Annual Pictures Will Be Taken October 7-21

Individual pictures for the 1947 BLUEPRINT will be taken in the Tech gymnasium from Monday, October 7, to October 21, by the Gaspar-Ware studio, it was announced recently by Calvin Johnson, editor.

Pictures will be taken only on weekdays, Monday through Friday, from 9:00 a.m. to 5:30 p.m. Since there is usually a rush the last few days, the two-week period has been divided into two parts.

During the first week, students from A through M will be photographed. The remainder of the student body will be taken on the second week.

Any student who has not had his picture made since June, 1945, is urged to do so in order that the BLUEPRINT will be complete.

The campus snapshot contest will be held by the BLUEPRINT in addition to the annual beauty contest. In the latter, students are to turn in pictures of their best girls with those chosen appearing in the next yearbook.

I. E. Department Plans Open House for Students

The Industrial Engineering Department, newest degree-granting department at Georgia Tech, is sponsoring an Open House this afternoon from five to seven p.m. at the home of Professor Frank P. Groesbeck, head of the department.

This gathering was planned to enable every I. E. student to become acquainted with his fellow students and the faculty. All I. E. students and their wives, or dates, are invited to attend this Open House, which will take place following the football game.

ATOS, SAE Lead Fraternity Pledging

After Rushing, Phi Delta Theta 3rd

The YELLOW JACKET editorial staff and business staffs will have a meeting Tuesday afternoon, October 8, at 5:00 on the second floor of the Y.M.C.A.

All members of the Society for the Advancement of Management are asked to meet on the third floor of the M. E. building at 11:00 A. M. next Thursday, October 10. An invitation is extended to all members of the Sophomores, Junior and Senior classes who are taking an Industrial Engineering course to be present and if they wish, affiliate with the organization.

Tau Beta Pi, national honorary society, will have its first meeting of the year on Wednesday, October 10, at 4:00 in the M. E. lounge. All members are urged to be present at this very important meeting.

All Latin American students enrolled at the Georgia School of Technology are invited to attend a Fiesta on the Tech Y. M. C. A. on Saturday evening, October 6th. There will be entertainment and dancing to Latin American music.

Pi Delta Epsilon, Tech's national honorary journalistic fraternity, has set as its date of its first meeting of the current semester Monday night, October 7, at 7:30 in the basement of the Y.M.C.A.

The organization, which has as its purpose the furthering of journalism on the Tech campus, plans to carry out an extensive program this fall of introducing noted journalists to the students on the campus interested in journalistic work.

Composed of members of the TECHNIQUE, BLUEPRINT and EVANUR SAE engineering staffs, the influence of Pi Delta Epsilon can be seen in each of the campus publications.

Milles Millap is currently heading the organization, with Erskine Love as vice-president and Al Newton as secretary. Professor Wren serves as faculty adviser.

Registration Period Ends; Enrollment Mounts To 4500

Students Are Invited As Debating Society Meets on Monday

M. L. Brittain Debating Society will hold its first meeting of the current quarter Monday night at 7:30 on the second floor of the Administration Building. New students are especially urged to attend. While previous debating experience is desirable, it is not necessary.

Tech's debate organization, one of the most prominent in the south, plans to schedule numerous out of state contests with various southern colleges and universities.

For many years the club has been, and still is under the direction of Professors Ed Folk and Glenn Rayley of the English Department, faculty advisors.

Present officers include Dean Ma-

Platform for registration purposes, the number of students to enter the Georgia Tech Y. M. C. A. will be based on the number of graduating seniors, the number of underclassmen, the number of students dropping out or for some other reason, and the capacity of the individual departments.

The schedule for the rest of the quarter is as follows:

October 5—last day for adding another subject to study list.
October 10—first day for dropping a subject from study list without penalty.
October 19—registration period.
November 28-30—Thanksgiving holiday.
December 13—end of quarter, exams in progress.

The Student Life Club begins classes the next day, January 5.

Various Movies Featured at ‘Y’

Georgia Tech’s "Y" Cabinet is sponsoring a series of films for the fall quarter. The films will be shown in room No. 1 at the Tech "Y" at 7:00 o’clock every Monday evening.

Last Monday “Stanley and Livingstone” was shown and everyone who attended enjoyed it very much.

Films have been chosen for the remainder of the quarter. Beginning Oct. 7th, every other week, the program will be selected short subjects. On the alternate weeks, feature length films will be shown. Everyone is cordially invited to see these films.

The program for the month of October is:

October 7—Stephen Foster, Going Places, and the Story of the Prodigal Son.
October 14—The Great Commanders.
October 28—Brigham Young.

More detailed information on these movies may be obtained at the information desk of the Tech "Y".

Colonel Jeffords Appointed Tech Military Commandant

Foremost among the faculty changes here at Georgia Tech is the appointment of Colonel W. J. Jeffords, Jr., as Professor and Commandant of Military Science and Tactics.

Colonel Jeffords began his work here on the twenty-fifth of August and will be in charge of the new program which has been begun in the Military department.

Colonel Jeffords comes to Tech with a brilliant military background, having served as a regular army officer for nearly thirty years. He was born in Florence, S. C., and attended the public schools there before entering as a student at the Citadel. In 1917 he graduated from the Citadel with a B.S. degree in Civil Engineering.

Entering the army as a 2nd Lieutenant in the Coast Artillery, Colonel Jeffords was stationed here in the States for the major part of World War I. In 1920 he served for a short while in the Quartermaster Corps, but in 1921 again was assigned to the Coast Artillery. In 1924 he graduated from the Coast Artillery Battery officer’s school and then at the outbreak of World War II he received a course at the Command and General Staff school.

Soon after the outbreak of World War II, Colonel Jeffords was sent to London, England, to serve as a military attaché in the American Embassy. He was in London at the time of Pearl Harbor and continued to serve there until August 1944 when he was transferred to the continent of Europe. While there he was stationed at various times in many different countries including France, Norway, Denmark, and Germany. In July 1946, he was sent back to London and served again at the American Embassy until June when he came back to this country.

Colonel Jeffords is the possessor of many military medals and ribbons. Among these are the Legion of Merit, the Bronze Star with one Oak Leaf cluster, the American Defense medal with one Oak Leaf cluster, and the European - African - Middle Eastern Theatre ribbon with two bronze stars.

Not only has Colonel Jeffords received these decorations but he has also been awarded by two of our foreign allies, France and Great Britain. He holds the French Croix de Guerre with Palm and has received a citation for award of an honorary officer in the British Empire.

Colonel Jeffords comes to Tech with a brilliant military background, having served as a regular army officer for nearly thirty years. He was born in Florence, S. C., and attended the public schools there before entering as a student at the Citadel. In 1917 he graduated from the Citadel with a B.S. degree in Civil Engineering.

Chapin’s Registration Workers Are Now Psychopathic Cases

By Jim Pearce

If the coffin stock on the market suddenly soars to a new high, it will probably be due to a man suicide taking place in Mr. Chapin’s domain at Tech. After two weeks of registration woes, the staff is approaching the end; the finish, the breaking point. In other words, they’re all shot.

Rehabilitation

The Psychology Department is thinking seriously of putting out a pamphlet on the rehabilitation of registration workers. They claim their observations will revolutionize treatment of shock, war nerves, and Mayhem cases.

Rule one in the chapin pamphlet will read, “Never, never, under any condition, say the words ‘fee card’ or ‘photostat’ to these poor unfortunate behind the desk.” This would undoubtedly bring about a complete relapse of their observations will revolutionize treatment of shock, war nerves, and Mayhem cases.

The same effect could be produced by going to the circus. The herds of people entering the arena will be led to believe they have been transported to a different world, far away from the stresses of everyday life. The clowns and acrobats will perform their routines, captivating the audience with their Grace and skill.

Mention of the circus also brings to mind the poor unfortunate who gave their all for you. When you hear the108

proof moonshine might have saved the day, but no one thought of that until too late . . . mental depression had already set in.

Poor Unfortunates

So remember to be kind to the poor unfortunate who gave their all for you. When you hear them say, “I’ve already made a mistake,” remember that they are only human, too. And, too, they’re probably the only people in the world who can truly understand what you’re going through.

The Techniques Of Rush Week Finally Exposed

Well another one is behind us, rush week that is. No more of the darn things for another year. How the frazzlersdnly ever endured more than one a year? I’ll never be able to understand.

Come the functions! Boy! Just look at the actsives; a bunch of deacons. You’d hardly know them; Gosh! there sure are a lot of good-looking women here. Boys must have used every phone number they ever heard of. These girls really give the rushes the works.

Well now, I don’t really know much about this, but a lot of odd things went on during rush week that I don’t understand. Why do the Betas move the man hole covers in front of their house just after dark? They tell me the local hardware store sells a lot of bear traps and similar devices to first men; not to mention all the knockout dogs the druggerall during rush week. Of course this was nothing to do with rushing; I was just wondering.

Hey! pledge, run this article down to the editor and hurry back, my nose is heating up!

Football Season’s Here Again With All Its Woes and Joys

By T. Green

Here’s that day you’ve waited patiently seven days for—it is Saturday and another football game. You can hardly wait!

Think about the grand time you had last week and last year at the football games. When you took a date you probably sneaked ever over the Ceramic Building and borrowed a chrysanthemum from that flower bed that was so handy there. Nothing cheap about you—your corsets was bush ripened and if one doesn’t think that doesn’t make a difference, well —

You approach the stadium and by the time you are within two blocks of the place you are so caught in the rush that you couldn’t go the other way if you wanted to. But before you know what has happened you are in your seat. Oh what a nine seat—

even if you can’t see the game from way down there there are some pretty slick walking by out there on第十 Street.

Kilzer Scores for Tech

36,000 Watch Jackets Lose in Tennessee Classic, 13-9

By Bill Gleason
Sheilds-Watkins Field, Knoxville, Tenn., September 28—A valiant fighting band of Yellow Jackets from Georgia Tech fought Tennessee's alert pass defense and General Bob Neyland's strategy for sixty grueling minutes today on better than even terms, but lost 13-9 to a colorful overflown crowd of 36,000 spectators. General Neyland will long remember this opening game as one of his best

Even in going down to defeat before mighty Tennessee the Jackets displayed the true colors of a great team. Time and again a Jacket back would burst into the clear—whipping, twisting, sidestepping—but just as it looked like he would go all the way out of nowhere it seemed came one Vol tackler to bring him down from behind. The Jackets fought for every inch and every yard they made. They continually carried the fight to Tennessee but a fumble or an intercepted pass would turn them back and the way the team fought as a unit in the third stanza to hold the Vols outside the Tech 20 yard stripe brought the cheering war torn crowd to its feet to applaud the stellar Tech eleven as Neyland's shock troops failed to penetrate the stellar Jack forward wall led by the brilliant play of big Bob Davis at tackle, Ewell Pope, Bill Healy at the guards and the unsurpassed line backing and defensive signal calling of Lewis Hook and Paul Duke. The Volunteers drew first blood when they ran back a Tech pass to the Jacket's own 11 yard line and on fourth down with the Vols still 6 yards short of a first down triple back and team captain Walter Slater stepped back and fired a touch-down pass to one of Tennessee's outstanding ends—Hubbel. The attempt-ed kick was blocked by the viciously charging Tech line. Not to be out-done and playing heads up football as usual Tech's stellar and Rabbit Jordan pounced on a Tennessee fumble late in the first period and it took the Tech team just two plays to score on the Vols. The TD was made by Walt Kilzer on a running jump pass from diminutive (Continued on page 5)

CERAMIC ENGINEERING
A PROFITABLE AND SERVICEABLE PROFESSION

Ceramic Engineering among the major engineering fields is the least crowded. There are less than 6,000 trained ceramic engineers today to service a billion dollar industry. Requests for ceramic engineers are received daily by the Georgia Tech Department of Ceramic Engineering.

The ceramic engineer has opportunities in production, sales, education, research and many allied fields. Few other engineering professions offer more chances for a young engineer to establish his own business.

The new era of electronics and atomic energy makes industry very much dependent upon Ceramic Engineering. The ceramic engineer has opportunities in production, sales, education, research and many allied fields. Few other engineering professions offer more chances for a young engineer to establish his own business.
Yellow Jackets Meet VMI Cadets Today

For Red-Jersey Team

On Saturday, October 19, the boys in the red jerseys will have their chance on Grant Field to avenge in part the 13 to 9 defeat of their varsity teammates at Knoxville last Saturday. A large measure of the credit for the fine play of the Jackets last Saturday must go to these boys who furnished the opposition every afternoon on Rose Bowl Field.

The season opener for the "B" team in Albany on October 12 against Clemson "B" team in a charity game for underprivileged children. The Tennessee game will be played here on Saturday, October 19—game time 2:30. The Athletic Association has announced that "there will be no admission charges to this game as it is being played for the pleasure and entertainment of the student body and their friends."

In November, the "B" team will meet Miami at Valdosta in another benefit game sponsored by the Exchange Club and Touchdown Club of Valdosta.

By long standing tradition the "B" team will meet Auburn on Armistice Day, November 11, at Auburn, and will complete the season here on Grant Field on Thanksgiving Day in an annual game with Georgia for the benefit of the Scottish Rite Hospital for Crippled Children.

Schedule
Oct. 19—Tennessee—Grant Field
Nov. 1—Miami—Valdosta, Ga.
Nov. 11—Auburn—Auburn
Nov. 28—Georgia—Grant Field

Attention
All men interested in trying out for basketball managers report to Coach Polk on Monday afternoon at 4 o’clock in the gym.

All Freshmen interested in trying out for a football manager’s job, report to the East stands, under Grant Field, on Monday or Tuesday, Oct. 6 or 7.

The TECHNIQUE Code

With the start of the fall quarter The TECHNIQUE again returns to full strength on the campus. It is the desire and hope of the editors and staff of THE TECHNIQUE that the TECHNIQUE will represent the student body and play its full part in being the voice of Georgia Tech.

In order to prevent any misunderstanding as to The TECHNIQUE's policy, both as to news and editorials, this opportunity is being taken to publish in full The TECHNIQUE Code, as adopted by the Georgia Tech Publication Board, April 23, 1946. This Code was prepared by Prof. Edward Foster at the request of the Board and was approved in full. It constitutes the TECHNIQUE's policy. The TECHNIQUE Code will be abided during the coming year.

THE TECHNIQUE Code

1. Freedom of Press. As citizens of the United States and, usually, of Georgia, the student writers are entitled to the right guaranteed by the Constitutions of the United States and of Georgia. "The Congress shall make no law...abridging the freedom of the Press." (Constitution of the United States, Amendment 1) The TECHNIQUE will safeguard the liberty of speech or of the press; any person may, speak, and publish his sentiments or ideas, however undeserving they may be of favor, to advance the freedom that liberty. (New Constitution of the State of Georgia, Art. 1, Par. XV) Except in certain situations to be mentioned later, TECHNIQUE writers will be permitted to express the views of the school and of the state by writing what they think needs to be said.

2. Truthfulness and Accuracy. By every consideration of good faith with its readers—students, administration, faculty, and alumni—the TECHNIQUE will endeavor to be truthful. Difficultly in obtaining facts or hate in getting a paper to press is not a sufficient excuse for false or misleading statements. This provision does not prohibit the use of any device to add emphasis or because of time restraints, to use an editorial technique, but also to signed comment and to letters to the editor. When facts are questionable, the editor shall withhold publication until they can be checked.

3. Fair Play. The TECHNIQUE will not publish charges reflecting upon the character or conduct of any individual or group, except upon request of that individual or group, or the editor shall withhold publication until they can be checked.

4. Decency. The TECHNIQUE will avoid profanity and also obscenity where the intention is to deprave others or corrupt their ideas. Whether in the form of writing or cartoons, the test of obscenity is "whether there is a probability of mistakes seriously damaging to the institution and themselves, and in other cases where obscenity is being done, or if the editor shall withhold publication until they can be checked.

5. Further Responsibilities. Though in every controversial issue, it is desirable to have the students, administration, faculty, and alumni express themselves in defense of their institution. From time to time, from March 1 through May 31, a "referee" on the Dean's Team; and a "father confessor" in the final court of appeal when the President is out of town may be appointed to listen to students. At this time the most difficult is to provide student work, or steals school work, or steals a Georgia Tech of which we may all be proud.

The Executive Dean—His Job

By Dean Phil Nsmore

The Executive Dean combines all the responsibilities concerning students of a "spokesman for Georgia Tech" when requiring discipline; a "referee" or "father confessor" when students break attendance rules; a "coach" on the Dean's Team; a "referee" on the Dean's Team; and a "father confessor" in the final court of appeal when the President is out of town.

The work of administering discipline is naturally unpopular.被告者フレーズは、初めて手にした学生の手当を、手紙で開ける。
