewise, became the first coach to have tutored four such teams.

About twenty years ago, Bobby Jones, a Tech student, won the final match necessary to give him the first and only grand-slam in golf history.

TECH COMES FROM BEHIND TO BEAT TULSA 20-18

NEW ORLEANS, Jan. 1—Led by Eddie Prokop, who averaged almost seven yards in each attempt at running after being forced to abandon his pass attack, the Georgia Tech Engineers came from behind to beat a previously under-rated Tulsa eleven 20-18 in a story-book finish before 69,000 half frozen fans in the tenth annual Sugar Bowl contest here on this first day of 1944.

Trailing by two touchdowns at half-time, the Jackets returned to the game, stopped passing and through long land movements overcame a lead the Tulsa team had acquired early in the game.

The Engineers apparently received orders at intermission to call in the air force and employ ground operations instead. Tech had been unsuccessful with an air attack during the first half against a team that was well prepared against that type of offense.

The Jackets became masters of the situation as soon as the last half began. Two long drives gave the two tallies required for victory, the final score coming with only four minutes remaining in the game when Ed Scharfwerdt spun over into pay dirt.

The Oklahomans, who led 18-7 at the half, failed to score after the second period. They threatened only once, and that came after Tech's final touchdown when Tulsa recovered a fumble. By means of a long pass, the Oilers moved to the Tech 33. On the next play Broyles made a spectacular interception of a touchdown bound Tulsa pass to put the game safely in the win column. Tech had moved deep into enemy territory again when the final whistle sounded.

The second half was one of the hardest fought games on record. The Jackets were attempting to overcome an 11-point handicap; Tulsa was trying to hang on to what was at first thought to be a safe lead.

Frank Broyles played his best game of the season, holding down two positions at different times for the game. On the line, Steber and Chambers were standouts.

A large amount of the credit for Tech's come-back goes to Coach Alexander who further proved himself as the nation's foremost defense strategist in setting up a check for Tulsa's variable offenses.

Several Sugar Bowl records were broken in the game, including the Tech total yardage rushing of 372 run up by Broyles, Prokop, Logan, Gaston and Scharfwerdt and the 25 first downs registered by the Jackets.

Two teams with almost identically opposite make-ups—Tulsa, composed of civilian 4-F's, coached by a man who has served as head mentor only three years; Tech, a team of physically fit Navy V-12 students, tutored by a veteran of 23 years' experience—gave the capacity crowd probably the most exciting game in the ten years of the bowl's existence.
Tulsa's Ford attempting a run around right end.

The Mighty Mite, Mickey Logan, fighting off enemies coming from all directions.

Between the bars for one of Tech's two winning extra points.

Smith of Tulsa heads around left end as Chambers (42) and Kitser (64) rush in for the kill.

Beavles carrying the ball and two Tulsa linemen down field towards pay dirt.
Due to the formation of the new S. E. C. rules which allowed freshmen to play in the varsity intercollegiate games, neither Tech nor Georgia had an organized freshman team during the 1943 season. The annual Tech-Georgia Freshman Thanksgiving Day game, naturally, was called off. Not to let down the Scottish Rite Hospital, the beneficiaries of the game, Tech A. A. officials arranged a Turkey Day grid tussel between the Tech "B" squad and the 10th Armored Division eleven from Camp Gordon, Georgia. The day arrived when the team that had been knocked all over the field by the varsity all season was to shine.

Before a crowd of 25,000, the Tech "Greenies" ran wild over the Camp Gordon team to the tune of 31-0. Led by Chiefs Pritchard and Andrus, the well-trained Engineers had little trouble in pushing aside a fighting but unorganized soldier team. After the winners had run up 25 points in the first half, a new style of play, termed the "frizzle-dizzle" system by Coach Dean, was employed which caused the game to become interesting even though lopsided as the score indicates.

Tech's 1944 basketball squad, functioning under conditions equally as difficult as did the football team, came from the court after the final scheduled cage encounter winners over all but two oncomers in one of the Jackets' most successful seasons in many years. Three lettermen, two hold-overs from the '43 "B" team, and five loopmen picked from the ranks of the many Navy students stationed at Tech, made up the 1944 squad. Wes Paxson, 1944 team captain; Bill Johnson, alternate-captain, and Frank Broyles played on the 1943 varsity, while Durand Holladay and Gene Wright were members of the '43 "B" team. The remaining five members, Dick Collier, Nelson Abell, Jack Bills, Hal Johnson, and Oscar Waldkirch, unknown to the coaches at the beginning of practice, worked their way up to a first string position from a field of twenty candidates.

Unusual about the 1944 team was that seven states were represented by the nine team members. California, Florida, Texas, Louisiana, Iowa, Kentucky and Georgia had representatives on Tech's 1944 cage squad. The Jackets lost to only two opponents. The Georgia Navy Pre-Flight defeated the Engineers once and the 176th Infantry, a team composed of cage stars from all over the country, beat the Tech team twice.

When the Jackets entered the Southeastern Conference tournament at Louisville, they were rated as the second best team in the conference and were expected to give the favored Kentucky five a close race for the championship. But orders from Washington calling Tech K. O. on active duty took Nelson Abell and Gene Wright from the team on the eve of the tournament. In Tech's first game of the tournament, the already handicapped Jackets suffered another jolt when Captain Wes Paxson sprained his ankle in the opening minutes of the Vanderbilt tilt.

Tech defeated Vanderbilt 63-51, however, after being held to a 27-27 deadlock at half time, and Paxson came out of the game as the top scorer with 23 points to his credit even with his broken ankle. In the semi-final game a shortage of reserves and Paxson's injury caught up with the Jackets and Tulane's extremely tall loopmen leaped ahead to win 65-55. At half time, Tech and Tulane was tied up, 31-31, and with only five minutes left in the final quarter, the tussle was at a 50-50 deadlock.

Against Tulane, Paxson was again high point man with another 23 points. Frank Broyles turned in an excellent defensive game and his accurate long shots over the Tulane's zone defense during the first half kept the Engineers in the game.

Tech sends the ball towards the basket in the Jackets second encounter with Clemson.
Captain Paxson was unanimously chosen to the All-S. E. C. team, while Broyles, Dick Collier and Bill Johnson received honorable mention. Paxson was the high scorer on the team for the entire season, being responsible for 283 points. Dick Collier was the second high scorer with 212 points.

A large amount of credit for the success of the team is due Coach Dwight Keith, who served as head basketball mentor for the first time, replacing Commander Mundorf, who was ordered to another station by the Navy Department. Coach Keith received valuable aid from Chief Bob Polk, and Assistant Coach and Trainer "Sandy" Sandlin.

Bottom right: Kitzer (3), then a Vandy student, attempts to beat Scruggs and Lance to a ball that missed the target.
FRED LANOUÉ, Swimming Coach. Coach Lanoué attended Springfield College where he participated in track and swimming. In 1932 he won the Northeastern Intercollegiate Diving Championship. While working on his Master's degree, he served as swimming Coach at Springfield. Known as "Freddie" by most of his associates, Coach Lanoué came to Tech in 1940 to coach swimming and gymnastics and to instruct physical education classes.

Under Freddie's leadership, swimming at Tech has developed into a major sport. In 1941 his team came through the season undefeated, winning the SEC Championship. His summer school team in 1942 won the Southeastern A. A. U. Championship.

Aside from being an outstanding coach, Lanoué is a member of the National Association for Health and Physical Education Committee.

WILLIAM STODDARD, Assistant Coach
LYN KEYES, Assistant Coach
UNDISPUTED CHAMPIONS

With the war, transportation shortages, and draft of men for the Navy, Tech swimmers had quite a few problems to overcome this year before ever meeting their opponents.

Since the beginning of the war, all the schools in the Southeastern Conference except Tech have, one by one, discontinued intercollegiate swimming. This makes Tech undisputed conference champion, but it also means that Coach "Freddie" Lanoue has to look elsewhere to find competition for his swimmers. However, he managed to book seven dual meets and the three A. A. U. meets this year.

The season was opened with the University of North Carolina, and although Tech was forced to bow to a superior team, the spectators saw the Tarheels shatter three pool records and the Jacket captain, George Backus, set a fourth.

The next week at Durham, the Duke Blue Devils went down before the Jacket tankmen and this time the combination of DeVries, Owen, and Coons set a new varsity record in the medley relay.

In the second meet with U. N. C., the Jacket swimmers managed to do a little better, but they were still unable to get a majority of the points. However, the second meet with Duke gave Tech another victory and Charlie Owen set a new varsity record in the 200-yard breaststroke.

The Jackets' next meet, Athens Preflight, made swimming history, for it was the first meet in which warfare aquatics have been introduced on a competitive basis. The routine events were laid aside and maneuvers which the Army and Navy have been using in their training programs were substituted. Preflight was victorious in this one, but the Engineers got revenge in the return meet in the Tech pool. After the two meets with Athens Preflight, the Jacket tankmen had become very adept in the Navy events and took an easy win over Emory the following week.

Tech mermen made a good individual showing in a series of three A. A. U. meets in which no team awards were made.

Coach "Freddie" is losing some of his best swimmers to the armed services this year, but as always he and his assistant, Lyn Keyes, probably have enough tricks up their sleeves to keep the Jacket swimming team on the map for some years to come.

Georgia Tech swimmers won the Southeastern Conference championship in the 1942 meet, marking the first time since the SEC meet has been held that Florida has been defeated. The 1942 swimming season was also highlighted by Florida's first defeat in a dual meet in five years.

The Jackets ended the season undefeated, winners of 8, losers of none.

In defeating the Gators in a dual meet and also in the Conference meet, the Tech team revived memories of the great swimming teams which dominated the sport from 1925 to 1935. During that decade, Tech was undefeated in swimming and diving, and Dave Young set a new National Intercollegiate record in the 150-yard backstroke which was not broken until 1942.

With only one letter man returning from the previous year’s squad, the 1943 Tech Fencing team developed into a worthy successor of teams of earlier and more auspicious years. Captain Hard was the single 1942 letter man on the team. In spite of the shortage of experienced material, however, Coach Morenus lead his team through the season winners of five matches, losers of one. The foil team was undefeated and untied, while the saber team was undefeated but tied twice by Kentucky.

NORRIS DEAN, Track Coach and Football End Coach. Like Coach Alexander, Coach Dean is a former Tech student. While at Tech he participated in football, boxing, and track. He won the A. A. U. heavyweight boxing championship in 1932 and played three years of varsity football before graduating in 1935. After graduation, he coached at Monroe, Georgia before coming to Tech in 1938 as freshman mentor.

J. H. PITTARD, Freshman Football and Assistant Track Coach. Coach Pittard, who came to Tech last year after serving eleven years at Gainesville High School as Athletic Director, attended High School at Winterville, Georgia, where he was a member of the baseball, basketball, and track teams. At Young Harris College he participated in football, baseball, and track. Coach Pittard completed requirements for a degree at Vanderbilt and the University of Georgia. During the last war, he was ranked a first lieutenant.

Frank Yates
The 1944 Track team added two more cups to Tech's rapidly growing trophy case by climaxing an undefeated, untied season with the winning of the Southeastern A. A. U. and the Southeastern Conference Track Meet. This '44 season marked the first time that Tech has won the Conference track championship—the second time the defending champions, L. S. U., has lost it.

The Al Doonam Trophy was presented to the Jacket team in Birmingham upon winning the SEC championship, and the Thomas Bragg Trophy was awarded the Engineers at Auburn upon the winning of the Southeastern A. A. U. meet.

Winning six first place positions in the SEC meet in Birmingham on May 20, the 1944 Engineer team, composed almost exclusively of Navy ROTC and V-12 students, ran up the highest score ever recorded in the Conference meet. John Serrie won the mile run in 4:32.8; George Hills took first place in the shot put competition with a 46 feet-3.28 inches throw; Hunley Elebash won the 100 yard dash in 10.1 seconds; Frank Nelson took top place over a favored Tulane runner in the 120-yard high hurdles, his winning time being 15.8 seconds; Bill Donahue cleared the bar at 11 feet 4 inches to win the pole vault contest; and Silvert Hill won the 880-yard run in 2:02.5.

In the A. A. U. meet at Auburn, the Jackets likewise took six first place positions.

Coach Norris Dean, who became head track mentor after Commander Griffin was ordered to another station, developed his exceptionally large squad into a well balanced team which captured a top place in every field of competition.

THE 1944 NROTC RIFLE TEAM

WINNERS OF THE HEARST TROPHY

In competition with 45 teams from all over the nation, the 1944 Tech Naval Rifle team outscored all opponents to win the William Randolph Hearst National NROTC Rifle Competition Trophy, marking the second time since the beginning of this particular postal tournament in 1935 that Tech has taken top honors. Out of a possible perfect score of 1,000, Tech's No. 1 team scored 919 points.

The No. 2 team ranked fourteenth in the competition with 858 points. Samuel Mangham, a member of the second team, shot the highest individual score in the entire tournament with 189 out of a possible perfect individual score of 200.

In the National NROTC Rifle tournament, Tech's team of ten men ranked No. 6. Miller Gowen scored 189 points in this tournament to take first place among individual competitors.

Roy Mundorff, Basketball and Baseball Coach. Coach Mundorff, a Lieutenant Commander in the U. S. Naval Reserves, was ordered to another post during the 1944 winter semester by the Navy after 23 years of coaching at Tech. Commander Mundorff has been on active duty in the Navy since June, 1941.

In 1921, Coach Mundorff came to Tech as freshman basketball and baseball coach. He helped with freshman football from 1924 to 1928 and served as a football scout from 1926 to 1928. Coach Mundorff was named head basketball coach in 1925, a position he held until he was ordered to Harvard by the Navy Department.

Bob Miller, Wrestling Coach and Football Line Coach. Coach Miller is not only a valuable mentor in two sports at Tech, but he is also an instructor in the Chemical Engineering Department. At Ohio State, where he received his B.S. and M.S. degrees in Chemical Engineering, Coach Miller was lightweight on the wrestling team and center on the football team in 1933-34-35. In high school, he graduated second scholastically in a class of two hundred and is a member of Tau Beta Pi, college honorary engineering fraternity.
The 1943 Wrestling team was the first attempt at organized wrestling at Georgia Tech. No experienced men, naturally were available to build the team around but, despite this handicap, the team won two out of six matches against top-flight competition. After the 1943 season wrestling on an inter-collegiate basis was discontinued for the duration. Coach Miller, however, expects to renew the sport as soon as conditions are favorable for doing so.

**THE TEAM**

CHARLES DONALDSON

FEASTER NEWTON  

Jack Paus (Captain)  
CHARLES SHEARER  
WALLACE SHIVER  
BERNARD STOPINSKI

Bob Miller, Coach
The tennis squad was another of Tech’s 1944 teams that ended the season undefeated. The Jacket netmen came through their limited schedule victors over five opponents, having defeated North Carolina and Duke twice and Tulane and Auburn once.

The Racket Engineers became the unofficial conference champions by beating the only other teams in the conference, Tulane and Auburn. No SEC tennis tournament was held in 1944 due to the lack of schools that continued the game for the duration.

This Jacket team holds the distinction of being the first to beat a North Carolina tennis team on the Tarheel’s home court in seventeen years—another example of the superiority of Coach Bonell’s team in its section of the country. Two of the team’s top position players, Frank Willett and Howard McCall, represented Georgia Tech in the National Intercollegiate Tennis Tournament at Northwestern in Chicago.

Mr. R. H. Bunzl	 June, 1944  
Mr. R. L. Thomison

Dear Rudy and Locke:

This is it! We've been a long time planning, gathering information, and assembling the book. And here is our result. It's been pretty hard to follow all of your plans, and where ever possible the best features of all plans submitted were incorporated. We've presented as is best possible a complete record of Tech during the past year and half.

In general we've had a small staff, necessitating a great deal of work by a few. The completeness of the sport section is possible by the work of Bill Summerour, associate editor for that section. The novelty of the snapshots appearing in the several sections is a tribute to David Kotlikoff. The color picture of the color guard facing the dedication page is one of his works. We are indebted to the New Orleans Midwinter Sports Association for the action pictures of the Tulsa-Tech Sugar Bowl game; and to Lane Brothers for the individual action pictures in the football section. Several of the pictures appearing in the Army section are by courtesy of Bill Evans, and some in the Navy section by courtesy of the Navy Department. The page in tribute to the ASTP is modelled after one appearing at Bowdoin Tech.

The fine art work appearing on the division pages and throughout the book is the work of Phillip London of the ASTP unit. For the cartoons in the Army and Navy sections we are indebted to Foote and Davies.

We also wish to express our gratitude to Gaspar-Ware whose panel pictures were used; to Miss Helen Morgan of Photo Process for help in arrangement and advising of the book; to Mr. Charles Young of Foote and Davies whose advice was offered at every stage of the book. We also are indebted to Mr. Phil Narmore, who even before his return to Tech, helped both myself and John Weatherly with many of the technical problems presented before the book could be distributed.

Here is our yearbook—a record of Georgia Tech from February, 1943 to June, 1944.

For the 1944 Staff,  
Paul L. Lee.
CLASS OF OCTOBER, 1943

The following men did not graduate with their class because of transfer by either Army or Navy or call by selective service.

Herbert Lee Antell
James M. Baskewell
William Dooly邦annan
William Mayered Brosher
(Called by ETC)
John McGowan Brown
Teri Linwood Brown
Sanger Marsh Brown

A. O. Bland, Acting Manager
Think you’re seeing Buck Rogers’ plane? You’re not. You are looking at the performance of America’s newest fighter—the first jet propelled airplane to be accepted by the United States Army Air Forces.

And with the official announcement of this propellerless plane, a new chapter begins in the history of world aviation.

Now we’ll take you behind the scenes and tell you the story of how these planes came into being.

In England there was designed a revolutionary new type of engine which could propel an airplane through the sky by spewing out a terrific blast of air.

The General Electric Company here in America further developed and built engines utilizing this principle.

By choice of both G. E. and the Army Air Forces officials, Bell Aircraft was selected to design and construct planes incorporating this Jet Propulsion engine.

Within two weeks after being notified of this project on September 8, 1941, Bell Aircraft engineers submitted a general arrangement for a new plane housing two Jet Propulsion engines. These designs were immediately accepted by the Army Air Forces.

One year and three weeks later, on October 1, 1942, this revolutionary type of aircraft, exactly on schedule, rose from the flying field at a secret base, climbed into the rarefied atmosphere where a conventional plane loses its efficiency and traveled at high speed.

Now that the story of this new jet propelled plane can be told, Bell Aircraft wishes publicly to express its appreciation to the officers of the Army Air Forces who have contributed so much to this project. We have learned many things which will aid us to pioneer in building safer, better and lower-priced aircraft when peace returns. © Bell Aircraft Corporation.
