All students (except first and second quarter veterans) who wish to remain enrolled for the spring quarter should have a schedule conference with an adviser during the week of March 8 and before March 10. Degrees and

FORMS FOR VETERANS

The Student Council is making an effort to clear up an understan-

ging between the veterans and the school. The Council is planning forms for the veterans to fill out. Please fill in questions and return to the question box placed there.

Campus Hospital Staff Begins Fight Against Flu

Fearing a rapid spread of influenza, the hospital's staff is taking steps to prevent a wide-

regarding the presence of any students or employees who are ill. The hospital's staff is prepared to cope with one if it should be found.

Regardless of the work that would be done by the staff, present facilities may not be able to handle extra patients. This is particularly true when the hospital is taking care of large numbers of students.

The hospital, the Joseph Whitehead Memorial Hospital, was transferred to the United States Department of Health, Education, and Welfare, effective January 1, 1946. The hospital is being operated under the direction of Mrs. Joseph Whitehead.

Glee Club Presents Program of Music Tonight Over WGST

Tonight the Tech Glee Club will present a program of music at 6:30 over radio station WGST. The pro-

This program is the initial of a new arrangement by which the club can reach a large student audience. The Glee Club is scheduled to appear on WGST every other week.

Plans are being made for the club to appear on WGST every other week. The next broadcast will be on Thursday, April 3. The club will be featured on WGST for the next four weeks.

Miss Louise, the Glee Club's accompanist, will also be featured on the broadcast. The Glee Club's program will include a variety of music, including songs of the Air Force and other popular songs.

Miss Louise is a graduate of the University of Alabama and is a native of Montgomery. She has been active in the Glee Club for several years and has been associated with the club as a member of the Board of Directors.

All Tech students are encouraged to attend this broadcast. The program will be repeated on WGST next week.

Alpha Phi Omega
Pledges Twelve

Twelve men were pledged by the
Georgia Tech chapter of Alpha Phi
Omeed, national service fraternity.
These pledged were "Tex" Branson,
M. V. Glasgow, E. E. Priole, J. J. Wise,
E. B. Fierson, J. J. A. Alford, J. E. Singe-
ley, E. B. Price, J. M. Moore, D. C.
Motherhead, R. M. F. Wise, Stanley
P. McCann.
APO is well known on the Tech
tang for its many outstanding pro-
tects. The most recent of these is the to install conv-con
laboratory machine in the campus dormitories.
This is being worked out with the co-
operation of Dean George Griffin and
Mr. Anderson, purchasing agent for
Georgia Tech. It is hoped that these
machines will be installed in the dormitories in the near future for
student use.
APO, the only national service in
the United States is devoted to pro-
moting school spirit and adding the
school and its students. APO projects
in the past have included: main-
taining a Georgia Tech blood bank, main-
taining the W.S.S.F. desk during the
recent drive and aiding in all student elections.
All former scouts are eligible to
join APO. All old members and those
interested in the organization are in-
vited to attend the next meeting at
the YMCA, Monday night at 7:00.

A. S. S. E. to Present Award for Safety Paper

Radio Engineers
Visit Air Station;
See Radar Devices

The Georgia Tech chapter of the Institute of Radio Engineers will
visit the Naval Air Station at Cham-
bley on Tuesday, March 4, it was an-
nounced this week by W. E. Newton,
chapter president. At the Naval Air
Station members will see typical air-
craft radars, installations of aviation
equipment, navigational aids, and
aviation electronic maintenance facili-
ties. Also, the latest ground based
radars will be seen in actual opera-
tion.
Professor C. E. Durkee of the Elec-
trical Engineering Department will
supervise the trip and will explain
the operation of the various radars.
All members interested in making the trip should meet in the lounge of
the R. R. Building at 5 p.m. on Tues-
da y, March 4. Those members who
are bringing cars are urged to do so if
at all possible, as the Naval Air Station
is beyond regular bus service. Any
number able to bring a car is request-
ed to notify President Newton before
Box 83.

Co-Op Club Initiates Twenty-nine Men at February Meeting

The Georgia Tech Co-Op Club, recently activated after a brief lay-off during the war years, initiated twenty-nine new members into the club at the last meeting. Only the outstanding members of the Co-Op class are eligible for membership.

Those recently initiated are as follows:

I.M. Honorary Fraternity Lists Eligibility Requisites

The I.M. Society is the honorary professional group in the Industrial Management Department.

To be eligible for membership in the organization the student must be a member of the department with a minimum scholastic average of 2.5 and must have shown outstanding leadership and interest in the field of his studies.

Although it is not affiliated with a national organization, the I.M. Society offers many opportunities for the students members to come in contact with men in fields of national-wide significance.

During the past Christmas season the society furnished a project to raise money for the Empty Stocking Fund. The members of the society took on the job of selling replicas of a local newspaper. The proceeds went into the fund.

Brenau Head Speaks To Presidents’ Club

Last night Dr. Joshua Crutch, president of Brenau College in Gainesville, spoke to the President’s Club banquet in the ODK Banquet Hall. Graham Jackson, accordion and piano artist, provided the entertainment.

Dr. Crutch’s subject was “Facing the Challenges of the Future.” He succeeded Dr. J. H. Pearse as president of Brenau in 1948. Dr. Pearse had died two years before.
It Was Their Evening To Howl, But Emily Post Really Suffered

Did you notice any quaint characters about the campus last week dressed tastefully in tuxedo jackets or tails with long swishing tails and topped off with black derby or top-hats with a low crease? It was the week end of informal initiation for twenty-four new members into the illustrious Bullpups. Out of the Bullpups and their nattily attired Bullpups, as they are called, will undergo a multitude of trials and tribulations before they become full-fledged Bulldogs.

The Discerning

These outlandish outfits they are wearing are only a part of the initiation. But the dinner date real tells. Each Bullpup is assigned to a home of one of Atlanta's lovely young women for a dinner date. The catch is that neither the girl nor her family knows anything about it until he arrives.

Moor In Paws Eye

Upon arrival at the home an hour before dinner the Bullpup rings the doorbell and presents his card. Until dinner is served, he is forbidden to speak. The surprise of the family so disturbed is limitless. While awaiting dinner, the Bullpup is required to take off his coat, tie, and shoes and plant himself on the floor in the middle of the living room. If the man of the house is reading the Sunday paper per normal, the initiate stealthily snatches it away from him while administering a couple of raspberries. Anticipation of the family reaches a peak by now, and only intercession by the lovely daughter on the Bullpup's part (they're all tall, dark, and handsome) keeps him from being bodysnatchingly manhandled by the father.

Boys In Your Head

These unorthodox actions by now have alienated the affections of the family slightly more than somewhat toward him, but the Bullpup's hospitality triumphs and when dinner is served he is invited to partake. Here begins a series of required actions that none but a strong man could face. The Bullpup sits over the back of his chair and by instruction can only use a knife. He must eat part of anything that is offered him. I have been told that no small amount of dexterity with a knife is required, say for soup or peas. Caustic comments are order during dinner and a standard one is, "Say, old lady, you get rocks in your head? Stop winking at me!" Some rare embarrassing moments occur at this stage of the game, as they say.

Fit For A Hog

After finishing dinner, the Bullpup arises, tosses two cents on the table and states, "A South Georgia hog wouldn't turned down this slop." Whereupon he reaches in to his skirt and takes out a hitherto concealed dry cheese sandwich and goes into the living room munching it.

Get Out—Fast

As a parting gesture, the Bullpup leaves the highest piece of furniture in the house, clambered atop it and makes like a dog with his voice for one minute. After this canine display he is free to leave—that is, if he can get out fast enough.

Many Theories of Modern Pyschology Were Anticipated by the "Mad Russian"

By Jim Peave

With the publication of books concerning psychology, psychiatry, and mental ailments that are appearing before the reading public each month, we are apt to overlook completely the man who was the first truly great writer of novels of this type. Pavlov Mikhailovitch Dostoevski, sometimes called the mad genius of Russian literature, wrote his magnificent tales even before Freud published his amazing accounts concerning mentality and the force that the subconscious plays on the personality.

Contribution To Science

Psychopathologists and criminologists have paid homage to Dostoevski's remarkable contributions in each novel as The Idiot, in which he anticipated, with a great degree of accuracy, many modern scientific developments in these fields.

Dual Emotions

Thus, in spite of his epilepsy, depravity, and degeneration, Dostoevski gave to science and the readers of the world novels fairly abounding in genius. One great psychiatrist said of his works, "Dostoevski's books seem, the huge numbers they handle them, to flow mysteriously together into one book, and this book is the book of the Last Judgment, for he leads us through the land of those visions which are our own.

er into the abysses of hell or swings him into heaven at God's very throne, for he possessed a rare genius that enabled him to penetrate into the darkness of the human soul. His characters revolutionized literary style, and he was the first author to lift a prostitute from degradation and con­ tempt to make her one of the most virtuous heroines of world literature. This was Sonya in Crime and Punishment who became the moral and spiritual force of the novel.

It Has Everything

Do I suggest that you pass up all the new fictional works dealing with psychiatry—usually written by people who know no more about it than you do—and turn to this book that beats them all the way around the proverbial bush. It has everything plus what you could find anywhere else—plot, depravity, murder, horror, religion, sex, and an inmeasurable list of spell-binding topics. I think that you, too, would agree it was one of the best you've ever read.

Overwhelming Vote

For YELLOW JACKET

Georgia Tech students rose up and expressed themselves loud and long on the controversy now raging about the purity, or lack of same, of the YELLOW JACKET. By an overwhelming majority they voted in favor of continuing publication of the Tech humor magazine in the same fashion as previous editions.

Although student opinion was lop-sided in more, proponents of the opinion that the YELLOW JACKET should be "cleaned up" were as vehement in their opinions as those who thought the publication was tops as it was. One student voiced his sentiments thus:

"I do not like any college to be represented by a collection of childish dirty jokes. The offending jokes were those which were not basically funny, merely something you wouldn’t like your mother to see. A clever naughty joke can be just as funny as a clean one—of course, but most of the jokes which are causing the present crisis seemed to be published solely for their dirt value."

On the other side of the fence a man who signed himself "A Loyd Tech Student" expressed the following statements best expressed as the printing of "dirty" jokes.

Yes No

1. Do you believe that the jokes in the last edition of the YELLOW JACKET were too much on the "garbage side" (as one Atlanta newspaper expressed it) ?
   11.7% 88.3%

2. Would you prefer that the YELLOW JACKET "tone down" its jokes a bit in the future ?
   17.5% 82.5%

3. Should there, in your opinion, be more or less Faculty involvement in the publication at Tech?
   97.3%

In general which of the following statements best expresses your ideas of the YELLOW JACKET and its future at Tech?

A. YELLOW JACKET should cease publication 2.7%
B. YELLOW JACKET should tone down considerably its jokes if it is to remain in publication 88.3%
C. YELLOW JACKET should tone down "a bit" its jokes 3.7%
D. YELLOW JACKET is not obligated to tone down its jokes since it is a humor magazine 97.3%
Three Options Offered

This week the Industrial Management department features a further discussion of the course it is having been added to the curriculum within the past year.

Liberal Education

The first two years lay the foundation for a liberal education, with English, History, Social Science, Biology, and the basic physical sciences. The mathematical training given enables the student to master the important work in Finance, business end of production is the primary goal.

Accounting, Statistics, and Management courses are given in Economics, Business Administration, Accounting, and Finance.

Production Not Distribution

From this discussion it can be seen that the business end of production is the primary goal of the B.S. in Industrial Management, as compared with the preparation for the business end of distribution for which the student is fitted by undergraduate work in a straight Business Administration course from a liberal arts college. The technical background is a definite advantage in that it furnishes the engineering approach to problems which is so highly desired by prospective employers.

Additional Training

Most of the positions available to I.M. graduates today fall within the classification of production, planning and management, time and motion study, cost control and accounting, technical sales, and straight sales work. Many of the larger corporations have specific programs where the graduate has a chance to try out all of the various fields before selecting the one in which they find themselves most adapted.

In general, I.M. is a diversified course and offers many different possibilities. Look for its graduates as some of the top industrial executives in the years to come.

Report of All Findings

As work progresses, periodic reports are made to sponsors, and at the final termination of the contract a complete detailed report of all findings is submitted. Only the right to publish the results of any work is reserved by the Research Institute.

Teach Research Can Aid

The progress made by the Institute, which was incorporated in January, 1946, as an outgrowth of the earlier Industrial Development Council, has been fairly extensive. But it is most important for the industry of this section to realize that Tech is now in a position to assist in many of its problems. For it is only through full usage of the research plant that Tech may provide the maximum services to the state and the South.

NOTICE

The TECHNIQUE wishes to extend an invitation for all students to express their opinions through a Letter to the Editor.

“QUALITY FIRST — IT PAYS TO BUY THE BEST”

GOLD SHIELD
LAUNDERERS — CLEANERS

Campus Peeks

by Jim Pearce

The little cliques of engineers gathered around the Yellow Jacket last weekend . . . punctuated by bursts of masculine laughter and a rush for extra copies!

The Platoon Guide on the military drill field wandering unconcernedly on down the field while the entire platoon did a column left movement. Was his face red when he realized that he was all alone in a cold, cruel world.

The excellent hand concert last weekend . . . It was truly the way everyone dreams of hearing band music . . . just perfect!

Basketball watchers all season were really a picture of enthusiasm and support. There seemed to be even more keen interest than at the football games, and that is really something?

The Student Concert-Lecture Committee really put on a show for us this week. The trend seems to be toward sopranos with husky figures, but Miss Long really tops the list.

And I, for one, was horrified at the taught of classics by Harmonia, but I’ll just have to admit that it wasn’t half bad! In fact, it was downright astounding!

The most unexpected sight of the week . . . an eager beaver on the outside of the dormitory washing his windows. What is this world coming to?

Prof. Bortell in the physics lecture room getting a choir from the students when he finally discovers the right plug for his demonstration on electricity.

And the happiest campus peak of the week was the sight of the first Robin perched contentedly on the tree in front of the library. Perhaps Spring is actually going to get here after all.

Why Does the Jukebox Bubble

by Hazen Short

The juke box is a wondrous machine, a tribute to the technological advances of America. Loud, colorful, and versatile, it is surely a mechanical and electrical marvel. Much genius has gone into the development of the device.

The excellent band concert last weekend . . . punctuated by bursts of cheers from Geetchy Frontage.

THEY'RE TALKING ABOUT US!

From the West Virginia University Daily, *Athensum* comes this bit of prejudice as subtle as a broken arm.

"College students today are 'vapid, inquisitive, Communist, and interested in self-expression.' Cynical critics to whom these beliefs may be attributed can be found at any public gathering. They are girded with knowledge and shellacked with culture.

"Youth of today is interested mainly in education as a way of dodging work. They have no interest in politics. The students are unaware of the Communist hiding under every rug. They demand specific reasons for everything. In rejecting the principle of generality, they forget that mental ability comes only to the 'first American families.' Any examples to the contrary are freaks of nature."

SCIENCE SAVES TOO

Two or three years from now there may be more Americans alive than if there had been no World War II. So says Dr. Vern O. Knudson, professor of physics and dean of graduate study at the University of California.

"In other words," he explains, "the number of American lives saved as a result of medical research during the war will exceed the number of boys killed in the war."

Tech Grapplers Battle Plainsmen Tonight, Away

Tooth's proponents of the wrestling game will face Auburn tonight in the final regular meet of this season. The Yellow Jacket grapplers bowed to the Tigers in a meet held earlier this year.

Next Friday and Saturday, March 7 and 8, the season will be formally ended with the SEA&U wrestling conference which will also take place at Auburn.

Last Saturday night the Yellowjackets met the number one team in the nation and confidently boast that they will take the Southern Conference championship.

Jerkins Wins

The Tech boys were able to stop the Kaydets in the heavyweight classes only. Jerkins won the 175 pound match by a pin, and Bennett took the unlimited bout by a forfeit. Goleman, who until this meet had not been defeated this season lost in a tightly contested bout which Coach Mall cites as the outstanding fray of the meet.

Jacket Tankmen Battle
For A. A. U. Title Today

This afternoon in Athens, the finals of the Southeastern A.A.U. swimming meet will be held in the University of Georgia pool. Yesterday afternoon and evening, qualifying heats were held, in order to determine the competition for the finals this afternoon.

The outstanding event of the afternoon will be the 200 meter medley relay. This event will pit Emory University against Georgia Tech, two of the stoutest teams in the south. The Emory team, composed of New-
trouncing the Sigma Nu's, 45-27 and the Sigma Chi's in the White League. The KA quintet nipped the Pi Kappa IFC by crushing Phi Kappa Sigma, 33-13.

Thrilling fames of the season. Delta Armory—

Tuesday, March 4 in the Naval Armory—

Wednesday, March 5 in the Naval Armory—

Rumsey Taylor hadn't let the Old Man down; he had come to become "Phantom Fullback." He was a pile-driving fullback that wouldn't be stopped, according to the announcers who were singing his praises. However, Taylor was moved from the B squad to the varsity just a short time before the Bowl game and as a result of his father's move from the B squad to the varsity. Taylor ended his letter with these words:

"I'm expecting to have you as an athlete at Tech, Taylor.""This letter, coming from a man he so greatly admired, inspired Taylor to take a new lease on life and he started to rally. He fought the fever that had pushed him near Death's door, and won.

The standings as of today, March 1 are:

The gymnastic team of 21 men will go to College Park this afternoon to put on an evenings performance for the Georgia Military Academy. This will be the first appearance of the gymnasts away from the field.

AAU Meet

A few of the acts to be included in tonight's performance are the freestyle calisthenics drill, Russian dance, flying rings, silver wands, trampoline, drummers, and bronze tableaux.

Military Academy. This will be the first appearance of the gymnasts away from the field.

Great Beginning

Coach Lyle Welser's gymnastic team of 21 men will go to College Park this afternoon to put on an evenings performance for the Georgia Military Academy. This will be the first appearance of the gymnasts away from the field.

AAT Meet

A few of the acts to be included in tonight's performance are the freestyle calisthenics drill, Russian dance, flying rings, silver wands, trampoline, drummers, and bronze tableaux.

A tentative date of April 12 has been set to give this spectacular performance for the benefit of the Georgia Tech student body. On the following Saturday, April 13, a conference AAU meet will be held for novices. Only gymnasts who have never engaged in team competition will be permitted to participate.

Great Beginning

Coach Welser has gone a long way in introducing this sport to the South. He has given hope of putting it on a competitive basis in the Southeastern Conference by next year. The public approval tendered to the gymnastic team during the past season's basketball intermissions is a good indication of future successes of this sport in SEC circles.

SAE's, Beta T Pi Lead in IFC Bowling Loop

Barnes, Smith Lead Fraternity Scorers

Action in the IFC Bowling League went at a fast pace during the past week as some of the leaders suffered severe losses. SAE continues to hold undisputed possession of first place in the Gold League while PKA is running a close second.

Beta Theta Pi broke a three-way tie in the White League to take the number one spot in that circuit.

Individual bowling averages also underwent a slight cut. Barnes, Smith, and Oakley are running neck and neck for the high scoring honors with only a few pins separating them.

Riflemen Beat Ga.

In their second shoulder to shoulder match of the year the ROTC rifle team outscored Georgia 1755 to 1714. The match was fired Friday, February 21, on the Tech rifle range. Ten man teams from each school fired, with the five high scores of each team counting. The five Tech men with scores which counted in the match were as follows: A. H. Flowers—329; C. H. Hudson—314; M. E. Dixon—351; J. E. Falter, Jr.—346; C. L. Lewis—345.

Plans are being made to fire a return match with Georgia in Athens.
