"Then let us not be precious of our thought,
Nor of our words, nor board them up . . .
Let us be prodigal, as heaven is;
Lose what we may lose, and give what we may give."

ADMINISTRATION
The Georgia School of Technology has long been proud of its presidents. They have always been distinguished and respected men who have heaped renown upon our school. In like fashion Dr. Blake Ragsdale Van Leer has guided this institution during the hectic post-war years and has helped to develop it into a school that stands unequaled throughout the South. Dr. Van Leer has continually fought for greater expansion and commensurate equality. His success is evident.

We are proud of his progress and respect him for what he is—the energetic and capable leader of our school.
Among the greatest living Southern educators is Dr. Marion Luther Brittain, who was for more than two decades President of the Georgia School of Technology. Even through the difficult depression years, the school under his administration continued to expand in size and improve in standing. Through his efforts Georgia Tech has become a school of national importance. The part that Dr. Brittain has played in the expansion of the Georgia School of Technology cannot be overemphasized.
EXECUTIVE DEAN

Georgia Tech is indeed fortunate to have a man of the administrative and organizational ability of Phil Blasier Narmore. In these times of crowded and changing conditions, his excellent performance of difficult duties merits the praise of faculty and students alike. A member of eleven standing and three special committees of the faculty, his energetic and tireless work has figured prominently in the improvement and expansion of the school.

DEAN OF STUDENTS

One of the most indispensable members of the administration from the standpoint of students and faculty is George C. Griffin, Dean of Students. Thousands of students pass through his office for advice and assistance. His direction of the activities of fraternities and organizations has always been patient, considerate, and helpful. No member of the faculty has a more difficult job, and no one could carry out the responsibilities of this office more ably than Dean Griffin.
