Personnel Survey Will List Nation's Scientists

Several thousand Georgia engineers and scientists are cooperating in a nationwide survey of scientific personnel being made for the National Military Establishment by the Engineers Joint Council, 29 W. 39th Street, New York 18, N. Y.

"That we may know our strength - and that the world may know it, this survey is being made," states C. E. Davies, executive secretary of the American Society of Mechanical Engineers and chairman of the national survey committee.

Complete Data

"Our government is seeking complete and accurate data on the engineering personnel resources of the Nation," says Mr. Davies. "It is part of the very prudent plan to be fully prepared for any possible national emergency that may occur. No segment of our economy booms up more vitally in this plan than engineering."

The survey is being made for the Office of Naval Research as a joint project for the Army, Navy, and Air Forces. Every engineer and scientist of full professional standing will be listed by the specialty or specialties in which the most significant contributions might be made to the general need.

Tech Professors Prominent

The listing from Georgia is led by more than 300 professors and research scientists of the Georgia Institute of Technology, many of whom made vital contributions to victory in World War II. A preliminary survey indicates that the Engineers and Architects of the Georgia Institute of Technology, many of whom are now at the Institute, are the Engineers and Architects of the very prudent plan to be fully prepared for any possible emergency that may occur. No segment of our economy booms up more vitally in this plan than engineering.

Point Average, Absence, Grades Included in New Student Rule Changes Effective on Sept. 15

Dean Narmore Leaves To Join Midshipmen On Cruise August 3

Joining the many Georgia Tech naval trainees on summer cruises this year, Dean Bill E. Narmore will leave August 3 on a seven week jaunt to Europe.

Residents Invited

The Navy Department invited an invitation to the presidents of all the colleges from which ROTC students are drawn for the summer trips to be made by the summer sailors. Col. Van Leer will be unable to make the trip due to the fact that he is on duty with General Bradley, U. S. Army in Washington, and Dean Narmore accepted the invitation.

To assure the Reserve commission as lieutenant, Dean Narmore will travel as a civilian guest of the Navy.

Will Make Trip On USS Missouri

Leaving Norfolk, Virginia on August 3 aboard the fleet carrier USS "Missouri," the cruise party will sail for the South Sea Islands, and to the great joy of the entire group, France, arriving there on August 16. A visit to Paris is on the program for the following week in Missouri January for Cuba, August 22.

Will Visit Paris

The travelers are looking forward eagerly to the visit to the "City of Light." There they will visit the scenes of historic landmarks and gay night spots of the French capital.

Will Travel in the South

From Paris they will travel south for Guantanamo Bay Naval Base on the southern coast of Cuba. Twelve days of training will be spent there before the group makes the last leg of the journey, leaving on September 16 and arriving back at Norfolk on the 21st.

The tour is looking forward to his first trip aboard a battleship, and he is particularly interested in describing the use of helicopters by the "Big M."
Books for Bowling Alleys

The need is for a Library not a Student Union Building.

In this issue of The Technique we invite your attention to a subscription and an addition to the Technique Platform. This change in tone which we believe will more precisely fill the student needs since the writing of such changes is practically nil. In an address to the state legislatures this week Governor Herman Talmadge asked for a twenty-five percent increase which would have raised the state funds of one million dollars. We are certain that this tax proposal would provide the revenue which will be needed to carry on the education scheme to a sound drubbing.

The place is different but the moral is the same. Shame on you.

Watch Your Manners, Rats

It is evident that there has been some misunderstanding or meaning violation of the Student Rules and Regulations.

The Student Rules and Regulations are being violated and the canons of good taste taken for a sound drubbing. Rat school spirit and make the new men feel "as inimicable to the best interests of the Georgia Institute of Technology on the assumption that they are gentlemen and of sufficient maturity to conduct themselves according to Student Rules and Regulations."

Jimmie McSusan, J. W., looks like you and some other smart men wrote these regs, only to be let down at a time like this. Now let's see some enforcement of what they say, by the powers that be, J. W. and gang here might not get booted out of Tech but let's throw in some more reg's that make a good example for any other hot shots who are hungry with a razor. The offense system was just patterned for this case and if you haven't hauled them up to the Executive Deen's office, you ought to get hot. Play of fail-minded men are here about what happened to Mr. Izlar.

Don't let this nothing personal, you understand. J. W., I still have my sculp. I am just wondering about your sanity.

Please bring all personal replies to room 207, Smith Dormitory.

Years for quick justice,
Bill Hoover
P.S. I seem to have given credit to the rest of the kiddies, namely, Marvin Phillips, Jules Miller and Pete Parry. So sorry.

—IMG.

TECHNIQUE PLATFORM:

1. Student rules in matters of student interest.
2. Better orientation and vocational guidance.
3. Greater interscholastic sports programs.
4. Prevention of antisocial activities.

GEORGIA TECH COLLEGE TUN

AND OPERATED BY GEORGIA INSTITUTE OF TECHNOLOGY
Larry Isler is shown receiving a free haircut from the hands of several Co-op upperclassmen. It seems that Mr. Isler was invited to attend the Co-op smoker but failed to make an appearance.

### Co-ops Stage Party Despite Heavy Showers

The rains may come and the rains may go, but once the Coops plan a party, that party comes off. Such was the case last Saturday when 40 optimistic Co-ops met at Mosley Park for an afternoon of fun. First on the agenda were two softball games between the juniors and the sophomores and between the juniors and freshmen. However, the continued rains had made the bad field too sloppy to play on. Therefore, the hardy Coops retired to the offices of their friends, kicked the other kids off the chutes, and began to perform for their dinner.

### Driving Techniques

Some "smart" juniors then decided to demonstrate some proper driving techniques. They were gracefully hauled out by a couple of Coach Lawson's aide from the clubhouse. The Co-ops were finally satisfied in killing each other by attempting to build human pyramids. The picnic which followed the swim featured Red Fern's favorite product, hot dogs, with everyone burning his own to suit his individual taste. The meal was washed down by baloney cokes which arrived just in time for dessert.

### Legion Will Assist Vets With Dividends

The national headquarters of the American Legion has announced that preparations are underway to aid and assist World War II veterans applying for dividend payments on their national service life insurance. According to the Veterans Administration, approximately 16,000,000 veterans took out 20,000,000 policies during World War II. Payment of a dividend, amounting to $2,800,000,000, is payable to a veteran's estate and among his beneficiaries.

### August 23 Will Be A Monday

Regardless of your calendar, August 23 will be a Monday. It is Monday, No! It is Tuesday, but on second thought it is Monday, and so the American Legion has announced that preparations are underway to aid and assist the veterans applying for dividends on their national service life insurance. According to the Veterans Administration, approximately 16,000,000 veterans took out 20,000,000 policies during World War II. Management Club Makes Guided Tour Of Chevrolet Plant

More than forty members of the Tech Management Club together with Professors Bruce and Alldredge of the IM department toured the huge Fisher Body division of General Motors plant in Southwest Atlanta last Thursday afternoon.

In this huge plant where Chevrolets are molded from a few odd pieces of metal into the finished product at the rate of 35 cars per hour, the visitors from Tech toured every phase of the assembly process from the initial welding of the body section to the tightening of the final bolt and nut.

One of the amazing features of the assembly process is the mass coordination of the various departments. When the bodies leave the paint shop and move on to the opposite section of the plant, the correct color wheels are ready to meet them on the final assembly line.

This union is accomplished by an electronic device that every branch of the plant knows the style and color of every unit as it moves down the assembly line.

At the conclusion of the assembly process, the finished Chevrolets are driven by their own power and loaded onto trucks or railroad cars for shipment through the South.

Further tours of industrial units in this area are planned as a part of the future activities of the Management Club.

Attention Prelims! All campus organizations who desire campus-wide publication of their activities and functions are urged to place this information in The Technique box by noon Tuesday of each week.

Other Colleges Say

Duke Undergrad Isolates Organism Fatal to Fungus

An undergraduate student at Duke proved that one doesn't have to be a seasoned scholar to make valuable contributions to science. This 19 year old Biology student, in a routine soil bacteria study in a Botany lab, isolated an organism which proved an able killer of fungus growths such as the latest batch of Alzoo in the ab-coast, which consists of counting the ah's per class period emitted by instructors to punctuate, stall for time, etc. The electrical engineers have perfected a recording oh-meter to cut down the enormous waste of pencils and paper. The latest results show that one instructor is leading the field with the amazing record of 826 ah's in a period.

Andrew G. Truxal, former professor at Dartmouth, now president of Hood College, said in a recent speech that, "The likeness of girls and boys of college age are more striking than their differences. They are both curious and the same in trying to dodge the rules and regulations of the day. There is the same proportion of the intellectually curious and the same large proportion who are just in college because it is the thing to do." He said the main trouble with the girls students that differs with the boys is their activities and functions are urged to place this information in The Technique box by noon Tuesday of each week.

Student Council Minutes

The meeting was called to order at 6:40 p.m. on July 10, 1949 by Secretary Bruce Line with the members present being as follows: Bruce Line, Ken Brown, and Ralph Day. The meeting was requested by various members, and Mr. Line was appointed as temporary chairman. Further information was requested by various members, and Mr. Line was appointed as temporary chairman. Mrs. Line spoke briefly about girl scholarships at Tech.

July Alvarez reported that plans for the social activities over the summer were arranged and a committee was appointed to the I.S.O. to carry out the plans of the Social Committee in the Smith and Classic Dormitories. There was some discussion as to whether the Council approved the $86.40 renovating bill. Motion carried.

Buddy Shields moved that the Council approve the I.S.O. lounge at Tech. Motion carried.

Lamar Jordan made a motion that $86.40 be permitted to bring dates to the swimming pool at any time. Motion carried.

Bruce Sams discussed the possibility of the Smith I.S.O. unit and the Tech Bridge Club for approval. They will be examined before the next meeting, at which time they will be voted on.

Mrs. Line spoke briefly about girl scholarships at Tech.

The regular order of business was suspended, and the I.S.O. lounges in Smith and Classic Dormitories were requested to be examined prior to registration. He will see the approval.

Pool Opens to Wives

The Student Council was recently requested to investigate the possibility of students taking dates to the swimming pool. It was announced that the pool would be open from twelve to three every day during the week for students and their wives, and faculty members and their families.

The pool will be kept open at night by appointment for a small nominal cost. Students will not be permitted to bring dates to the swimming pool at any time.

The swimming season started promptly after this meeting, and early success was reported by those who attended.

The meeting was adjourned at 7:05 p.m.

Respectfully submitted,

Gus Nakhleh, Treasurer.
