DEPARTMENTAL
SOCIETIES
The student chapter of the American Association of Textile Chemists and Colorists was originally formed on the Tech campus in 1935. The Association affords an opportunity for the student to become better acquainted with the chemistry and dyeing of textiles through the medium of motion pictures, field trips and speakers prominent in the textile field. Its purpose is to promote an increase in knowledge of the application of dyes and chemicals in the industry, to encourage research on chemical processes and materials of importance to the industry, and to establish channels through which the interchange of professional knowledge among members may be increased.
The American Ceramic Society was instituted on the campus in 1926 as a student branch of the National Organization. The activities of the Society include frequent talks by prominent engineers and businessmen in the ceramic industries, presentation of technical papers by the students, and participation in social functions. Thus the members are unified and led in the spirit of cooperation and fellowship toward a common goal of personal development and professional achievement.

The Georgia Tech Student Chapter of the American Chemical Society is affiliated with the national American Chemical Society. The national society was founded in 1876 while the idea of student affiliate chapters was adopted in 1937. The purpose of this organization is to afford the opportunity for the students of chemistry and chemical engineering to become better acquainted, to secure the intellectual stimulation that arises from professional association, to secure experience in preparing and presenting technical material before chemical audiences, to foster a professional spirit among the members, and to instill a professional pride in chemistry and chemical engineering.

The purpose of the student chapter of A. I. Ch. E. is to provide for professional development of students of chemical engineering. Realizing that the professional attitudes acquired as a student set the pattern for later life, A. I. Ch. E. endeavors to foster a professional spirit among the members and to instill a professional pride in chemical engineering. The student chapter recognizes scholastic achievement by making an annual scholarship award to the junior in the chapter who has attained the highest scholastic average during his first two years.
The American Institute of Electrical Engineers was founded in 1884, when the possibilities of an organization which would foster and encourage electrical development were beginning to be realized. The objects of the institute are the advancement of the theory and practice of electrical engineering, maintenance of a high professional standing among its members, and the development of the individual engineer. The institute has contributed largely toward the remarkable progress that has taken place in the electrical field since the latter part of the nineteenth century. All branches of electrical engineering are represented in the membership.

The Georgia Tech Chapter of A.I.E.E. was established in 1915, and is one of 127 student branches in leading technical institutions of the country. Activities to stimulate student interest here include lectures, demonstrations, movies, tours, and an annual delegation to the national convention to present technical papers written by Georgia Tech students.

The Georgia Tech Chapter of the American Society of Civil Engineers obtained its charter in 1924. All juniors and seniors in civil engineering are eligible for membership and are welcome at the meetings. The student chapter is active in obtaining movies, speakers, and field trips. At least one student-faculty social function is held each quarter.

AMERICAN SOCIETY OF

The Georgia Tech Student Branch of the American Society of Mechanical Engineers gives the mechanical engineering student the opportunity to develop a professional outlook. To its weekly meetings, prominent engineers are invited as speakers to discuss current advances in engineering and the place of the engineer in society.

The student branch conducts field trips and holds at least one social event each quarter. Membership in the society is the young mechanical engineer’s first step toward acquiring professional standing in the engineering community.

The Architectural Society, one of the largest and most powerful groups on the campus, is the spokesman for the students in the School of Architecture. It is widely recognized as an important factor in maintaining high standards in student design through the lectures it helps to sponsor and the recognition it bestows upon outstanding students.

This year the school was honored by the lectures of first Marcel Breuer of Harvard and finally the dean of American architecture, Frank Lloyd Wright. A festive occasion each year is the Beaux-Arts Ball, sponsored jointly by the society and its parent organization, the American Institute of Architects.

A student who joins the society has taken the first in a series of steps that lead to active membership in the American Institute Of Architects.

The American Institute of Industrial Engineers is a national organization for industrial engineers or professional men who are performing duties in the Industrial Engineering field. The aim of the Georgia Tech student chapter is to create, develop, and maintain a keen interest in the field of Industrial Engineering. To do this, an opportunity to further study the principles taught in class is given to the members by having qualified speakers, illustrative movies, and plant tours to different types of industry in the Atlanta area. The chapter represents the School of Industrial Engineering in various campus activities and functions, and prepares the I. E. exhibit for Engineer's Week.

The Institute of Radio Engineers was organized in 1912, to advance the art and science of radio communication and related fields, and to promote the professional welfare of engineers, engaged therein. The Georgia Tech student branch, formed in 1945, is chiefly interested in broadening the professional interest of its members. This is achieved through regular meetings to which prominent engineers in the communications and electronics fields are invited to speak.

Designed to encourage original thought, the National Institute of Aeronautical Science coordinates the different phases of aeronautics, including education, engineering, and production. By opening its rolls to aeronautical students, it affords the prospective engineer an opportunity to become acquainted with many aspects of the field outside the classroom.

SOCIETY FOR THE ADVANCEMENT
OF MANAGEMENT

The Georgia Tech chapter of the Society for the Advancement of Management seeks to forward the elimination of waste and the development of efficiency through the study and application of scientific principles and methods of management; to bring about a better understanding of the mutual interests of government, management, investors, labor, and the public in improved management; and to inspire in laborer, manager, and employer a constant adherence to the highest ethical conception of individual and collective social responsibility.

It is a student chapter of the national society which was formed in 1936 by the merging of the Taylor Society, organized in 1912, and the Society of Industrial Engineers, founded in 1917.

Activities of the club include plant tours, discussions led by outstanding men in the management and industrial engineering fields, and promotion of worthy departmental projects.

The Georgia Tech Student Chapter of the Armed Forces Chemical Association was founded on the Tech campus in the spring quarter of 1951. This chapter is the second student chapter of the A. F. C. A., a professional society with chapters all over the world. Since its membership is not limited to members of the Armed Forces, anyone interested in the Chemical Warfare phase of the National Defense Program may join. Chemical Warfare Defense includes defense against chemical, biological and atomic attack.

The foremost purpose of the Student chapter is to provide those interested with knowledge and contacts that will prove helpful to them in professional life.

The Society of American Military Engineers was organized in 1920 for the purpose of preserving and studying the experiences of the engineering profession in World War I. The purposes of the society are: to advance knowledge of the science of military engineering; promote efficiency in the military engineer; encourage, foster, and develop among military engineers and other arms of the military service a spirit of co-operation and mutual understanding of their respective duties, powers, and limitations; to hold meetings for the presentation and discussion of appropriate topics that should be helpful and of interest to the organization’s members.

There are eighty-five posts throughout the country in larger cities and colleges. The Georgia Tech Student Post was chartered in 1942, and is composed of Army, Navy, and Air Force R.O.T.C. cadets.
Kappa Kappa Psi is the national honorary fraternity for band members. Although membership in Kappa Kappa Psi is restricted to men, there is a sorority, Tau Beta Sigma, which acts as a sister organization.

Both Kappa Kappa Psi and Tau Beta Sigma were founded on the campus of Oklahoma A. & M. College, and now have chapters all over the country.

Iota chapter, at Georgia Tech, was founded in the early nineteen-twenties, and has continued active ever since. Membership is based primarily on musical ability, although leadership and band activity play a large part in the selection of members. The chapter sponsors an annual banquet for members, their wives and dates, as well as an occasional wiener roast or barn dance. The A. J. Garing award is presented annually by Iota chapter to the outstanding graduating senior in the Tech band.

COUNCILS and CLUBS
The Student Council, which was first established in 1922, is the student government organization. It serves as the principal liaison agent between the student body and the school authorities and is the authoritative voice of the students. The Student Council controls the use of student activity fees and handles all financial matters involving the general student body. The council is also in charge of all elections of class officers and Student Council representatives. The members are elected by popular vote in the spring quarter of each year, with the exception of the freshmen who are elected at the first of the fall quarter.

The newly formed Activities Council strives to acquaint all Tech students with the various organizations on the campus. Each fall the council presents the annual Activities Fair, where students have an excellent chance to learn of the projects and work of many different activities. Each organization has a member who serves as Councilman and prepares the project for his activity to be presented at the fair. The success of the Activities Council this year clearly shows that the Activity Fair will be a mainstay at Tech for many years to come.

ACTIVITIES COUNCIL
The St. Patrick's Council was formed in the early part of 1950 to promote the interest of the Georgia Institute of Technology and the several honorary and professional societies within its academic schools, departments and divisions. Its primary undertaking at the present time is to promote, plan, develop, and coordinate all of the several activities leading up to and including the Engineers' Week celebrations, to the end that such societies shall be encouraged to compete in their contributions to the professional developments of management, engineering, and science students.

Members are elected by the active honorary and professional societies in their respective fields.

Alpha Phi Omega is a national service fraternity organized on the principles of the Boy Scout Oath and Laws. Among its many activities, the Gamma Zeta Chapter at Tech sponsors the “Ugliest Man On Campus” contest, operates the Student Book Exchange, and supervises the voting polls during student elections. APO is striving to fulfill its purpose of assembling college men in the fellowship of the Boy Scout Oath and Laws, developing friendship, and promoting service to the student body and to the community.

The Georgia Tech Camera Club was organized for the benefit and instruction of the many amateur photographers in the student body. The club maintains an adequately equipped darkroom which is available to all members.

The activities of the club include instructive lectures by well known photographers, Visual-Aid movies, planned model nights, field trips, and two salons each quarter. One of the interesting highlights of last year was a visit to the Academy of Charm during which many glamorous professional models posed for the cameras of the members.

Members receive the best possible instruction in the quarterly salons. At this time well known Atlanta photographers judge and criticize the prints and color transparencies submitted.

Members of the Bulldog Club are selected by their fraternities or ISO Units because of their active participation in these organizations and their interest in intramural sports. The colorful initiation of Bullpups in the fall and spring of each year is a campus tradition.

The club aids the Athletic Association in organizing and directing all intramural sports contests. Other annual projects of the club include the sponsoring of Homecoming decorations contest, the Homecoming dance, and the Freshman Cake Race.

The Co-op Club was organized in 1915 by a group of outstanding co-op students for the purpose of promoting interest in co-op activities and fostering a spirit of fellowship among students in the Co-operative Department. This club is one of the oldest social organizations on the campus. Members of the Co-op Club are selected from upperclassmen of the Co-operative Department who are outstanding in leadership and character, and who have manifested an interest in co-op activities.

The Co-op Club is divided into two sections, each representing the separate sections of the Co-operative Department. Section I is active during the winter and summer quarters, and Section II is active during the fall and spring quarters. Although the two groups are entirely separate, co-operative spirit is their primary purpose and close harmony is maintained to achieve this.

Members of both sections of the Co-op Club are heavy competitors in scholastic and extra-curricular activities. This competition has led co-op students to attain higher levels of scholastic nature. Both of these units rank high on the campus as social and scholastic groups.

DEBATING SOCIETY
The Circle K Club was organized on the Tech campus in 1950 by its parent organization, the Northside Kiwanis Club of Atlanta. Membership being based on leadership, service, and character, the group has endeavored to promote various worthwhile activities.

Being a member of a rapidly expanding organization, sponsored by Kiwanis International, Tech was the sixteenth club organized. To date the Tech club has helped organize clubs at Emory University and St. Louis.

Although it is one of the newest organizations on the campus, Circle K shows signs of becoming one of the most active and progressive organizations on the campus.

DramaTech was founded in late 1946 to stimulate student interest in dramatics and to give potential engineers a chance to develop their acting abilities. This year academic credit for DramaTech work was inaugurated through the English Department. The main activity of the club consisted of again producing three plays during the school term. One of these plays, "The Live Wire," was presented in benefit performances at Fort McPherson and Lawson General Veterans Hospital. The club is under the very capable guidance of a professional director, Mary Nell Ivey.

The Georgia Tech Glee Club, under the able direction of Mr. Walter C. Herbert, is one of the fastest growing organizations on the campus. Its membership has reached a total of thirty-seven men.

Recent highlights of the club are its European tour under the auspices of the Special Services branch of the Army which included Berlin, Vienna, and many other cities of Germany and Austria. The Glee Club made a most enjoyable trip to Miami where they participated in the Orange Bowl festivities the week before the game.

The Glee Club in conjunction with Music 201, 202, and 203 is a real stride toward rounding out the education of many students, and it furnishes a pleasant diversion from the more technical subjects offered at Georgia Tech.

The Tech Marketing Club is the branch of the American Marketing Association. The purpose of the club is to promote friendly relations between students and faculty so as to develop sound thinking in marketing theory. Lectures by prominent men are sponsored by the club to foster scientific study and research, to encourage and uphold honest practices, and to keep marketing work on a high ethical plane.

MANAGEMENT CLUB
The International Relations Club, founded in 1938, serves as a meeting
place for students who are interested in keeping abreast of conditions,
developments, and trends of international affairs. The meetings are
highlighted by speeches either by foreign students from the campus,
by members of the faculty, or by notables who have participated in
the shaping of our foreign policy. The club sponsors speakers on ques-
tions of immediate interest and importance, thus keeping in step with
the ever-changing foreign scene.

The Georgia Tech Radio Club is primarily an organization of enthusiasts of amateur radio. Its primary aim is to promote the general welfare of its members and to maintain an active interest in communication by amateur radio. To fulfill that aim, the club owns high-powered transmitters which cover all the active "ham" bands. This equipment is in the club "shack," which is located in back of the Civil Engineering Building.

A second purpose of the club is to provide instruction in the principles of amateur radio for aspirant "hams," to enable them to qualify for the required government license. Code practice machines, lectures, and training films accomplish this purpose.

The final goal of the club is to provide a common meeting place for those interested in radio, so that they may become acquainted with each other, exchange technical information, and become members of a radio brotherhood at Georgia Tech.
The Ramblin' Reck Club is an organization whose purpose is to create and magnify school spirit. Members are chosen from among sophomores, juniors and seniors; the number is kept small to insure maximum efficiency. At the beginning of each school year, the Recks give instructions to the new freshmen on the duties of a "rat," and also sponsor each fall a Ramblin' Reck Contest between the different organizations on the campus. Also in the spring the club sponsors the highly successful "Stunt Night" program.

RAMBLIN' RECK CLUB
The Georgia Tech T-Club has been organized for many years to recognize the letter winners in the major sports at Georgia Tech. The members are made up of anyone who letters in one of these major sports: football, basketball, baseball, or track. The functions of the T-Club consist mainly of honoring new letter winners, assisting with the promotion of school spirit, and carrying on certain school functions during the athletic year.

The White and Gold Club directs and organizes the flashcard section at Georgia Tech to further school spirit and to stimulate interest at all Tech football games played at home. This year marked the third straight year that the flashcard section has operated at Tech. Each year the flashcard section has increased in popularity, not only with the public, but also with the student body. With cooperation from the students, the flashcard section will continue to be a colorful mainstay in the coming Tech football games.

The Baptist Student Union first became recognized as a Georgia Tech campus organization in 1925. Guided in its program by an executive council, the B. S. U. seeks primarily to link the Baptist students at Tech with one of the local Baptist churches. B. S. U. membership is contingent upon the student becoming a member of one of the local churches, or a member of a Sunday School class or Training Union in one of the local churches.

The B. S. U. engages in a number of activities on and off the campus designed to help the student live a well-rounded life during his college days.

Mr. E. Warren Woolf, a Tech graduate, became the first full-time director for the Georgia Tech B. S. U. in 1950. His office and B. S. U. headquarters are in the Y. M. C. A.

As a club of Catholic culture and Catholic fellowship, the Newman Club is organized in order to deepen the spiritual and enrich the temporal lives of its members through a balanced program of religious, intellectual, and social activities; to weld the Catholic students in a common union; and to assist the college and its students whenever possible.

The Georgia Tech chapter of the National Newman Club Federation was established in 1928. Since that time, under the spiritual guidance and assistance of its chaplains, the club has been cited as the campus organization which most nearly achieved its purpose.

In addition to its weekly meetings, activities include corporate communions, spiritual retreats, lectures, parties, dances, picnics and outstanding participation in the intramural sports program.

Father Thomas Dubay, our Chaplain.

Every Tuesday night at the house.
The Wesley Foundation is the Methodist Church at work on the college campus. As a part of the national Methodist Student Movement, it seeks to provide for the spiritual, moral, and social needs of the students.

It is the purpose of the Wesley Foundation to provide a program that creates a greater personal relationship with God, and continues to strengthen those ties with the church made in youth, which assure full Christian maturity.

The Wesley Foundation on the Tech campus was founded under the ministry of Dr. Lester Rumble, who was then pastor of The St. Mark Church, in 1938. The first full-time director was Reverend Ernest P. Kendall, who was succeeded by the present director, Reverend B. C. Speers, Jr.

The purpose of the Y. M. C. A. is to develop Christian personality and a Christian Society. It seeks to achieve this purpose through group program activities and services such as Phalanx Clubs, a Films Council, Marriage, Seminars, Open House Committee, Bible Study, Y.M.C.A. World Service, Camp Conferences, Deputations, Freshman Orientation Camp, and the "T" Book.

Every student is eligible for membership in these groups, and from these groups the Y. M. C. A. Cabinet is elected.
