This section of the Blue Print is devoted to the honorary societies, which distinguish themselves from the rest of the organizations on the campus by virtue of their more rigid requirements for election. High scholastic standards and extracurricular activities are required by these societies for membership.
TOP: Lawrence Selvette is tapped by Bill Johnson for Asak. LEFT: John Weathersby being tapped for Asak is upset. RIGHT: Paul Lee is tapped.
Anak was founded at Tech in 1908, and has the distinction of being the oldest honorary organization on the campus. To be chosen a member is the highest honor that any senior may obtain.

The members of Anak are chosen as the most outstanding men in the Senior Class, as judged by their achievements and services to Georgia Tech. Announcement of new members is made at Anak's unique tapping exercises during the I. F. C. dances each semester.

Omicron Delta Kappa was founded in 1914 at Washington and Lee University as a national college activities fraternity for men. The Alpha Eta Circle was established at Tech in 1930.

Members of O. D. K. are selected on a point basis—a definite number of points being given for each honor or position attained by the student. When a student has earned a minimum of thirty points and maintained a prescribed scholastic average he is eligible for election—the ultimate election depending upon his character and popularity among his fellow students.

OMICRON DELTA KAPPA
TAU BETA PI

Tau Beta Pi is the largest engineering honorary fraternity in the country and numbers among its members many of the country's leading engineers. Members are chosen from the upper eighth of the Junior class and the upper fourth of the Senior class on the basis of scholarship, character, loyalty, personality, leadership, and school activities. Each semester, the local chapter gives a scholarship cup to the Senior with the highest eight-semester average in the engineering school.

**PHI KAPPA PHI**
Pi Delta Epsilon is the national honorary journalistic fraternity on the Georgia Tech campus. After being inactive since the beginning of the war, the local chapter was reorganized in the summer of 1944 through the efforts of the two major publications of Tech, Dean Floyd Field, and Professor Fred Wenn.

At least two terms at a staff position on one of the publications is required for membership. Activities of the fraternity during the past year included several luncheons with professional journalists as special guests, and a drive to place a course in journalism on the Tech campus.

Alpha Chi Sigma, the national chemical fraternity, was founded at the University of Wisconsin in 1904. The Alpha Omega chapter was installed at Georgia Tech in 1932. The second largest chemical society in the world, Alpha Chi Sigma is devoted to the advancement of the social, professional, and scientific ideals of workers in the field of chemistry. The Tech chapter draws its members from the juniors and seniors in the Chemistry and Chemical Engineering Departments. It also awards a chemical handbook annually to the junior chemist or chemical engineer attaining the highest scholastic average.

ALPHA CHI SIGMA
This national honorary electrical engineering fraternity, founded in 1904, installed a chapter at Tech in 1941. The organization draws its members from the outstanding juniors and seniors in the Electrical Engineering Department. In the interest of promoting scholarship, the local chapter awards a handbook to the electrical engineering sophomore having the highest scholastic average for the first three semesters at Tech. Other notable activities of the fraternity include its program of lectures, discussions, and movies to create interest in electrical engineering.

The national honorary mechanical engineering society of Pi Tau Sigma was founded in 1915 and the local chapter was installed at Tech in 1932. From the junior and senior classes of the Mechanical Engineering Department outstanding students are selected for membership on the basis of character, leadership, and scholarship. Each year the society presents an engineering handbook to the highest ranking mechanical engineering sophomore, and engraves the name of the most outstanding senior on a plaque which rests in the Mechanical Engineering Building.

The Architectural Society, composed of architectural students who have completed three semesters of work, strives to increase interest in architecture and its applications. Each year it enters the work of outstanding students in a national contest. In the fall it holds a reception for all freshmen desiring to take architecture in order that they might become acquainted with the department and their fellow students.

The Industrial Management Society chooses its members from students in the Industrial Management Department who are outstanding in both scholarship and extra-curricular activities. The Society was formerly known as the Scientia Club, the name being changed when the industrial management course replaced the general science course. The organization maintains an active program all year. Annually it awards a certificate of scholarship to the senior in the Industrial Management Department who earns the highest scholastic average in his years at Tech.

INDUSTRIAL MANAGEMENT SOCIETY
The Bulldog Club, originally founded in 1910, is today the result of a union with the Junior Koseme Society in 1933. It is a non-scholastic society which takes its members from the outstanding juniors and seniors recommended to it by the social fraternities. The distinctive nature of the Bulldog initiations has made them one of the traditions of the school. It is one of the most active organizations on the campus, some of its outstanding activities being the Freshman Cake Race, the Homecoming Decorations Contest, and the Bowling and Track Contests between fraternities. During the Spring of 1944 the Bulldog Club lapsed into inactivity, but its organization again in the Summer brought it back before the eyes of the Tech student body.

Phi Eta Sigma, a national freshman honorary scholastic fraternity, was installed at Georgia Tech in 1930, and membership in it constitutes the highest scholastic honor granted to Tech freshmen. Members are required to have an average of at least 3.5, equivalent to a half-and-half ratio of A's and B's throughout the entire first year. The organization presents an award to the freshman having the highest average for his first semester.

Chi Epsilon is the only national fraternity composed entirely of men in the field of Civil Engineering. Founded at the University of Illinois in 1922, it reorganizes and encourages the qualities of scholarship, character, practicality, and sociability in the undergraduate Civil Engineer.

The Georgia Tech chapter of Chi Epsilon, founded in 1943, was formed from the Civil Crew, the oldest honor organization on the Tech campus. Among its many activities are field trips, guest speakers presenting news of the profession, and movies on various engineering subjects.

The education you receive while at college is worth little without the outside activities which tend to broaden your field of knowledge and to teach the spirit of cooperation with your fellow men in the accomplishment of a common task. Three publications and many clubs afford the opportunity for every student to find interest in some activity.
The 1945 Blue Print, the thirty-eighth annual of Georgia Tech, presents the continuous history of the school throughout the period from March, 1944, to March, 1945, covering three semesters. The accelerated program has made the compilation of the numerous data a difficult task, and credit should be given to all of the campus organizations for their sympathetic help. With only a few members remaining from last year’s staff, the 1945 staff has attempted to make this history of Georgia Tech as accurate and as complete as possible.
The Technique, published weekly by the students of Georgia Tech, strives to give the students of the school a complete and accurate coverage of the news as it occurs.

Although no course in journalism is offered at Georgia Tech, the Technique has advanced through the years until it is rated one of the best collegiate publications in the South.

Throughout the year the staff of this paper has taken the initiative in putting many of the drives and campaigns conducted on the campus over the top.

Since the Navy came to Tech, the Nautilus, formerly the N. R. O. T. C. magazine, has expanded to cover the whole school and has become increasingly popular with everyone. It has taken over the duties of the Yellow Jacket, which has been discontinued for the duration, in bringing to the Navy boys the spirit and traditions of Tech and making it seem more like their own college while stationed here. It is published monthly and has its offices in the Naval Armory.

The Student Council was organized in 1923 by Dean Skiles and the student body to provide a limited system of student government, thereby placing certain responsibilities on the students of the school. The purpose of the Council is to give the students representation in matters affecting them, to provide a suitable means of communication between the student body and the school administration, and to create and preserve the customs and traditions of the school.

Since the war began the Council has been composed of seventeen members, chosen as follows: two upperclass and one underclass civilians, two representatives from Harrison and two from Techwood, and one representative from each of the remaining Navy dormitories. The remainder of the Council is composed of the president of the I. F. C., the president of the Y. M. C. A., the editors of the Blue Print and the Technique, and the presidents of the classes. The officers are elected at the beginning of each semester.

Composed of three faculty members and three students selected by the Student Council, the Student Faculty Honor Committee was formed in 1932 to administer just and impartial rulings in cases of infractions of the honor system rule. The committee has been valuable in the formation of higher standards of honor here at Tech.

The Georgia Tech chapter of the American Institute of Chemical Engineers was established on this campus in 1933. Students in their junior and senior years in the Chemical Engineering Department compose its membership. Its prime purpose being the stimulation of interest in the field of chemical engineering, the organization sponsors a program of motion pictures, surveys, and lectures by persons active in the field of chemistry. In addition to its other activities, the A.I.Ch.E. also annually awards a key to the junior Ch.E. maintaining the highest scholarship average, and, too, presents a handbook to another outstanding Ch.E.

AMERICAN INSTITUTE OF CHEMICAL ENGINEERS
This organization draws its members from the sophomore, junior, and senior classes in the Aeronautical Engineering Department. Its purpose is to stimulate interest in the field of aeronautics, and to keep its members abreast of the latest developments in their chosen field. It seeks to accomplish this end by means of movies, field trips to nearby airplane plants, and lectures by high-ranking men in the aviation field. In addition, it carries on an active social program.

MEMBERS
The Georgia Tech chapter of the American Society of Civil Engineers offers membership to all Civil Engineering students. The purpose of the Society is to aid the student through associations and contacts which will aid him as a practicing engineer. Toward this goal, the program sponsored by the organization includes luncheons, investigations, trips to nearby construction work, and lectures by practicing engineers.

Established at Georgia Tech in 1916, the American Society of Mechanical Engineers soon assumed a position as one of the most active of the departmental organizations, and has continued to maintain this place down to the present time. Membership is open to Mechanical Engineering students in their junior or senior years. The purpose of the Society is to increase the technical knowledge of its members and to stimulate a greater interest in the realm of mechanical engineering. Movies, lectures, and discussions have a high position on the program of the Society. Invaluable opportunities are afforded the young engineer in associations and discussions with his fellow prominent professional M.E.'s.

On the Georgia Tech campus in 1915 was founded a chapter of the American Institute of Electrical Engineers. Drawing its members from the entire Electrical Engineering Department, the organization seeks to further the knowledge of the field of Electrical Engineering. It works toward this goal by means of lectures, tours, and movies on related subjects.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
One of the principal cultural organizations on the Tech campus, the Glee Club, is also among the most active and has done much to spread the name of Georgia Tech in good favor.

The Glee Club has presented programs for many groups and organizations in Atlanta and in the fall presented a recital in conjunction with the Agnes Scott Choir. Its popularity has spread until the Glee Club is unable to accept all of the invitations to sing that they receive. Plans to present the English version of the opera, "Martha," have been announced.

A chapter of the Federation of Catholic College Clubs, the Newman Club was established at Georgia Tech in 1913. The club is devoted to the unity of the members of Catholic faith at Tech and to the presentation of religious and social functions for the enrichment of the student's life outside classes. The Newman Club has until recently maintained a house for its members.

NEWMAN CLUB
The members of the Baptist Student Union include all members of the Baptist Church who are attending Georgia Tech. The Council of the Union directs the activities of the organization on the Tech campus. The group plans a Student Evangelistic Week, Vocational Training Week, student night services, and courses in church and Bible training. The council sends delegates to the State and Southern Baptist Student Union conventions. The council itself affords the connecting link between the student and the neighborhood Baptist churches and takes an active part in promoting the religious activities of the student body.

The Y. M. C. A. Cabinet at Tech helps to balance the campus life of the students by encouraging the spiritual development along with the student's mental and physical development. It very effectively accomplishes this aim by a program of retreats, lectures, and delegations to other colleges. The "Y" also sponsors campus activities such as athletic tournaments, dances, movies, and other social functions.

Y. M. C. A. CABINET
The Georgia Tech Religious Council was organized in July, 1944, to promote religious activity and the general welfare of the student body of Georgia Tech and to meet the long-felt need for a co-ordinated religious effort on the campus of Georgia Tech by the local churches, the Y. M. C. A., and the religious organizations serving Tech students.

In this interest the Council each term distributes lists of students’ names, addresses, and denominational preference to each group represented on the Council. It supports an open house in the Tech Y. M. C. A. to welcome all new students to the school, and supports completely any special Council-approved campus activity of any of the member religious groups.

Founded at Tech in 1927 was the M. L. Brittain Debating Society. Named in honor of the beloved President Emeritus of Tech, this group includes members drawn from all classes. Its purpose is to train the members in the principles of informal speaking, and to discuss topics of current interest. In connection with its policy of promoting good speaking habits, the society holds numerous debates with other colleges and has succeeded in maintaining high standards of the forensic nature.

The Gamma Zeta Chapter of Alpha Phi Omega was founded at Tech in 1940 in order to promote fellowship and for the purpose of rendering service to the school, city, and nation. The fact that the chapter is now comprised of about thirty members, is proof that the students at Tech are interested in their fellow man.

One of the primary requirements for membership in this national service fraternity is previous affiliation with the Boy Scouts of America.

One of the best known and most active organizations on the campus is the Yellow Jacket Club. Founded in 1930 to promote school spirit, it now plays a useful and important part in campus activity. The club is composed of eight seniors, eight juniors, and sixteen sophomores, eight of whom are elected for junior memberships. While acting as a connecting link between freshmen and upperclassmen, it stresses the traditions and school spirit of Tech upon the newcomers. The Yellow Jacket Club has played a most important role in achieving the excellent spirit on the campus today.

Beauties and Sponsors

Mr. John Robert Powers, famed beauty expert of New York, was the judge for this section. Pictures, turned in by over forty Tech men, were sent to Mr. Powers for judging. Out of this group he chose the following ten girls, five winners and five runner-ups. We present these as Tech's best in the field of beauty.
