Koseme Society Honors Five in Recent Election

On Tuesday of this week the Koseme Society, junior honorary, announces the names of five students who were elected officials during the current year. These elections were Dr. Dave Cumming, Mark Gregoire, George Nalesnik, Bruce Sanner and Buddy Shields.

These men were elected for their qualities of leadership and contribution to the committee and their students through their activities in the campus. As only juniors may hold office in the organization, the officers for the coming year will be chosen from the seniors.

Dr. Taylor Receives Research Prize

Dr. James L. Taylor, Professor of Textile Engineering at the Georgia Institute of Technology, recently received a research prize from the Textile Chemistry Foundation. On Wednesday, June 8, the Tech Sigma Xi Chapter of Phi Delta Epsilon awarded Dr. Taylor the prize at the annual meeting of the chapter. Dr. Taylor will present an address on "The Place of Research in the Textile Industry." The meeting is to be held at 6 p.m. in the Alumni Auditorium.

New Members Announced by Alpha Pi Mu

By Tom Jenkins

Alpha Pi Mu, Tech's honorary LE fraternity, held its second initiation at the OKN Bookstore last Monday night, May 30. Following the initiation, 29 students were inducted into the initiation. The new members include:

New Members are Named Members of Leadership Group

Eleven Students are Named Members of Leadership Group

By Homer Pittman

At a meeting held Tuesday morning at 11 a.m., eleven were elected to membership in Omicron Delta Epsilon, national leadership honor society, it was recently announced. They are Brian S. "BP" Brown, Wayne Colson, Dean Lindgren, Doby Kratz, Wilt Langstaff, Joe Wood, Gene Dameron, H. W. Little, Robert H. "Bob" Lowery, Bill LaRoche, and Charles "Charlie" McCamish.

Georgia Camera Club Holds Spring Solon, Invites National Critic

On Monday, May 31, 1949, the Georgia Camera Club held its spring quarter solon, which was attended by many of the members of Omicron Delta Epsilon. The meeting was held in the Student Union, and was presided over by President Jack Meeks.

The meeting began with the election of new officers, which included Wally Gambill as president, Bill Jones as vice-president, and Harry Winchester as secretary-treasurer.

Attention, Photographers!

Any rising sophomore or junior with a 2.5 or 4.5 or better will be eligible to take part in the upcoming photographic work for the 1950 issue of the Technique. Submit your work by June 15, to the Photography Department, X-111, Vol. XXXIII, Atlanta, Georgia, Friday afternoon, June 2, 1949.
Student Council Minutes

May 24, 1949.

The first meeting of the 1949-50 Student Council was called to order at 3:30 p.m. by outgoing President George Nalesnik, who welcomed the members to the new semester. George Nalesnik was re-elected as President of the new Student Council.

Fuzzy Field made a motion to send 4 delegates to the Student Council's annual convention. The motion was seconded by Brian Brown, and the motion was voted on. The delegates were selected as follows: Brian Brown, George Nalesnik, and Vann H. Collier. The motion was approved.

In other business, the Council discussed the budget for the new year and decided to increase student fees by 10%. DISCOUNT TO TECH STUDENTS

The better we produce the better we live!

Dearest Soviet Teachers:

We note that you have been diligently about on some aspects of the Communist system and that you have marveled at the advances by students with "primitive concepts and methods of study.

May we respectfully suggest a few more things that you might want to consider for the education of your young technocrats:

1. That you provide your students with "modern" concepts and methods of study.

2. That you provide your students with "modern" concepts and methods of study.

3. That you provide your students with "modern" concepts and methods of study.

4. That you provide your students with "modern" concepts and methods of study.

5. That you provide your students with "modern" concepts and methods of study.

6. That you provide your students with "modern" concepts and methods of study.

7. That you provide your students with "modern" concepts and methods of study.

8. That you provide your students with "modern" concepts and methods of study.

9. That you provide your students with "modern" concepts and methods of study.

10. That you provide your students with "modern" concepts and methods of study.

Please be assured that we are not trying to impose our own views on you, but rather to help you improve your teaching methods.

A political science class at Florida State University has been discussing the problems of the "machine age." The machine they are considering are political organizations and the people who have dominated the political scene in years past—Edward Kelly, Tom Pendergast, Ed Crump, and George Washington Plunkett. Here is Mr. Plunkett’s formula for success: "There’s only one way to hold a district: you must study human nature and act according. You can’t study human nature in books. Books is a hindrance more than anything else. If you have been to college so much the worse for you. You’ll have to unlearn all you learned before because you can get right down to human nature, and unless you takes a lot of time. Some never forget what they learned in college. Such men may get to be district leaders by a jluke, but they never last."

Mr. Drexel, the head of the Psychology department at Drexel stressed aptitude tests results for selecting a job. He said the individual should know his own qualifications, interest, and the possibilities for happiness and success in the particular field in which he seeks employment. He said these facts may be determined with a high degree of validity from aptitude tests. Employers hold the results of these tests in high esteem. It was also pointed out that even though one may be about to graduate now as an engineer, feeling may determine the specific field of engineering which holds the greatest possibilities of success.

The girls at Stephens College had writing assignments in a psychology class to reveal their hidden desires. A professor in a psychology course recently mentioned that the majority of students were shy. There would be missionaries, business magnates, politicians and beauty experts if all the ambitions were fulfilled. Three of the "top traits" of the majority of students were shyness, tolerance, and being able to take orders.

According to the Daily Californian, optometrists say glasses will go. The new contact lens department of the school says this is the era of contact lenses. The department is equipped with the best of modern optometric equipment for most phases of work. The Associated College Press announced that Dr. Vera Hohman has given some criteria for judging whether or not a person is emotionally mature. The most important was the ability to weigh the value of "long time gold against immediate satisfaction." The capability to give attention and love to another individual was mentioned as another criterion. The emotionally immature person shies away from making any deep emotional attachments. One more important criterion of emotional maturity is that of various types of emotional responses.

**OKD Elections—**
(Continued from page 1)

Chemical Society, Alpha Chi Sigma, AICLE, Sigma Chi, Scabbard and Blade, and Tau Beta Pi, and the Society of General Engineers. He served a year on the staff of the Blueprint.

Both Systems Used

The elections were held under both the formerly-used point system and a new, revised system, which was instituted because of the new ruling of the Student Council which limited participation in extra-curricular activities, according to Travis Brannon, treasurer of the organization. The new system classifies the various noteworthy achievements as "A", "B", or "C" honors, and will be revised in detail at some future date. It was stated, however, that elections probably would be held under both systems for at least another year.

To qualify for election, a student must rank scholastically in the upper 15 percent of his class for the two quarters preceding election, or else have a 2.5 overall point average. Under the old system a minimum of 35 percent of his class for the two quarters preceding election, or else have a 2.5 overall point average. Under the old system a minimum of 35 percent of his class for the two quarters preceding election, or else have a 2.5 overall point average.

It's a Reciprocal Agreement

The university and the city are mutually dependent on each other.

BEQUESTLY the Purchasing Card System, sponsored by the National Student Association, has been adopted by the University of Miami, making it possible for students to make purchases, in addition to payment for other necessities at a slight discount price.

The PCS has been installed and worked successfully in at least 11 other states and is steadily growing. Merchants in cities like Chicago, Denver, Los Angeles, Washington, D. C., New Brunswick, Jersey City, and many others have helped students from the colleges and universities by initiating the PCS. Faced in many stores have risen as a result of this practice, as stores started to buy business establishments which were working along with the PCS. A certain amount of the advertising costs was also paid out by the local PCS and certainly helped the merchants.

More than $100,000 is being spent each month by about 6,000 students of this university in the city of Coral Gables. This staggering figure will grow and grow as the schools begin to be more conscious of the PCS system. Practically all students of the University of Miami are dependent upon Coral Gables, but the city of Coral Gables is funded with students spending their money, and in the summer months July and August, when the student population is attending summer school, is probably the peak time for students spending their money.

Merchants of Coral Gables, wake up and look into your own back yard! The mentioned PCS cannot be ignored. The University of Miami is dependent upon Coral Gables, but the city of Coral Gables is dependent upon the University. The students here serve the same cooperation in making the University of Miami one student in other school communities have received from merchants.

We hope the businessmen of Coral Gables will join in to help make the Purchasing Card System work, by which they and the students will profit.

Miami Hurricane.

A Revealing Character Analysis

Life says that today's graduating senior wants to stay in the South.

Today's typical graduating senior—so different from the average college graduate of 20 years ago—undergoes a revealing character analysis in a current Life magazine article. As the country's major campuses have set down a number of shared observations on our favorite recent graduates, the following is the result.

Today's graduating senior differs from his forerunners in several important aspects. According to McPartland, he wants to get a job with a big corporation instead of a business of his own. He looks upon football as a contest of organizations rather than a religion; he favors a stronger government; he has been trained in more technical subjects; he looks upon Communism as an idea rather than a system and, not with a laugh, he has a cool outlook on social matters. One of the most significant points in the article, however, contends that most Southern students wish to remain in the South after graduation instead of pursuing their careers in the large Northern cities so attractive in the past. This, if true, should have a great and beneficial effect on the welfare and prosperity of the Southern states. A Mississippi law dean explained the situation: "This used to be one of the richest agricultural states, but for 80 years, we have been a Civil War, most of our best young men left for other states."

It's a simple thing... so why can't the Robbery give us a good cup of coffee?

To those of us, and consequently most of us, who keep long hours, a cup of coffee means as much to us as a good night's sleep. During the day, when ninety per cent of the student body stagnates out of bed in the morning the first thing they think of is a sense of survival is a cup of coffee. And on those long days when we are especially greasy and the only thing that will perk us up is a cup of coffee.

Now coffee in itself is a pretty simple thing. Some ground up beans treated with hot water with perhaps sugar and cream added for flavor. Not much, is it? It's cheap, too. Only when ninety per cent of the student body is a cup of coffee. And on those long days a great deal. We would venture to say that few college graduates could survive if there had been no coffee. Many were those long months when we couldn't even look at them, but it will do practically everything but. It seems to me, however, that the major importance of coffee lies not with the brand of coffee that is used. We are sick and tired of the strange flavors, but it will do practically everything but. —HCJ.

It's a simple thing... so why can't the Robbery give us a good cup of coffee?

We are sick and tired of the strange varieties of coffee that comes in genuine coffee. Coffee is esteemed as good coffee, now, we can excuse for excuse for such continuously poor coffee. If a man makes a cup of coffee and it can't be ruined.

To make criticism without suggestions is a grave breach of etiquette. Since we are not exactly sure what the trouble is we are likely to agree with our suggestions but we must make a couple for the records.

First, we are sure that the trouble does not lie with the brand of coffee that is used. We have checked that and know that good coffee can be ruined. In such a simple process as coffee-making, there are not many ways it can be fouled up. Therefore, the trouble lies either in carelessness of measure, or failure to properly prepare the coffee or the person making it.

Second, it is entirely possible that our bikes have been confused but we don't. Coffee made in the-24 oz. type maker must be allowed to sit for a few minutes before it is drawn. This possibility is rather doubtful, however, because of the conscientiousness of personnel. Evidently those who make it don't drink it. No true coffee drinker would ruin it.

Further, we recommend that the Robbery establish the contract office, the Office for Printing. The coffee there is usually a little stronger than most prefer but it is coffee and can also make a cup of coffee that is good coffee.

We have repeatedly stated the subject in a rather light and joking fashion not because it is a joke but because it is one of those serious things that cannot be discussed seriously without danger. We can only hope that our sincerity is evident. Let's try to get it to us. It isn't hard. —HCJ.

It's a simple thing... so why can't the Robbery give us a good cup of coffee?

The pickle is a versatile creature which affects our way of life.

Next week will be National Pickle Week. All over the country, strong arms and keen minds are being called into play in the preservation of the annual celebration of this vegetable. The National Pickle Packers Association will publish a manual that will tell us when the American Legion green with envy. From a history of the pickle, of the types of the pickle, this chairman of the group will crown a Pickle Queen. Once more, America will acknowledge the superior abilities of the woman.

Yet, for all of this pageantry, the bitter fact remains that Americans know all too little about the pickle. What schoolchildren, for example, realize that Americans Vesuvius, who gave birth to the pickle traffic in Italy? It is probably safe to say that few college graduates could supply us with more information on this subject.

It's a simple thing... so why can't the Robbery give us a good cup of coffee?

It's a simple thing... so why can't the Robbery give us a good cup of coffee?

The wrong approach. During the past few months I have been reading with keen interest the very pertinent articles on the subject of honor and school spirit. If you, Mr. Sharp, Mr. Croxley, and other members of The Technique staff, and of the student body, one could only be convinced of the sincerity of the comments and of the earnest desires to find answers to the vexing problems that have been voiced.

It seems to me, however, that the major emphasis and attention have been given a negative approach to honor—to proclaiming blame for deeds already done. I would judge this is "shaster" and "shafee." This course, however, because of the continuousness of offenses, would probably have collapsed if there had been no coffee.

The future of the pickle traffic in Spain? It is probably safe to say that few college graduates could supply us with more information on this subject. —HCJ.

The Technique

The South's Liveliest College Newspaper

Published weekly by the students of the Georgia Institute of Technology as an expression of student views and opinions only. Letters to the Editor and signed articles represent only the views of their writers and not necessarily those of the editors.

EDITORIAL OFFICE: The Technique, Atlanta, Georgia Saturday Afternoon, June 3, 1949

Subscription rates $1.00 per quarter

The Technique PLATFORM:

4. Representation of school spirit. We are willing to support and participate in programs which the student body wishes to undertake in order to represent the best interests of the students in concerned directions and goals.

Editor: Howard Johnson
Business Manager: John Krieller
Account Manager: Don Under

THE TECHNIQUE PLATFORM:

1. Student voice in matters of student interest.
2. An appropriate lower Tuition fee.
3. Effective student organization and participation in the University administration.
4. Greater intercollegiate sports program.

Jackets Land Pete Silas, Starred Miami Basketeer

By Frank Pollio

When Coach Roy MacArthur goes after a man that will do the basketball good, he goes at it with great zest and zeal. After several months of work, Coach MacArthur has landed another giant to enter the confines of the Flats and play under the colors of the White and Gold. This lad is Pete Silas, who hails from Miami, Florida. Silas is only nineteen years old but stands six feet five and weighs a lean 165 pounds.

Great Prospect

He played center for Miami High's state basketball championship team, and MacArthur thinks he is the greatest prospect to hit Tech in ages. Remember Wes Paxon? Well, the cross stated that he is the nearest thing to a great prospect since Wes left in 1947. That is a great amount of praise for such a young fellow as Silas.

Silas will get a scholarship and take the Chemical Engineering course. He is doing very well in high school with better than a 3.6 average and can be expected to do well in this course. Tech, one of the few schools that has a chance to take the SEC crown, is building a team that will be hard to defeat. Pete Silas will be an important factor in these plans.

ALL ROUND ACE

Versatile Fowlkes Tops Sterling Tech Trackmen

By Paul Barnett, Jr.

Georgia Tech's track team has been noted this past season for its marvelous team balance, and it is certainly true that this overall team is the strongest long string of dual meets victories "not too much credit can be given cut his time in the 220 dash to as low as 23.3 sec.

Fowlkes has consistently been high point man in the dual meets, was high point man in the conference meet last week with 14 points, and tied for top honors with Overton and Elles in the inter-conference meet with 10 points.

Top SEC Scorer

As far as top scorers go in the annual SEC meet, Buddy has but 6 points to go to set an all time record of 44 points. Billy Brown, former LSU star, collected 42 points, and Buddy, after his third annual SEC meet, already has 18 points. Next year he has an excellent chance to capture all time individual scoring honors.

Along with the very capable coaching given by Coaches Dean and Flex- ton and the amazing progress he has made, Buddy may possibly look forward to an even more successful season next year. We are all behind you, Buddy, and good luck.
White and Gold Thinclds Host To Annual SEAAU Tournament

Ex-LSU Star, SEC Standouts Peril Five Records in Cinder Marathon

By Hub Daniel

Grant Field will again be the scene of one of the season's finest track meets tomorrow afternoon with the annual SEAAU track and field meet scheduled to begin at 2 p.m. Teams from Tech, Alabama, Mercer, Oglethorpe, Auburn, Georgia, Emory, and many other team trophies.

Tom Dickey, ex-LSU star from Atlanta, has entered, thus providing with one competitor better than the changes in the SEC-Southern interconference meet.

Record Breaker

Dickey is expected to clip the SEAAU half-mile record of 1:54.8 set in 1939 by Tennessee's Pink. He has been clocked in 1:53 practicing recently at Tech.

Other records are apt to fall also. Auburton's Whitey Overton is capable of setting mile and mile and one half mile records. His winning time last Saturday in the inter-conference meet approached the record time set by Auburn's Fred Carter in beating Overton last year, and 3:30 by Ga. Tech's Chick Aldridge in 1939.

Stars

Both Alabama's Charley Davis and Ga. Tech's Johnny Dioly have bettered the SEAAU 440 record of 48.2 set last year by Southern Rucked of South Carolina.

Buddy Fortson is expected to set a new mark in the 220 low hurdles. The Tech star has three times broken the tape in 23.5 this season. The record time set by Auburn's Fred Carter in beating Overton last year, and 3:30 by Ga. Tech's Chick Aldridge in 1939.

The White and Gold have been victorious in all of their dual meets this season and clinched their endeavors with a resounding victory in the SEC meet at Bloomington.

Teams which have fallen before Norris Dean's powerful forces this year are Florida, Tulane, Tennessee, Georgia and Auburn. Everyone is urged to attend tomorrow's meet to get a final glimpse of the 1949 cinderman in action.
SPORTS CHATTER—
(Continued from page 7)
if you will be back here next fall when we look for Bobby Dodd’s Yellow Jacket gridiron juggernaut to once again be the scourge of SEC. In writing our swan song for the year, we’d like to offer thanks to Don Judd for his top-notch work as assistant sports editor, to Paul Harnett and Hub Daniell for their excellent track coverage, to Frank Pollio and Bob Kimzey for their baseball work, and to all the others including Bill Griswold, Lew Levenson, Bill Hanbury, Fred Talbott, Frank Redfield, Bill Dowdy, and John Huskisson. The work of these lads, who have often spent many a sleepless night, has been the big factor in giving the South’s finest sports coverage for the South’s liveliest college newspaper.

PHI EPS HOLD ELECTION
At their regular meeting Wednesday night, June 1, Xi chapter of Phi Epsilon Pi elected a new slate of officers to serve for the coming year. As president, Robert (Buddy) Kleinman was elected while Leonard Frieden was elected as vice-president. William Walker is the new treasurer with Louis Kleis and Richard Mandel serving as recording and corresponding secretaries, respectively. The new pledgemaster is Lew Levenson, sgt. at arms is Richard Wassertein, and IFC representatives are Siegfried Guthman and David Lowi. Al Lowi is the new house manager.

OPTION 4 ARCHITECTS
Plan Organization
A meeting was held Tuesday to form an organization of Option 4 Architecture students. The purpose of the organization is to stimulate interest in this phase of Architecture and to aid in the procurement of jobs for graduates.

All interested Option 4 students are invited to attend the next meeting which will be held at 11:00 Tuesday, June 7, in Room 216 of the Physics building.

ALPHA PI MU INITIATION
(Continued from page 1)
was installed by eight members of the chapter at Tech. As a possible way of interesting other schools in Alpha Pi Mu, more than thirty-five colleges were contacted. About twenty favorable reports were returned. From two or three colleges the urgency of the reply was such that the Tech chapter hopes to install chapters at those schools within the next four months. Plans to install new chapters are made to handle them in the same manner as the Ohio State installation was held.

Officers of the chapter who were elected for the past term are: Alan Thomas, president; Ernie Sturgis, vice president; Charlie Fircnak, recording secretary; Wheeler Bearden, treasurer; Jim Varner, corresponding secretary. These men vacate office upon completion of this Spring quarter.

Eugene O’Brien, one of the better known speakers around Tech, gave an informal talk following the banquet. Mr. O’Brien is the past president of A.S.M.E., former professor of Brown and Yale universities, vice president and managing editor of Smith Publishing Co.
