We do not want to "run" too much interfered with by the activities of the football team, but there is a certain limit to this policy and we have a right to feel just a little bit cheerful over the showing of that team. We can not afford to lug very much over a foot ball victory, but we can surely be pardoned for liking to hear about those victories. And so with our coach and our team. In this case these "good words" have been spoken by people who, we would have thought from past evidence, never had heard of football. It is a new experience for them. Such comment as this makes a Tech fan feel warm, and shows how it makes you feel.

The Tech Marionettes, Pennsylvania, paper, says this, in part: "Penn's one-sided defeat at the hands of Georgia Tech furnished the biggest upset in collegiate football in the past three years. There was an abundance of other surprises in years was not entirely unexpected, as the biggest upset in collegiate football in the country. A few of them might be of the Georgia Tech, champions of the South land, the biggest upset on the gridiron, and the down- treading of Pennsylvania Tech by the Mason and Dixon line for all practical purposes.

The New York Times headed their article, "Georgia Tech, a Newcomer to the South, beats the Mason and Dixon line for all practical purposes."

Part of their article follows: "Strupper, Gwyn and Hill amassed through the line at the first-name reading off a T-ray lists in the first few minutes of play, for the first touchdown of the game. These succeeded in the first instance of the Yellow Jacket attack and they performed their duties nobly. "Herry, Dell, Miller and the other highly-touted Penn stars were stopped by the Tech, and put to a very few minutes of play, and it was just a question of the size of the more. The fact that Penn held the Yellow Jackets somewhat in check in Saturday's game is more due to Tech resisting than to any deficiencies on the part of the team." The big thrill of the game came in the last five minutes of the first half, when Strupper shook off the Penn tacklers and dashed clear for a touchdown.

The huge crowd, most of whom at Tech partisans, went wild with delight at the showing of the Jackets continued their smashings attacks and drew Penn in continuous retreat down the field.

The fans in the South have heard so much of Berry that they ex-
tures are to be planned to committees, and a good time is in store for the students.

DAVIDSON DOWNED WITH DIFFICULTY

Put Up Pluck, Fight But Lose by Score of 32 to 10

Saturday afternoon on Great Field the fast, light Davidson eleven held as the second half of the game opened and the two teams in on the field for the first time of the season. Tech was not on top as the players saw the scores of 16 to 7 against Davidson, but the Tech men were ready for any attack that would come their way. The men on the Tech eleven were in good condition and ready for the game. The Tech eleven was composed of the following players: G. Flowers, 1. h; Strupper, 1. h; Astle, 1. e; Darrow, 1. e; Carpenter, r. e; Richardson, r. e; Burns, f. b; Harlan, f. b; G. Flowers, f. b; W. W. Crouch, c; Fincher, c; King, 1. e; Guill, 1. e; Woods, 1. g; Huggins, 1. g; Thweatt, 1. g; and very few gains were made in the first half.

The Davidson eleven was composed of the following players: J. T. Flagg, 1. h; Williams, 1. h; Shaw, t.; Wheeler, t.; Whidden, t.; Gray, t.; Langston, t.; W. W. Crouch, t.; Flacher, t.; McMaster, r.; Rogers, r. e; Ellington, r. e; Richardson, r. e; Carpenter, r. e; Mikkelsen, c; Bill, c; G. Flowers, c; Trupper, t.; Bill, t.; and Burns, f. b; Harlan, f. b; G. Flowers, f. b; W. W. Crouch, c; Fincher, c; King, 1. e; Guill, 1. e; Woods, 1. g; Huggins, 1. g; and very few gains were made in the first half.

NEW STAND NEEDED FOR GRANT FIELD.

Present stand inadequate.

One of the biggest problems now facing the Athletic Association is the handling of the huge crowds that come to the football games. An examination of the inadequate seating capacity was painfully evident at the Pennsylvania game, several thousand of the spectators having to stand through the entire game on the ground in sight of the team goals. The playing field was almost filled to capacity.

ACHIEVEMENT

It has set the spur to research, as in expression of life, as in science and art.

It has set free the spirit of research. It has given tangible form to invention, as expression of life, as in science and art.

PI KAPPA ALPHA DANCE. Last Friday night the Pi Kappa Alpha entertainers united the college set with an informal dance at their chapter house on Williams street. The whole lower floor was thrown open, forming a most unique dancing pavilion and a profusion of flowers so that your foot seemed to hit the right spot every time. The music was most capricious, and everything was just right to make everybody have a good time, and from what was expected at the gauntlets were departing a time that could not be surpassed was had.

The following young ladies were present: Misses Nellie Dodd, Georgia Bliss, Hallie Pool, Madeleine Bellinger; Hallie Crawford, Julia Adams, Bubba Shade, Rollin Hopkins, Francis Wynkoop, Annie Kate Adams, Caroline Shivers, Leto McIntyre, Charlotte Meadors, Nora Stilling, Catherine Hook, Grace Goldsmith, Compton Lene, Charlotte Wilkes, Sarah Schoen, Corinne Johnson, Mazarie Shaver, Elizabeth Reid, Caroline Shivers, Misses Meadors, Elizabeth Mather College and every one.

The members of The Gene Turner Little Bible Class plan to apply to have one of their own in the big Sophomore-Freshman feed to take place and invitations will be issued at an early date. This is always a big event and serves to bring the Freshman into closer contact with the upper classes.

LOCALS

The Sophomore news a patch of green.
'Thought it was the Freshman class
But, after all, it was they who knew it best.
'They found it was a looking class.

REGISTRATION SMALL.
"As was expected, Tech opened this year with a rather small registration.
The list of 844 students as compared with 1,015 last year.
This year, however, there are 44 men on its roll as the only class which
Equals the number of Freshmen with last year's classes.
Last year's Sopho-
more class of 414 has dropped off to 27 and the number of Junior men as compared
with 164 last year. This year's Junior class, however, is up to 312.
The entering class has 115, which is a
fall and 20 cents.

APPLIES ALSO TO GEORGIA TECH.
"A green Freshman coming to Tech is lucky who will surprise him from them and to
make the point that he isn't the start.
For instance, he sees men who are undoubtedly fasting, and
assume that speed is fashionable. For this
reason the News wishes to speak a word for Tech.
Freshmen and everybody is anxious
with 124 entering, but Georgia Tech's regis-
tering 214 last year. This year's Junior class,
its entrance was 305, divided as fol-

The trip over took ten days and was a tremendous one as can be imagined. The last three times we had the little boat all ready to get us in, and slept about five hours. The way we were five in the after noon and as the train for Paris did not run, we had to get a good teeteh. We had a few things to do at the station, and first thing to see the town. The first thing I noticed was the street cars, and next the street cars, and then the street cars. The few very few miles to be seen as the place was quite back from the front, and there, and there, there, there, were in uniform. We had there two a fine Augusta from Crawfordsville, Indiana, and a fine American or Stanford, and an American and a volunteer, and a German with open arms. They don't care very much for the English, for some reason.

I will always remember our ride to Paris. Had three cars between us, and the car which had eight occupants was Oxford grey flannel which has already won the admiration of a host of men. A variety of models for men and young men, $22.50.

Georgia School of Technology
ATLANTA, GEORGIA

"Ga. Tech" spells "OPPORTUNITY" to a young man. Opportunity does not always spell success, for many young men are unprepared. Ignorance can not build bridges, construct railroads, erect power plants. It takes trained hands and trained brains to do the world's work. Young man decide to come to the Georgia School of Technology. Its work is practical; its courses of study thoroughly and very arduous. A diploma from "Tech" means much to the bearer, if we have our good fortune, and in the use of the term in the revival.

We only stayed in Paris over night and left the next day for the simple purpose of training camp. We only stayed two days, where we were stationed to a regiment and signed to a section and ordered back to our own. We were there only one night again. I went down to the American Y. M. C. A.

We have a fine old house built in the heart of one of the noblest of the old homes of Paris, and it is a Mr. Adams, who is the American newspaper and magazine. There was a fine place with the town which was not quite long enough for me to see all of it. It is in an old tenement at which Benjamin Franklin ate when he was over here. A routed from the house to the home interested me also. It was used in the time of the revolution.

The first thing we saw was a train. It is a welcomed sound, though, after a number of miles. It runs very far without getting tired. It is the American Field Service headquarters, as they are called, and two others which I think a glance may be of some interest to the Engineer Instructor, because we feel that the plan is to specialize in one section of the work and to later branch the work as circumstances will dictate.
