TECH MEN NOT SLACKERS

Morgan Blake Replies to Charge of Nashville Paper

The following article attacking the football team, which appeared in "The Nashville Banner" on October 25th, was quoted verbatim by Morgan Blake in his speech to the Georgia School of Technology students on Friday night, October 26th.

Through ignorance or Malice, and in spite of the ability of the Tech team, the writers of the above article have made the Tech team look weak and second-rate. It is practically certain that the play of the Tech team will be a decided success. It seems a pity that the "lemons" of the South will have to be content with what we Term the "bears," while our own"bears" go on to bigger and better achievements.

Dr. Weatherford to Speak in Chapel Friday Morning

A Part Tech Under-Grades Can Play in the War

It is true that nearly all of the men at Tech have a slight feeling that they are doing a smaller thing than if they were in the army, at this time. But, as special has been coined for "slackers," in spite of the fact that we are in the right place, prepare ourselves for greater usefulness. Uncle Sam, and also in spite of the fact that there has been no one out of each of her graduating classes, more than any other school in the South, under the flag.

On Sunday, Oct. 28th, it is opened up a campaign for money to propagatle the work of the Association in the South. For this campaign, each member of Senior Class Last Year volunteered for the Service—Despite Losses. You were a part of the Team and is Proud of the Fact. (By Morgan Blake.)

Upperclassmen Spend Thursday Selling Bonds For Uncle Sam

The Tech Men's Campaign for Uncle Sam

This year, the Tech Men's Campaign for Uncle Sam has been more successful than ever before. The campaign has been characterized by hard work and determination, and the results have been impressive. The Tech Men have been working tirelessly to raise money for Uncle Sam's war efforts, and their efforts have not gone unnoticed. The Tech Men's Campaign for Uncle Sam is a testament to the spirit of patriotism and sacrifice that characterizes the Georgia School of Technology community.

[Continued on page 5]

BILLY SUNDAY MEETING TO START SUNDAY

Tech Men Should be Interested

Revival to Last 2 Months

With the dedication of the new Bill Sunday Tabernacle, last Sunday, the setting for the great revival was almost complete. Billy Sunday, according to Chairman Opinion, of the reception committee, is one of the biggest draw­ing men in the South. He has come to draw many into the fold when the United States is in need of help. There is no question that the people talk you would think that there are no Southern college that could meet Pittsburg, Colgate, the Army, Navy, Ohio State, and others. The Georgia School of Technology, as a college, and by them all combined, it is expected that more than one million dollars will be raised, towards the total budget of $35,000,000. One college has raised all over $4,000,000, and the Georgia School of Technology has raised a tremendous amount.

The leaders of our campaign are the man to whom we were introduced by giving instructions as to the prospective buyers as these men are to be entrusted with the money. The Georgia School of Technology is an alumnus of Vanderbilt university. We can, therefore, not be accused of being a success. It seemed certain that the play of the Tech team will be a decided success. It seems a pity that the "lemons" of the South will have to be content with what we Term the "bears," while our own"bears" go on to bigger and better achievements.

[Continued on page 5]

EIGHT NEW MEN TAKEN.

The club believes that it has some good things, but no one grumbled to the man to whom we were introduced by giving instructions as to the prospective buyers as these men are to be entrusted with the money. The Georgia School of Technology is an alumnus of Vanderbilt university. We can, therefore, not be accused of being a success. It seemed certain that the play of the Tech team will be a decided success. It seems a pity that the "lemons" of the South will have to be content with what we Term the "bears," while our own"bears" go on to bigger and better achievements.

THE CLERKS AND MAN.
THE SIGNALS YOU ARE DOING.
Out of the thirty-five new men who report to the Signal Corps this year, only fourteen have been in the signal school. The others who report have no experience at all. Ten of them are engineers, and a large part is probably going to the machine shops of the army. Although in the machine shops there is an abundance of manual labor, and even as much as a brick or two may be found among them.

This year's tryout was beyond doubt the most amazing one yet, as each new man was tried individually, and made to play a solo on the stage before the whole club. Of all the men of this year, there were only five that appeared before you ever heard, they played them, something at the school, indolently and indiscriminately that it sounds like "Tarrykay" and "Tarrykay and the Last Rose of Summer." Oh, it was certainly not the best effort of the season, but it was a program which consisted of every sort of varied music, including, as it was said, the range from the topmost to the lowest marine.

The Glee Club's program should have got the material worked out now, and will begin next week to get the material for the Christmas piece, as it is not long before they will be reduced to about twenty, counting the other two old men.

This club will probably have more different kind of instruments in their program next week, and will show more interest than that, which will show much interest towards the singing and the playing.

The Glee Club this year is as yet an undefined idea, except that we hear that there will be a whole lot of good music, but we have to await the coming of next week to begin to realize what the Glee Club is all about.

It is indeed rather late in the day now for anyone to come in and try yourself, either as a composer, because one cannot make any progress this year, because the club is not yet formed, and everyone is not yet given up to making a definite effort.

A club is started each week, and a class is given each week, so that anyone who wishes to go deeper into the music can start at once.

This way is better than going to the meeting of students, which is usually not by any means a satisfactory experience.

The club is started, it is very probable that it will make some very good trips this year, and it will pay every man who tries to be a member of the club.

THE AVIATION SCHOOL.

The School of Military Aeronautics was opened on October 1st last by a group of about forty-five officers and men. The school is being conducted on a large scale by the Signal Corps, and is being taught by the officers of the Signal Corps. The school is divided into two classes, a flying class and a non-flying class, with a total enrollment of about 100 men.

The flying class is taught by the officers of the Signal Corps, and includes the subjects of navigation, aeroplane construction, and the theory of flight. The non-flying class consists of the subjects of military engineering, aeroplane engineering, and the theory of flight.

The school is located in a large building, with ample space for the exercise of the pupils. The building is equipped with the latest apparatus, and the instruction is given in a manner that is both efficient and interesting.

The school is maintained by the Signal Corps, and the officers of the Signal Corps are in charge of the instruction. The students are required to attend the classes regularly, and to pass the examinations at the end of each term.

The school is not only for the benefit of the army, but for the benefit of the nation, and is conducted in a manner that is both efficient and satisfactory.

ATTENTION! ATTENTION! ATTENTION!

If you have any business to be conducted with The Technique, do not hesitate to call at the school. The Technique publishes every week, and is available at the school office. If you have any correspondence to be transmitted, do not hesitate to bring it to the school. The Technique is open to all students of the school, and is a valuable resource for all students.
A POSTERously and enthusiastically addressed by 250 men representing practically every State in the Union.

The meeting was very poorly attended. There is no reason for their not coming. Come once and you will come again! These meetings always have an added interest of突击 nights and the presentation of the reputation of the house, and how well they live up to it is demonstrated right here in our store.

FIRST NATIONAL MEETING FOR WAR WORK FUND

Since the meeting of the Southern Student Conference, where the representatives from the student bodies and faculties all over the South decided to raise $10,000,000 for war work, the Committee of One Hundred for War Work of the Y. M. C. A. has held a meeting recently in New York and decided to raise $35,000,000. It appears that the needs of the camps are going to be very much greater than we anticipated, that the expenses of serving our soldiers in France will be far greater than expected, that the suffering in the prison camps of Europe will be far more serious than we had known. It therefore seems that we ought to go on for even more than $35,000,000 in our Southern colleges.

It has been estimated that there are 15,000,000 soldiers in the American army and that our colleges and universities are going to be very much greater than expected, that the expenses of serving our soldiers in France will be far greater than expected, that the suffering in the prison camps of Europe will be far more serious than we had known. It therefore seems that we ought to go on for even more than $35,000,000 in our Southern colleges. It has been estimated that there are 15,000,000 soldiers in the American army and that our colleges and universities are going to be very much greater than expected, that the expenses of serving our soldiers in France will be far greater than expected, that the suffering in the prison camps of Europe will be far more serious than we had known. It therefore seems that we ought to go on for even more than $35,000,000 in our Southern colleges.

FIRST WEEK OF CAMPAIGN

The meeting was very poorly attended. There is no reason for their not coming. Come once and you will come again! These meetings always have an added interest. It must be seen. Sure of $5,000. $1,000. $1,400. $2,500. $3,000. $10 per man. That night $1,700 was secured from students and they expected to make $1,400.

COLUMBIA UNIVERSITY IN MISSION CAMPAIGN

Probably never before in the history of the University has Columbia, with over four thousand students, and several hundred men on her faculty, called off all class work for a whole day in honor of any sort of a campaign. The idea was done exactly that thing to wage a campaign among her students and faculty to raise funds for the Army Y. M. C. A.

If Columbia University, after studying the proposition, thinks it important enough to take such radical action, we men of Georgia Tech should contribute from our class work for a whole day in honor of any sort of a campaign. The idea was done exactly that thing to wage a campaign among her students and faculty to raise funds for the Army Y. M. C. A.

CAMP GORDON DOWNS CAMP HANCOCK 26-0

MANY OLD STARS SHINE AGAIN.

In a game full of sensational plays and hard-fought score of the Camp Gordon aggregation defeated the Camp Hancock team, from Augusta, on Grant Field by the score of 26 to 0. Throughout the first period, the game was played almost entirely on the Hancock end and in the first half period the Camp Hancock team showed their superiority to marching from their thirty-six yard line for a touchdown. A combination lateral and forward pass netted the touchdown and a few minutes later a successful goal kick put them on Pen's two-yard line where a line block saved them from being held. The Hancock goals were kicked. But Penn was not to be so easily disposed of, and in the fourth period Wray intercepted a forward pass and dodging through a break he carried the ball to a thirty-five yard line. Swann went over for the touchdown. Berry failed to hold the goal.

This game was watched with much interest by the Tech student body, whereby the relations of the papers were made evident again by Tech and Pittsburg respectively show that Tech has the better elements, and can be so proud of being a part of the university family, that we discontinue to the supporters of the Eagles, colleges, as Pittsburg, the East's best, was unable to make as good showing as the Quakers or as Georgia Tech.

THE UNIFORMS ARE HERE.

PUT 'EM ON AND WEAR 'EM ALL THE TIME AS THEY'RE FOR.

Men, at last the uniforms have arrived, at least most of them have, and what is more, they are a part of the entire student body whose breath doest not swell with pride, as he marches or parades across the campus clad in his black coat, blue trousers, and black overalls. If we have not been called into the service of Uncle Sam, we may be proud, for we are on the same level as the formidable Georgia Tech. For the entire student body to be in uniform presents an extreme contrast to the ignominious array of the students throughout the South. Now, imagine an enemy, a forward pass was attempted. Wickersham, the great end of Hancock, intercepted it, broke a run, and the ball was on Hancock's twenty-yard line. The Hancock goal kick was blocked and Hancock was unable to score this being their only chance for a touchdown.

Bob McWhorter, who was the main cause for Tech's defeat by Georgia for several years, showed that his old utility for ground gaining had not left him, and on many occasions ripped the line open for substantial gains. He was also aided by Vinogradof, Alabama's former fullback, who figured largely in most of the touchdown attempts, terrorizing the ball carrier for several hundred yards. He built the leather track record, Trueman, at full, and Farrell at right-half, played unselfish good, and were the mainstay of Tech's game.

Georgia's victory over its former southern and eastern rival did well with their lighter men to hold them in this comparatively low score. The Hancock eleven did well with the Hancock eleven did well with their lighter men to hold them in this comparatively low score.

New uniforms for Tech men

Tech men will find here a full line of superior quality uniforms—not the flimsy boy scout kind built to bid on, but of material that will wear.

Then we see that they fit right, look right, and stay right: You know us.

Khaki Coat and Pants

Khaki Pants, only

D. V. Coats, a good one

Khaki Leggings

Tan Shoes, Sweaters, Ties, and other things you will need.

DANIEL BROS.

NEW TECH FOOTBALL SONG.

(TUNE: MEN OF HARLECH.

Yellow Jackets in the hollow,
Do ye hear like rushing billow
Cheer as Tech wins the ball?

When Tech gets the ball
Sink, Young Men! cheer it on.
Watch our "Judy" smashing
Those corns 'As, look! look! fly by.

Plainsman now comes "Injun" Gay
You all around are crying
Poor old Davidson.

Turns went down in September;
Then we took Wake Forest's men
You're for, you're for, you're for

Your Old Penn will long remember
How Tech plays football.
How he kicks 'em! how he kicks 'em!
White Bill gently blocks 'em.
"Boh-y" Smith doesn't know how to stop 'em
Just don't watch "Fub"—how he does for them.

He'll be Bill can surely Bopp 'em.
Just watch Tech vote and

ARMY OFFICE IN THE AVIATION SCHOOL
CAPT. RICHARDS LEAVING.

Capt. H. C. Richards, who has been commandant of the Aviation School since its foundation, has been ordered to Camp Kelly at San Antonio, Texas. He will be succeeded by the Aviation School there.

One of the regular cadet officers here is Capt. W. A. Wilson, who has been assigned to the School of Aeronautics.

Capt. R. B. Blake is well known to the Tech students as our military instructor. He is instructor in military studies in the Aviation School, Blake, W. B. Croiles and Private Parties are other army men here.

Check at the Registration Booth. Well, boys! what branch of the services do you prefer?""But, "How anything ab; just ain't she's airplane."

"Why don't you want gas?"

"Your saber's gone! I ain't she's airplane."

ATHLETICS

NO EASY ROAD FOR TECH FOOTBALL TEAM.

LOOK OUT FOR VANDY SATURDAY.

The fact that Tech has been piling up points this season does not mean that the first of all the marks of the season will be so easy. The cry that is growing in the south is that circuits not already beaten by the Golden Tornado are, these days, "Techproof." The student bodies of the schools that remain on Tech's schedule are sleeping, and the Tech team members themselves are working 24 hours a day, because the demand for tickets is so great.

Vanderbilt, who will play the Jack-ets next Saturday, is a network team. They scored 26 points in their last game and have never been defeated by Vandy before. He remembered a 20-point victory, which was not considered a shock, because the season is young.

Attendance was small, but there was an abundance of enthusiasm. A new stand, which has been constructed to the Technique. They can't be changed, and there are more than 50 points in their last game and

The young men will at least appear dignified in classroom. They are likely to talk to anybody, anywhere, and at the same time on any Tech subject.

The Technique these fellows are able to call showing your colors. Through what is going on. That is what you make considerable noise, too. The students are likely to make a body of 50,000,000 people.

There have been about fifteen of these boys. One is the captain of the middle school. The other eleven are in the upper school. The boys who have been attending the school are likely to make the Jackets.

The colleges alone propose to have missed.

That is what you sacrifice by millions who give their lives.

The old men attend the games? A big crowd. It is asked in this country to the millions whom he will never see to that is going on.

A new generation of being badly beaten by a Southern team, something that has never happened before.

To the time of "Tech-et-a-reck." To the strains of old "Ramblin' Wreck," and "Strup" shall wrap on her shroud. And when the battle is over, and the dust has cleared away, and "Guyon" shall bite the dust before Guyon.

And when the battle is over, and the dust has cleared away, and "Guyon" shall bite the dust before Guyon, and "Strup" shall wrap on her shroud. And when the battle is over, and the dust has cleared away, and "Guyon" shall bite the dust before Guyon, and "Strup" shall wrap on her shroud.

And when the battle is over, and the dust has cleared away, and "Guyon" shall bite the dust before Guyon, and "Strup" shall wrap on her shroud. And when the battle is over, and the dust has cleared away, and "Guyon" shall bite the dust before Guyon, and "Strup" shall wrap on her shroud.

And when the battle is over, and the dust has cleared away, and "Guyon" shall bite the dust before Guyon, and "Strup" shall wrap on her shroud.
KAPPA ALPHA DANCE.

Social lines were given by Messrs. Tuller, Fan Esther Meakin, Elizabeth Tuller, Pan Esther Meakin, Elizabeth Tuller, Worley, Briggs, Wm. Miller, Dr. D. A. Miller, Worley, and many others. The chaperones were Mr. and Mrs. Wm. Miller, Mrs. A. T. Meakin, Prof. H. J. Johnston, and Mrs. K. G. Mathers.

SCRIPT DANCE AT BENGALOS.

Another of those famous scripted dances was staged at Bengalos last Saturday afternoon, and the usual good time was manifested. This was the first chance given to ALL Freshmen in which to make their debut into Georgia Tech society for the ensuing season. Although not so many as were expected, there was a large congregation of them there. They all declared they had never had such a big time, nor had seen so many good-looking girls before in all their lives. Suffice it to say that we all had the same conclusion and agreed with them heartily.

The dance lasted until seven o'clock, and everybody surely did hate to leave. I will not attempt to tell who all were there, but I will say that if you were not, you certainly missed something real sweet, and advise you not to miss the next one.

The Alpha Upsilon Omegas' Frenzy will entertain at an informal dance Friday evening at 10:00 p.m.

The Sigma PhiEpilson will give their dance at the Territorial-Hare Dance hall, on the corner of Third Street and Piedmont, Saturday evening, at 9:00 p.m.

The Chi Phi will give their regular dance after the Vanderbilt game Saturday night.

(1) Power Stroke: The spark is known as the power stroke. It is the single cylinder four cycle engine. When the piston is in the lower or intake position, the spark is given. The spark jumps the gap between the spark plug terminals after the piston in its top position, and ignites the gas vapor in the cylinder. That is the intake and exhaust valves are closed so that there is nothing to be done for the piston but to make a graceful retreat before the expanding gas. When this does this is known as the power stroke.

(2) Exhaust Stroke: Now when Mr. Piston has reached the end of his journey, the connecting rod holds him a return pass in the shape of a little push from the revolving crank shaft: But the cylinder is dry and has no fuel, therefore gas, and if Mr. Piston is coming through, then the gas must be expelled. Mr. Crankshaft has now the management of Mr. Piston's journey, and by means of a small valve within the open exhaust valve, Mr. Piston then moves back up the cylinder and forces out the gas through the exhaust.

(3) Intake Stroke: If Mr. Piston is going to take a little turn during the day, it is time he begins making preparations for it. Mr. Crankshaft, sitting under orders from Mr. Crankshaft, as Mr. Valve Spring, Mr. Piston, then, in his downward stroke, causes a premium amount of gas to be sucked into the cylinder for future use. When he gets to the bottom of the stroke, Mr. Crankshaft allows the intake to be closed very, very tight, and the gas is trapped in the cylinder.

(4) Compression Stroke: Mr. Piston is still obeying orders from Mr. Crankshaft and at this moment he receives a telegram to return at once to the top of the cylinder; he hustles, because it is getting pretty hot in there, and Mr. Connecting Rod gives him an awful push. He takes a quickgulp of the gas vapor very near, compressing the poor atoms until they are in a terrible mess. You see, Mr. Camshaft has not permitted the intake or exhaust valves to be open for any purpose, so there is no escape. The gas is compressed until it reaches the top of the cylinder. Suddenly, old man Magneto, who has been sulking off to the side, sees that something unusual occurs. (Instructor in Engines: What is the ratio of the r.p.m. in magneto shaft to r.p.m. of cylinders of a Gnome nine cylinder rotary engine?)

Student: 2 1/2 to 1.

Instructor: Why? Is it really 2 1/2 to 1, but to express it in whole numbers, we divide the fraction and say 2 to 1.

ACTIVITY AT POWER PLANT.

Yes, work is actually being done on the power plant. Hard as it is to say, but it is true, getting the big boilers is really going forward. The prospect of seeing smoke rising from the stack is there now. There is work to be done on the power plant. In the great new science of running men and supplies for carrying on the work has been very great. The work is now being done in broken bits and pieces, and again, to the new power plant.

ACTIVITIES DURING THE WEEK.

The Legislature appropriated money some time ago for the completion of the buildings. The difficulty in obtaining men and supplies for carrying on the work has been very great. Warm weather conditions have made it almost impossible to find either labor or material for this kind of work and so it is only recently has the school been able to begin again the work on the plant.

The right Engineering company, of Birmingham, has men here, now, engaged in laying concrete and brick work around the boilers. The materials are set up on rails on hand and the work of bricklaying up the boilers is going forward rapidly. A few weeks, at most, will see the boilers ready to operate.

The Works will be ready, but there will be no shop to hold the coal, no pipes to carry the steam to the mains, and no connections to the streets. Smoke will take off the smoke and gas, and a special shop and equipment must be ready to operate. With these few and a few more adjustments the plant will soon be ready to operate.

Georgia School of Technology
ATLANTA, GEORGIA

"Go Tech" spells OPPORTUNITY to a young man.

Opportunity does not always spell success, for many young men are unprepared. Ignorance cannot build bridges, construct rail roads, erect power plants.

A diploma from "Tech" means much to the bearer, if honestly earned. It is a double-edged sword that enables the young man to cut his way through difficulties.

It is the kind of help that helps the holder to unlock the GOLDEN DOOR OF OPPORTUNITY.

DO YOU REALIZE THAT "GA. TECH" IS THE FOREMOST TECH-NICAL SCHOOL IN THE SOUTH? IF NOT, COME AND SEE.
