**Orientation Period To Be Extended**

Beginning this fall the freshman orientation period is taking on a much more serious aspect than it ever had before. The freshmen for the regular period of orientation will continue throughout the first term instead of terminating in October.

Under the direction of Professors Bennett and Stewart these programs are designed to cover the entire field and are not confined to freshman work only. The purpose is really to acquaint freshmen with the engineering profession by answering some of the many perplexing questions that confront the student. Questions such as the following are discussed: The advisability of jobs in the future

**SUNDIAL**

MARTIN

The football season of 1934 promises to bring forth one of the best back-bands in Tech's history. Tonight, when the Jackets take ups with the Clemson Tigers, the band, in charge of Cadet Captain K. H. Hanner and Maj. J. Garing, director, will make its first appearance.

Attired in their new uniforms (the description of which we will withhold until Friday), they will present a much improved and attractive appearance.

**W. C. Slocum Obtains Recognition From Winchester Arms**

Recently Tech was given a little in-direct help from the student body. It was said that the student body might be interested.

W. C. Slocum, the master craftsman in charge of the shop in the Aeronautical Department, is the man who made us inducted often in small ways. It is said that he has been given much of his leisure time during the past six months in making by hand a 32 rifle of the most recent type for the Army. (Continued on Page 5)

**New Cadet Officers**

Appointments of Cadet Officers in the Infantry and Coast Artillery units of the Georgia Tech R. O. T. C. were made this week by the Military Department under Maj. T. H. Jones, who recently succeeded Col. O. H. Longino as commandant.

R. P. Wootan; Lieutenant, T. H. Copeland; Assistant, H. J. Bobo.

Infantry: Cadet Commanding Officer, F. E. McDonald; Colonel, A. C. Johnson; Adjutant, H. O. Clark. Presented Advisory, H. O. Clark. Commanding Officer Co. "A," H. M.

**First Yellow Jacket To Appear Soon**

The "Yellow Jacket," Georgia Tech's banner of utmost importance, will soon make its initial appearance during the first football game.

Having been dedicated to the "zero runs" at Tech, the first issue will be the Freshman Number. It will attempt to provide a little diversity from the monotony of the first school days by means of humorous stories and anecdotes.

As a humorous magazine the "Yellow Jacket" is recognized as one of the best college comics in the country, and it is provable that it will obtain even higher recognition this year on the able leadership of Student Editor.

**Clemson Threatens With Strong Squad**

The Clemson Tigers are expected to put up a real battle when they engage the Yellow Jackets at Grant Field tomorrow. This is indicated by the fact that the Tiger forwards planned such an excellent defensive game in their opener with Presby- terian College that the latter failed to make a single first down through the first half.

Henry Woodward, captain and outstanding back of Coach Jessie's team, may be in the lineup. He has received a good deal of the injury which made his playing during this season impossible. He is to play halfback and a fine passer.

For putting Clemson will rely upon John Truitt, Alex Stevens and Tate Horton, and its best runners are...

**Non-Fraternity Organization Outlines Active Program; Announces Officers**

The Non-Fraternity Organization, newly formed on the Tech campus, only last May having received the sanction and approval of the Executive Committee of Georgia Tech, announces that it is about to begin upon its work.

The organization, which went to F. A. L. Holloway for the presidency in May, has been chosen from the best material since her foundation.

The purpose is really to acclimatize the student body and to provide an adequate and adequate social program; to provide an adequate social program; and to encourage par- ticipation in the large number of social activities found here. The membership is to be made up of those students who desire to become members. There is no initiation fee.

The organization has received wide support outside its own ranks. Mr. Proctor at the "Y" has invited the non-fraternity men to call on him for advice, help, and cooperation. Prof. Balfour and several other faculty mem- bers also offer their council. Coach Alexander and Coach Gifford have as- sured their good will and cooperation.

Fraternity and campus leaders see the advisability of such a combined group and have endorsed it.

Just one word of warning to the Freshmen: This is not an anti-fraternal organization. In reality it is neither for nor against the fraternity. It is Non-Fraternity, and is for the non-fraternity student.

The next regular meeting of the Executive Committee will be held Monday night at 7 o'clock. At this meeting plans will be made for... (Continued on Page 5)
The Value of a Good Start

One of the largest freshman classes to enter Tech since 1929 began its work this week, and in that beginning started on a four-year test that may end in success or failure. The ultimate result is up to the freshman himself. It is well for the freshman to realize that the best possible start is in the freshman year. Fewer than 25 per cent of the men that entered Tech in 1929 have returned this year, and that is bad enough. Those who have returned have made good, but those who have not, have made no good. So do not let the time go by without knowing what it is all about, and do not let a month slip by without getting into some extra activities. You will find later when the opportunity has passed that you could have done something to give you more than mere "book knowledge."
**GOOD ADVICE FOR FRESHMEN**

1. Purchase freshman cap at College Inn and wear it at all times except in class rooms and in dining hall.

2. Print "BAT" and your last name on visor of cap so that it may be easily read.

3. Never be seen on the campus or nearby with your prep school belt or sweater on. If the sweater must be worn, turn it inside out.

4. Have a cheerful "Hello" for everyone.

5. Attend all "Pop" meetings and parades.

6. Respect upper classmen at all times.

7. Stay off the senior bench. Only seniors deserve this privilege.

8. Read pages 76, 77, 78 and 79 of your "T" book, given out by the Y. M. C. A.

9. Know the school yells and the school songs.

**First Yellow Jacket to Appear Soon**

(Continued from Page 1) Millie as editor and Charlie Yates as business manager.

The editorial staff, the business staff, and the art staff are open to all who are willing to work. Freshmen, especially, are urged to come out for the staff and give the magazine the benefit of the new ideas that they bring to Tech with them.

**Best Band in Years Makes Initial Appearance**

(Continued from Page 1) previous bands. They will be 50 strong, backing the team musically as well as otherwise.

The band has the Athletic Association to thank for the new uniforms, and in order to show that they appreciate their new apparel they are giving a concert and dance in the near future to help the Athletic Association defray the band's expenses to Durham, N. C., when the Jackets meet the Blue Devils.

This year has started off very favorably with the band. With over 90 boys to choose from, a band of 50 will represent Tech on the Field.

a good cigarette gives you a lot of pleasure

. . . just about every cigarette smoker knows that—but here are some other facts to keep in mind . . .

For a cigarette to be milder and taste better it must be made of mild, ripe Turkish and home-grown tobaccos.

We wish you could go into the factories and see Chesterfield made. The mild ripe tobacco is cut in long even threads—then packed into the cigarette so as to make Chesterfield draw right and burn evenly.

A good cigarette can give you a lot of pleasure, and we would like for you to try Chesterfield.

The cigarette that's MILDER the cigarette that TASTES BETTER

The members of the 1934 varsity squad are as follows:

C. F. Shaw, center, a veteran of last year's squad and a valuable mainstay squad, and he is sure to see service in and final year as a member of the varsity. He is one of the smartest and most capable members of the squad, and his accurate kicks from placement are a feature of the Tech defense. He is one of the smartest and most versatile members of the varsity. His study to Dave Wilcox.

Russell "Circus" Lyons, a hefty 200-pounder, is a great ball carrier and a fine running back, who will play in many contests this fall. He is five feet ten inches tall, and weighs 187 pounds.

Jere Perkerson are from Atlanta; Moore and Arias, both 140 pounds in weight, are two dynamic quarterbacks who his successor would be. Jere Perkerson is from Missouri, and the thought that Tech was assured of a finalist. In this match things went against him; and we found things against him; and we found no extra men to pull us through in our school title. Unfortunately we were able to send only one of our players wasn't on his game and sportsmanship. To prove that this fine showing was no fluke, Frank later on this summer won the Atlanta Championship over a great field.

SON THREATENS STRONG SQUAD

(Continued from Page 1) John W. (Bud) Meek, Randy Hinman, John O. (Doc) Fiske, and U. A. (Buck) Dolberry for quarter-back positions and will be suited up tonight.

Tigers have lost only four games in Brown and Black and most of their opponents have been the most likely to be used.

The three best games played this season were against Brown, West Virginia, and Kalamazoo, the last two teams having been defeated by Tech.

On Thursday night at 7:30 a moving picture program was presented in the Tech Y auditorium which featured a musical short subject, strange as it seems, a comedy, and a silent picture. The program, entitled "The Virginia Rose Bowl game of 1928," was shown.

Three hundred men were present. Mr. Procter has the machine set up in the "Y" on approval and hopes that, with the student cooperation, the instruments may be purchased and made a permanent fixture in the Tech auditorium.

Coo "Y" Club invited all the Tech freshmen to attend a moving picture program, held in the Tech "Y" auditorium on Wednesday, September 19, at 7:30 p.m. President of the Tech "Y" Club, introduced the speakers—Dean Procter, of the English Department, who addressed the assembly, pertaining to what the freshmen should know about entering Tech. There were approximately 125 new freshmen present.

Annual freshman reception was given at the "Y" on Friday night at seven thirty o'clock. Between two hundred fifty and three hundred freshmen were present. Mr. Procter introduced Chick Meehan who in turn introduced Dr. Newton and Coach Alexander who addressed the assembly.

The importance of attending these meetings cannot be stressed too highly. Many thanks, Mr. Slocum, and keep up the good work.

In the construction of the bolt of the "V" engine, a very fortunate thing for Tech, and effective methods of study (with some good test book as a basis) in 2, is in a like manner will be the subjects of the meetings be concerned with professional engineering, what it embodies, its requirements for success, various types of engineering in dasturbant, and various types of engineering work such as research, design, etc.

To those who have lost only a few dollars, but have not lost the thing be it a joke, it seems, a comedy, and a silent picture.

The plays are clicking. The professors in charge are the most likely to be used.

The plays are clicking. The professors in charge are the most likely to be used.
The Paramount Theater has shown a strong interest in supporting the Varsity football team. In fact, during the football season, the theater has invited Tech students to attend performances for free admission. This practice is extended to the Varsity football team and is expected to continue for the upcoming season.

The theater is also known for its pep meetings, during which the cheerleaders and students gather at the Paramount and other Atlanta theaters. These meetings are attended by Tech men, who participate in parades through the theaters following big pep meetings or hard-fought grid victories. If the theaters decide to allow shirt-tail parades, they must be made in a way that respects the theaters. The Paramount and other Atlanta theaters have always cooperated with Tech and it is expected that this arrangement will continue.

The management of the Paramount Theater has shown a strong interest in keeping the students awake. They have formulated fifteen ways to keep the students awake, including:

1. Amplifying the announcements.
2. Playing upbeat music.
3. Serving food and drinks.
4. Encouraging student participation in performances.
5. Announcing special offers to Tech students.

In the past, the Atlanta theaters have allowed the attendance of pep meetings to parades through the theaters following big pep meetings. However, the theaters have limited the parades to allow for a more uniform appearance, as a guest of the theater. This practice has been somewhat limited. The theaters decide to allow shirt-tail parades through their lobbies and across the stage, and the cheer leaders will be able to inform the students at the pep meetings concerning the theater and the other arrangements.

Last year, a few over-enthusiastic students化妆品 the lobbies of several theaters and some damage was done to the displays. The theaters have always cooperated with Tech and it is only fair to show our appreciation by respecting their property.

The Paramount Theater offers a formal invitation to all students of Georgia Tech to enter in any manner are eligible for participation. Any student thus interested should take a general interest in the theater and program. Students who believe they have some stage talent, or who can entertain in any manner are eligible for entry. Any student thus interested should leave his name and address with the doorman at the theater. Then the student will be notified by letter when he is to appear.

Three prizes are offered by the theater each Friday night. First prize is $7.50 in cash; second prize $4.00 in cash and third prize a monthly pass to the theater, good for two persons. The management of the Capitol has also announced that special cards are being printed, which when finished will be distributed to all new Georgia Tech students. These cards will permit the bearer to attend a performer, as a guest of the theater.

After much arguing, a co-ed at a junior dance at the University of Minnesota was induced to take off her shoes in order to reduce her height advantage over her escort so that a photograph of the leaders would present a more uniform appearance.

Phi Nu Pi at the University of Michigan buried themselves and formulated fifteen ways to keep their students awake.

The football season brings an increase in student registration. The enrollment for the year exceeded 600, and the increase this year of 149 men makes the enrollment of this year 11.3 per cent more than that of last year. While these figures are correct up to 5:00 P. M., the Registrar's office expressed the opinion that there would be a few additions.

The modern co-ed is a gold-digger and out for all she can get, according to the opinion of 25 per cent of the women who responded to a survey conducted by the University of Western Ontario, Canada.

The clean center leaves—they are the mildest leaves—naturally, they taste better—because Luckies use "The Cream of the Crop"—only the clean center leaves—these are the mildest leaves—they cost more—they taste better.
