The Georgia Tech Student Chapter of the American Chemical Society is affiliated with the national American Chemical Society. The national society was founded in 1876 while the idea of student affiliate chapters was adopted in 1937. The purpose of the society is to afford an opportunity for the students of Chemistry and Chemical Engineering in the Georgia Institute of Technology to become better acquainted, to secure the intellectual stimulation that arises from professional association, to secure experience in preparing and presenting technical material before chemical audiences, to foster a professional spirit among the members, and to install a professional pride in chemistry and chemical engineering.
The Society is an affiliate of the Georgia Chapter of the American Institute of Architects. Its membership is open to any student in the Architecture Department, who is taking at least Junior design, and ranks in the upper two thirds of the Institute according to the point grades published by the Registrar.

The prime function of the Society is to promote fellowship, cooperation, and a spirit of unity between students. It also attempts to represent the students of the school collectively in all extra-curricular matters relative to the faculty of the school, the profession, and other campus organizations.

At present, there are several events which the Society promotes each year. Some of these are as follows: the Beaux Arts Ball, the Engineers' Week Exhibit, the co-sponsorship and entertaining of visiting lecturers, and small parties for members.

The Georgia Tech branch of the American Society of Mechanical Engineers gives the mechanical engineering student an opportunity to become better acquainted with the professional part of engineering by conducting weekly meetings. To these meetings are invited prominent engineers who discuss the current advances in engineering. All mechanical engineering students are eligible for membership in A.S.M.E. Membership in this society is a real step toward acquiring professional standing in the engineering community.
The Institute of Radio Engineers (IRE) was organized in 1912, to advance the art and science of radio communication and related fields, and to promote the professional welfare of engineers engaged therein. The Georgia Tech student branch, formed in 1945, is chiefly interested in broadening the professional interest of its members. This is achieved through regular meetings to which prominent engineers in the communications and electronics fields are invited to speak.

Designed to encourage original thought, the National Institute of Aeronautical Science coordinates the different phases of aeronautics, including education, engineering, and production. By opening its rolls to aeronautical students, it affords the prospective engineer an opportunity to become acquainted with many aspects of the field outside the classroom.
The Society for the Advancement of Management is the recognized national professional society of management people in industry, commerce, government and education. Representing no special interest, it is motivated by a selfless zeal to spread the benefits of scientific management wherever management is required. It has constantly adhered to the purpose of helping executives approach all phases of the management problem—Production, Distribution, Administration, Industrial Relations—in the engineering manner.

The student chapter of Georgia Tech was the first departmental society in the Industrial Engineering department, but has since opened its membership to all departments. Representation of all the engineering fields provides a more complete understanding of management problems.
The Society of American Military Engineers was organized in 1920 for the purpose of preserving and studying the experiences of the engineering profession in World War I. The purposes of the society are: to advance knowledge of the science of military engineering; promote efficiency in the military engineer; encourage, foster, and develop among military engineers and other arms of the military service a spirit of co-operation and mutual understanding of their respective duties, powers, and limitations; to hold meetings for the presentation and discussion of appropriate topics that should be helpful and of interest to the organization's members.

There are eighty-five posts throughout the country in larger cities and colleges. The Georgia Tech Student Post was chartered in 1942, and is composed of Army, Navy, and Air Force R.O.T.C. cadets.
The clubs at Tech show the wide scope of interest of the students. Typical of which is this group who are part of the Glee Club.
The Activities Council strives to acquaint all Tech students with the various organizations on the campus. Each fall the Council presents the annual Activities Fair, where students have an excellent chance to learn of the projects and work of many different activities. Each organization has a member who serves as Councilman and prepares the project for his activity to be presented at the fair. During the past year the Activities Council accepted and performed many new duties and responsibilities which were for the betterment of all campus organizations and Georgia Tech as a whole. The past success of the Activities Council clearly shows that it will be a mainstay here on the Tech campus for many years to come.
The St. Patrick's Council was organized in the early part of 1950 on the Georgia Tech campus. The purpose of its organization was to promote the interest of the Georgia Institute of Technology and the several honorary and professional societies within its academic schools, departments, and divisions. Its primary undertaking at the present time is to promote, plan, develop, and coordinate all of the several activities leading up to and including Engineer's Week celebrations, to the end that such societies shall be encouraged to compete in their contributions to the professional developments of management, engineering and science students.

Members are elected by the active honorary and professional societies in their prospective fields.

The purpose of Alpha Phi Omega is to assemble the men of Georgia Tech in the fellowship of the Scout Oath and Law, develop friendship, leadership, and association among Scout trained men, promote service to the student body and faculty, to youth and community, to members of the fraternity, and to the nation as participating citizens.
The Georgia Tech Auto Club, founded at the beginning of this year, has enjoyed phenomenal growth. The importance of the club has been recognized by donations from prominent Atlanta businesses. Wagstaff Motors has given the club a V-8 engine with which to build an experimental dragster. The speed equipment has been donated by Atlanta Piston Ring and Parts Co. The club is contemplating joining the American Society of Automotive Engineers. If they do, they will be one of the first student groups to make this move in the United States. The club are the co-sponsors of the drag strip at Fairburn, Georgia. The activities of the club include speakers and moving pictures on all phases of the auto industry.
CAMERA CLUB

The Georgia Tech Camera Club was organized for the benefit and instruction of the many amateur photographers in the student body. The club maintains an adequately equipped darkroom which is available to all members.

The activities of the club include instructive lectures by well known photographers, Visual-Aid movies, planned model nights, field trips, and two salons each quarter. One of the interesting highlights of last year was a visit to the Academy of Charm during which many glamorous professional models posed for the cameras of the members.

Members receive the best possible instruction in the quarterly salons. At this time well known Atlanta photographers judge and criticize the prints and color transparencies submitted.

The Circle K Club was organized on the Tech campus in 1950 by the Northside Kiwanis Club of Atlanta, their sponsors. Membership is open to anyone wishing to be of service to Tech and Atlanta.

The club was fortunate to have two International officers among its members this year. Eugene C. Alford served as International President and Carter Terrell as Secretary.

Among its projects for the year, the club worked with the Student Council on Spring and Fall elections; collected contributions for the March of Dimes, Heart Fund, and Red Cross drives; and participated in many other worthwhile projects. Circle K is constantly striving to be the most progressive and useful group on the campus.
The Bulldog Club, one of the campus' leading organizations, is responsible for a large part of student extra-curricular activities. With the help of the Athletic Association, the club sponsors, directs and provides officials for all intramural contests. It is responsible for the annual Homecoming weekend, which includes the Homecoming decorations contest, the Homecoming dance, the Freshman Cake Race and the Ramblin' Reck Parade.

Members are selected twice a year from the most outstanding juniors and seniors. Any group participating in intramural sports is eligible to submit names of initiates. The Bullpups colorful initiation in the fall and spring of each year is a campus tradition.

The Co-op Club was organized in 1915 by a group of outstanding co-op students for the purpose of promoting interest in co-op activities and fostering a spirit of fellowship among students in the Co-operative Department. This club is one of the oldest social organizations on the campus. Members of the Co-op Club are selected from upperclassmen of the Co-operative Department who are outstanding in leadership and character, and who have manifested an interest in co-op activities.

The Co-op Club is divided into two sections, each representing the separate sections of the Co-operative Department.
Club

Section II

Section I is active during the winter and summer quarters, and Section II is active during the fall and spring quarters. Although the two groups are entirely separate, co-operative spirit is their primary purpose and close harmony is maintained to achieve this.

Members of both sections of the Co-op Club are heavy competitors in scholastic and extra-curricular activities. This competition has led co-op students to attain higher levels of scholastic nature. Both of these units rank high on the campus as social and scholastic groups.

The Georgia Tech Geology Club was organized October 4, 1954, by students with a mutual enthusiasm for the study of geology, mineralogy, and their relationships to engineering. Anyone whose interests are in harmony with those of the club may become a member. Field trips and guest speakers are part of the planned programs on the club's regular docket.
FLYING CLUB

By providing low cost flying and instruction, the Georgia Tech Flying Club gives every air-minded Yellow Jacket the opportunity to further his aviation interests. Actual flying, coordinated with interesting basic ground school subjects, provides all the requirements for becoming a licensed pilot. Through the cooperation of the Aeronautical Engineering Department and the College Inn operating costs are kept at a minimum. In the near future plans call for installation of a more powerful engine and night-flying equipment in the club's Aeronca Champion aircraft.

The Tech Management Club is the student organization of the Industrial Management Department embracing all fields of Industrial Management work. Its membership is open to all Industrial Management juniors and seniors. The members and advisors are greatly interested in all Industrial Management students participating in this club so that they might learn firsthand about the management side of industry. The club now boasts a membership of over one hundred, which is one of the largest in its history.

During the school year the club sponsors many activities of interest to the student of Industrial Management. Some of its more outstanding activities are talks by outstanding industrial leaders, field trips, and social events.

The Pan American Club of Georgia Tech was founded in 1953 with the purpose of getting students acquainted with Latin American affairs and establishing better relations among students from different countries. The scope of the club also includes social activities and intramural sports.
The Physics Club was founded in 1950 by the Georgia Tech chapter of Sigma Pi Sigma, honorary physics society, for the purpose of creating an interest in physics among the students. The only requirement for membership in the Physics Club is an interest in physics. The programs during the year have included a trip to the Agnes Scott Observatory and several talks by scientists from Oak Ridge. For those interested in the physical sciences, the Physics Club offers a chance to further their interest.
The Georgia Tech Radio Club is primarily an organization of enthusiasts of amateur radio. Its primary aim is to promote the general welfare of its members and to maintain an active interest in communication by amateur radio. To fulfill that aim, the club owns high-powered transmitters which cover all the active "ham" bands. This equipment is in the club "shack," which is located in the penthouse atop the Physics Building.

A second purpose of the club is to provide instruction in the principles of amateur radio for aspirant "hams," to enable them to qualify for the required government license. Code practice machines, lectures, and training films accomplish this purpose.

The final goal of the club is to provide a common meeting place for those interested in radio, so that they may become acquainted with each other, exchange technical information, and become members of a radio brotherhood at Georgia Tech.

This year the Ramblin' Reck Club has been very successful in carrying out its purpose of developing enthusiastic school spirit. The pep rallies held by the club during football season were highlighted by the spectacular "Beat Georgia" bonfire rally which was attended by more than two thousand students. The club also sponsored Ramblin' Reck contests during the fall and the "Stunt Night" program during the spring. In addition to these activities the Ramblin' Recks set forth and enforced the requirements of the freshman "rats."
The Spiked Shoe Club is an honorary track and field society, the membership being composed of outstanding lettermen from the varsity track and cross country teams. The specific purpose of the Spiked Shoe Club is to bring together in a closer bond the track men in the Southeastern Conference and to further the interest of track.

TOASTMASTERS CLUB

OFFICERS

ROBERT WINN
President
HARWOOD BARTLETT
Vice President
CHARLES COBB
Secretary
GEORGE SUDDATH
Treasurer

The Georgia Tech Chapter of Toastmasters' International, founded in 1950, was the first college chapter among the hundreds of Toastmasters' Clubs.

Toastmasters is more than a club—it is an education. It is especially useful on a technological campus, since it seeks to improve, through practical experience, the ability to speak in public. Weekly, through planned programs, members deliver prepared and extemporaneous speeches, thus constantly improving their power of speech.
The aim of the Georgia Tech Canterbury Club is to serve the Mission of Christianity in higher education by fostering among the students of Georgia Tech a better understanding of the faith and practice of the Episcopal Church and loyalty to its corporate life. Meetings are held each Sunday evening in the parish of All Saints Church with other college students of the Diocese. A corporate service of Holy Communion for Canterbury Club members is celebrated on the third Sunday of each month.

The Baptist Student Union serves as the link between Tech's fourteen hundred Baptists and the local churches, promoting not only Sunday School and Training Union but active participation in the local churches' organizations. On the campus, the B.S.U. sponsors vespers, Bible study and discussion groups, intramural athletic teams, a monthly newspaper, and various social activities. The Baptist Student Center, located at 734 Techwood Drive, N. W., is the campus headquarters for the B.S.U.

Every Baptist student who is a member of a local Baptist church or who is a member of a Sunday School class or Training Union in a local Baptist church is a member of the Baptist Student Union. Total membership is more than four hundred. Pictured on these pages are the B.S.U. Executive Council members, Freshman Council members, and members of the committees which make up the Greater B.S.U. Council.
As a club of Catholic culture and Catholic fellowship, the Newman Club is organized in order to deepen the spiritual and enrich the temporal lives of its members through a balanced program of religious, intellectual, and social activities; to weld the Catholic students into a common union; and to assist the college and its students whenever possible.

The Georgia Tech chapter of the National Newman Club Federation was established in 1928. Since that time, under the spiritual guidance and assistance of its chaplains, the Club has been cited as the campus organization which most nearly achieved the purposes for which it was founded.

Center of Club activities on campus is the Newman House, adequately equipped with intellectual and recreational facilities. In addition to weekly meetings, activities include corporate communications, spiritual retreats, lectures, discussion groups, parties, dances, picnics, and outstanding participation in the intramural sports program.

The Georgia Tech Wesley Foundation is the official agency of the Methodist Church at work on the Tech campus. The organization is housed in the Methodist Student Center located at the corner of Fourth and Fowler Streets. The purpose of the Foundation is to provide a program that creates a greater personal relationship with God, and continues to strengthen those ties with the church, made in youth, which assure full Christian maturity.

Activities of the Wesley Foundation include participation in Intramural sports, Student Conferences, Deputations to other Colleges, Wesley Singers, Worship programs, Community Service projects, and World Friendship aid to foreign colleges. These activities are administered by a Student Council under the direction of the Director of the Wesley Foundation.
"See you at the Y" is a popular expression on the Tech campus. Many campus organizations use the several rooms available for meetings and the "Y" camp near Roswell, Ga., which is available for hayrides and parties.

The purpose of the "Y" is not only to help young men help themselves, but also to help them help others. The different organizations sponsored by the YMCA are Alpha Phalanx, Sigma Phalanx, Camp Committee Recreation Council, T-Book Staff and the World Student Fund. The Cabinet, composed of the presidents of the various groups, is the nucleus of the Association.

The Georgia Tech Band followed its usual full schedule of events again this year. This year, for the first time the band was led by majorettes. The band participated in all the half-time shows at the Tech home football games and followed the team to Dallas for the Cotton Bowl game on January 1. The band also furnished music at the Tech Night festivities held at the Fox theater.
Drama Tech was founded in the year 1946 to stimulate student interest in dramatics and to give potential engineers a chance to develop their acting and producing abilities. This year the club opened its membership to the faculty and employees of Georgia Tech, acquiring many interested and talented members.

Each year the club presents three plays, one per quarter, giving its audiences a very diversified bill of entertainment. From the rollicking humor of "The Milky May" in the fall of 1952, the club turned to the dramatic success, "The Hasty Heart." Then it triumphed in the powerful "Stalag 17" last spring to conclude its yearly program. This fall the club undertook a variation of its now-accomplished arena presentation to explore another, more-exacting technique with its heart-warming production of "Mr. Roberts," staged "on three sides." At the same time it welcomed back its director of the four previous years, Mrs. Mary Nell Ivey, who has always encouraged the club to increase its proficiency and has contributed much to its advancement.

Fixing the stage sets.
The Georgia Tech Glee Club, some fifty voices strong, has in the past few years gained the reputation of being one of the most traveled and best known organizations on the campus. Under the able direction of Mr. Walter C. Herbert, the Glee Club continued its traveling and singing this year. Twice recently the glee club has gone to New Orleans to entertain in the Blue Room of the famous Roosevelt Hotel there. These trips were preceded by trips to Miami, Greenland, Bermuda, Newfoundland and Europe. Last year the glee club appeared on a nationally broadcast television show with Ed Sullivan. In addition to continuing its usual travel this year the Glee Club sang for several organizations around campus.

A view of the Georgia Tech Glee Club before a performance.
Phalanx is a Y.M.C.A. club program for young men eighteen to twenty-five years of age. Its activities promote fine friendships, develop useful skills, stimulate sound thinking, and encourage support of democratic principles and Christian values. The name Phalanx, a Greek word for a closely knit military formation, suggests group unity—moving forward together—and embodies the purpose and objectives of the organization.

Dunwody speaks at Phalanx sponsored Freshman camp.
