Honoraries
Omicron Delta Kappa, national leadership honor society for men, was founded in 1914 at Washington and Lee University, and the local circle was established in 1932. Members are selected on a point basis, a definite number of points being given for each honor or position attained by the student. When a student has amassed enough points and a definite scholastic average he is eligible for election. ODK ranks with ANAK as the highest honorary organization on the Tech campus.

The Georgia Tech ANAK Society was organized on January 1, 1908, to honor select men from the Senior Class who were outstanding among their fellow students by their achievements and services to Georgia Tech. ANAK has contributed, from its membership, many Tech men who have become leaders of national prominence. ANAK ranks with Omicron Delta Kappa as the highest honor a Tech student may receive.
The Koseme Society, established by ANAK in 1938, recognizes juniors and third-quarter sophomores who have been outstanding in extra-curricular activities. Not merely an honorary, Koseme each year undertakes several service projects, among them the preparation of the instructor-course list at the beginning of each quarter.
Phi Kappa Phi, Oldest on the
Phi Kappa Phi is the oldest national scholastic honor society on the Georgia Tech campus. Since its founding in 1897, the society has steadily grown until it has now established chapters in more than fifty colleges and universities throughout the nation. Admission to Phi Kappa Phi is one of the highest honors an undergraduate student may receive. Only those seniors who have maintained the highest scholarship during their three years in college may become members.

Phi Kappa Phi is well represented in all departments on the campus, as there are at least thirty members of the faculty in this society. The local chapter conducts the annual Honors Day exercises.

Tau Beta Pi, Leading Engineering
Tau Beta Pi is the leading engineering honor society in the nation. Engineering students who rank in the upper tenth of their junior class and the upper eighth of the senior class become eligible for membership. However, election of members is also based on leadership, character and service. An outstanding senior is selected and presented with a scholarship cup each year, the selection being on the basis of overall scholastic work.

This year’s officers, who were elected at the beginning of the year, were Newt Hardie, president; Charles Spencer, vice-president; Joe Dougan, corresponding secretary; John Goss, recording secretary and Malcom Brown, treasurer.
The Georgia Tech Chapter of Phi Eta Sigma is led this year by Adair Mellichamp as president, James Jolly as secretary, and Joseph E. Brown as treasurer. Phi Eta Sigma is a national freshman honorary scholastic fraternity. Membership in this fraternity is the highest scholastic honor a freshman can attain at Georgia Tech. Only those men who have a point average of 3.5 for the first quarter, or an overall average of 3.5 for the entire freshman year are eligible for membership. Each spring the fraternity presents a cup to the freshman having the highest scholastic average for the first quarter. The National Phi Eta Sigma Fraternity offers two $300 scholarships each year to deserving students.

Freshmen Scholastic Incentive
The Briaerean Society was founded in 1912 for students attending Tech under the co-operative plan. Members chosen for this honorary society are selected on the basis of their outstanding ability in academic and extra-curricular work. No member may be chosen until he has completed his sophomore year. Over five hundred Briaereans have graduated from Tech and attained

**Alpha Pi Mu** is a national honor society for the recognition of industrial engineers with superior abilities. Membership is limited to juniors and seniors who have maintained high scholastic standards. Only those juniors in the upper fifth and those seniors in the upper third of their classes who possess those traits of leadership, character and ethics are eligible.

Carter Terrell, Bob Little, Tom Davenport and Don Gay were president, vice-president, secretary and treasurer respectively.

Chi Epsilon, the only national honorary fraternity limited to those men in the field of Civil Engineering, was directed by Frank Williams and his assistants were Hubert Dougherty, vice-president; Dan Rhodes, secretary and Gene Mann, treasurer.

The fraternity was founded in 1922 at the University of Illinois and now has 43 chapters throughout the nation. The Tech chapter was formed from Civil Crew, the oldest honorary society on the campus, and recognizes the qualities of character, scholarship, and sociability in undergraduate and graduate students.

Delta Kappa Phi is the oldest textile fraternity in the United States. The Tech chapter was headed by Jim Haynes, President, Albert Taylor, Vice-President, Larry Baird, Secretary, Jim Overby, Treasurer this year. The purpose of the fraternity is to recognize outstanding members in the textile school, and to promote fraternal relationships among these men and to further interest in the textile schools and related industries as well. Graduates are able to carry their membership into active alumni chapters where they may continue their fraternal relationship in industry.

Since 1937, the Industrial Management Society has selected those seniors and third quarter juniors whose scholastic achievement, general campus leadership and interest in the field of industrial management qualify them for membership in this departmental honorary society.

Plant tours, talks by business leaders at the weekly meetings, occasional social events, and the unique Bullrymph Golf Tournament were carried out to a great degree of success this year under the leadership of Bill Schaeffer, president; Burton Grant, vice-president; Jack Boatwright, secretary and Rodney Cook, treasurer.

The society functions to stimulate interest in the field of industrial management and to promote friendly student-faculty relationships which typify the Industrial Management Department.

Eta Kappa Nu is a national electrical engineering honorary society. It was founded for the purpose of binding together the outstanding students and promoting interest in the field of electrical engineering.

Each year Eta Kappa Nu elects pledges from those junior and senior E. E. students who have demonstrated themselves to be of highest character and marked ability, as demonstrated by scholarship and campus activities. To be eligible, one must be a junior in the upper fourth of his class or a senior in the upper third. An annual initiation banquet is held for new members.

Kappa Kappa Psi Honors Band Members

Kappa Kappa Psi is the national honorary fraternity for band members. It was founded on the campus of Oklahoma A & M College and now has more than fifty chapters spread throughout the country. The national headquarters are located at Stillwell, Oklahoma.

Iota Chapter on this campus was founded more than thirty years ago and has remained active continuously. Although musical ability is the prime requisite for membership, leadership and band activity are also key factors in selection of new members. An outstanding graduating senior in the band is selected each year and presented with the A. J. Garing Award.

The banquet, held for the members and their wives or dates is one of the outstanding annual events.

Those students who are enrolled in Ceramic Engineering may become eligible for Keramos, a professional honorary fraternity. Although the Tech chapter is one of the newer honorary organizations on the campus, the history of the fraternity dates back to 1902, when the organization was founded at Ohio State University. Keramos is the oldest national professional honorary fraternity in existence.

The goal of Keramos is the promotion of professional ethics and attitude not only among its members, but among all ceramic engineers throughout the nation. The Tech chapter works toward the elevation of the scholastic achievements of all ceramic students as well.

The requirements for Keramos are a 2.4 overall point average, classification as a junior, a ceramic student and election into the chapter by the active members.

The purpose of Phi Psi, a national honorary textile fraternity, is to promote better scholarship within the Textile school and to effect ties of friendship among its members. Students are chosen for membership from those juniors and seniors who rank in the upper third of their class in the Textile school.

One of the primary functions of the chapter here at Tech is to arrange for men in the Textile field to come to the meetings and give helpful advice to the members on subject matter which is not available in the classroom. These talks were very successful this year.

Service to Christian Church Is Recognized by Pi Tau Chi

Recognition has long been given to outstanding college students in almost every area of activity except that of the field of religion. For this reason, Pi Tau Chi was established with the hope of filling this need. All college students professing the Christian faith are eligible for membership in this honorary society. Members are chosen on the basis of their contributions of leadership and service to religious activities on the campus.

The Tech chapter, although it is only four years old, has been actively engaged in many religious functions on the campus, in spite of the fact that there is no established program of activities. In the future, as in the past, the chapter will serve as a challenge to all students.

Pi Tau Sigma is the national honorary mechanical engineering fraternity. Its members are selected junior and senior mechanical engineering students. These students organized and prepared the entire M. E. exhibit for Engineers Week this year. Last spring they held a student-faculty picnic for all M. E. students and professors which aided in bettering relations between these groups. By having at its banquets, speakers from outside of the department, the fraternity helps to give its members knowledge of useful subjects unrelated to mechanical engineering. Pi Tau Sigma cooperates with the American Society of Mechanical Engineers to sponsor and support the Student Lounge in the M. E. Building.

The highly successful publications clinic this year was sponsored by Pi Delta Epsilon. This clinic was deemed so important by the 'hill' that students who wished to attend were excused from classes.

Guided this year by president Slater Marshall, vice-president, Garnet Keith; A. B. Pervis, secretary and Jere Goldsmith, treasurer, Pi Delta Epsilon also sponsored the annual publications banquet.

Membership to this honorary journalism fraternity is open only to those men who have completed at least six quarters of work on any of the campus publications.

MEMBER NOT PICTURED

STEVENS, C. H.
Bob Russ, president, Bill Patton, vice-president, Jim Taylor, secretary and Charles Smith, treasurer, presided over the meetings of Sigma Gamma Tau this year. Under their leadership, the society had a great deal of success in attaining its purposes of fostering a high standard of ethics and professional practices and of creating a spirit of loyalty and fellowship among the students in Aeronautical Engineering.

The society was formed only three years ago by a merger of two national aeronautical engineering societies, Tau Omega and Gamma Alpha Rho. Since this union, the society has been able to make increased progress throughout the nation by honoring those individuals in the fields of aeronautics who have been a credit to their profession through outstanding achievements in scholarship and service.

A. E.'s Sigma Gamma Tau
Guided by James Tucker, president, J. T. Bradford, vice-president, Jim Tanner, secretary, and John Meeks, treasurer, Sigma Pi Sigma sponsored a number of successful lectures and demonstrations this year on material that would not generally be covered in the classroom. These meetings were open to the public as well as the members of this Physics department honorary society. Sigma Pi Sigma also sponsors the Physics Club which is open to any student with an interest in physics.

Although membership in this honorary society is not limited to physics majors, one must have taken a sufficient number of junior and senior physics courses, have a superior point average and be a second quarter junior to be eligible.
