

NOTES FOR GEORGIA TECH PRESIDENT G. WAYNE CLOUGH  
Ribbon Cutting, Agilent EDA Stimulation Center, October 30, 2007

- Exciting to celebrate opening of Agilent EDA Simulation Center.
- Georgia Tech is honored to be the recipient of one of the largest gifts that Agilent has provided to any single university.
- Center gives Georgia Tech a leg up in educating our students and encouraging commercial innovation:
  - Gives our students unique access to the latest in radio frequency microwave system and circuit design instruction as well as additional design capabilities.
  - Gives our start-up companies in wireless communications design unique access to licensed software.
- Center is an expansion of Georgia Tech's long-term partnership with Agilent Technologies.
  - GT is not only one of the nation's best public universities, but is also focused on becoming genuinely global university.
  - Agilent Technologies is a world leader in communications and electronic technologies with customers in over 100 countries.
  - Partnership is good example of how universities and private companies can partner to promote innovation and technology transfer to their mutual benefit.
