Tomorrow night, May 18, at the First Methodist Church, will be held a banquet to honor the following: (1) Dr. Harris, the football coach; (2) four junior and four senior players. The former are to be recipients of the championship award, and the latter of the presidential award.

At 9:45 o'clock, it is planned, the banquet will begin. Doors will be open at 9:30. The guests present will be seated at tables of eight, and will be served a complete dinner. Following the dinner, the banquet will resume, and the presentations will begin. The program will be as follows:

9:45 o'clock—Banquet begins.
10:00 o'clock—Dr. R. F. Harris makes the first presentation.
10:15 o'clock—Dr. Harris makes the second presentation.
10:30 o'clock—Dr. Harris makes the third presentation.
10:45 o'clock—Dr. Harris makes the fourth presentation.

The program will continue until 11:30 o'clock. At that time, the guests will be invited to join the members of the ODK at the banquet hall.

ODK Announces

The issue of The Terrace coming out next Friday will be the last one for this year. The last staff meeting will be on Monday, May 19.
A Tribute to Dr. Boggs

A great man has died. A man who has devoted his entire life toward the advancement of chemistry and in later years, toward the building up of Georgia Tech to the great technical institution that it is today. Although Dr. G. H. Boggs has passed on, his untiring efforts for the progress of Georgia Tech and his spirit of friendliness and kindliness will go on living and will serve as ideals for those who will take his place.

Dr. Boggs came to Georgia Tech in 1903 as an assistant professor of chemistry. In 1921 he became Professor of Inorganic Chemistry and head of the Department of Chemistry. Since 1938 he has been Director of Chemistry and Chemical Engineering. Dr. Boggs' educational career is shown by the widespread activities in which he participated. He is in Who's Who in America, and was a member of the American Chemical Society, Georgia Academy of Sciences, Sigma Xi, Phi Beta Kappa, Phi Kappa Phi, Omicron Delta Kappa, Alpha Chi Sigma, and Seaboard and Blade.

Yesterday morning friends gathered to pay him tribute at the funeral. The Taconic staff, along with the faculty, students, alumni, and his family, all extend their sincere sympathy to Dr. Boggs' family. We shall always remember him as a man who dignified everything by doing it.

The Service of God

By CHARLIE COMMANDER

Total war demands total exploitation of the resources of a people, individually and collectively. In America if national defense is to be an all-out effort, then not only the physical resources of the country, but the spiritual and social values is imperative. A better mind is the object of war but a better man, and a better mankind, is the object of humanity in less peaceful and war.

If spiritual and social values are neglected in an emergency then both in the emergency and in the ensuing peace, not a better a workman and mankind will result. In a day when battalions of home and field are forming, the enemy's battle hymn of bombastic battle lies relaxed through the world in an attempt to realizes and develop a medium objective, what can youth to do to preserve and strengthen the values of religion?

The four following areas are indicative of things that may be done.

1. With faith and strength our own spiritual lives by prayer, reading of the Bible, study, and thought, and can strive even more-increasingly to live the kind of lives that are contingently and religiously exemplified. Religion is a thing that others would rather learn by observing what we do than by tving what we say.

2. To perpetuate the true spirit of fellow­ship or community with those of like, or similar, religious experience; therefore this is our work. We can work, in the spirit of missionary enterprise, and in accordance with the injunction, " . . . go into all the world, and preach the gospel . . . ." seek to win others to the way of living which is in keeping with God's will.

3. WW will serve as ideals for those who will take his place. God requires but one thing—the service of God. Losing one's self in the mystical contemplation of God is not service for there is no service of God which is not at the same time service of man. Serving God means to serve man.

The Purposes of the Tech 'Y' by JIM HARRIS

In speaking of what the Young Men's Christian Association can do, one has only to be conscious of local as well as international happenings to realize the acute need for tolerance, cooperation, and unselfish, self-sacrificing service of individual and group selves. In comprehending the difficulties of a situation we will find ourselves more and more in the aims of the 'Y's' on campus.

To many students, the 'Y' has been a place for recreation, where books, magazines, facilities for games and meetings are available. To a smaller group of students, it has been a place of relating their vision to the universal desire to help mankind.

Using forums and discussions with well-informed leaders of the church and study groups, the 'Y's' have been trying to educate students in the fields of social and economic problems. As much contact as possible is kept with students of other schools to broaden viewpoints and share new experiences and speakers. To give a student some sense of purpose into private his ideas and convictions, the work with boys' clubs in the junior high school, the teaching of Sunday School classes, and the promotion of social and recreational opportunities for Tech students, a find important place in the 'Y's' program.

As to what can be done in the years to come here at the Tech Y. M. C. A., the possibilities are limitless in developing more socially minded, high-character men who will serve their race rather than their own materialistic desires. It is hoped that the 'Y's' along with many other groups and individuals on this campus, can make religion increasingly meaningful to more and more people, in view of the personal, social, and economic situations of the present civilization.

Georgia School of Technology

"A Technical School With a National Reputation"

The Georgia School of Technology caters to young men of ability and ambition who desire to become engineers. The School is maintained with public funds, and the national reputation of this institution is based not on claims, but on results. Its greatest asset is the record which its alumni are making in the productive work of the world. Georgia Tech graduates succeed because they have been taught in an atmosphere of scholarship and to work efficiently.

Courses in Civil, Electrical, Mechanical, Textile, General, Ceramic, Chemical, Aeronautical, Architectural and Industrial are offered by the Department of Engineering, Architecture, Chemistry, and Industrial Management.

For Further Information Address

THE REGISTRAR, GEORGIA SCHOOL OF TECHNOLOGY, ATLANTA, GA.
At a recent meeting, the Georgia Tech Interfraternity Council elected its officers for the coming school year. All the men chosen are prominent on the campus and are ably qualified to take over their offices.

Stokes Hamour, new president, is secretary of the Kappa Alpha fraternity, a member of the Bulldog Club, Phi Psi, Skull and Key, the Yellow Jacket Staff, and was on the Honor Roll his freshman year. Hal Florian, vice-president, is treasurer of the Chi Phi fraternity, has been a member of the golf team for three years, has been a junior lieutenant, is a member of the Bulldog and I. M. Clubs, Alpha Phi Omega, the International Relations Club, and has worked on the Yellow Jacket, Blueprint, Tempo, Sigma, and Ingenuus. The new treasurer, is president of Kappa Sigma fraternity, a winner of the Gold T, Honor Roll 1, 2, 3, president of Pi Tau Sigma, a member of A.S.M.E., the Bulldog Club, Tau Beta Pi, and is on the Tennis and Yoga Jacket staffs. Jack Adams, secretary, is president of the Theta Chi fraternity, managing editor of the Blueprint for 1941-42, secretary of A.I.Ch.E., a member of Pi D. E., Tau Beta Pi, Phi Eta Sigma, the Bulldog Club, and has been on the Honor Roll 1, 2, 3.

### College Students Need More Dates

Los Angeles, Calif.—More dates for college students—plain dates, "blind" dates and "group" dates—are seen as a solution to marriage problems by Mrs. C. Brooks Fry. Mrs. Fry, assistant to Dr. Paul Popenoe, founder of the American Family Institute, asked all teachers to urge their students to get acquainted and make dates with each other, even during class time.

Stressing the need for greater social relationships for young men and women on coeducational campuses, she said, "only 50 per cent of the students in coeducational colleges marry, and we are losing all this opportunity by allowing this condition to exist.

"Popular students will have to take some responsibility in seeing that the "wallflowers" get into the swing of campus social life.

The program was greatly enlivened by a surprise appearance of one of the guest stars who had been singing at the Reno May Festival and who was passing through Atlanta. He gave several stirring numbers, regaling the audience with a setting and playing the bells, both very well done.

One of the outstanding retreats of the "Y" this year were held at G. S. W. C. and the annual "T" held at Hard Labor Creek. The purpose of this retreat was to lay for the coming year. The one at G. S. W. C. was held for the Land Grant colleges of Georgia who could not attend the state retreat. These colleges voted to have this annual interview. Bill Garrison of Tech was elected secretary of this group.

The "Y" also sent delegations to other Southern colleges and churches, including Georgia, Bruner, and Agnes Scott. The Y Cabinet-Council was host to visiting delegations from some of these and other colleges.

### Famed Swiss Bell Ringers Play Here

Ambassador Quartet, Guest Singer On Program

A rather small crowd heard the Ambassador Male Quartet and the Swiss Bell Ringers last Monday evening when they presented their program of semi-classics and folk tunes, occasionally interspersed with a comic number. The quartet divided its time about equally between singing and playing the bells, both very well done.

### CAMPFIRE GROUPS

MEETINGS WHICH WERE SO SUCCESSFUL THIS YEAR. THIS IS ONLY ONE OF THE MANY STUDENT CAMPFIRE GROUPS SUCH AS THIS ONE GET TOGETHER FREQUENTLY UNDER THE SPONSORSHIP OF THE TECH-YMCA."
Southeastern Conference Track Meet
In Birmingham Arouses Speculation
Close Contest Predicted for Evenly Matched Tech, Bama, and Auburn Squads

The battle for team championship, contrary to the usual situation, should prove to be a humdinger when the members of the B. E. C. throw themselves into their annual championship track carnival at Birmingham tomorrow.

Individual battles are always present; however, the close team race is an added attraction this year and it is a cinch the Bengal Tigers race is an added attraction this year, should prove to be a humdinger when the members of the other aggregations are revving up for the contest. Roy Goree '41

ALABAMA DARK HORSE

The close contest prediction is even more valid now that the little men have had their own way in the coming conference. The meet was not completely decided until the last event, the broad jump, in which two placemen plumped to assure their victory by a 64-51 count and averge their one-point defeat in the AAV championship two weeks ago.

The Jackets started in front, however, accounting for two marks which have not been equaled within the conference this year. George Webb tightened his grip on the javelin situation when he let the spear go for a 204' 8" toss. A 24.2 low hurdle run likewise cast Plaxico into the role of favorite in the conference championship tomorrow; he also registered one of the finest marks of the year when he raced over the big bent in 14.9.

Rykley finished the dual-season with a close slate in the 101, winning again in 10 flat, and also turned in a 21.7 burlfing to place him right behind L. S. U.'s Billy Brown. Dutiel catapulted himself almost to the 23' marker to win first honors in the broad jump.

Performing well in defeat were Weeks, who lost the pole vault by a hair in a renewal of his feud with L. S. U.'s H. A. Bailey; Bailey, the bicameral champion, pushed Tyler to a 4.286; McDaniel, with a 180' jump, who dethroned Webb in; Cash, who ran well in the 440; and the relay team.

The Jackets starred in defeat, however, accounting for two marks which have not been equaled within the conference this year. George Webb tightened his grip on the javelin situation when he let the spear go for a 204' 8" toss. A 24.2 low hurdle run likewise cast Plaxico into the role of favorite in the conference championship tomorrow; he also registered one of the finest marks of the year when he raced over the big bent in 14.9.

The father entered the contracting business. His parents moved to the city in Florence County, South Carolina. He went to Clemson from high school and high school in Florence. Having his name in "Who's Who in Clemson" he received the honor of the R.O.T.C. unit and still holds junior "Y" council and the senior was elected president of both the junior "Y" council and the senior cabinet. He was also a captain in the R.O.T.C. unit and still holds a reserve commission. While at Clemson he received the honor of having his name in "Who's Who in American Colleges."

Charlie won a scholarship to Yale and graduated in 1939 with a Bachelor of Divinity degree. He specialized in student "Y" work and was supervisor of the junior high boys work. After he graduated from Yale he went to V.P. L as assistant V. M. C. A. secretary. He remained there a year. In August, 1940, he came to Georgia Tech.

**Boys’ Club**

(Continued from page 1) Next year the "Y" anticipated increasing the number of boys’ clubs which will be formed from the various groups at O’Keefe. This will render some competition and help build up interest in the organization. The principal purpose of undertaking this project was to offer a means for boys of different denominations and faiths to indulge harmoniously together in wholesome recreations.

The Georgia Tech Glee Singers, sponsored by the Y. M. C. A., have had a very successful season this year. In addition to the usual concert series the organization started the Tech Christmas Carol Sing, and with the SAAS Scott Glee Club presented the light opera, "H. M. S. Pinafore." Walter Herbert is the director of the Glee Singers.

The Tech Glee Singers have another Y-sponsored organization. Among the achievements of the Glee Singers this year were the presentation of Gilbert and Sullivan’s light opera, "H. M. S. Pinafore," the Christmas Carol Sing, and appearances at Southern Colleges and Universities. Brenau, Georgia State College for Women, Wesleyan, and Boston Tif were among the places that the Glee Singers have been presented.

For the past few weeks, the sophomores and freshmen classes in the Coast Artillery B.O.T.C. unit have been building engaged in the task of moving and emplacing the 155mm gun from its former position in front of the Military building to a more advantageous spot behind the Civil Engineering building. Under the direction of officers of the Coast Artillery unit, the two classes placed the gun in traveling position, hauling it to its present position with the aid of a truck, and by dint of some prodigious efforts on ropes, emplaced it in its present site. In the soft ground, the gun sank almost to its hub caps and required some skillful maneuvering with tackle to emplace it properly.

"The gun was moved for two reasons," stated Mayor John C. Day, A. C. unit commander. "We wished to synchronize our gun drill with our range finding practice, and we also wished to give our present classes the actual experience of gun transportation with makeshift tackle."

In its present position, the gun is located in the vacant lot behind the C.E. building, and overlooks the part of Fourth street near the Delta Tau Delta fraternity house. Observing stations are located in the vacant lot below it, and plotting boards are situated behind the gun. Targets are laid along Fourth street, and as the course of these targets are plotted, actual gun drill is done on the gun. This synchronization is expected to add much to the experience of the present military students.

**Four Fraternities Left in Golf Meet**

Phi Delts, A.T.O.'s, Phi Kappa Phi's, Pi K.A.'s Reach Semi-Final Round

The semi-finals of the interfraternity golf meet have been reached by the Phi Delta, the A.T.O., the Phi Kappa Phi, and the Pi K.A. teams. The Phi Delta Theta team, with the K.A. team, will play in the semi-finals.

The meet is conducted on an elimination basis. The winners of the semi-finals will contend for the fraternity championship of the school. To them will be awarded a suitable trophy presented by the Interfraternity Council.

**Coast Artillery Students Employ Old Faithful '155**

The Phi Delta Theta team nosed out the A.T.O. team by a score of 3 to 1 in the semi-final round. The Phi Delta Theta team is composed of: 

*Phil Delts, A.T.O.'s, Phi Kappa Phi's, Pi K.A.'s Reach Semi-Final Round*

*The semi-finals of the interfraternity golf meet have been reached by the Phi Delta, the A.T.O., the Phi Kappa Phi, and the Pi K.A. teams. The Phi Delta Theta team, with the K.A. team, will play in the semi-finals.***

Tech "Y" Offers Top-Notch
Program of Study, Recreation
BY BILL GARRISON

Tech "Y" Throughout the program of study, recreation.

Once a senior told me that he had been made to work at his desk for five years and had averaged about one date a month, and wished he could have had more. When questioned as to why he had been so limited in his dating he said that he couldn't afford to go out much —that it was impossible to have a good time on a date in Atlanta without the costs of the evening running over five dollars. Laughable, isn't it? And yet sad at the same time.

Local churches offer a full program of fun as well as the serious things of life. It isn't "easy" to go to church. Good engineers can be just as interested in making friends in the local churches as anyone else. So if you have been at Tech and been to church a couple of times during those three years try going a little more often and attend the young people's meetings.

That building on the corner of North Avenue across from Grant Field is the Y. M. C. A. building. Ever been in it? If not, come over and investigate it and see what it has to offer for you. Friends, first of all. It is a friendly place, full of boys who believe that there is much more to be had at Tech than book learning. Fellow travelers who think that good wholesome recreation at little cost is just as important as anything else.

Pleasures planned to include many Atlanta girls and girls from other colleges give all of us a chance to see green grass and honest-to-goodness "wild" trees and flowers. Swimming parties will come later on.

Next year it is planned to have Sunday afternoon meetings with Atlanta girls coming over to the "Y" for the afternoon. Youth hosteling, which was so popular in Europe before the outbreak of the war has just begun to take hold in this country. Come around and talk it over at the "Y" if you are interested. There are several who hope to have some outings next year along the plan of youth hosteling.

Is there anything strange about boys and girls being together? Even though most of the boys are planning to be engineers we can find time to take a little interest in looking around for a good propsect to do the cooking and stay home to mind the baby some day. But you can't meet the kind of girls who are really worth while with going strolling down "Butter- milk Drive." Recreational activities are planned to help Tech boys meet the nicest girls around here—girls from the Atlanta churches and from such schools as Agnes Scott.

We can't always take a few hours off for a picnic or a weiner roast. But it is usually possible to take a few minutes and play a game of tennis or handball or foot around in the gym, not to mention swimming in the best pool in this part of the country.

No matter how full the schedule is we should always find time to have some recreation, the kind of recreation where we have fun by being a part of things; not going to the show and watching someone act out a part on a screen, but rather having fun by being with real live people who will be our friends and won't charge admission for us to see them act out a part.

How about a bet? Not one where the odds are against you or where the wheel is fixed or the dice loaded, but just a good sporting bet. Try the kind of recreation offered by the "Y".
