</table>
The honoraries strive to give some recognition to the outstanding achievements of the students. Koseme Society shown at the right is a typical group.
The Georgia Tech ANAK Society was organized on January 1, 1908, to honor select men from the Senior Class who were outstanding among their fellow students by their achievements and services to Georgia Tech. ANAK has contributed from its membership, many Tech men who have become leaders of national prominence. ANAK ranks with Omicron Delta Kappa as the highest honor a Tech student may receive.

Omicron Delta Kappa, national leadership honor society for men, was founded in 1914 at Washington and Lee University, and the local circle was established in 1932. Members are selected on a point basis, a definite number of points being given for each honor or position attained by the student. When a student has amassed enough points and a definite scholastic average he is eligible for election. ODK ranks with ANAK as the highest honorary organization on the Tech campus.
The Koseme Society, established by ANAK in 1938, recognizes juniors and third-quarter sophomores who have been outstanding in extra-curricular activities. Not merely an honorary, Koseme each year undertakes several service projects, among them the preparation of the instructor-course list at the beginning of each quarter.

Phi Kappa Phi is the oldest national scholastic honor society on the Georgia Tech campus. Founded in 1897, it now has chapters in more than 50 colleges and universities. Membership in Phi Kappa Phi is awarded to those members of the senior class who are outstanding in scholarship during their first three years at Georgia Tech. The local chapter conducts the annual Honors Day exercises and awards a cup each year to the senior with the highest scholastic average.

Phi Kappa Phi—represented in all departments.

Beta Phi

Tau Beta Pi is the leading engineering honor society in the nation today. In 1925 the Georgia Alpha Chapter was installed on this campus and is today one of the largest of the ninety undergraduate chapters now in existence.

Engineering students who rank in the upper tenth of the junior class or in the upper eighth of the senior class are eligible for membership. The election of members is also based on excellence in leadership, character, personality, and service.

Tau Beta Pi actively supports and sponsors various school projects. The local chapter annually awards a scholarship cup to an outstanding senior selected on the basis of all his scholastic work.

Eta Sigma, a national freshman honorary scholastic fraternity, was established at Georgia Tech in 1930. Membership in Phi Eta Sigma is the highest scholastic honor a freshman can attain at Georgia Tech. Only those men who have a point average of 3.5 for the first quarter, or an overall average of 3.5 for the entire freshman year are eligible for membership. Each spring the fraternity presents a cup to the freshman having the highest scholastic average for the first quarter.

MOT MORRISON
Treasurer

Alpha Pi Mu, a national honorary industrial engineering society, was founded at Georgia Tech in the fall of 1948 as a society for the recognition of industrial engineers with superior abilities.

The local chapter was granted its charter by the Student Council on January 25, 1949, and was recognized by the state of Georgia on March 17, 1949.

Membership is limited to juniors, seniors, and graduate students of high scholastic standards, who possess traits of high leadership, character, and ethicality. Only those juniors who are in the upper one-fifth, and those seniors in the upper one-third of their classes are eligible.

MEMBERS
Chi Epsilon is the only national honorary fraternity limited to those men in the field of Civil Engineering. Founded in 1922 at the University of Illinois, the fraternity now consists of 43 chapters in leading colleges throughout the country. Chi Epsilon recognizes the qualities of scholarship, character, practicality and sociability in civil engineering undergraduate and graduate students. The Georgia Tech Chapter of Chi Epsilon, chartered in 1943, was formed from Civil Crew, the oldest honorary society on the Tech campus.

IM SOCIETY

Since 1937, the Industrial Management Society has selected those seniors and third-quarter juniors whose scholastic achievement, general campus leadership, and interest in the field of industrial management qualify them for membership in the departmental honorary organization.

Plant tours, talks by business leaders, occasional social events, and the unique annual Bullrymple Golf Tournament comprise part of the Society's activities.

In addition, the Society functions to stimulate interest among the student body in the field of industrial management, and to promote the friendly student-faculty relationships which mark the IM department.

Kappa Kappa Psi is the national honorary fraternity for band members. It was founded on the campus of Oklahoma A&M College, and now has chapters all over the country.

Iota Chapter at Georgia Tech was founded in the early twenties, and has been active ever since. Membership is based primarily on musical ability, although leadership and band activity play a large part in the selection of members. The chapter sponsors an annual banquet for members, their wives and dates, as well as an occasional wiener roast or barn dance. The A. J. Garing Award is presented annually by Iota Chapter to the outstanding graduating senior in the Tech band.

The Georgia Tech chapter of Keramos Fraternity was founded in February of 1919. The history of the fraternity dates back to 1902 when the organization had its beginning at Ohio State, thus making it the oldest national professional fraternity in existence. The purposes of the fraternity are to promote and emphasize scholarship and character in the thoughts of ceramic students and to furnish an additional tie of college friendship. Many of the United States' outstanding leaders in the field of ceramic education and ceramic engineering are members of Keramos.

Phi Lambda Upsilon was founded as an honorary chemical society in March, 1899, at the University of Illinois. A charter was granted at Georgia Tech in 1951. The aims and purposes of the society were from its inception "the promotion of high scholarship and original investigation in all branches of pure and applied chemistry." At the present time there are 46 chapters of the society at major universities throughout the nation, with a total membership of twenty thousand.

All students of chemistry, chemical engineering, and allied fields who are in the upper 20% of their class and who have an overall average of not less than 3.0 are eligible for membership. Election of members is on a scholastic basis and elections are held semiannually.
Phi Psi is a national honorary textile fraternity which has as its aim the promotion of better feeling and closer relations between the textile students, and the strengthening of the position of the textile industry. Election to membership is limited to a percentage of junior and senior textile students having qualifications in scholarship, leadership, and character.

Pi Delta Epsilon is the national honorary journalism fraternity at Tech. Its members are men who have served in an outstanding manner for at least two years on the staff of one of the four publications. It seeks to establish a code of ethics among the staffs of the individual college publications. Several projects are undertaken each year. Professor rating sheets were established by PiDE. PiDE also publishes a pamphlet explaining publications to incoming freshmen and plans to start putting out the student directory. Each year trophies and certificates are awarded to those men who have contributed the most to the individual publications and to all publications as a group.

Pi Tau Chi is a national honor society for the recognition of leadership, loyalty, service and scholarship in the work of the Christian Church among students on college campuses.

In May of 1952 at the Georgia Institute of Technology the Beta Gamma chapter of Pi Tau Chi was organized and received its charter. To every Christian student at Georgia Tech the doors of this chapter are open. Let the existence of Beta Gamma serve as a challenge to excel in Christian and unselfish service here on the campus.

The Sigma Gamma Tau Society was formed on February 28, 1953 at Purdue University by a merger of the two national honorary aeronautical engineering societies, Tau Omega and Gamma Alpha Rho.

The purpose of Sigma Gamma Tau is summarized in the Preamble of the society's national constitution, which states: "The Sigma Gamma Tau Society is established to recognize and honor those individuals in the field of aeronautics who have through scholarship, integrity, and outstanding achievement been a credit to their profession. The society seeks to foster a high standard of ethics and professional practices and to create a spirit of loyalty and fellowship, particularly among students of aeronautical engineering.

**SIGMA PI SIGMA**

*Sigma Pi Sigma*, the Physics Department honor society, endeavors to promote interest in physics through lectures and demonstrations which are open to the public. It sponsors the Physics Club and assists physics majors in their choice of electives outside the department. While membership is not strictly limited to physics majors, it is necessary that a candidate for admission take a sufficient number of junior and senior physics courses and maintain a superior academic average.

Politics Hit The Campus

Every person knows how important it is to advertise so the campus politician starts his campaign by posters.

A firm hand shake and a warm smile plays a big part on election day.

A line forms as students take part in student government by voting.

Smiles show that he thinks he has voted for a winner.
Tech students are able to voice their opinions on the student government through the Student Council. Shown at the right are some prospective members campaigning during spring elections.

The Student Council, which was first established in 1922, is the student government organization. It serves as the principal liaison agent between the student body and the school authorities and is the authoritative voice of the students. The Student Council controls the use of student activity fees and handles all financial matters involving the general student body. The council is also in charge of all elections of class officers and Student Council representatives. The members are elected by popular vote in the spring quarter of each year, with the exception of the freshmen who are elected at the first of the fall quarter.

IFC TRIAL BOARD

Tech has long been known for its outstanding publications. This year they have been under the capable direction of the Publications Board shown at the right.
The *Blue Print*, which is the official yearbook of Georgia Tech, is published by the students during the latter part of the Spring term each year. Sections of each yearly issue are devoted to administration and faculty, campus activities, features, fraternities, athletics, and classes in an attempt to present as complete coverage as possible of the various activities which take place on the Tech campus during the school year. Work on each issue of the *Blue Print* is always begun during the Spring quarter in which the preceding issue is printed. For many years the *Blue Print* has ranked high in the field of collegiate yearbooks, having received in the last five years, two First Class and two All-American ratings.

We, of the 1955 staff, sincerely hope that you will enjoy reading this issue of the *Blue Print* as much as we have enjoyed putting it together. There were many seemingly hopeless days and even quite a few nights of hard work spent in the production of this yearbook, but there was quite a lot of fun and pleasure derived. We hope it has been worthwhile to you, the students, who will read this book in years to come. It has been to us.

The latest developments in engineering and technology are published eight times a year by the staff of the Georgia Tech Engineer. Student writers prepare the articles, edit the material and organize each issue for publication. Art work and business management also play a big part in producing the Engineer, which is respected nationally as among the best in engineering college magazines.
The *Technique* is the semi-weekly newspaper of the Georgia Institute of Technology. Its primary purpose is the publication of student news, including news of organizations, campus activities, sports, and other events of interest. Student opinion on current affairs is also expressed through the medium of an editorial page containing letters to the editor, opinion polls, and discussion articles.

The Yellow Jacket is the Georgia Tech humor magazine. The main objective of the Yellow Jacket is to serve as an outlet for creative writers, cartoonists, artists, and photographers on the campus. Articles of technical or even semi-technical nature are of no concern to this publication. The expected results of the Yellow Jacket embrace all forms of enjoyment. The students who read the magazine do so for the pleasure that they receive, rather than for practical knowledge.
The Publications Board, made up of representatives from the student publications, is the governing body on policy and scope of coverage as pertains to each. The editors, business managers, and faculty advisers from the Blue Print, Engineer, Technique, and Yellow Jacket are automatically members of the Board together with a representative from the Student Council and Pi Delta Epsilon.
Departmental societies at Tech help promote interest within the department. They also help to stimulate outside interest by work on Engineer's Week such as shown on the right.

The student chapter of the American Association of Textile Chemists and Colorists was originally formed on the Tech campus in 1935. The Association affords an opportunity for the student to become better acquainted with the chemistry and dyeing of textiles through the medium of motion pictures, field trips and speakers prominent in the textile field. Its purpose is to promote an increase in knowledge of the application of dyes and chemicals in the industry, to encourage research on chemical processes and materials of importance to the industry, and to establish channels through which the interchange of professional knowledge among members may be increased.

The American Ceramic Society was instituted on the Tech campus in 1926 as a student branch of the National Organization. The activities of the American Ceramic Society are numerous, some of which include frequent talks by prominent engineers and business men in the ceramic industry and participation in social functions. Thus the members are unified and led in the spirit of cooperation and fellowship toward a common goal of personal development and professional achievement.

The purpose of the student chapter of the American Institute of Chemical Engineers is to promote the professional development of students of chemical engineering. Further A.I.Ch.E. endeavors to foster a professional spirit among its members and instill a professional pride in chemical engineering. The Georgia Tech chapter recognizes scholastic achievement by presenting annual awards to those who have distinguished themselves in chemical engineering, and, in addition, sponsors numerous social functions throughout the entire school year. Other chapter activities include lectures, movies and presentation of technical papers to the annual national convention.

The American Institute of Electrical Engineers was founded in 1884, when the possibilities of an organization which would foster and encourage electrical development were beginning to be realized. The objects of the institute are the advancement of the theory and practice of electrical engineering, maintenance of a high professional standing among its members, and the development of the individual engineer. The institute has contributed largely toward the remarkable progress that has taken place in the electrical field since the latter part of the nineteenth century. All branches of electrical engineering are represented in the membership.

The Georgia Tech Chapter of A.I.E.E. was established in 1915, and is one of 127 student branches in leading technical institutions of the country. Activities to stimulate student interest here include lectures, demonstrations, movies, tours, and an annual delegation to the national convention to present technical papers written by Georgia Tech students.
AMERICAN INSTITUTE

The American Institute of Industrial Engineers is a national organization for industrial engineers or professional men who are performing duties in the industrial engineering field. The student chapter of Georgia Tech was organized after the opening of the Industrial Engineering School on the campus in 1946. The aim of the Georgia Tech student chapter is to create, develop, and maintain a keen interest in the field of industrial engineering. To do this, an opportunity to further study the principles taught in the classroom is given to the members by having qualified speakers, illustrative movies, and plant tours to the many diversified types of industry in the Atlanta area. The chapter represents the School of Industrial Engineering in the various campus activities and functions and acts as an agent to its members for the dissemination of the latest industrial engineering developments.

The Georgia Tech Student Chapter of the American Society of Civil Engineers received its charter in 1924. It is active in obtaining films, speakers, etc. It also takes the lead in the planning of entries for Engineers' Week from the CE Department and provides a medium for the get-together of students and an exchange of ideas. Field trips sponsored by the Chapter give members a chance to see the theory of Civil Engineering translated into practical use.

Membership is open to Junior and Senior CE students only. However, the meetings which are held in the CE building are open to all students in the Department.
