**Dr. Ketter to Lecture on Stability of Space Frames**

Dr. Robert L. Ketter, Professor and Head of Civil Engineering at State University of New York, Buffalo, New York, will deliver a lecture at Tech on Monday afternoon, February 4. Doctor Ketter is the twelfth visitor to be brought to the Georgia Tech campus this year by the Neely Professorship Fund, which was established by Mr. and Mrs. Frank H. Neely of Atlanta for the purpose of bringing outstanding scientists, engineers, and educators to the campus.

The lecture entitled, "Stability of Space Frames," will be held at 2:00 PM in the Wilby Room of the Price Gilbert Library.

Doctor Ketter has been actively engaged in research concerning itself with the stability of structural members since 1950 when he first was associated with the research activity at Lehigh University, and has published numerous articles on the subject. He has made notable contributions to the establishment of the recently developed.

**Local Paper Attacks Warren Visit, Insults Georgia Tech Administration**

Mike Rogers

Congress' biggest decision this year will be to approve the 1964 Federal Budget. Congress will decide whether to increase deficit taxes, cut taxes, or raise both. The bill is estimated to produce a budget surplus of about $30 billion for 1964, while the deficit for this year will be about $10 billion.

To be blunt, it can't be seen. The paper has tried repeatedly since the '30's, when we were heavily borrowing our national debt to $130 billion. Going into short-term debt is not to achieve long-run growth in sound practice in profit-seeking, but for some reason has never worked in government. Still, it needs only to break even.

Who's Progressive?

The liberals also present what the voting public likes to hear, "income tax cut," for a cut in taxes of $13.5 billion in 1965, and $17 billion in 1966, instead of cutting the time high of $108.4 billion. The deficit for this year would be $1.5 billion. The budget is open to be returned as a return to New Deal economics.

The theory behind it is that the tax cut will stir the lagging economy to a new high, thus offsetting the increased spending and its resultant deficit which will be $2.5 billion.

The purpose of "The News" article is to attempt to disgrace Georgia Tech, its administration, and Dr. Paul May-er of the 75th Committee; while at same time saying nice of better scientists, engineers, and educators in an atmosphere which has been, up to now, propitious.

We urge all Techmen to inform themselves of all phases of this situation... Georgia Tech has been attacked by a relatively unknown newspaper which has not even been around as long as "The Technique." The unfavorable publicity to come from this attack will be eminent.

The "North Side News" has entered a second field, non-news, that area which I detest and will do all in my power to discourage.

Turn to page six, men. We've got a fight on our hands.
Council to Sponsor Ping Pong Tourney:
Region Champ to Win Expense Paid Trip

Each year the Association of College Unions sponsors an indoor-sports tournament off a national level. This tournament is broken down by regions that through playoffs among grouped schools, sponsor regional champions at the national intercollegiate tournament.

For the first time in tournament history, Tech will be represented. The Student Council, feeling that the student body could produce strong competitors, organized programs to determine champions in bowling, ping pong, and chess.

ICF News

IFC Honors 4.0 Scholars, Resets Ping Pong Tourney

At its meeting Tuesday night, the Interfraternity council presented plaques to the five fraternity men who achieved a 4.0 average for Fall quarter. These men were: George Caigill, TKE; Don Davis, Delta Sigma Phi; Warren Moore, Pi Kappa Alpha; Harry Smith, Delta Upsilon; and Bill Westbrook, Beta Theta Pi.

A suggestion was made to organize an IFC billiard competition handled in the manner of other minor sports. The teams would consist of two men and the proposed time for matches would be 2 1/2 hours.

As of this date, only one fraternity has entered the Help Wreck competition sponsored by the ATO. The trophy for this competition will be awarded at the Greek Week ceremonies.

A proposal to relegate the Honor Board activities between large and small fraternities was examined by Council opinion was that such a stand in the way of more constructive programs to determine champions in bowling, ping pong, and chess.

A bowling tournament has been held, yielding five men who display tremendous talent. Both fraternity men and independent competitors competed, as they will in the ping-pong tournament.

Present plans are to match the fraternity singles and doubles champions with the independent champions. These independents interested are asked to contact Jerry Irminger.

The regionals will be held locally, with representatives of these southern state meeting at Emory University on Feb. 15 and 16. The Buffalo finals will be expenses paid trips for the region winners and will begin in the spring.

New SC Hours

The Student Council office hours for the Winter Quarter are as follows:
Monday at 1 and 2—Fred Hirons; at 3—Jack Painter.
Tuesday at 1 and 2—Sonny Hodges at 5—Ron Stalling.
Wednesday at 1—Tom Gey; at 2—Frasery Brandlei; at 3—Jack Painter.
Thursday at 1 and 2—Tom Gey; at 3—Frasery Brandlei.
Friday at 1 and 2—Jerry Cox; at 3—Frasery Brandlei.

ADVANCED AEROSPACE PROGRAMS AT DOUGLAS
have created outstanding career opportunities for

SCIENTISTS and ENGINEERS

B.S. degrees or better

Assignments include the following areas:

Servo-Mechanisms — relating to all types of control problems
Electronic Systems — relating to all types of guidance, detection, control and communications
Propulsion — relating to fluid-mechanics, thermodynamics, dynamics, internal aerodynamics
Environmental — relating to air conditioning, pressurization and air systems
Human Factors — analysis of environment affecting pilot and space crews, design of cockpit consoles, instrument panels and pilot equipment

Heat Transfer — relating to aircraft, missile and space vehicle structures
Structures — relating to cyclic loads, temperature effects, and the investigation of new materials, modes, pressure, etc.
Aerodynamics — relating to wind tunnel, research, stability and control
Solid State Physics — relating to metal surfaces and fatigue

Service vehicle and weapon system studies — of all types, involving a vast range of scientific and engineering skills.

Vice-Presidential Hopefuls Present Platforms

Franny Brantley

Since taking office last year as a Junior class representative, I’ve been amazed at the change in Tech’s Student Government. This change becomes even more pronounced as I review minutes and reports from past quarters. Your Student Council is just beginning to “bloom.” This more or less sudden movement toward the realization of its potential is largely the result of increased student interest.

With these thoughts in mind, it should be clear that Tech’s Student Government is dependent upon you and your attitude toward its work. Granted, the leaders of any group have a tremendous responsibility, but their enthusiasm is directly stimulated by the support given them. The “full-bloom” of the Council is in your hands—the hands of the Tech Student Body.

Our Publicity Committee is pushing a Student Council public relations program for the sole purpose of encouraging student participation through more effective communication. We are far from the projected goal, but with your support, I, as Vice-president of your Student Council, will continue to strive toward that goal. Many proposed projects and ideas could be listed, but an often overlooked and most important prerequisite is to plan for the Student Body and its desires, not just the desires of the Student Council.

The Student Council is not a club. Neither is it a dictating body of B.M.O.C.’s. It is a tool—a tool that is just beginning to be applied to that which it fits—and it is yours. I sincerely challenge you, as a fellow student, to help me use it to our best advantage.

SB Vice-President Holds Office of Responsibility

The Vice-President of the Student Body is also Vice President of the Student Council. He is automatically the chairman of the Advisory Cabinet.

The Cabinet serves as a guidance, planning and steering committee for the Council and is composed of four officers of the Council, the Chairman of each class, the Editor of the “Technique,” and two members at large.

The Vice President must keep a close check on the attendance record of each student council member. He acts as Homecoming Committee Chairman. Although it is not specified in the Constitution, the Vice President chairs the Who’s Who nominating committee for Tech.

Y-Cabinet Head

To Talk on Trip

The president of the Tech Y Cabinet will speak before the National Council of YMCA’s on February 2. Wally Cornett, the current president, will report on his trip this past summer to the Soviet Union.

He was one of two Tech students selected to form a group of 15 to make the trip. The trip was sponsored by the YMCA as a part of the USA-USSR exchange program.

The main idea of his speech will be concerned with how the American impression of Russia differs from reality. This speech will be the twenty-ninth such talk given about his trip.

He and one of the Y-secretaries will each talk for 15 minutes and then will each spend a half-hour answering questions posed by the National Council.

The report will be delivered to the National Council in New York City. This report will be the second such report received by a Tech student to the Council.

Previously, Mr. Tom Hall appeared before the Council in 1959. Mr. Hall is presently Associate Secretary of the Alumni office.

The National Council is the top policy-making board of the YMCA in the United States.

“Tareyton’s Dual Filter in duas partes divisa est!”

says Marcus (Ace) Severus, noted Roman natator. “After a plunge in the aqua, a Tareyton is the sine quon non for enjoyment,” says Ace. “Here’s the flavor amo—de gustibus you never thought you’d get from any filter cigarette.” Keep a pack handy—tecum wherever you go.

Dual Filter makes the difference
Dean Weber Announces Exam Schedule

The Final Examination Schedule for the Winter Quarter has been released. Copies are posted on bulletin boards in the various buildings, including the Administration Building. The places where the examinations are to be given will be announced by the instructors. In examining the Final Examination Schedule, the following points should be noted:

1. Two or more examining periods are scheduled for certain courses. The students in those courses must consult their instructors as to which period they will take the examination.
2. No student is to take more than two examinations in one day.
3. CONFLICTS: Each student should check the Final Examination Schedule against his own class schedule and report any conflicts to his instructor as soon as possible. It is the responsibility of each student to see that all possible conflicts are resolved by his instructors prior to March 1.
4. It is the responsibility of each instructor to see that all possible conflicts are resolved by the instructor and student.
5. Graduating seniors are not exempt from final examinations at the end of the Winter Quarter.
6. A student concurrently enrolled in day school and night school should consult his night school instructor for instructions regarding the examination for the night school subject.
7. Exempt from final examinations for all other courses will be scheduled according to the time of the meeting of the classes, as indicated below:

**Dean Weber Announces Exam Schedule**

**WHO NEEDS ENGINEERS?**

Just about everybody needs engineers! Why do you suppose this is true? Engineers make things happen — they literally "keep the world turning." Engineers apply the knowledge gained by scientific research to ways of making the world a more pleasant place in which to live.

What qualities make up a good engineer? A really good engineer must have the best training available, such as may be obtained at Tech. In addition to this a really good engineer must have a keen and inquisitive mind coupled with a desire to succeed. The College Inn plays an important part in Tech's program to train and educate good engineers. Let the College Inn help you succeed at Tech.

**Is this the only reason for using Mennen Skin Bracer?**

Skin Bracer's rugged, lasting aroma is an obvious attribute. But it's everything.

After all, Mennen Skin Bracer is the after-shave lotion that cools rather than burns. It helps heal shaving nicks and scrapes. Helps prevent blemishes. Conditions your skin.

Arent these sound, scientific virtues more important than the purely emotional effect Skin Bracer has on women? In that case, buy a bottle. And—have fun.

**Phi Eps, Lambda Chis Hold Initiations, Chi Psi to Stage Formal Weekend**

By LEE BAYLIN Fraternity Editor

**Things are picking up again on the social scene this week, as several fraternities finished initiations.**

The CHI PSIs formal weekend will begin tonight at the Embry Hills Clubhouse with Carl's Combo providing the music. The festivities will continue Saturday night with a formal dinner dance at the East Lake Country Club followed by a breakfast at the Bome.

The SIG EPs will make the scene at Preps Farm tonight for a combo party with the Zois playing.

Initiations continued at the PHI EP house last week with five more men going through — Barry Senator, Joe Greenberg, Ricky Nathan, Yale Finkle and Rich Wolfe. The new brothers at the PHI EP house along with the men who were initiated earlier this quarter were the guests of honor at a dinner at the J&D Steak Ranch.

Twenty-one men are just completing a joyous five day "Happy Week" at the LAMBDA CHI house and plan to regroup their forces at a combo party at the house with the continental Jazzmen. The weekend will end with a buffet style initiation banquet at Yohannson's Sunday evening. The DKITs will have a combo party at the house tomorrow evening, where new pledges Mike Bankner will get his first taste of fraternity social life.

The PIKES will have a record party at the house tomorrow night, while the FUJs hold a combo party.

PHI SIGS have recently elected Jon Bryson and Graham Cambell as representatives to the bulldog club.

---

**Co-ops Announce Seven Openings**

Section II of the Co-op Club has announced some vacancies for new members this quarter.

Any co-op student with sophomore or junior standing may apply for one of these memberships. Application forms are available from any member of the Co-op Club. Selection is made on the basis of personality, character, and interest in co-op activities.

"The Co-op Club is a service organization which promotes participation in co-op functions and fosters a spirit of fellowship among co-op students," stated Cliff Bellum, membership chairman.

"Those men making application will be entertained by members at the Flying Instruction Schoolhouse, February 9th, "he continued. "This will give new members and applicants a chance to meet one another. Selection of the new members will be made on February 11. Interested co-ops must have their applications in by February 9th," he concluded.

How to Be Successful While Being a Jellyfish

One of the more shocking transformations that has occurred during our lifetime is, to me, the lack of moral fiber and the rise of "Keatingism" that is becoming evident among our student body, particularly our "campus leaders."

Peter Keating, for those of you who may not know, is a character in Ayn Rand's "The Fountainhead." Keating believed that the easiest way to get ahead was to please everybody and body and worm yourself into their trust. "After all," he may have reasoned, "everyone is your friend, you jolly well can't have any enemies."

Keating's formula works, if you happen to be a jellyfish and don't mind prostituting your mind and talent. If, however, you believe in yourself, and wish to do things on your own in your own way; the Keatings are very repulsive characters.

It is a constant source of amusement that Keatings do as well as they do. They seem to baffle people who are ordinarily very intelligent.

Once the Keatings have the power and recognition they seek, they are lost. Having never had need of original or creative thought, they are generally incapable of it when the chips are down. The results? Stutterings and stammerings and much asking for advice.

Keatings rarely do things on their own hook. A committee or a team effort is called for. If the effort fails, the blame is spread; if the effort succeeds, Keating, with his only asset of twisting people, comes up with the credit.

If you're reading this Petey, take off, we'll do just as well without you.

Grady Thrasher

Committee Frustrates Activity Building Cause

We need a Student Activities Building. One look at our campus and this fact becomes obvious. This need was recognized nearly 30 years ago and since then proposals have been tossed around, surveys of student needs were taken, plans were drawn, and such things as drafing steps and replacing the proposed structure on the Building Priority List were carried out.

Since the first simple idea was conceived, it has grown into a multi-million dollar dream, a pipedream seemingly designed to replace every- thing on campus as well as a sizeable section of the city of Atlanta.

This is just a pipedream—a dream which has fed on endless talk for years, and is slowly dying from inactivity.

The Student Activities Building Committee has the fate of our building in its hands. It is a typical committee composed of typical members of typical committees, and, has, typically, done nothing.

The members of the committee as individuals certainly cannot be held completely responsible for this. There is always the problem of money, which is a formidable roadblock. But there are also too many special interests involved. There are too many suggestions such as those using the Crenshaw Building as a "trial" activities building.

But let's not give up too soon. Once in a while a donation is made to the Activity Building Fund. Each December every student pays two dollars to this same fund through his activities fees. Why, in only one hundred years we students will be able to finance the building ourselves, and at the rate progress is being made by the committee, this should be about a half century ahead of schedule.
ed Patterson

Political Forum Leaders Lack Initiative; Student Council Should Investigate Club

Last quarter, I wrote a column asking questions about the public forum leaders. These questions have not been answered, either by the leaders of the club or by members of the student body.

This quarter, as well as last, the Political Forum has been going on without much participation from the students. When the club met last quarter, it received a great deal of support from the students. Now, the Student Council and the Technique are being met by members of different groups of students.

It seems likely that a great deal of latent enthusiasm of the group ethic in the forum and efforts made by students to bring speakers to the campus should receive a favorable response. Such activities require much time and effort from the leaders of the club, those who organized it, have apparent interest in the foment, and as many other Tech students, who would like to participate in the future plans of those officers are.

If the club remains inactive or does not have the opportunity to activate at some future date, the club is not doing anything about the growth of the future. Perhaps the forum leaders in the club are not even interested in what the club is doing as members.

Was this spent, or is there some more interest in some left what will be done for the future in the forum?

The answers to these questions have never been made clear to the members of the club. It is not to imply that there is nothing being wrong with the officers; it is, however, likely that they have lapsed in their duties.

For the benefit of the Student Council should meet with the club's officers to discuss its future with the idea of getting more participation from the whole student body knowing what future plans the club has, as well as the present state of the forum.

The problem then is lack of interest by the faculty and administration in doing the lectures in the 75th Anniversary Series. Even students at Georgia, that uncultured place that is reported to be the center of the human race, have been forced to keep up with what is said in the forums. The forum leaders have no idea of all the questions that have been answered, either by the leaders of the club or by members of the student body.

It is important that there be some way of contacting the members of the forum leaders to make sure that they are doing what they are supposed to be doing. It is also important that there be some way of contacting the faculty and administration to make sure that they are doing what they are supposed to be doing.

The students of Georgia are not interested in the forum leaders. The forum leaders are not interested in the students. The students of Georgia are not interested in the forum leaders. The forum leaders are not interested in the students.

But I digress. Roommates, I say, are still with us and I fear they will always be, so we better learn how to get along with them. Once again, the point is that we are the closest and most caring group of people on any campus in the world, and we are the closest and most caring group of people on any campus in the world.

It is important that we have a forum leaders. If we do not, we will not be able to get along with our roommates. If we do not have a forum leaders, we will not be able to get along with our roommates.

We have to make sure that the forum leaders are doing what they are supposed to be doing. We have to make sure that the faculty and administration are doing what they are supposed to be doing.

Dixie Divers Defy Danger; Free Falling Fellows Frolic

The parachutes that were seen appearing on campus about a year ago are no longer such an unusual sight to Tech students. The members of the Dixie Divers, sport-parachuting and sky-diving club, are now in their second year of active jumping.

No doubt this is a club which can and does, inject excitement into the routine campus life and offers a unique form of recreation.

The Dixie Divers are a tribute to the rapidly increasing sport of sky-diving in that all safety precautions are stressed and enforced. There is practice of PLF's (parachute landing falls) and detailed instruction on all facets of jumping, including that on all possible malfunctions. As yet there has been not one accident, injury, or mishap. (Knock on wood).

The club requires a minimum of five static line jumps, i.e., jumps in which the chute will be automatically deployed by a static line attached to the plane. Not until a member has demonstrated his ability with three consecutive, successful "soggy" rip cord pulls will he be allowed to free fall and deploy his own chute. He will also be instructed to pack his own chute.

Although the club is not a Tech organization, it is a Tech club, and its membership consists almost entirely of Tech students. At the present, however, only new members willing to purchase their own chutes, especially experienced jumpers who already own chutes, are encouraged to join. This measure is necessitated by the limited number of chutes available in the club. Those interested in this organization may contact Tom Lamphe, phone 842-7822.

FREE FALLING FELLOWS FROLIC

EFFECTIVE, SAFE, NOT HABIT-FORMING.

Stay bright. Fight drowsiness and be at your brilliant best with Verv*. The observant reader will note the absence of a handy coupon to clip, and is advised to stop by the YMCA service. Each participant reads the pamphlet and is fully prepared with a background of several articles on any particular subject.

The YMCA Cabinet will sponsor a Great Decisions program if there is sufficient interest. The club requires a minimum of five static line jumps, i.e., jumps in which the chute will be automatically deployed by a static line attached to the plane. Not until a member has demonstrated his ability with three consecutive, successful "soggy" rip cord pulls will he be allowed to free fall and deploy his own chute. He will also be instructed to pack his own chute.

Although the club is not a Tech organization, it is a Tech club, and its membership consists almost entirely of Tech students. At the present, however, only new members willing to purchase their own chutes, especially experienced jumpers who already own chutes, are encouraged to join. This measure is necessitated by the limited number of chutes available in the club. Those interested in this organization may contact Tom Lamphe, phone 842-7822.

Thurber’s ‘University Days’ Satirizes Athletics, Laboratory Detail, ROTC

By JOEL J. ALTERMAN

As students of Georgia Tech, we have become acutely concerned with the problems of college life. We have become accustomed to finding fault with the various facets of our school. But we are not the first who have recognized the existence of these problems. “University Days,” by James Thurber, is a delightfully humorous sketch of college life in America.

However, there is more to this rib-ticking book than sheer, unadulterated wit. Thurber uses his college life. We have become accustomed to finding fault with the various facets of our "percent understanding/ignorant football player who receives a preferential treatment from his professors. In this case, Thurber is guilty of creating his humor at the expense of this exploited group. His remarks were sufficient to create a rather dubious impression of the college athlete. However, he did succeed in bringing a serious problem to the attention of the reader. The college athlete, in the guise of a student, is the victim of undue pressure and responsibilities. He is driven and browbeaten. He spends hours upon hours on the practice field during a time in his life when every moment is of the essence. For this he receives his hour of glory. Then what?

Throughout “University Days,” Thurber satirizes various shortcomings in our colleges. His points are worth pondering and his humor is unique. But when a populace that is highly impressionable and frequently shallow in its thinking is exposed to literature which ridicules those Americans institutions that we cherish it is easy for the seeds of prejudice to be planted. When we continually mimic the dialect of a foreigner, we are, in some ways, alienating ourselves from those of his nationality. These cases are, by nature, equivalent and point out the power of humor.

Nevertheless, Thurber’s “University Days” remains as a masterpiece of American humor. His use of satire, irony, and vernacular blended into a humorous and thought-provoking work. A gem was spawned that will sparkle for posterity, but an exploited group, the college athlete, was the sacrificial lamb. Is the price right, or does it merit evaluation? The question remains and continues debatable.

**...things go better with Coke**

Bottled under authority of The Coca-Cola Company by ATLANTA COCA-COLA BOTTLING CO.
WELL, SPORTS FANS, Hyder's Hoard did it again! With this 15-1 season going for the Tech basketball team, it is quite likely that we will make a big jump in both SEC and National press ratings.

After going into my own personal bottle of rubber glue, I foresee a jump of two places in the National ratings and a possible (things are a little hazy toward the bottom of the bottle) jump to the top of the SEC heap. Considering the opposition though, it'll be a big jump.

Even the referees couldn't stop the onslaught of Caldwell, the fine hall handling of Big Mike, Edson, Schurf, Craddock, Nash, Herbert, and Spooner... ( alas, where do I stop?) that brought the Engineers home victorious.

REFERRING to the Tennessee game of a week ago in which Tech showed its true abilities to "come back" to win, the following little remarks should be made: The refereeing to me that I read in Post magazine where a well-known

President Harrison, vice-president representing Georgia Tech, already have a cut-off score of at least 756.

The sites of the SEC cross-country and swimming meets were fixed at Georgia Tech. The golf meet will take place at the University of Georgia. Van derbilt will host the tennis meet; and for the first time in several years, Birmingham will be the setting for the track championship.

In conclusion, Coach Coleman remarked: "The conference enjoys its greatest year in football, from the standpoint of competition, attendance, etc., and perhaps having its finest year in basketball."

Grapplers Fall To Georgia As Greek Camps Lone Win

Last Friday the wrestling club traveled to Athens for a dual meet with the University of Georgia. Although it lost the match by the decisive score of 30-5, the club, still in its formative stages, is showing a good deal of improvement.

The lone pin of the evening was gained by Phil Greek in the 123 pound class. Phil pinned his man in the first period of 15 seconds. At the time of one minute, one second of the first period.

There were several close matches. In the heavyweight class, Larry Laflowitz was barely

nudged out by the score of 1-0. Pat McMahon lost by a score of 7-4, while team captain Jim Appel trounced the crowd to a fine display of skill, finally losing to the recent Georgia State Champion by a score of 16-6.

Wrestling has been a varsity sport at Georgia for only three years. In this short time, they have risen to stand beside Auburn and Sewanee at the head of southern schools in wrestling.

On February 15 Georgia Tech's wrestling Club will have another chance to challenge the Georgia team as they return to Tech for a rematch.

SIDELIGHTS

Jackets May Move Still Higher In Polls

By HORACE McWHIRTER

Sports Editor

For several days of discussion last week here in Atlanta, the annual meeting of the Southeastern Conference was readying for election of many important decisions. Re- 

viewing Georgia Tech were the Reverend President, Reverend Mason, football athletic representative; Athletic Director and Head Coach Bobby Dodd; and Assistant Athletic Director Tombo Coleman.

After a brief review of 1962 athletics, the conference settled down to new business. One of the main issues before this year's conference was the question of whether to increase the conference membership to 16 or to keep it at 12. Hesitating in the background was the bid of Florida State University to gain membership. To FSU's chagrin, the proposal was defeated.

The limit on the number of football games a freshman team may play was raised from three to four, beginning with the 1963 season. No change was made in the freshman scheduling for other sports, which, at present, place no restriction on the number of games which may be played.

The most important decision was to reduce the number of football scholarships from 55 to 45. Asked to comment on this reduction, Coach Tombo Coleman replied: "We had hoped that the number of football scholarships would be lifted and that instead a more realistic limit would be placed on the incoming freshman... in other words, we feel that better selective football academically and athletically, would take place if the number of new growth-to-id were restricted and the overall restriction removed."

Also in the realm of scholarships was the ruling that all new scholarship athletes must achieve a minimum total of 750 on the College Board exams or earn them equivalent. Coach Coleman noted that many schools, including Georgia Tech, already have a cut-off score of at least 756.

The sites of the SEC cross-country and swimming meets were fixed at Georgia Tech. The golf meet will take place at the University of Georgia. Van derbilt will host the tennis meet; and for the first time in several years, Birmingham will be the setting for the track championship.

In conclusion, Coach Coleman remarked: "The conference enjoys its greatest year in football, from the standpoint of competition, attendance, etc., and perhaps having its finest year in basketball."

Gymnastics Drop Second By One
By HOWARD SCHWARTZER
Coach Welser's gymnastics team came close to pulling the upset victory of the year last week when they lost to an excellent Florida State University team by one point. The score, 63 to 64, was a credit to our team. The high scorer for the match was Miller of FSU. For Tech, Snyder came up with 33 points.

A new method of scoring was used for this meet. Coach Welser said that it is both quicker and fairer.

Under the new system, there are three judges. Each one scores either form and style, composition, or difficulty. With the old system each of five judges had to score on all three items.

The next match is February 2 and the next home match is February 9, against Georgia State. Good luck to our fine gymnastics team.

Skindivers Club Meets
The Scuba Club will meet Monday, February 4, in 202 Classroom Building. The program will feature underwater color slides taken in the Pacific by Robert Richey. If you cannot attend, or would like more information, contact Scuba Club Campus Box 23432.

This club was formed in the interest of providing an organization at which the many scuba divers here at Tech can share their common interest. The club is new and needs your support.

Intramurals:
Basketball Favorites Continue To Win:
Perry Rolls On, Whips Howell 102-53

As the mid-season for all intramural sports passes, action appears hot in all leagues for basketball.

The ATO's have apparently copied the Gold League crown as they lead with a 2-0 record including a 66-52 win over the previously favored Sigma Chi's.

The winner in the White League looks like the Beta's. Their record is now 3-4 with an important win over the Lambda Chi Alpha's, last year's White League champs.

The power of the Tornado League, Phi Delta Theta, has taken its lead with a 3-0 record, including wins over the Theta Chi's, AE Pi's and the Fiji's.

The Yellow Jacket League is still untouced with the Delta Upsilon's on top with a 2-0 record.

In the Independent League, the Co-op Club and the Wesley Foundation look forward to their showdown, the winner of which will take the league honors. Both ride high with 3-0 records.

The ATO's have apparently sown the hand of fate. ATO won this one in a close contest. (Photo by E. A. Smith)

SAM J. EPSTEIN, Prop.
Ron Scharf Leads Jackets To Victory

By RICH ROGEN
Basketball Writer

IN A SEE-SAW battle between the Georgia Tech Yellow Jackets and the Kentucky Wildcats, the difference proved to be a sophomore from Lithfield, Ill., Ron Scharf. With 1 minute and 55 seconds left in the game, Tech started it in the basket and Tech was ahead for good. Kentucky promptly suffered "sophomoritis" and the Yellow Jackets won 62-47 to the pleasure of 6,978 Tech partisans.

The first half proved to be a stand off, 33-33. However, according to the Baron, Cotton Nash played his best half in a year, sitting for 10 minutes and collecting 11 rebounds. Unfortunately for the Wildcats and for Nash, the first half wore away. Nash did make a move and a point in the second half, and three more rebounds. Also helping in Nash's list was the defensive job done by Tomasovich and Scharf.

Up until the last 2 minutes and 49 seconds, the second half was a continuation of the see-saw battle of the first half, at which time Scotty Baerler, hitting from the floor, gave Kentucky their last lead of the night, 60-62. Nineteen seconds later Roberts fouled Caldwell and Big Jim tied the score. At this point the previously mentioned man of the night, Ron Scharf, iced the game very boldly with a 5-0 stretch; however, the sophomore from Kentucky did again and saved the day for Tech's 13th win of the season.

This past Saturday night 6,012 spectators saw R. D. Craddock again save the Yellow Jackets from a come-from-behind defeat at the hands of the Tennessee Volunteers, 73-69. R. D. came off the bench hitting on 7 out of 10 from the floor and 4 out of 4 from the free throw line, besides scoring Tech's last 9 points, to salvage the victory.

The first half was undoubtedly Tech's finest half this year. The Jackets led by M. Tomasovich, Jim Caldwell, and Ron Scharf opened a 15-point lead, 47-32. The Jackets out-rebounded, out-played, and out-shot the Volunteers, amassing 8 rebounds, which was the half time total for the entire Tennessee team. Nine of Tech's 62 per cent from the floor, as Tomasovich led the Jackets with 13 big points. Volunteer Coach Dr. D. Shinn commenting on the first half said, "There was nothing we could do to stop them."

However, it seems the Yellow Jackets came out on the floor looking towards the game with Kentucky. A complete reverse of the floor, Scharf hitting nine in the first half, scored no points in the second half, Tomasovich had only 2 points at half time and finished with 16. The Yellow Jackets played dead until Craddock made the scene.

With six minutes remaining, Scharf's score 64-48, R. D. filled the bill as Tech's pressure man, got a driving lay up, while Scharf and Craddock converted for the three point play and Tech was off to the races.

Tennessee nearly nipped the Jackets down the stretch; however, the sophomore from Kentucky did again and saved the day for Tech's 13th win of the season.

SCHARF SPARKS JACKETS

As Charlie Ishmael watches helplessly, Ronnie Scharf drives in for another one. His last two baskets clinched the game for the Jackets. (By Photo.)

Finmen Trounce Kentucky

Last Wednesday night the swimming team lost a close meet to the University of Georgia. The score was tied three times, but a win by only four feet in the 400 yard freestyle sufficed to push Georgia over the line.

As could be expected, Art Jeppe won the 50 and 100 yard freestyle events. Captain Robert Popp was a member of the winning 200 yard medley relay team, and he took first place in the 200 yard breast stroke. Obviously recovered from the diving-board incident at Sewannee, Pete Wright won the diving, followed by Lee Enkin in second place.

The tailman's day finally arrived last Saturday, at which time they trounced East Kentucky State by a score of 57-58. The 400 yard freestyle relay, 500 yard, 200 yard, 100 yard, 50 yard freestyle, 200 yard back stroke, 200 yard breast stroke and diving events all fell victim to the attack of a formidable Engineering squad. Second place honors were won in the 200 yard individual medley and the 100 yard butterfly.

"It's nice that Tech finally won a meet," said Coach Lanoue with satisfaction. "In the hopes that this portends greater things in days to come.
