Councils and Clubs

The Activities Council strives to acquaint all Tech students with the various organizations on the campus. Each fall the Council presents the annual Activities Fair, where students have an excellent chance to learn of the projects and work of many different activities. Each organization has a member who serves as Councilman and prepares the project for his activity to be presented at the fair. During the past year the Activities Council accepted and performed many new duties and responsibilities which were for the betterment of all campus organizations and Georgia Tech as a whole. The past success of the Activities Council clearly shows that it will be a mainstay here on the Tech campus for many years to come.
The St. Patrick's Council was organized in the early part of 1950 on the Georgia Tech campus. The purpose of its organization was to promote the interest of the Georgia Institute of Technology and the several honorary and professional societies within its academic schools, departments, and divisions. Its primary undertaking at the present time is to promote, plan, develop, and coordinate all of the several activities leading up to and including Engineer's Week celebrations, to the end that such societies shall be encouraged to compete in their contributions to the professional developments of management, engineering and science students.

Members are elected by the active honorary and professional societies in their prospective fields.
The purpose of Alpha Phi Omega is to assemble the men of Georgia Tech in the fellowship of the Scout Oath and Law, develop friendship, leadership, and association among Scout trained men, promote service to the student body and faculty, to youth and community, to members of the fraternity, and to the nation as participating citizens.
The Georgia Tech Camera Club was organized for the benefit and instruction of the many amateur photographers in the student body. The club maintains a well-equipped darkroom which is available to all members.

Each quarter the club has a Black & White Salon and a Color Salon, judged by well-known Atlanta photographers who offer helpful comments and criticism on each entry and award prizes for the best entries. Also each quarter one meeting is devoted to Model Night and the members visit one of the local schools of modeling where the girls pose for our cameras. Field trips and lectures on the various aspects of photography offer training and experience for the members in the finer points of the camera art.
The Bulldog Club, one of the campus' leading organizations, is responsible for a large part of student extra-curricular activities. With the help of the Athletic Association, the club sponsors, directs, and provides officials for all intramural contests. It is responsible for the annual Homecoming weekend, which includes the Homecoming decorations contest, the Homecoming dance, the Freshman Cake Race and the Ramblin' Reck Parade.

Members are selected twice a year from the most outstanding juniors and seniors. Any group participating in intramural sports is eligible to submit names of initiates. The Bullpups colorful initiation in the fall and spring of each year is a campus tradition.

The Co-op Club was organized in 1915 by a group of outstanding co-op students for the purpose of promoting interest in co-op activities and fostering a spirit of fellowship among students in the Co-operative Department. This club is one of the oldest social organizations on the campus. Members of the Co-op Club are selected from upperclassmen of the Co-operative Department who are outstanding in leadership and character, and who have manifested an interest in co-op activities.

The Co-op Club is divided into two sections, each representing the separate sections of the Co-operative Department.
Section I is active during the winter and summer quarters, and Section II is active during the fall and spring quarters. Although the two groups are entirely separate, co-operative spirit is their primary purpose and close harmony is maintained to achieve this.

Members of both sections of the Co-op Club are heavy competitors in scholastic and extracurricular activities. This competition has led co-op students to attain higher levels of scholastic nature. Both of these units rank high on the campus as social and scholastic groups.
Drama Tech was founded in the year 1946 to stimulate student interest in dramatics and to give potential engineers a chance to develop their acting and producing abilities. This year the club opened its membership to the faculty and employees of Georgia Tech, acquiring many interested and talented members.

Each year the club presents three plays, one per quarter, giving its audiences a very diversified bill of entertainment. From the rollicking humor of "The Milky Way" in the fall of 1952, the club turned to the dramatic success, "The Hasty Heart." Then it triumphed in the powerful "Stalag 17" last spring to conclude its yearly program. This fall the club undertook a variation of its now-accomplished arena presentation to explore another, more-exacting technique with its heart-warming production of "Mr. Roberts," staged "on three sides." At the same time it welcomed back its director of the four previous years, Mrs. Mary Nell Ivey, who has always encouraged the club to increase its proficiency and has contributed much to its advancement.
Circle K Club is a Kiwanis sponsored service organization whose objectives are to sponsor and carry out worthwhile projects that will benefit the college and the community. The membership in Circle K is based on leadership, service and character.

The Circle K Club was organized on the Tech campus in 1950 by its parent organization, the Northside Kiwanis Club of Atlanta. Since that time it has shown to be a progressive club by carrying out many worthwhile activities. Some of these are: providing the calendar of events card issued at the beginning of each quarter, the presentation of a trophy and plaque to the active ISO unit having the most outstanding scholarship record during the year, assistance in student elections, and helping the Northside Kiwanis Club in several of its undertakings.

By providing low cost flying and instruction, the Georgia Tech Flying Club gives every air-minded Yellow Jacket the opportunity to further his aviation interests. Actual flying, coordinated with interesting basic ground school subjects, provides all the requirements for becoming a licensed pilot. Through the cooperation of the Aeronautical Engineering Department and the College Inn operating costs are kept at a minimum. In the near future plans call for installation of a more powerful engine and night-flying equipment in the club’s Aeronca Champion aircraft.
The Georgia Tech Glee Club, some fifty voices strong, has in the last few years gained the reputation of being one of the most traveled and best known organizations on campus. Under the able direction of Mr. Walter Herbert, the Glee Club spent its fifth consecutive New Years Season away from home this year. The last two being in the famous Blue Room in the Roosevelt Hotel in New Orleans. The New Orleans trips were preceded by a trip to Miami in 1951, Greenland, Bermuda and Newfoundland in 1950, and Europe in 1949.

We may also proudly add to the record of the Glee Club this year, a nationally broadcast television show with Ed Sullivan for which the club went up to New York for the week end.
The Tech Management Club is the student organization of the Industrial Management Department embracing all fields of Industrial Management work. Its membership is open to all Industrial Management juniors and seniors. The members and advisors are greatly interested in all Industrial Management students participating in this club so that they might learn first hand about the management side of industry. The club now boasts a membership of over one hundred, which is one of the largest in its history.

During the school year the club sponsors many activities of interest to the student of Industrial Management. Some of its more outstanding activities are talks by outstanding industrial leaders, field trips, and social events.

The Geechee Club was formed in 1946 by a group of students from Savannah who were interested in organizing all Tech students from that area. The Club is very active during the school quarter, and participates in all intramural sports. One of the many advantages of the Geechee Club, and its purpose of organization, is the car pool system for rides between Tech and Savannah. Outstanding social events are also featured by the Club. The organization is unique on campus and very restricted in its membership; only Savannah area students are eligible.
The Pan American Club of Georgia Tech was founded in 1953 with the purpose of getting students acquainted with Latin American affairs and establishing better relations among students from different countries.

The scope of the club also includes social activities and intramural sports.
The Physics Club was founded in 1950 by the Georgia Tech chapter of Sigma Pi Sigma, honorary physics society, for the purpose of creating an interest in physics among the students. The only requirement for membership in the Physics Club is an interest in physics. The programs during the year have included a trip to the Agnes Scott Observatory and several talks by scientists from Oak Ridge. For those interested in the physical sciences, the Physics Club offers a chance to further their interest.
The Georgia Tech Radio Club is primarily an organization of enthusiasts of amateur radio. Its primary aim is to promote the general welfare of its members and to maintain an active interest in communication by amateur radio. To fulfill that aim, the club owns high-powered transmitters which cover all the active "ham" bands. This equipment is in the club "shack," which is located in the penthouse atop the Physics Building.

A second purpose of the club is to provide instruction in the principles of amateur radio for aspirant "hams," to enable them to qualify for the required government license. Code practice machines, lectures, and training films accomplish this purpose.

The final goal of the club is to provide a common meeting place for those interested in radio, so that they may become acquainted with each other, exchange technical information, and become members of a radio brotherhood at Georgia Tech.
This year the Ramblin' Reck Club has been very successful in carrying out its purpose of developing enthusiastic school spirit. The pep rallies held by the club during football season were highlighted by the spectacular "Beat Georgia" bonfire rally which was attended by more than two thousand students. The club also sponsored Ramblin' Reck contests during the fall and the "Stunt Night" program during the spring. In addition to these activities the Ramblin' Recks set forth and enforced the requirements of the freshman "rats.

The Spiked Shoe Club is an honorary track and field society, the membership being composed of outstanding lettermen from the varsity track and cross country teams. The specific purpose of the Spiked Shoe Club is to bring together in a closer bond the track men in the Southeastern Conference and to further the interest of track.

Tau Kappa was organized in the fall of 1953 as a social club for coeds. It is the first and only organization on the campus open exclusively to women students. While Tau Kappa is intended to promote a closer friendship among the coeds, to provide opportunities for exchanging ideas, and to enable the members to discuss common problems, its chief aim is to be a nucleus for the first chapter of a national sorority at Georgia Tech.
The Georgia Tech Chapter of Toastmasters' International, founded in 1950, was the first college chapter among the hundreds of Toastmasters' Clubs. Toastmasters' is more than a club—it is an education. It is specially useful on a technological campus, since it seeks to improve, through practical experience, the ability to speak in public. Weekly, through planned programs, members deliver prepared and extemporaneous speeches, thus constantly improving their power of speech.

The Baptist Student Union serves as the link between Tech's twelve hundred Baptists and the local churches, promoting not only Sunday School and Training Union but active participation in the local churches' organizations. On the campus, the B.S.U. sponsors vespers, discussion groups, intramural athletic teams, a choral group, a bi-weekly newspaper, and other organized activities. In addition, social, recreational, and religious facilities are offered at the Baptist Student Center located at 734 Techwood Drive, N. W.

Every Baptist student who is a member of a local Baptist church or who is a member of a Sunday School class or Training Union in a local Baptist church is a member of the Baptist Student Union. Pictured on these pages are the B.S.U. Executive Council members and their committees which make up the Greater B.S.U. Council.
As a club of Catholic culture and Catholic fellowship, the Newman Club is organized in order to deepen the spiritual and enrich the temporal lives of its members through a balanced program of religious, intellectual, and social activities; to weld the Catholic students into a common union; and to assist the college and its students whenever possible.

The Georgia Tech chapter of the National Newman Club Federation was established in 1928. Since that time, under the spiritual guidance and assistance of its chaplains, the Club has been cited as the campus organization which most nearly achieved the purposes for which it was founded.

Center of Club activities on campus is the Newman House, adequately equipped with intellectual and recreational facilities. In addition to weekly meetings, activities include corporate communions, spiritual retreats, lectures, discussion groups, parties, dances, picnics, and outstanding participation in the intramural sports program.

The Georgia Tech Wesley Foundation is the official agency of the Methodist Church at work on the Tech campus. The organization is housed in the Methodist Student Center located at the corner of Fourth and Fowler Streets. The purpose of the Foundation is to provide a program that creates a greater personal relationship with God, and continues to strengthen those ties with the church, made in youth, which assure full Christian maturity.

Activities of the Wesley Foundation include participation in Intramural sports, Student Conferences, Deputations to other Colleges, Wesley Singers, Worship programs, Community Service projects, and World Friendship aid to foreign colleges. These activities are administered by a Student Council under the direction of the Director of the Wesley Foundation.
The aim of the Georgia Tech Canterbury Club is to serve the Mission of Christianity in higher education by fostering among the students of Georgia Tech a better understanding of the faith and practice of the Episcopal Church and loyalty to its corporate life. Meetings are held each Sunday evening in the parish of All Saints Church with other college students of the Diocese. A corporate service of Holy Communion for Canterbury Club members is celebrated on the third Sunday of each month.

"See you at the Y" is a popular expression on the Tech campus. Many campus organizations use the several rooms available for meetings and the "Y" camp near Roswell, Ga., which is available for hayrides and parties.

The purpose of the "Y" is not only to help young men help themselves, but also to help them help others. The different organizations sponsored by the YMCA are Alpha Phalanx, Sigma Phalanx, Camp Committee Recreation Council, T-Book Staff and the World Student Fund. The Cabinet, composed of the presidents of the various groups, is the nucleus of the Association.
Student life at Tech was well-rounded.
features
Mr. William H. Britton  
Feature Editor  
1954 BLUE PRINT  
Georgia Institute of Technology  
Box 19, Georgia Tech  
Atlanta, Georgia.

Dear Mr. Britton:

To agree to judge a beauty queen contest —
when the entrants are from Georgia — is to show more valor
than "discretion".

Who can say which is more lovely — a rose or
a lily-of-the-valley — a sunset or a sunrise — an emerald or
a pearl?

However, I have made my selection and marked
my choice on the name cards.

Mr. Arnold Friberg — who, as you may know, is
one of America's finest artists — happened to be in my office.
I asked him what his selection would be. Coincidentally, he
agreed with my choice, but added as he picked up the picture:
"This is the one I would choose to paint."

In closing — a word to all the lovely young
contestants: "You have beauty — may you have happiness."

Sincerely,

Cecil B. deMille
