Auburn Knights Play For Regular Anukh Dance Tomorrow

This week at the regular Saturday night dance, Anuk will present the Auburn Knights, one of the South's finest college dance organizations. On its former appearances at the Flats this splendid dance organization has gone over in a big way. The Knights have been playing together all summer as a unit, and should present an even better band than they have herebefore. The newly formed Armory Ball Room has been developed and the profits derived from any dance will be used to add to the dancing pleasure. If you haven't tried it this is a good time to try.

The Tech will send out to the lucky two lucky ladies attending the dance. Admission for this dance will be seventy-five cents per couple and still the price is cheap.

The Tech Circle requests all societies have their elections as early as possible in order that the full election of ODK, may be held by the first of December.

Omicron Delta Kappa, the highest national honorary academic fraternity, announces the point system as revised last year.

The purpose of presenting the system at this time is to let the underclassmen know the requirements in order that they may work with some definite goal in view.

The Tech Circle requests that all societies have their elections as early as possible in order that the full election of ODK, may be held by the first of December.

Omicron Delta Kappa was founded in 1914 at Washington and Lee University and has circles in forty American colleges and universities. The purposes of ODK, is threefold: (1) to recognize men who have attained a high standard of efficiency in college activities, and to inspire others to strive for conspicuous attainments along similar lines; (2) to bring together the most representative men in all phases of collegiate life and thus to create an organization which will be broadened. Patent applica-
tions for inventions and processes developed by the station will be hand-
and both of you will have a much bet-
ter time.

Each week the dances are getting better and better, and there is a ver-
table bevy of swell babs such Sat-
Saturday. Get the Anuk habit, it is a good one to have.

M. Mitchell Elected To Student Council

Marvin G. Mitchell was recently elected Junior Class Representative on the Student Council. He will serve for the next two years representing the Co-op Department.

Three men, Harold Adams, D. A. Brugh, and Mitchell, were appointed by the Junior Class, and all Co-op undergraduate students will vote on their final election. Mitchell will succeed "Pete" Smith, who did not return to Tech this term.

Marvin has been a very prominent man on the campus, being outstanding in scholarship as well as campus activities. He is a potential civil engi-
neer from Guttman, Ga., and is a member of the Kappa Alpha fraternity. He will certainly deserve this important position.

FRATERNITY HIGHLIGHTS

By Hal Curtis Felsher

With blaring horns emanating from the ceiling — silver trophies strung up on the walls — gold, red, and white gowns gliding gracefully over polished floors — and dashing enginees leading the way — the S.E.A. of Georgia Tech held their first gala open house of the college year. The first of the fair’s charm is that of the beauteous of the strong Mary Parker Scott, Ann Campodoglio and Ernest Rees, Alice Armstrong and Walter Kovac, Emmylou Carter and Rodgers Joy, Julia Chapin and Evalyn Miller, and “Billiny” Nelson swinging on the swinging music of good Harry Hersey. The fraternity of tea-dance regulars—Chi Phi Lodge—and their offering of the ladies of their goddess, Georgia Tech and her lightning Golden Torpedo with a swing time hand — a mate of the south’s choicest ballads — and a riot of gold, red and white color and very nice and corner of the lodge, hanging in the coat of arms of Harky’s pallid music makers were Edith Munford and Jane Brightwell, John Cherry and Becky Buggy, Bill Patten and Lillian Guinn, Bill Manry and Fraulein von Schrader. (Continued on Page 3)

GUEST COLUMN

"The Student Corner"

SHOULD AMERICA STAY OUT?

Surely, the predominant concern of all peoples in the world today is the maintenance of peace. This war has been a most trying experience for many people, many decades. We Americans can be especially proud of the fact that we have remained aloof from the ravages of this war, despite our military preparedness. This is one of the greatest achievements of this war, and one that we should be especially proud of. We have not joined the war in any way, and we have not suffered any losses. This is a testament to the strength and resilience of our nation.

I therefore submit the question: Should America stay out of this war? I believe that America should stay out of this war, as we have already done. We should continue to focus on our own internal issues, as the world is full of problems that need to be addressed. We should continue to work towards peace, and we should continue to support the efforts of those who are working towards peace.

I hope that our leaders will continue to work towards peace, and that they will continue to stay out of this war. We should continue to work towards a better world, and we should continue to work towards a world of peace. I believe that we can achieve this, and I believe that we should continue to work towards this goal.

In conclusion, I believe that America should stay out of this war. We should continue to work towards peace, and we should continue to work towards a world of peace. I believe that we can achieve this, and I believe that we should continue to work towards this goal.

Helen Aycock is at it again. Yes, she is a true American and she is doing her part to help her country. She is a true patriot and she is doing her part to help her country.

Mary Elizabeth Beers is trying to decide between football player J. L. and lawyer J. D. She is a true American and she is doing her part to help her country. She is a true patriot and she is doing her part to help her country.

The American people are doing their part to help their country. They are working hard and they are doing their part to help their country.

I therefore submit the question: Should America stay out of this war? I believe that America should stay out of this war, as we have already done. We should continue to focus on our own internal issues, as the world is full of problems that need to be addressed. Tech ODK Circle Has Four Active Faculty Members

Representing one of the few faculty student activities, the Tech ODK Circle of O. D. K. includes four active faculty members. These are the only four active student members.

At the present time the four active faculty members are Professor C. D. Gibson, head of the Geology Department; W. Harvey Vaughn, Episcopal Diocesan Chancellor; F. E. Stetson, of the Journalism Department; and Fred B. Wenn, of the Economics and Social Service Department.

The faculty students are active for approximately a period of four years, and at the end of this time another faculty member is elected to active membership from the active faculty members. These four active members serve as faculty advisor and as one faculty secretary-treasurer; at times one member may be out of the city, but he is active.

At the present time John A. Griffin is serving as faculty advisor to the society.

Technique of October 8.

The election of one of these members, Ed. E. Cox, as Director of the State Experiment Station, and Fred B. Wenn, for several years faculty advisor of the Tech Circle, was announced.

The Alpha Tau Omega's, coming to town with another fine dance last Saturday, presented several fair-haired debutantes to the Tech campus. Bill Jennings escorted Olive Howard, John Woodall offered his arm to Libby Baggett, and John A. Griffin escorted Frances Hansen.

Among the other dances of the Tech Circle were the festivities for the Ramblin' Wreck from the week-end one merry-go-round of out-of-town, and Junior Haines Harrier from out of town.

Fraternity Highlights

(Continued from Page 2) "Righthearted" Frances Neal, "Bill" Coldwell and his dark-eyed date from out-of-town, and Junior Haines Rupert with gorgeous Georgia Oliver. The Phi Kappa Sigma's, known for that good old college spirit, rode the week-end one merry-go-round of the Tech Circle. Following the Yellow Jackets' gallant battle with members from Dulin, Bill Pitts of the Phi Kappa Sigma's, known for his "robust" keg-swinging into the head of Jerry Boggs, charmed the audience, much to the delight of Miss Jean McLeod and Ed E. Cox, who proudly presented Frances Can

29 Members of Tech A. I. Ch. E. Visit Scripto Plant

Twenty-nine members of the Georgia Tech Student Chapter of the American Institute of Chemical Engineers visited the Scripto Pencil Company's Scripto Circle plant of the Scripto Pencil Company last Monday to find out how automatic pencil manufacture takes place. The plant is the largest pencil manufacturer in the world, with a production of 250 million pencils per year. The plant is divided into three main departments: the lead and graphite department, the blackening and gilding department, and the varnish and finishing department.

The lead and graphite department involves the preparation of the lead and graphite materials. The lead is mixed with graphite to create the desired hardness for the pencil. The mixture is then molded into the desired shape.

The blackening and gilding department involves the application of the black ink to the pencil. The ink is applied to the pencil using a machine that coats the entire surface. The pencil is then dried and polished.

The varnish and finishing department involves the application of the varnish to the pencil. The varnish is applied using a machine that coats the entire surface. The pencil is then dried and polished.

The plant is equipped with the latest technology and is designed to produce high-quality pencils efficiently. The plant is a testament to the importance of skilled labor and the use of advanced technology in the manufacturing industry.

Cross Country Team Has Good Prospects For Coming Season

The cross country team held its first practice meet between teams chosen by Captain Aldridge and Alternate Captain Pierce last Friday. Pierce's team won by a score of 27 to 29, points being given for the first ten places. The winning team was composed of: Pierce, who came in 3rd; Small, 2nd; Joiner, 10th; Foote, 5th; and Morgan, 19th. Aldridge set a new course record of 16:57 to win a milkslab, and his team came in with Manley, T., 3rd; LeCraw, 12th; Gunter, 13th; and Morgan, 15th.

Captain Pierce last Friday. Pierce's team won by a score of 27 to 29, points being given for the first ten places.

Another meet will be run this week with theater tickets for the winning team in preparation for the first regular meet with Mississippi State, October 30th.

They're going to roll those cars over the red hills of Georgia and the wind- 
ing curves of mountainous East Alabama, and Georgia Tech will be proclaimed “Atlanta Day” in 
Birmingham. The visitors from Georgia 
would be given the keys to the city and 
a free hand in making their stay as enjoyable as possible accord- 
ing to their own wishes. 
President R. L. British of Tech told the committee that his institution 
was ready to join in the plans with 
full cooperation and the band would 
be available for the parade in the city 
when the motorcade arrived. 
At the Capitol the Birmingham Jay- 
nees presented Downing Maxcover a 
statue of Vulcan, symbolic of Birmingham's civic spirit 
of "fire and steel." This will adorn 
Governor River's desk.

Bowling Schedule Announced
Listed below is the revised and official bowling schedule for all teams for the entire season. This is official and all fraternities should keep one.
