Pete Dunlap, ANAK president, taps Dean Davidson at Homecoming Dance.
Omicron Delta Kappa, national leadership honor society for men, was founded in 1914 at Washington and Lee University, and the local circle was established in 1932. Members are selected on a point basis, a definite number of points being given for each honor or position attained by the student. When a student has amassed enough points and a definite scholastic average he is eligible for election. ODK ranks with ANAK as the highest honorary organization on the Tech campus.
The Georgia Tech ANAK Society was organized on January 1, 1908, to honor select men from the Senior Class who were outstanding among their fellow students by their achievements and services to Georgia Tech. ANAK has contributed, from its membership, many Tech men who have become leaders of national prominence. ANAK ranks with Omicron Delta Kappa as the highest honor a Tech student may receive.
The Koseme Society, established by ANAK in 1938, recognizes juniors and third-quarter sophomores who have been outstanding in extra-curricular activities. Not merely an honorary, Koseme each year undertakes several service projects, among them the preparation of the instructor-course list at the beginning of each quarter.
Phi Kappa Phi is the oldest national scholastic honor society on the Georgia Tech campus. Founded in 1897, it now has chapters in more than 50 colleges and universities. Membership in Phi Kappa Phi is awarded to those members of the senior class who are outstanding in scholarship during their first three years at Georgia Tech. The local chapter conducts the annual Honors Day exercises and awards a cup each year to the senior with the highest scholastic average.

Tau Beta Pi is the leading engineering honor society in the nation today. In 1925 the Georgia Alpha Chapter was installed on this campus and is today one of the largest of the ninety undergraduate chapters now in existence.

Engineering students who rank in the upper tenth of the junior class or in the upper eighth of the senior class are eligible for membership. The election of members is also based on excellence in leadership, character, personality, and service.

Tau Beta Pi is actively supporting the establishment of the campus radio station, WTYJ. The chapter also assisted Georgia Tech in co-sponsoring an Atomic Energy exhibit at the Crenshaw Field House this year.
Phi Eta Sigma, a national freshman honorary scholastic fraternity, was established at Georgia Tech in 1930. Membership in Phi Eta Sigma is the highest scholastic honor a freshman can attain at Georgia Tech. Only those men who have a point average of 3.5 for the first quarter, or an overall average of 3.5 for the entire freshman year are eligible for membership. Each spring the fraternity presents a cup to the freshman having the highest scholastic average for the first quarter.

The Briaerean Society was founded in 1912 for students of the co-operative department to promote high ideals and scholarship. Upperclassmen are selected for membership on the basis of scholarship, leadership, and character. Since the society was founded, over five hundred Briaereans have graduated from Tech and attained positions of leadership in all phases of engineering.

The Section I group attends school during the winter and summer quarters, while Section II attends during the spring and fall quarters. Men from each group work in industry while not in school.

Alpha Pi Mu, a national honorary industrial engineering society, was founded at Georgia Tech in the fall of 1948 as a society for the recognition of industrial engineers with superior abilities. The local chapter was granted its charter by the Student Council on January 25, 1949, and was recognized by the state of Georgia on March 17, 1949.

Membership is limited to juniors, seniors and graduate students of high scholastic standards, who possess traits of high leadership, character, and ethicality. Only those juniors who are in the upper one-fifth, and those seniors in the upper one-third of their classes are eligible.

Chi Epsilon is the only honorary fraternity limited to those men in the field of civil engineering. Founded in 1922 at the University of Illinois, the fraternity recognizes the qualities of scholarship, character, practicality, and socialibility in civil engineering undergraduates throughout the country. The Georgia Tech Chapter of Chi Epsilon, founded in 1943, was formed from Civil Crew, the oldest honorary society on the Tech campus.

Since 1937, the Industrial Management Society has selected those seniors and third-quarter juniors whose scholastic achievement, general campus leadership, and interest in the field of industrial management qualify them for membership in the departmental honorary organization.

Plant tours, talks by business leaders, occasional social events, and the unique annual Bullrymple Golf Tournament comprise part of the Society's activities.

In addition, the Society functions to stimulate interest among the student body in the field of industrial management, and to promote the friendly student-faculty relationships which mark the IM department.

MEMBERS NOT PICTURED

Chambers, J. M.  LeBlanc, G. R.

INDUSTRIAL MANAGEMENT SOCIETY
Phi Lambda Upsilon was founded as an honorary chemical society in March, 1899, at the University of Illinois. A charter was granted at Georgia Tech in 1951. The aims and purposes of the society were from its inception "the promotion of high scholarship and original investigation in all branches of pure and applied chemistry." At the present time there are 46 chapters of the society at major universities throughout the nation, with a total membership of twenty thousand.

All students of chemistry, chemical engineering, and allied fields who are in the upper 20% of their class and who have an overall average of not less than 3.0 are eligible for membership. Election of members is on a scholastic basis and elections are held semi-annually.
Phi Psi is a national honorary textile fraternity which has as its aim
the promotion of better feeling and closer relations between the tex-
tile students, and the strengthening of the position of the textile in-
dustry. Election to membership is limited to a percentage of junior
and senior textile students having qualifications in scholarship,
leadership, and character.

Legette, H. C.

PHI PSI
Pi Delta Epsilon is the national honorary journalism fraternity at Tech. Its members are men who have served in an outstanding manner for at least two years on the staff of one of the four publications. It seeks to establish a code of ethics among the staffs of the individual college publications. Several projects are undertaken each year. Professor rating sheets were established by PiDE. PiDE also publishes a pamphlet explaining publications to incoming freshmen and plans to start putting out the student directory. Each year trophies and certificates are awarded to those men who have contributed the most to the individual publications and to all publications as a group.
Pi Tau Sigma is the national honorary mechanical engineering fraternity, selecting its members from junior and senior mechanical engineering students. To be eligible for membership, a student must be outstanding in leadership and character, as well as in scholastic ability. Pi Tau Sigma annually awards an engineering handbook to the highest ranking sophomore student in mechanical engineering.

MEMBERS NOT PICTURED

Roberts, O. P.
Sigma Pi Sigma, the Physics Department honor society, endeavors to promote interest in physics through lectures and demonstrations which are open to the public. It sponsors the Physics Club and assists physics majors in their choice of electives outside the department. While membership is not strictly limited to physics majors, it is necessary that a candidate for admission take a sufficient number of junior and senior physics courses and maintain a superior academic average.
The national chapter of Tau Omega, a national honorary fraternity for Aeronautical Engineering students, was founded at the University of Oklahoma in 1927. The Theta chapter was installed at Georgia Tech on May 18, 1952, following six months of planning by the Aeronautical Engineering students. The purpose of Tau Omega is to create, foster, and maintain a spirit of fellowship and co-operation among the Aeronautical Engineering students; to promote scholarship; and to help to the best of its ability the progress of aviation. The requirements for membership are scholarship, character, and willingness to work.
The Student Council in action.
The Student Council, which was first established in 1922, is the student government organization. It serves as the principal liaison agent between the student body and the school authorities and is the authoritative voice of the students. The Student Council controls the use of student activity fees and handles all financial matters involving the general student body. The council is also in charge of all elections of class officers and Student Council representatives. The members are elected by popular vote in the spring quarter of each year, with the exception of the freshmen who are elected at the first of the fall quarter.

publications
The Blue Print, which is the official yearbook of Georgia Tech, is published by the students during the latter part of the spring term. Sections of each yearly issue are devoted to classes, faculty, and administration, athletics, fraternities, features, and campus organizations in an attempt to present as complete coverage as possible of the various activities which take place on the Tech campus during the school year. For many years the Blue Print has ranked high in the field of collegiate yearbooks, having received in the last four years, two First Class and two All-American ratings.
The Georgia Tech Engineer is a technical publication issued by the students of Georgia Tech eight times each year. It contains reports of research by Tech professors, and other scientific articles by students and faculty, as well as articles on social and economic problems which confront the engineer at work in society. Staff work includes writing, art, and business management.

The Technique is the semi-weekly newspaper of the Georgia Institute of Technology. Its primary purpose is the publication of student news, including news of organizations, campus activities, sports, and other events of interest. Student opinion on current affairs is also expressed through the medium of an editorial page containing letters to the editor, opinion polls, and discussion articles.

The *Yellow Jacket* is the Georgia Tech humor magazine. The main objective of the *Yellow Jacket* is to serve as an outlet for creative writers, cartoonists, artists, and photographers on the campus. Articles of technical or even semi-technical nature are of no concern to this publication. The expected results of the *Yellow Jacket* embrace all forms of enjoyment. The students who read the magazine do so for the pleasure that they receive, rather than for practical knowledge.

The Publications Board, made up of representatives from the student publications, is the governing body on policy and scope of coverage as pertains to each. The editors, business managers, and faculty advisers from the Blue Print, Engineer, Technique, and Yellow Jacket are automatically members of the Board together with a representative from the Student Council and Pi Delta Epsilon.
departmental societies

The C. E.'s winning display at 1952 Engineers' Week exhibits.
The student chapter of the American Association of Textile Chemists and Colorists was originally formed on the Tech campus in 1935. The Association affords an opportunity for the student to become better acquainted with the chemistry and dyeing of textiles through the medium of motion pictures, field trips and speakers prominent in the textile field. Its purpose is to promote an increase in knowledge of the application of dyes and chemicals in the industry, to encourage research on chemical processes and materials of importance to the industry, and to establish channels through which the interchange of professional knowledge among members may be increased.
The American Ceramic Society was instituted on the Tech campus in 1926 as a student branch of the National Organization. The activities of the American Ceramic Society are numerous, some of which include frequent talks by prominent engineers and business men in the ceramic industry and participation in social functions. Thus the members are unified and led in the spirit of cooperation and fellowship toward a common goal of personal development and professional achievement.
The purpose of the student chapter of the American Institute of Chemical Engineers is to promote the professional development of students of chemical engineering. Further, A. I. Ch. E. endeavors to foster a professional spirit among its members and instill a professional pride in chemical engineering. The Georgia Tech chapter recognizes scholastic achievement by presenting annual awards to those who have distinguished themselves in chemical engineering, and, in addition, sponsors numerous social functions throughout the entire school year. Other chapter activities include lectures, movies, and presentation of technical papers to the annual national convention.

The Georgia Tech Student Chapter of the American Chemical Society is affiliated with the national American Chemical Society. The national society was founded in 1876 while the idea of student affiliate chapters was adopted in 1937. The purpose of the society is to afford an opportunity for the students of Chemistry and Chemical Engineering in the Georgia Institute of Technology to become better acquainted, to secure the intellectual stimulation that arise from professional association, to secure experience in preparing and presenting technical material before chemical audiences, to foster a professional spirit among the members, and to install a professional pride in chemistry and chemical engineering.

The American Institute of Electrical Engineers was founded in 1884, when the possibilities of an organization which would foster and encourage electrical development were beginning to be realized. The objects of the institute are the advancement of the theory and practice of electrical engineering, maintenance of a high professional standing among its members, and the development of the individual engineer. The institute has contributed largely toward the remarkable progress that has taken place in the electrical field since the latter part of the nineteenth century. All branches of electrical engineering are represented in the membership.

The Georgia Tech Chapter of A.I.E.E. was established in 1915, and is one of 127 student branches in leading technical institutions of the country. Activities to stimulate student interest here include lectures, demonstrations, movies, tours, and an annual delegation to the national convention to present technical papers written by Georgia Tech students.

The American Institute of Industrial Engineers is a national organization for industrial engineers or professional men who are performing duties of the industrial engineering field. The student chapter of Georgia Tech was organized after the opening of the Industrial Engineering School on the campus in 1946. The aim of the Georgia Tech student chapter is to create, develop, and maintain a keen interest in the field of industrial engineering. To do this, an opportunity to further study the principles taught in the classroom is given to the members by having qualified speakers, illustrative movies, and plant tours to the many diversified types of industry in the Atlanta area. The chapter represents the School of Industrial Engineering in the various campus activities and functions and acts as an agent to its members for the dissemination of the latest industrial engineering developments.

The Georgia Tech Chapter of the American Society of Civil Engineers obtained its charter in 1924. All juniors and seniors in the Department of Civil Engineering are eligible for membership and all students of the department are welcome at the meetings.

The Student Chapter is active in obtaining movies, speakers, and sponsoring field trips which relate the theory of civil engineering to the practical methods of construction industry.
The Georgia Tech branch of the American Society of Mechanical Engineers gives the mechanical engineering student an opportunity to become better acquainted with the professional part of engineering by conducting weekly meetings. To these meetings are invited prominent engineers who discuss the current advances in engineering.

All mechanical engineering students are eligible for membership in A. S. M. E. Membership in this society is a real step toward acquiring professional standing in the engineering community.

Designed to encourage original thought, the National Institute of Aeronautical Science coordinates the different phases of aeronautics, including education, engineering, and production. By opening its rolls to aeronautical students, it affords the prospective engineer an opportunity to become acquainted with many aspects of the field outside the classroom.
The Architecture Society, one of the most influential groups on the campus, is spokesman for the students in the School of Architecture. It is widely recognized as an important factor in maintaining high standards in student design through the lectures it helps to sponsor and the recognition it bestows upon outstanding students. During the past three years the school has been honored by the lectures of Hugh Stubbins, Marcel Breuer, and Frank Lloyd Wright. An important lecturer this year will be Walter Gropius of Harvard.

A festive occasion each year is the Beaux Arts Ball, sponsored jointly by the Society and its parent organization, the American Institute of Architects.

A student who joins the Society has taken the first in a series of steps that leads to active membership in the American Institute of Architects.

The Society for the Advancement of Management is the recognized national professional society of management people in industry, commerce, government and education. Representing no special interest, it is motivated by a selfless zeal to spread the benefits of scientific management wherever management is required. It has constantly adhered to the purpose of helping executives approach all phases of the management problem—Production, Distribution, Administration, Industrial Relations—in the engineering manner.

The student chapter of Georgia Tech was the first departmental society in the Industrial Engineering department, but has since opened its membership to all departments. Representation of all the engineering fields provides a more complete understanding of management problems.
FLEETWOOD

CHARLIE ENG . . . . . . . . . . . Vice President
ORVILLE BEVEL . . . . . . . . . . . Secretary
M. E. BARTHOLOMEW . . . . . . . Treasurer

The Society of American Military Engineers was organized in 1920 for the purpose of preserving and studying the experiences of the engineering profession in World War I. The purposes of the society are: to advance knowledge of the science of military engineering; promote efficiency in the military engineer; encourage, foster, and develop among military engineers and other arms of the military service a spirit of co-operation and mutual understanding of their respective duties, powers, and limitations; to hold meetings for the presentation and discussion of appropriate topics that should be helpful and of interest to the organization's members.

There are eighty-five posts throughout the country in larger cities and colleges. The Georgia Tech Student Post was chartered in 1942, and is composed of Army, Navy, and Air Force R. O. T. C. cadets.

SOCIETY OF AMERICAN MILITARY ENGINEERS
KAPPA KAPPA PSI

OFFICERS

ANTHONY DRAGO  President
ROY W. REACH  Secretary
ROBERT B. NELSON  Treasurer
BEN LOGAN SISK  Advisor

Kappa Kappa Psi is the national honorary fraternity for band members. It was founded on the campus of Oklahoma A&M College, and now has chapters all over the country.

Iota Chapter at Georgia Tech was founded in the early twenties, and has been active ever since. Membership is based primarily on musical ability, although leadership and band activity play a large part in the selection of members. The chapter sponsors an annual banquet for members, their wives and dates, as well as an occasional wiener roast or barn dance. The A. J. Garing Award is presented annually by Iota Chapter to the outstanding graduating senior in the Tech band.
