Editors Conduct Campus Wide Survey, Questionnaires Enclosed in This Issue

By EVANS FLOWDEN
News Editor

Students enrolled in summer school are being asked to fill out a student opinion poll today. This survey is being sponsored by the Technique and is a pilot project to be followed up by a poll of the entire student body this fall.

Questionnaires are available inside this issue. Students should fill out the forms and deposit them in boxes that will be labeled and placed in the Tech-Office. No names will be placed on the sheets and the student is not asked to sign it. The Editors of the Technique felt that more authentic picture of Techmen's thoughts could be gained if no names were attached.

As to the purpose of the survey, Editor Leverett commented, "This survey will give the student an opportunity to express his opinions, on a variety of topics. The concern of the survey will be used to help shape Technique editorial policy and will allow the opinions of the Tech student body to be compared with the opinions of other student bodies around the nation."

"This survey will give the individual student an opportunity to speak out and give his ideas about helping to improve the school."

The content of the survey contains matters concerning the Tech campus as a whole. A sample of the type questions to be asked are:

- Are they satisfied with the academic instruction they are receiving?
- Do they think the Tech facilities provide the best education they can get for their money?
- Are they satisfied with the college's administration and the way it handles student problems?
- Do they think the new program of expansion is being handled properly?
- Do they think the various Tech departments should be merged or expanded?
- Do they think the Tech program is the best in the Southeast?
- Do they think the student body is large enough?
- Do they think Techmen are too dressed up?
- Do they think the Tech newspaper is the best in the Southeast?
- Do they think the Techmen are too short or too tall?
- Do they think Techmen are too fat or too thin?
- Do they think Techmen are too friendly or too unfriendly?
- Do they think the Techmen are too smart or too stupid?
- Do they think the Techmen are too lazy or too hardworking?
- Do they think the Techmen are too clean or too dirty?
- Do they think the Techmen are too rich or too poor?
- Do they think the Techmen are too old or too young?
- Do they think the Techmen are too good or too bad?
- Do they think the Techmen are too honest or too dishonest?
- Do they think the Techmen are too sentimental or too practical?
- Do they think the Techmen are too conservative or too liberal?
- Do they think the Techmen are too serious or too relaxed?
- Do they think the Techmen are too serious or too relaxed?
- Do they think the Techmen are too serious or too relaxed?
- Do they think the Techmen are too serious or too relaxed?
- Do they think the Techmen are too serious or too relaxed?
- Do they think the Techmen are too serious or too relaxed?
- Do they think the Techmen are too serious or too relaxed?
- Do they think the Techmen are too serious or too relaxed?
- Do they think the Techmen are too serious or too relaxed?

Make Your Voice Heard; Co-opration Necessary

Today, every student in school this quarter has a chance to express his opinion about many topics which concern each of us. The "Technique" poll gives an equal vote to each student and insures that his idea will help shape an outline of the Tech student body.

Most of us often wish that we could, in some way, make known our feelings about campus problems. Well, here is your chance and the Editors would like to urge every student to fill out his questionnaire carefully and thoughtfully. If this is done, an accurate picture of the feelings of the student body will be drawn.

With the help of this survey, the Tech student government, other organizations, and other groups will be able to work further on projects which will benefit the student body as a whole. But this work depends in a large degree on the co-operation of all the students. Now we have the opportunity. Make your voice heard. Participate in the survey!

Think Big! Set Goals

Good Advice for All

In his commencement address, Eugene Miller told the 1962 Tech graduates that, "in the business world there are two basic ways to get ahead. One is to jump from one job to another in the hope of finding the one way. The other way is to take on additional responsibilities. Try new experiences. Take on the "small" jobs." After giving a couple of parallels to illustrate his point, he says, "If you really want to do in life it seems to me to be like cutting a tree. You have to cut off the branch at the time when you do something rather than not to do it, you have come out ahead. But even if you fail, remember it is better to have tried and failed than not to have tried at all."

The good advice is and must be only for undergraduates as it is for graduates. The intent of this article is to encourage every student at Tech to take advantage in a calculated undertaking to broaden his horizon of experience, creative endeavor and organizational initiative. Average men and women can be leaders. Leadership is available to all who are willing and able. The big dividends of experience are that you will be able to apply them yourself or in a calculated investment of time and energy.

The Georgia Tech Student Government structure provides a good opportunity for undergraduate leaders to get involved. One need not have been elected to the Student Council to take an active part in the workings of and activities that go on at Tech. Research, athletic, academic, and other organizations need you. Community leadership is available to all who are willing and able. The big dividends of experience are that you will be able to apply them yourself or in a calculated investment of time and energy.

The Tech campus has witnessed the beginning of a revival of active interest and participation in student body activities during this past year—especially this was true of student government activities. The Student Council has elected three representatives to the class and is planning for next year. Members of the 1962 SGA have been the nucleus for the new student organization. Penalization for Class Attendance Unfair; Administration Should Scrap Roll Books

While considering various classroom attitudes, I realized the gross injustices and inconsistencies forced upon Tech students every day. For instance, in a class where attendance is not strictly enforced, the student's grade is determined purely by his knowledge of the course, i.e., his performance on quizzes and not by the number of times he did or did not attend class.

On the other hand, in some other courses, he may be knocked down several letter grades or even dropped failing, simply due to overcuts with no regard to his quiz grades.

A careful examination of the reason for overcutting will, I think, reveal the injustice of this action. Oftentimes the student is not feeling well. This is not to say he is sick enough to spend two boring days in the infirmary to attain a legal excuse. Then too, he may have an important quiz coming up in the next hour on which 50 additional minutes of study will help considerably more than watching a movie on "Fire Ant Control in South America."

IN OUR country an 18 year old youth is considered mature enough to defend his life and the freedom of our country in our Armed Forces. In Georgia, he is of sufficient age to take on the grave responsibility of selecting the leaders of our country and state. Does it not then follow that the student is capable of judging the value of his time and using it to its utmost advantage—without fear of reprisal?

I call on the administration to allow professors to throw away their roll books and let the student accept the responsibility which should be his.
'Pajama Game' Best Showing of Season, Horton and Wife Give Fine Performances

By Hoke Brannen
Features Editor

Tuesday night Robert Horton and his wife, Miss Horton and Wife, gave a performance that put the audience at ease. The show was produced by Jack Googer, and the music and lyrics were by Richard Adler and Jerry Ross.

The story of 'Pajama Game' is a classic American musical comedy, and the cast was able to bring it to life with their performances.

In the role of Jerry Dingle, Horton was able to show his range as a performer, and his partner, Miss Horton, was equally impressive as Della Lou."
