McKINNON AND JAMES NAMED FOR OTHER "Y" OFFICES

Ray Kytle was elected president of the Tech Y. M. C. A. in an all-school election held on the campus last Monday. Jack McKinnon, sophomore, and Willard James, freshmen, were elected to fill the offices of president and secretary-treasurer, respectively.

Kytle is well suited for the newly acquired office, as he has been active in "Y" work for the past three years at Tech. In addition to his many campus honors, he was recently made a member of the Georgia State Y. M. C. A. - Y. W. C. A. conference at a meeting in Atlanta. He is a member of Pi Delta Epsilon, editor of the campus honors, he was recently made a member of the "Y" Cabinet.

Bob McKinnon and James have proven their ability for their offices through the active work they have been doing during the past year in the "Y" Cabinet.

The new officers will be installed at the "Y" annual banquet to be held in the near future. They will be installed in the presence of the student body and the public on May 12th at the Young People’s Sunday night meeting in the Tech Y. M. C. A. auditorium.

The purpose of the "Y" election, which will automatically become a member of next year’s Student Council; the vice-president will also get a position in the Student Council. Quite a few men have taken an active interest in the "Y" work during the past year and it is hoped that they will continue to render their services and follow the leadership of the new officers and cooperate with them as well as they have with the officers during the past year. The men on the ballot who were not elected to office are nevertheless key men; they will continue to serve the students and better themselves by active participation, the "Y", the student body and themselves will benefit therefore.

Interfraternity Baseball Tourney Draws Near; Schedule Completed

Thirty-one soft-ball teams began play on Monday, the eighth of May, for the four league, three fraternity and one non-fraternity.

All the teams entered have been broken into two groups and are soon to be divided. Ten games will be played in each group, with the winners of each group to play off for the championship.

John Ridley has announced that the winner of the inter-fraternity tournament will be given a cup by the Interfraternity Council.

Coach Alexander announced that he is going to give a cup to the championship team. This is to be decided at the end of the season by a play-off between the fraternity champions and the non-fraternity champions.

This season is expected to be even more interesting than that of last year. More students are interested in the game and more teams have entered the tourney. All of the students are urged to come and see on of the teams.

Last year’s Interfraternity Softball Tournament was won by the Alpha Tau Omega’s. In a hard fought game the A. T. O.’s beat the Delta Sigma Phi’s for the winning game.

This is the first year that the non-fraternity groups will play among themselves. These games will do much toward furthering inter-varsity sports at Tech.

With spring weather, the fraternities are already preparing to start their teams for practice. These practices will do much to make the tournament games more lively.

The "soft ball" nine is in reality a team, the additional men being an extra substitute. The "soft ball" is much larger and, as the name implies, suffers in size. It is held as far as the regulation ball.

O.K.D. and Freebody Plan for Tech Day

One of the biggest events of the year is just a few weeks away. The students will participate in the ceremonies and a combination of Honor Day, Annual Field Day, and a tour of the various departments of the school sponsored by Omicron Delta Kappa, in conjunction with the Freebody Club, will blend together to form "Tech Day" April 2nd.

Monday morning, when the ballots for the finals in the Student Council election are circulated in the residence halls, a letter, printed by the members of O.D.K. and addressed to the fathers of Tech students, will be given each student. The purpose of this letter is to inform the fathers and mothers of Tech students to take part in the election of Tech Day. O.D.K. and the Freebody Club will conduct tours of the various departments of Tech, and point out the points of interest to the visitors.

The Honor Day exercises will take place in the morning, at which time awards and honors will be bestowed upon outstanding students and campus organizations. The Honor Day exercises will be held in the morning, at which time awards and honors will be bestowed upon outstanding students and campus organizations. The ceremonies will be held in the morning, at which time awards and honors will be bestowed upon outstanding students and campus organizations. The ceremonies will be held.

Dirty Pool... "Honesty is always the best policy." Stretching this a bit we might say that such a statement in politics is always the best policy," or, parallelizing the well known adage, "crime does not pay," we might presume "dirty politics does not pay." In reference to this last we offer the thoroughly disgusting...
COLLEGE COMMENTS

BY J. A. J. C.

One of the best stories of the year comes from Armour Tech. It concerns a group of yielded politicians who lured out of a night club and set, arm in arm, in their precarious journey homeward. After traversing several blocks they stopped before a large mansion and held a hushed and hierarchy conference. Finally one of the heartily-handled blocks away from the group and caused the job of climbing the mansion's seven stairs. After several unsuccessful attempts he reached the door and, bestowing a woozy grin of triumph on his friends below, pushed the bell-button half way through the wall. Immediately a window was opened and a feminine voice yelled: "What in blazes—do you want?"

The blarey one below answered with anguish sweet:

"Ish Ish bin Missis—I'm—Smith!"

"Yes! What do you want?"

"Will you pleesh come down and—his—pick out your hushand. The rest of sub want to go home."

I'd like to be a college boy, He lives a life of easy, For when he graduates, He does it by degrees. —Armour.

Out of 53 students at W. & L. asked, "What in h— do you want?" and 44 students replied that they wanted to pick out their husbands. The rest of the students asked whether they could have a possible hushand. The weekly in the Ring-tum Phi.

He had toiled the entire evening, And he entered without knocking, So his mind was all for pleasure, And he entered without knocking. —R. P. I.

"Yes!! What do you want?"

"Will you pleesh come down and—his—pick out your hushand. The rest of sub want to go home."

A co-ed at Ohio State recently sent us a picture of her aunt to Ballyhoo. It was accepted and published! —Auburn.

Hite is the only real dictator in Europe—the rest are mere marionettes. —Alabama.

IN AN UNPOPULARITY contest held at Illinois, Huuy Long, William Randolph Hearst and Falcher Coughlin are the nominees. Thus far the Kingfish leads by a wide margin, Hearst second.

Here's the way "A" students at California get that way.

1. Cram for quizzes and outline the course before finals.
2. Sit near the front. (That sounds to me like— the nice word for it is "apple-pushing").
3. Budget your time.
4. Go in for as many activities as you can without hurting your grade.
5. Keep up with daily assignments.
6. Have at least six love affairs a year.—L. A. J. C.

Revised Proverbs

1. He who laughs last is an Englishman.
2. Absence makes the grass grow fonder.
3. Go in for as many activities as you can without hurting your grade.
4. Love is blind.

Wise-ups

There are 2,500 courses in the English language. The average college man is 68½ inches tall and weighs 14½.

Directors of Oxford once voted not to install baths in the dormitories because the students attended school only eight months out of the year. Although 114 Washington University students said gambling is wrong, only 33 out of them condemned petting.

Thanks to Civil for last week's "All-American Tragedy."

He had toiled the entire evening. And at last his work was o'er. So his mind was all for pleasure, And his feetsteps sobered her brow. He entered without knocking. Leaving both the portals wide. In a moment he was with her.

Hits the only real dictator in Europe—the rest are mere marionettes. —Alabama.

"Spring Has Sprung" Remedy Suggested

BY J. A. J. C.

At the regular meeting of the Co-op Club last week the officers to serve for the coming year were elected. A. P. Greer was elected to succeed Bill McCree as president; T. C. Moore was re-elected as vice-president, and H. E. DuVall was re-elected treasurer. Bob Hudson was elected secretary to succeed J. P. Johnson. Under these new officers the club looks forward to a very successful year.

This organization has been on the Tech campus almost as long as the Co-op Department. It was founded in 1914 and organized in 1915. It has been known as the All-American Tragedy. The club was founded with the purpose of promoting better fellowship among the Co-op students. Annual functions of the body include at least two dances, as well as entertainments for the freshmen. Their annual Mistletoe Ball has always attracted a colorful crowd.

SPECIAL ATTENTION! We are showing the latest in foreign and domestic woolens—of the finest materials, and shades as you like them. We are showing the latest in foreign and domestic woolens—of the finest materials, and shades as you like them.

Inter-Mural Baseball League Begins Games Monday

Monday afternoon will see the first battles of the 1935 Inter-Mural Baseball League. Coach McArthur has issued balls and bats to all teams, and most of them have already set up and practiced. A schedule has been prepared and a copy issued to every manager.

The teams will be divided into four leagues. Three of these will be composed of fraternity teams, and the fourth of non-fraternity teams. The members of each league are as follows:

League No. 1 League No. 2
Pi Kappa Alpha Kappa Delta Phi
Theta Chi Sigma Phi Sigma Chi
Pi Chi Sigma Nu
Delta Sigma Phi Sigma Xi
Pi Phi Delta Delta Delta
Epsilon Phi Sigma Phi
Phi Delta Theta Sigma Chi
Phi Kappa Tau
Phi Epsilon Pi Sigma Chi

The first league, composed of fraternity teams, and the second of non-fraternity teams, will be played out to the last. The last two teams in the second league will play for the third place, and the last two in the fourth. The third league, composed of fraternity teams, and the fourth of non-fraternity teams, will be played out to the last. The last two teams in the fourth league will play for the third place.

Auburn Natators Lose To Jackets, 46-38

Taking the last two events, the 220-yard dash and the 330-yard medley relay, the Tech swimming team defeated Auburn, 279-243, at Athens last Saturday. The meet was very close, with every stroke of the swimmer being watched by the spectators. The meet was won by the 220-yard dash and was moved out of Catto in the 220. Tomorrow the Tech swimmers will go to Athens to meet the Georgia Bulldogs. As this is the last meet of the season, Tech will probably finish the season with a victory. Georgia has not had a very successful season, and has turned in its best performance of the season so far.

The Tech Freshmen will probably make the Athens trip with the varsity to meet the Bulldogs. The Freshmen have not had very much success this year, having lost most meets to Boys' High, Tech High, and the Enory Freshman this year.

Tech Man Awarded M. I. T. Scholarship

Fred A. L. Holloway, senior Chemical Engineer, has been awarded one of the six fellowships awarded annually by the national chapter of Tau Beta Pi, national honorary engineering fraternity, it was announced yesterday by Vincent Millen, president of the local chapter.

Holloway, who has one of the highest averages ever made at Georgia Tech, stated that he would study industrial chemical engineering at M. I. T. during the year 1935-36.

Among Holloway's activities at Tech besides being a high ranking honor student are: Football manager; colorist in the B. O. T. C., and a member of O. K. K. and Southbrad and Blade.

Baron Barnes, together in one of the professional meets to be held in America this year.

The Hearst Trophy, of which the University of Oregon, won individual honors in an amazing perfect score of 200 points in the Fourth Corps Area competition. Incidentally, the University of Alabama teams won tenth place with a score of 977, and twenty-third place, with a score of still in the Fourth Corps Area.

The University of Alabama's No. 2 placed third in the Fourth Corps Area competition. Incidentally, the Hearst Trophy among the Naval R. O. T. C. was captured by the University of Georgia team, and also was a member of Tau Beta Pi, has been awarded a scholarship by M. I. T. to pursue post-graduate work in chemical engineering for the year 1935-36. He will leave his present work in civil engineering for the study of industrial chemical engineering at M. I. T. during the year 1935-36.

Awards; the first, a student of North Carolina State College for the year 1930-31, and the second a student of Alabama for the year 1933-34.

I:

April the first is sometimes called 'April Fool Day' and 'All Fool's Day,' but at Tech it is called 'Whistle Day.' Here's why.

Stung in their beds on Monday morning lay some thousand students, enjoying that blissful, dreamy period between waking and rising. 'Why,' they asked themselves, 'why get up until (or after) the whistle blows?'

So saying, they pulled up their covers and dreamed, while the sweet fragrance of bacon and coffee rose from kitchen and dining hall. Fifteen, thirty, forty minutes passed and still the musical voice of the whistle failed to rouse them. Some few curiously rose and examined their watches. It was seven-thirty. Rousing the others, they hastily dressed, ate, and went to their eight o'clocks.

Eight o'clock came, but the whistle didn't blow. At eight-fifty (or thereabouts) the professors grudgingly admitted the classes. This happened at nine-fifty-five and ten-fifty-five. Then about ten-thirty, from around the power plant came some queer-sounding toots from a whistle. Several times the screeching occurred, as if someone were trying to blow a whistle. But the whistle was not our whistle, not our deep, mournful, bass whistle. It was a pimple, tenor whistle, whose weld was still before it could really build up a man-sized toot.

Welded for Strength

The welded whistle is as strong as or even stronger than the metal it joins. It is leak-proof and thus admirably suited for piping or containers of any sort, to resist pressure, temperature, or shock. Another way of making the product stronger is to weld it from one of the new special steels or strong non-ferrous alloys. In this way another desirable property is usually obtained—lighter weight. Welding can be used to make joints in any of the commercial metals.

In Aircraft Construction

One of the most direct examples of the use of welded joints for their strength in an aircraft manufacturer, is an airplane propeller. Every joint must be strong enough to withstand heavy stresses from all sides in flying. The joints must be tough also, for the shocks they undergo are so violent as to be powerful. They are made in a strong alloy—chrome-molybdenum steel. Welded joints are the standard of the aircraft industry because they fulfill faithfully those essential requirements on which so many human lives depend.

Naval ROTC Students Offered Commission In Regular USMC

The Naval ROTC student graduating with the highest rating in the unit will be eligible for a commission as probationary second lieutenant in the regular United States Marine Corps, Commander M. C. Bowman, commandant of the Tech Unit, announced today.

The student selected must be of honor graduate, having graduated in the highest five per cent of his class, and must be recommended by the commandant and the president of the school, the orders state.

Two men will be recommended, one in the capacity of alternate for the first. One man will be selected for marine commissions in each of six Naval ROTC units in the United States, with the exception of the two west coast units, which will be allowed to two men each.

This move marks another step of recognition for the excellent training offered in the Georgia Tech and other ROTC units.

Although no official report has been made of the actions of the Naval Unit last week, it is believed that a very good appearance was made before the inspection board.

Invisible Joints—Strong, Trim, Simple

Oxy-acetylene Welding contributes these important advantages to the design and manufacture of metal products.

For Rigorous Use

In two fabrications of metal it is not necessary to sacrifice appearance and simplicity for strength. Modern methods have changed that. The weld of fabrication in modern welding, it is now possible, with a minimum investment in equipment, to fabricate products with strength which it was impossible to build through the reinforcing we formerly used.

Welded for Strength

The welded joint is as strong as or even stronger than the metal it joins. It is leak-proof and thus admirably suited for piping or containers of any sort, to resist pressure, temperature, or shock. Another way of making the product stronger is to weld it from one of the new special steels or strong non-ferrous alloys. In this way another desirable property is usually obtained—lighter weight. Welding can be used to make joints in any of the commercial metals.

In Aircraft Construction

One of the most direct examples of the use of welded joints for their strength in an aircraft manufacturer, is an airplane propeller. Every joint must be strong enough to withstand heavy stresses from all sides in flying. The joints must be tough also, for the shocks they undergo are so violent as to be powerful. They are made in a strong alloy—chrome-molybdenum steel. Welded joints are the standard of the aircraft industry because they fulfill faithfully those essential requirements on which so many human lives depend.

This move marks another step of recognition for the excellent training offered in the Georgia Tech and other ROTC units.

Although no official report has been made of the actions of the Naval Unit last week, it is believed that a very good appearance was made before the inspection board.
New Scientific and Mechanical Books Added to Library Shelves

The school library has recently established a book shelf of new scientific and mechanical books. Some of the most popular of these are "Advance of Science," by Watson Davis; "Through Space and Time," James Hayward Jeans; "Vault of Heaven," R. A. Gregory; "Jobs for the College Graduate in Science," Menge; and "Television," (a very interesting book) J. H. Renger.

Other books of plays and more thoughtful reading reserved during the last few weeks are: "Point Valaine," Conrad; "Within the Gates," O'Nell; "Ah, Wilderness," O'Neill; "Green Light," Douglas; "Good Bye, Mr. Chips," Hilton; and "Come and Get It," Edna Ferber.

All students are urged and invited to go to the library and use these books. They are either directly or indirectly connected with most engineering courses at Tech and will be a great help as well as a fine pastime during the long hours to read. Interesting college professors and their campus.

Popular Light Reading
Douglas—"Green Light," (Author of Magnificent Obsession, which was and still is very popular). Hilton, James—"Good Bye, Mr. Chips" (requires about one and a half hours to read. Interesting college professor and his campus).

Mrs. John—"The World Went Mad" (war story). Foster, Edna—"Come and Get It."

New Plays
Coward—"Point Valaine." O'Casey—"Within the Gates." O'Neill—"Ah, Wilderness." Anderson—"Mary of Scotland." Anderson—"Valley Forge."

Most of these have been or are now playing on Broadway.

More Thoughtful Reading
"Air Conditioning" — Engineers' Handbook.
Bennett, Harry—"Practical Everyday Chemistry" (tells how to make things: hair tonics, stay-combs, beverages, etc.)
Davis, Watson — "Advance of Science."
Jeans, James Hopwood—"Through Space and Time." (Author of Stars in Heredity and Eugenics."
Gregory, R. A.—"Vault of Heaven" (astronomy).
Menge—"Jobs for the College Graduate in Science."
Guyer, M. F.—"Being Well-born" (heredity and eugenics).
Rayner, J. H.—"Television" (Popular).
House—"Wild Flowers" (beautifully illustrated).
Gittens—"Confessions of a Scientist."
Bees—"Half Mile Down."
Chatterton—"Danger Zone" (capture of Queenstown).
Seabrook—"White Monk of Timbuktu."

Tennis Team Defeats Davidson and Ft. Benning

(Continued from Page 4) matches have been prepared, and will be kept in tip-top condition throughout the entire season. They have been numbered and each league is to have its own diamond. As in basketball, the F.E.R.A. is to furnish all referees for the games.

If the soft-ball will be as successful as the basketball, the efforts of the Georgia Tech Athletic Department to give all men a chance to take part in athletics will not have been wasted. PLAY BALL!

O.D.K. and Freebody Plan for Tech Day

(Continued from Page 1) will be followed by the tours of the campus. The afternoon will be occupied by the annual Anak Field Day.

This is expected to be one of the biggest events of the year, and if the students will cooperate with the sponsors of Tech Day by sending or carrying their letters to their parents, it will certainly be a red letter day on the school calendar.

Complete details of the plans for Tech Day will be carried in next week's Technique. Don't forget to mail the letter home.

HATS that are air minded

The Stetson Bantam
The Stetson Playboy

$5

They're so stripped of excess weight that you hardly know you're wearing a hat.

STETSON HATS ARE
PRICED AT $6

THE PLAYBOY AND THE BANTAM, AIR-LIGHT STETSONS, ARE $5.

THE PLAYBOY, AS RAKISHLY SMART AS A SCOUT PLANE THAT YOU HARDLY KNOW YOU'RE WEARING A HAT.

...I do not irritate —

I'm your best friend

I am your Lucky Strike

I am always the same... always mild, fine-tasting and fragrant. I am made of center leaves, only. The top leaves are undeveloped, acid and biting. The bottom leaves are grimy, tasteless and harsh.

I am made of only the fragrant, expensive center leaves. I give you the mildest, best-tasting smoke.

They Taste Better

Duke Ellington To Play Here Saturday

Duke Ellington, the original king of jazz from Harlem, comes to Atlanta Saturday with his 14 syncopators, including Ivie Anderson, California songbird. The dance will be held at the Shrine Mosque and will last from 8:00 until 12:00. Plenty of seats will be provided for those that have already indulged in their daily dozen and eager to hear this unusual dance music.

The orchestra is under the sponsorship of the Oriental Club of the Yaarab Shrine Mosque. It will be remembered at Tech that last year this club cooperated with the Inter-fraternity Council at Finals last year on the Saturday night dance. This is an excellent chance for Tech men to repay the club for their splendid cooperation and at the same time hear one of the country's foremost dance bands.

Duke, other than being a piano player par-excellence, is a composer, having given music some of its best tunes. Among them are the most popular "Solitude," "Mood Indigo," "Black and Tan Fantasy," "Sophisticated Lady" and "Creole Love Call." Duke will preside at the piano and you will have a chance to hear the above music played by the man who gave them to us to enjoy.

To elaborate on the orchestra would be somewhat of a miss, we believe, because everyone is familiar with this famous orchestra, its records and radio performances speaking for themselves. The ante is $1.10 per person and tickets are on sale at Barnes, Inc., and will be on sale at the Mosque box office the evening of the dance. The Oriental Club invites Tech men and their dates. Here's a chance, fellows, to get in on Atlanta's biggest dance attraction. This will be Duke's only appearance in Atlanta—there will not be a concert.

There's something about a Chesterfield—

There's one thing I especially like about Chesterfields—entirely aside from the fact that it's a milder cigarette—and I've heard a number of people say the same thing... While I'm smoking Chesterfield I never get little crumbs of tobacco in my mouth—the tobacco doesn't spill out and that adds a lot to my pleasure of smoking them... I notice more and more of my friends smoke Chesterfields.
