Refurnished Room Now Ready For Inspection by Students; New Metal Furniture Is Used

Director of Housing Makes Study of Dorm Furnishings

On Tuesday afternoon, July 11, the Simmons Company installed all new metal furniture in a regular dormitory room as a sample room for consideration by the faculty, students and administrators of the possibility of furnishing all dormitory rooms in a similar manner in the future.

The director of housing, General C. A. Wynn, on left, with Mr. S. C. Sanders of the Simmons Company, shows the fine sample furniture installed in dormitory room for inspection by faculty and students.

APLO to Pay Money Due on Book Sales

The APL0 Book Exchange in room 202 Knowles building will be open on Tuesday, July 18, from 10:00 to 1:00 for the purpose of paying money due book owners whose books were sold. In order to collect, book owners must present stubs.

Vets Must File Form

The summer term will come to an end on September 9, 1950 and the enrollments of all veterans will be automatically terminated as of September 9, 1950. It is requested that all veterans administration to pay fifteen days leave after September 9 or pay the difference between the fifteen days will be charged to the student's enrollment.

If a veteran desires fifteen days leave, then no action is to be taken by him. On the other hand, if a veteran does not desire fifteen days leave, he should come at once to room 102, Knowles building and file the necessary papers to secure this leave.

All veterans now in school will collect their leave and report to the Office of the Registrar. If you desire to apply to "old veterans" on registration day September 25-26, on Tuesday, July 18, 9:00 a.m., you will be sincerely appreciated.

ME Society Secures MacClain to Address Seminar on Tuesday

The Georgia Tech student branch of the American Society of Mechanical Engineers has secured Mr. A. Lewis MacClain, installation engineer of the Pratt and Whitney Aircraft Division of United Aircraft Corporation, to speak at the Mechanical Engineering seminar on Tuesday, July 18, at 1:00 p.m., in the Tighthouse auditorium.

Mr. MacClain will speak on "Homes Associated with Early Engine Operations." This talk will particularly appeal not only to Mechanical Engineering students but also to the Aeronautical Engineering students. Members of the faculty and students of any of the engineering schools are invited and urged to attend.

Mr. MacClain began his career with Pratt & Whitney as a test pilot and aeronautical engineer in 1928. Mr. MacClain has been a pilot since 1928 when he received training during World War I in the aviation section of the Signal Corps and was selected for special training as an instructor in the Goosert System of flight training and at the end of the war was instructing at Kelly Field.

He continued his military association with the air units of the Army Reserve while attending the University of Washington where he received the degrees of Bachelor of Science and Bachelor of Science (Mechanical Engineering), and at Massachusetts Institute of Technology where he received the degree of the anticipated enrollment of 9000 students in the fall quarter will be veterans and therefore not subject to the draft at the present time.

Banquet Held to Honor Turners

By Marvin Stuart

The Gene Turner Fund dinner was held Wednesday night in British Dining Hall. It was a testimonial to the splendid works of Gene Turner, Sr. and a farewell to his son, Gene Turner, Jr. Mr. Turner, Jr. leaves August 8 for Burma to carry on his father's efforts at furthering Christian ideals in the organization's work. Cuyler M. Green, WEF secretary, announced that last year's solicitations on campuses had been successful enough to bring four men here next year, with a possibility of the three more who are present likely being delayed by the technical difficulties of the work.

Gene Turner, Jr. spoke of his intended works in Rangoon, Burma, which was 90% destroyed in the last war. It changed hands several times during hostilities and suffered extensively. At present, there are 10 boys grouped together in any type of Christian Boys Club, and there are no other organized activities for young people. It will be his job to plan a long range program similar to American YMCA programs in this devastated area. He plans summer camps, clubs, student societies, which will do much in the training of the Burmese youth, which he eventually become better leaders in their country.

Professor J. H. Hentz, retired, presented Gene Turner, Jr. with a Bible which he had given Mr. Turner when he was new in the Corps of Engineers. Fort Monmouth, New Jersey, on Wednesday evening, July 12, Dr. Van Leer gave a testimonial dinner to Mr. Turner in the Hightower auditorium. It was a testimonial to the splendid works of Gene Turner, Sr.

A Tentative plan has been worked out by the housing director so that the room now occupied by former students will be furnished for the next student. No furniture will be purchased for the new room, but plans are being made to furnish the room with furniture that will be used in the dormitory. The room will be furnished with furniture that will be used in the dormitory. The room will be furnished with furniture that will be used in the dormitory.

Banker Held to Honor Turners
Defense Course Planned

Governor requests use of Tech facilities to study atomic defense.

July 7, 1950

President Blake Van Leer
Georgia Institute of Technology
Atlanta, Georgia

Dear Colonel Van Leer:

As you know, the subject of defense against atomic warfare is receiving a bit of attention in the press at the present time. The Governors of the various states are asked to see that some instruction is given to the defense leaders of their states along this line, and in conformity with this, we have decided to give a three day course of instruction in Atlanta on September 15, 16 and 17.

I do not know of a better place to give this than at the fountain from which such technical matters should flow, Georgia Tech. Frank A. Popf, one of your former Chemistry professors, is in charge of the course, and Doctor James E. Boyd, of your Physics Department, is to give some of the instruction. As some of it is strictly laboratory work and the apparatus and facilities for it are already in place at Georgia Tech, I would like to ask for the use of such facilities, apparatus and rooms as may be required in the putting on of this three day course. If it can be done without greatly interfering with the normal duties of the Physics Department. We will see to it that Tech will be put to no additional expense on account of it.

This work is all under the joint General of the Military Department of the State. If you will please communicate with him as soon as possible, so that the final arrangements may be made, I will greatly appreciate your cooperation.

Yours very truly,

Herman E. Talmadge
Governor

July 11, 1950

The Honorable Herman E. Talmadge
Governor of Georgia
Atlanta, Georgia

Dear Governor Talmadge:

Thank you for your letter of July 7. I assure you it will be a pleasure for Georgia Tech to cooperate in offering the course of instruction to civil defense leaders of this state in the matter of defense against atomic warfare.

It is noted that the dates for this course are September 15, 16, and 17. I am asking Mr. L. F. Zsuffa of our Public Relations Department to get in touch with the Adjutant General to ascertain in detail what will be expected of us.

I am sure that Dr. Frank A. Popf and Dr. James E. Boyd will likewise cooperate in every feasible way.

Yours sincerely,

Blake R. Van Leer
President
Many Views Given Concerning United States and Korean War

By Al Conway

The military developments in the Far East have the whole world watching the Korean front with keen interest. Trying to predict the future has become a grim and humorless game. Plans for future schooling and jobs are preceived, with the idea that everything is on a tentative and temporary basis. The feeling that the world is sitting on a powder keg with an atomic fuse brings home the fact that the pattern of life here in the United States is, in the matter of a few hours, retrogress into the not too distant past.

To try and determine the reaction to the present development, the Technique has interviewed random members of the school administration and the student body. The following is a brief resume of the opinions gathered.

Captain Cheney, Military Department.—"The situation is serious and can get much worse in a hurry. There is no change in the plans for the fall as far as the ROTC is concerned. Nothing official has come out Washington as to an increase in quotas for advanced military students. The only evident change is an increase in student interest in advance ROTC." Mr. Curmichael, registrar.—"It is too soon to predict any specific trends as far as enrollment is concerned. A large number of students have requested transcripts for their draft boards and a large group of Reserve Officers have been called to active duty.

John Bissett, guard.—"The situation is serious and I feel that it will get much worse. The general feeling of tension and unrest is comparable to that which was evidenced at Tech in 1943 before the last war." Quinton Vanzelie, freshman.—"I do not believe that the situation is terribly serious and will not get so unless Russia actively participates in the present trouble. We should do a thorough job and whip the North Koreans completely and decisively. I believe that the present trouble will be over in four months."

James Eastham, freshman (Viet)—"I do not believe that I see the Air Reserve will be called to active duty at the present time. The U.S. has superior air power now and will more than likely hold it. The North Koreans are using a Yak 15 fighter jet at the present time which is inferior to the American aircraft. The 38th parallel is a very important area and thousands of people, especially United Nations Mandate. The Russians will probably not get into it at this time."

George Flake, M.E. senior.—"I believe that we will win in Korea but there is a long, long way to go. I believe that the Reserve will eventually be called out." George Head, M.E. junior.—"The situation can get much worse. I do not think that I will be pulled out of school before I graduate. School enrollment should increase and there should be an increase in jobs for graduates. I think that the U.S. will put up beyond the 38th parallel and do a thorough job of it. Korea will probably become a United Nations Mandate. The Russians will probably not get into it at this time."

From the interviews made, all of the students seem to be confident of the eventual outcome of the war. They are optimistic about the possibility of a speedy finishing school. Some interesting sidelights to the present trouble were given by John Eastham, an F-80 pilot who has just returned after three and one-half years with the occupation forces in Europe. He participated in the 38th parallel war and says that the student body is generally shown at all meetings and parties are regularly held.

The IAS will meet every other week in room 11 of the AE building. The next meeting will be held on Thursday, July 20, at 12:45. Further information may be obtained by consulting Professor A. Y. Pope, faculty adviser, or any of the above-named officers.

Library is Appointed Depository for AEC

The Tech library is one of the fifty-two research libraries in the country which have been designated as official depositories of the Atomic Energy Commission. In accepting the designation, the library has agreed to provide facilities for approximately $500 AEC declassified and unclassified research material. The library has agreed to provide facilities for approximately $500 AEC declassified and unclassified research material. The library has agreed to provide facilities for approximately $500 AEC declassified and unclassified research material. The library has agreed to provide facilities for approximately $500 AEC declassified and unclassified research material.

APD Meets at "Y" Monday Urges Scout Attendance

On Monday, July 17, the Alpha Phi Omega service fraternity will hold an open meeting in room 1 of the YMCA at 7:00 p.m. All men who are former or present members of the Boy Scouts of America or a foreign equivalent are eligible to join, and are urged to attend this meeting. APO is the national collegiate service fraternity for former scouts.

COOP FRESHMEN START SEARCH FOR MISS PERFECT LIPS OF 1950

By Bob Davis and Frank Hinds

Kins cards for the Miss Perfect Lips contest have been distributed among the fifty-two freshman co-ops, who are now eagerly getting good-looking girls to fill them out. The cards have to be turned in by July 26, at which time a preliminary judging of the lip prints will be held and the finalists chosen by the executive committee of the Co-op Club. From the finalists Miss Perfect Lips of 1950 will be chosen and presented at the annual Miss Perfect Lips Ball.

The dance, which is to be given by the Co-op Club and the new co-op freshmen, will be held August 11 in the Sky Room of the Atlanta Municipal Auditorium. The dance will be open to the entire school. At some time during the dance the executive committee of the club will announce the winner, and she will then be crowned Miss Perfect Lips of 1950.

The Co-op freshmen held their first meeting Tuesday night at the "Y" with Bob Davis presiding. The freshmen co-op constitution was read and approved. Special emphasis at the meeting.

Summer Swimming Provisions Are Announced by Mundorff

In order to allow everyone an opportunity to swim in the Tech pool this summer, a schedule which will not interfere with the physical training classes has been set up. The schedule puts the pool at the disposal of the faculty, their wives and children, and all office personnel on Mondays, Thursdays and Saturdays from 12:15 to 2:00; Tuesdays and Wednesdays from 12:15 to 1:30; and on Fridays from 12:15 to 1:00.

Students may use the pool from 4:30 to 7:00 on Mondays and Wednesdays; from 4:30 to 7:00 on Tuesdays and Thursdays; from 5:30 to 7:00 on Saturdays; and from 6:00 on Saturdays.

Special arrangements for using the pool for swimming parties may be made by contacting Coach Mundorff in the Athletic building. All other times not designated in the schedule are allotted for physical training classes.

Tech Library Hours
To Remain Regular Except for Saturday

By Bob Tait

The Tech library will keep its regular Monday through Friday hours during this summer, but the Saturday hours will be curtailed for the summer. The hours are 8:00 a.m. to 9:00 p.m. Monday through Friday, and 8:00 a.m. to noon on Saturday.

The library announces that it has a group of new books which will be of interest to the student body. Most of the books are technical, but notable among the non-technical books is T. E. Elliott's comedy drama, "The Cocktail Party." New Tech students should become acquainted with the reading room and the music room facilities which are offered by the library. The reading room offers students a quiet place for study, and it is supplied with a large selection of current scientific, literary, and general interest magazines.

The music room contains a wide collection of classical and semi-classical records. The music room is open to all students.

The library has a new three-speed automatic record changer, and a group of high fidelity microgroove records for the music room. The librarian expects a decree that an extra fare be taken when operating the record changer, to which new instrument, William J. Yopp, Tech '50, left his record collection to the library. The reading room offers students a quiet place for study, and it is supplied with a large selection of current scientific, literary, and general interest magazines.

The music room contains a wide collection of classical and semi-classical records. The music room is open to all students.

Perfect Lip—
(Continued from page 3)

was placed on the qualifications for class officers, in view of the elections to be held during the eighth week of this quarter.

At the Coop smoker last week Jim Wright, president of the Briarman Society, announced that the society will give an engraved knife to the coop freshman who has the highest place average after his first two quarters. This presentation will be made next summer, and it will be the first time since the war that this presentation has been made. A similar token will be given to the highest ranking non-freshman in the fall-spring section.

Recreational Activities Offered To Student Groups by YMCA

The Georgia Tech YMCA in offering again this summer a wide variety of services to all students, whether they be last quarter seniors or new students taking pre-freshmen courses.

As explained by Ted Loden, associate secretary, the YMCA plans to offer almost every kind of activity that it*s possible to think of. All these activities are offered at no cost to the students and are open to all students. Any student may join the cabinet simply by attending the open house on Monday, July 10, from 6:00 to 7:00 p.m. The cabinet has had members of many faiths, including Jewish, Mohammedan, Protestant and Catholic.

Mr. Robert C. Anderson, general secretary; Mr. Ted Loden, associate secretary; and Mr. Russell Wifield, the newest addition to the staff, all have offices in the building. Rev. D. M. Brown, minister to Presbyterian students, has an office, as does Mr. Warren Woolf, Baptist student director. All are ready at any time to assist students in any way they can.

ASME Plans Picnic; New Officers Named

At the last meeting of the spring quarter, the Georgia Institute of Mechanical Engineers, Georgia Tech students, held their annual election. C. J. Raczynski, chairman; Gordon G. Stapleton, vice chairman; Richard R. Homan, secretary; and Jack Hoover, secretary, Professor A. D. Holland will serve as honorary chairman.

The ASME meets every Tuesday at 7:00 at the "Y" on regular nights. The officers are Electra Ford, president; and Mr. Russell Wifield, secretary. The cabinet is made up of four faculty members, two students, and two staff members.

Forms Available

All seniors who will graduate in September are urged to fill out a senior activities form at the Information Desk. It is essential that each graduate have a date on which he wishes his activities listed in the senior section of the 1951 Blue Print.
