The Tech unit of the Independent Students Organization, a national club, has done much to aid the non-fraternity man. This organization is devoted to helping its members to become well rounded in their college life. The I. S. O. has done much toward this goal since their organization, and they now rank as one of the top social organizations on the campus.

The Callaway Unit of the I. S. O. is composed primarily of married students who live in the Callaway Apartments, and functions as a member unit of the main I. S. O. on the campus. This unit has one of the highest scholarship standings on the campus and is very active in athletic, social and civic affairs.

The Activities section is much the same this year as it was last year; however we feel that we have succeeded in making the pages more attractive to the reader. We hope that you agree.
Part of the cast of "The Traitor" is shown at dress rehearsal.
IN LOVING MEMORY

JOHN HENRY HENIKA

November 11, 1855—February 19, 1951

PROFESSOR OF MECHANICAL ENGINEERING

Although he was officially Professor John Henry Henika, this grand old man will forever remain "Uncle Heinie" to Tech and Techmen. He retired at the early age of eighty-five, but he never stopped being a confidante and adviser of everyone connected with his beloved Georgia Tech. It is really hard to tell who was more dear to whom—Tech to Uncle Heinie or Uncle Heinie to Tech—but everyone knows Tech has lost a staunch supporter.

OMICRON DELTA KAPPA, national leadership honor society for men, was founded in 1914 at Washington and Lee University, and the local circle was established in 1932. Members are selected on a point basis, a definite number of points being given for each honor or position attained by the student. When a student has amassed enough points and a definite scholastic average he is eligible for election. ODK ranks with ANAK as the highest honorary organization on the Tech campus.

THE KOSEME SOCIETY was recently reorganized on the Tech campus after a period of several years' inactivity. The society is climbing high in recognition as one of the outstanding honorary organizations on the campus. Members are selected from the students of the junior and third-quarter sophomore classes who have been outstanding in extra-curricula activities.
PHI KAPPA PHI

PHI KAPPA PHI is the oldest national scholastic honor society on the Georgia Tech campus. Founded in 1897, it now has chapters in more than 50 colleges and universities. Membership in Phi Kappa Phi is awarded to those members of the senior class who are outstanding in scholarship during their first three years at Georgia Tech. The local chapter conducts the annual Honors Day exercises and awards a cup each year to the senior with the highest scholastic average.

THE TAU BETA PI association was founded on the campus of Lehigh University in 1885 and is the leading honorary engineering fraternity in the nation. The standards of Tau Beta Pi are those which every student in the engineering field seeks to attain. Membership thus signifies the attainment of excellence in scholarship, character, leadership, personality, and service.

The Georgia Alpha chapter was established on the Tech campus in 1925. Only those engineering students who are in the upper one-eighth of the senior class or the upper one-tenth of the junior class are eligible for membership.

The local chapter is active in various campus projects. Engineers' Day was founded at Tech by Tau Beta Pi in 1940. Since that time, Engineers' Day has grown into Engineers' Week, and the St. Patrick's Council was organized in 1950 to assume the responsibility for the organization and direction of the various activities associated with Engineers' Week.

Tau Beta Pi annually awards a cup to the outstanding engineering senior and sponsors a campus-wide tutoring program which is administered and carried out by departmental societies under the direction of Tau Beta Pi.
PHI ETA SIGMA

PHI ETA SIGMA, a national freshman honorary scholastic fraternity, was established at Georgia Tech in 1930. Membership in Phi Eta Sigma is the highest scholastic honor a freshman can attain at Georgia Tech. Only those men who have a point average of 3.5 for the first quarter, or an over-all average of 3.5 for the entire freshman year are eligible for membership. Each spring the fraternity presents a cup to the freshman having the highest scholastic average for the first quarter.

THE BRIAEREAN SOCIETY was founded in 1912 for students of the Co-operative Department to promote high ideals and scholarship. It offers the highest honor available to upper-classmen who are outstanding in scholarship, leadership, and character. The Section I group attends school during the winter and summer quarters and Section II, during the spring and fall quarters. Those not in school work with industry.

WHO'S WHO
AMONG STUDENTS IN AMERICAN
UNIVERSITIES AND COLLEGES

WHO'S WHO is a national organization that selects distinguished students throughout America for their scholarship, leadership, cooperation in educational and extra-curricular activities, general citizenship, and promise of future usefulness. Who's Who was organized in 1934-1935 to give recognition to those students who contributed most to school life.

Students nominated and accepted will be listed in the annual directory of distinguished students from colleges and universities throughout America. This annual will give a biographical sketch and write-up of each student selected.

ALPHA CHI SIGMA

ALPHA CHI SIGMA is the national professional organization for chemists and chemical engineers. Students are eligible for membership when they have reached second quarter status, and who are in school without conditions. The work of the local chapter includes providing exhibits for the student body, sponsoring speakers on scientific subjects, and establishing a medium for social contact among its members.

ALPHA PI MU, the youngest of the departmental honorary fraternities, was founded at Georgia Tech in the fall of 1948 as a society for the recognition of industrial engineers with superior abilities.

The local chapter was granted its charter by the Student Council on January 25, 1949, and recognized by the state of Georgia on March 17, 1949.

Membership is limited to juniors, seniors, and graduate students of high scholastic standards who possess traits of high leadership, character, and ethicality. Only those juniors who are in the upper one-fifth, and those seniors who are in the upper one-third of their classes are eligible.

CHI EPSILON

CHI EPSILON is the only national honorary fraternity limited entirely to those men in the field of civil engineering. Founded in 1922 at the University of Illinois, the fraternity recognizes the qualities of scholarship, character, practicality, and sociability in civil engineering undergraduates throughout the country. The Georgia Tech Chapter of Chi Epsilon, founded in 1943, was formed from Civil Crew, the oldest honorary society on the Tech campus. The chapter procures speakers to present the latest news in the profession and also seeks to represent the students on questions concerning changes in curricula or policy in the School of Civil Engineering.

DELTA KAPPA PHI is the oldest national honorary textile fraternity. It was incorporated in 1905, and the Theta Chapter at Georgia Tech was granted its charter in 1949. Its membership is composed of textile juniors and seniors whose scholastic standing, character, and leadership can fulfill the requirements. The purpose of the fraternity is to promote and encourage a fraternal relationship among its members, and to advance the interest of its members in acquiring a thorough education in textiles.

The INDUSTRIAL MANAGEMENT SOCIETY is the honorary professional group in the Industrial Management Department. To be eligible for membership in this organization, the student must be a member of the department and in the upper third of the class. He must also show outstanding leadership and interest in the field of his studies. The purpose of the Society is to give the member a practical view of industry that is sometimes neglected in the classroom.

The Georgia Tech Chapter of KERAMOS fraternity, a relatively new organization on the campus, was founded in February of 1949. However, the history of the fraternity dates back to 1902, when the organization had its beginning at Ohio State, thus making it the oldest national professional fraternity in existence.

Many of the United States' most outstanding leaders in the field of ceramic education and engineering are members of Keramos, and the entire organization has as its goal the promotion of professional ethics and attitude among ceramic engineers.

The founding of the Institute of Ceramic Engineers was fostered by Keramos Fraternity, and although the Institute is now an affiliate of the American Ceramic Society, its purpose is the protection of the interests of professional ceramic engineers throughout the nation.

KERAMOS
PI TAU SIGMA, the honorary Mechanical Engineering fraternity, selects its membership from the outstanding juniors and seniors of each year. To be eligible for membership, a student must not only have high scholastic standing in his class but also fulfill requirements of character and leadership.
PHI PSI

PHI PSI is a national honorary textile fraternity which has as its aim the promotion of better feeling and closer relations between the textile students, and to strengthen the position of the textile industry. Election to membership is limited to a percentage of the junior and senior textile students.

PUBLICATIONS
The BLUE PRINT which is the official yearbook of Georgia Tech is published by the students during the latter part of the spring term. Sections of each yearly issue are devoted to classes, faculty and administration, athletics, fraternities, features, and campus organizations in an attempt to present a complete coverage as possible of the various activities which take place on the Tech campus during the school year. For many years the BLUE PRINT has ranked high in the field of collegiate yearbooks and is a publication of which Tech students are justly proud.
THE GEORGIA TECH ENGINEER

The GEORGIA TECH ENGINEER is a technical publication issued by the students of Georgia Tech eight times each year. It contains reports of research by Tech professors, and other scientific articles by students and faculty, as well as articles on social and economic problems which confront the engineer at work in society. Staff work includes writing, art, and business management.

GENE LORENZ........ Assistant Feature Editor
HENRY OAKLEY........ Collection Manager
GEORGE PUCA........ Assistant Collection Manager
PHIL KOETHMENZ Assistant Collection Manager
BRUCE SMITH........ Merchandising Manager
DICK WASSERSTEIN... News Editor
BILL WEILLER........ Circulation Manager
The TECHNIQUE is the semi-weekly newspaper of the Georgia Institute of Technology, published each Tuesday and Friday of the school year by the students of Georgia Tech. Its primary purpose is the publication of student news, including news of organizations, campus activities, sports, and other events of interest. Student opinion on current affairs is also expressed through the medium of an editorial page containing letters to the editor, opinion polls, and discussion articles.
The YELLOW JACKET is the Georgia Tech humor magazine. The main objective of the YELLOW JACKET is to serve as an outlet for creative writers, cartoonists, artists, and photographers on the campus. Articles of technical or even semi-technical nature are of no concern to this publication. The expected results of the YELLOW JACKET embrace all forms of enjoyment. The students who read the magazine do so for the pleasure that they receive, rather than for practical knowledge.
The Publications Board, made up of representatives from the student publications, is the governing body on policy and scope of coverage as pertains to each. The editors, business managers, and faculty advisors from the Technique, Yellow Jacket, Blue Print, The Swivet, and The Engineer are automatically members of the Board together with a representative from the Student Council and Pi Delta Epsilon.

ORGANIZATIONS
The Student Council, now in its twenty-ninth year, is the governing body of the Student Government of the Georgia Institute of Technology. Through its duly elected members it represents the student body in all matters affecting student interest, provides a medium of communication between the students and school authorities, and preserves the customs and traditions of the school. The members are elected by popular vote in the spring quarter of each school year, with the exception of the freshmen who are elected at the first of the fall quarter.

SAINT PATRICK'S COUNCIL was organized during the fall quarter of 1949 by Tau Beta Pi, a national honor society, whose purpose it is to coordinate the ideas and efforts of all the engineering divisions on the campus.

The membership of Saint Patrick’s Council consists of at least two representatives from each school of engineering, two each from the schools of Physics, Chemistry and Industrial Management, and two from the Department of Public Health.

The chief function of this council is to promote the interest in the Georgia Institute of Technology and the several honorary and professional societies within its academic school and departments. It also plans, develops, promotes and coordinates all of the several activities leading up to and included in the annual celebration of Engineers Week.
THE AMERICAN CERAMIC SOCIETY exists on the campus as a student branch. The organization was instituted during the year 1926. Among the many activities of the student branch are presentation of technical papers by students, talks by prominent ceramic engineers, and participation in social functions. Every effort is made to reach that combination of academic achievement and social development to give a well-rounded personality to students in the School of Ceramic Engineering.

AMERICAN CERAMIC SOCIETY
The student chapter of the American Association of Textile Chemists and Colorists is now functioning in the Textile Engineering Department. This organization sponsors speakers that are prominent in the field of Textile Engineering, motion pictures on various processes, and field trips to mills and other points of interest in the textile field.
