In an atmosphere heavy with harmony and sweet forgiveness, the Student Council Monday night at its first meeting had its members elected officers for the school year. The men elected were well qualified to represent the students and have demonstrated their ability in many fields of student activities.

Officers

William Douglas Cromartie, new president of the Student Council, is also President of the A.I.C.E., Treasurer of Anak Society, a member of the Civil Crew, and a member of Scabbard and Blade.

Harry Baker Arthur, Vice-President, is senior football manager, a member of the Skull and Key Society, and a member of students from all classes and in the Boosters’ Club.

The first meeting of the Georgia Tech Student Council at its first meeting of the school year appointed a committee to serve on Council Committee.

The orchestra selected for this series, is an honor society. The Graff Ballet, artistic highlight of the season, January 21.

In a statement to THE TECH, Dr. M. L. Brittain, said, “I have had directing soloists on trumpet and tenor play in a danceable, highly rhythmic way. In an atmosphere heavy with harmony and sweet forgiveness, the Winnington Ordnance at the Ordinance School for officers at Aberdeen.

In an atmosphere heavy with harmony and sweet forgiveness, the Student Council Monday night at its first meeting had its members elected officers for the school year. The men elected were well qualified to represent the students and have demonstrated their ability in many fields of student activities.

Religious Faiths Will Be Discussed in Tech Auditorium

Under the auspices of the National Conference of Christians and Jews, three international eminent ministers will speak on October 24 at the auditorium-gymnasium. Each minister will represent the three most-well known branches of religion. Mr. Ernest Clenchey, director of the conference, will speak for the Protestant faith; Father Donanin, who has represented President Roosevelt abroad.

Senior Privilege Cards Are Printed, Guards Chosen for Home Games

These cards entitle seniors, and seniors only, to sit in the senior section at the football games. The student council committee handling the cards and selecting the guards for the senior section consists of Harry Arthur, Jimmy Griffis, and Tom Tharp.

Committee Appointed To Probe High Food Prices of Dining Hall

As a result of the recent student reaction to the high cost of food in the dining hall, a committee was appointed last Tuesday by Miss Daisy Daniel, the student dietitian, and try to discover why the dining hall prices are above those of surrounding neighborhood eating establishments and fraternity houses.

PEP MEETING!

Tonight, October 8, at 7 o’clock, there will be a pep meeting at the Georgia Tech gymnasium. This will be the first pep meeting of the year and all freshmen are urged to be present.

Anak Society

The Anak Society is sponsored by the Georgia Tech Homecoming weekend. This series is a relatively new organization which has made a sensational rise in the past few months and is now asking to have been booked for the majority of the high-school and college dances to be held in Atlanta this fall. Com.
Georgia School of Technology

"A Technical School With a National Reputation"

THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of ability and ambition a broad interpretation of education. Georgia Tech is a training ground for men and women who are making the productive work of the world. Georgia Tech graduates succeed because they have learned to think scientifically and to work efficiently.

Chi Phi’s Give Varsity Dances

In accordance with long-established tradition, the Chi Phi’s will give another series of Tea Dances this year during the football season. There will be a dance after each home and away game except the homecoming game with Georgia. The Emeroc Aces will play for the dances, which will last from six to eight. The dances to be held at the Chi Phi House will be given in honor of the Chi Phi freshmen. Because of the limited space no other freshmen are invited, and only a limited number of bids are extended to upperclassmen.

**Football-less College Progresses,** Hutchins

CHICAGO, ILL. — (ACP) — The University of Chicago is getting along quite well without intercollegiate activities. Its football team is doing well for the time they have had, but the reverse is highlighted by an inspired performance of bids are extended to upperclassmen.

Ohio Wesleyan Selects Wrong ‘Typical’ Students

And then there's the case of Ohio Wesleyan where the students have received the wrong “typical” students when preparing a picture booklet on its sports teams. The photos were taken last spring and the front cover of the booklet shows a player whose “left-handed” fraternity pin has “flunked out” of school and a boy who has trans­ferred to Case College.

The Big Store

It’s quite simple why Rich’s is the Big Store. You see, we know that bigness is more than a matter of floor space or income or the newest lighting effect. We think a Big Store is a place where the customers can buy what they want, when they want it, and under courteous treatment at this Big Store. It means that we’re more than merchants—we’re neighbors, too.

The Big Store

The blueprint will have a meeting of its members on Saturday at 5:00 P.M. in the Tech Y.M.C.A. basement. All students interested in editorial work or the geographic work on the Blue Print should attend this first meeting.

Jobs for Each Man Graduated

The department of Public Health Engineering offers to students outstanding opportunity for achievement. One of the newer departments at Tech, it is filling a need that has long existed in the South, namely, the need for technically trained men to direct the development of health facilities throughout the region. With the awakening of public interest in the last decade to the need for improved living conditions, there has come a demand for personnel that creates three jobs to every available health engineer. Starting Salary $3,000

In Georgia particularly is the lack of correctly trained men evident; out of the 159 counties, only 59 have health departments. And the Army, the T. V. A., the governments of the other Southern states all are in need of sanitary engineers. Salaries are excellent. The average for graduates is a beginning at around $2000 a year; several Tech graduates in P. H. E. have started at salaries exceeding $3000.

Georgia Tech is the only school in the southeast offering a complete course in Public Health or Sanitation. The curriculum includes study of the control of typhus fever and malaria, milk pasteurization, factory inspections, and sanitary sewage disposal. Study is devised so as to give the student a great deal of experience under actual working conditions. Thus, the course is divided into approximately 60 percent class work and 40 percent field work. After the junior year, workshops are available from the Kellogg Foundation in Michigan, where students may carry on advanced summer study.

Field Work

Health divisions of the state of Georgia and city of Atlanta furnish constant cooperation to the department. Valuable assistance in field work and ready employment of graduates characterizes their attitude. Graduates who enter the State Department of Health are given a training period of three months, during which time they work under regional directors all over the state at a salary of $75 per month. At the end of this time, if they prove satisfactory, they become county public health engineers with a salary of $2000 per year.

An Outdoor Job

The health engineer has very enjoyable work. His occupation keeps him outdoors constantly, offering him many and varied personal contacts. It is often emphasized that the technical knowledge alone is insufficient—the ability to "get along" with the people encountered is of great importance. He is working on his own responsibility; there is unlimited opportunity for a good man.

Water Works Course

Also under the auspices of the Public Health Department is a water works short course. Held in the fall of every year, it serves to keep waterworks operators abreast of the latest developments in water purification. The department is a consultant for the U. S. Army and acts in cooperation with county health departments, whose men may put present or future formal training to use to obtain the P.H.E. degree.

Lecture Series

(continued from Page 1)

registration cards. The tickets have already been paid for by the students and are transferable. Student athletic pass books will not gain admittance. For outsiders, the box office price is 76 cents for a season ticket, which is good for one or all of the programs.

Student athletic passbooks will not gain admittance to Lecture Association programs. Tickets can be obtained on presentation of registration cards at the College Inn at a time to be announced in the future.

American Art

A notable influence upon modern painting is Thomas H. Benton, who will discuss "American Art" at Tech December 1. Benton, who is noted for his intense and vivid picturization of American scenes, is illustrating his talk with many examples of modern American art, and will try to explain in a simple and interesting manner the spirit, trends, and aims of modern art.

Ballet

Called by some the most artistic of the arts, ballet is certainly one of the most exciting. A variety of interpretations of classical and modern themes by the Graff Ballet with fifteen young dancers and two pianists will, on January 21, constitute the climax of the season. It is hoped that Tech students will enjoy this unusual combination of music and dance, sometimes misunderstood by unimaginative audiences.

Oriental Movies

Last on the regular program, on March 5, is a movie illustrated lecture by Arthur Mosken, famous "March of Time" and Paramount news photographer. On a timely and interesting subject, "The Battle for the Pacific" by an expert and fascinating speaker, the lecture will be accompanied by movies of Tokyo, Singapore, Hong Kong, Dutch East Indies, and other Pacific trouble spots.

The Flavor Lasts

"Full Stomach Remedy For Blackouts." Fulton

New Haven, Conn.—ACP—There's nothing better than a full stomach for flyers embarking on dive-bombing target practice. A recent scientific literature analyzed by Dr. John P. Fulton, Yale university physicist.

Dr. Fulton says reports from Germany emphasize the empty stomach seriously lowers a dive-bomber's ability to withstand the terrific acceleration of a dive.

The Natio, Dr. Fulton adds, are experimenting in use of certain drugs to improve tolerance to acceleration. Both Dr. isn't and the British, he says, have proposed use of girdle-like pneumatic belts and pneumatic trousers to minimize the rush of blood from a flyer's head to the lower extremities.

Tech Representative — Walt Penney

Prof. Daniel Made Chem. Dept. Head

Graduate Studies, Ch. E. Dept. Under Him Also

According to information received from the office of the President, Pro-

fessor John Laurence Daniel has recently been appointed head of the De-

partment of Chemistry and Chemical Engineering at Georgia Tech and

Dean of the School of Graduate Studies. He was chosen to succeed Dr.

E. B. Buggs, who held both of these posts on the school faculty until his death last summer.

Professor Daniel, a Virginian by birth, was graduated from Hampton-

Ridley College with the degree of Bachelor of Arts degree from the

Graduate School of Washington and Lee University. He came to Tech in

1932 as an instructor, and since that time has served in the Chemistry De-

partment as Assistant Professor, Asso-

ciate Professor, and Professor of Chemistry.

Freshmen 'T' Book Is Used at Pep Meetings

Changes Improve Book Over Previous Issues

The "T Book," the freshman hand-

book published each year by the YMCA, appeared this year under the

leadership of Editor Eddie Van Voor-

hees with changes designed to personi-

fie the features and to present a

more unified treatment of the various

campus activities. Among the innova-

tions was the use of action shots il-

Illustrating the various sections in

the book, and for the first time the Con-

stitution and By-Laws of the Student

Council were added.

The "T Book" is issued free to all freshmen. All that is necessary is

that he call at the YMCA and sign

for the book at the desk in the lobby. Quite a number of men have not as

yet obtained theirs and should do so

at once as a T Book is a necessity during the first pep meetings and football games.

THE PERFECT MODEL OF A MODERN INFANTRYMAN

The 34th version of a United States Army infantryman. The infan-

tryman in question is Corporal Robert T. Kennedy, of the 29th In-

fantry. He is wearing the new style helmet, the fancy green and beige.

The insignia of his crack regiment is shown over the archway to barracks.
Tech Receives Large Tract of Land From Capt. J. E. Smith, '95

Captain John E. Smith, M.E., 1895, outstanding alumnus of Georgia Tech, civic leader, President and owner of John Smith Company, prominent automobile firm, died an excellent tracht of improved and elevated land to Georgia Tech during the latter part of May.

The valuable gift was made in memory of Mr. Smith's father, who was a contributor to the founding of Georgia Tech under Dr. I. S. Hopkins, and was originally secured as a home site.

Baseball Captain

Captain John Smith attended Tech under Dr. I. S. Hopkins and Captain Lyman Hall, the first and second presidents, respectively, of the institution. He received his M.E. degree in 1895 and was captain of Tech's baseball team in '95, also caught in '96, and was quarterback in '94 on the football team that defeated Auburn 94 to 0. (Yes, they have trime-

aca. (ma. teams and won versus.) His son, Hal L. Smith, was graduated from Tech in 1935; and a

future is now on route to the college.

In his fine letter to Dr. Brittain, announcing the gift, Mr. Smith stated: "You, my dear Dr. Brittain, have been president for 19 years and have inspired this gift. Under your guid-

ance Tech has made wonderful strides in growth, in reputation, and in character. The luck reflected by Tech since you have been its president will always be a great source of pride and satisfaction to its alumni.

To Benefit Tech

"It is my wish that this property be used exclusively for the benefit of my old alma mater, Georgia Tech. This gift is made in memory of my father, John M. Smith, who was a contribu-

tor for the benefit of Tech under Dr. I. S. Hopkins."

He added that the growth of Georgia Tech will undoubtedly be in the direction of the property—which is its great educational trend—and it is his hope, Mr. Smith further de-

clared, that his gift will stimulate fellow alumni to make similar and other contributions to Georgia Tech.

Dean Savant Begins
First Full Term as Head of E. E. Dept.

Presto Savant, former dean of engi-

neering, was appointed head of the Electrical Engineering Department last February and begins his first full year as head of the department this fall. He succeeds Professor Fitzger-

ald, who died during the last school year.

Professor Savant attended Rose Polytechnic Institute, where he obtained a degree in electrical engineer-

ing, and later attended Harvard, where he obtained the degree of M.S. in E.E. He came to Tech in 1932 as an Assistant Professor of Electrical Engineering, became an Associate Professor in 1926, full Professor in 1926, and Dean of Engineering in 1934.

MONKEYS!

Three gibbons, anthropoid apes much more closely related to man than any other known type, were added to the collection of the psychology laboratory at Penn-

sylvania State College for experimental purposes.

GOOBER DAYS

It's Goober Time in Georgia, but not every farmer can have as pret-

ty a helper as Miss John-

nie Watson, of Cordele, to aid with the stacking. The outlook for the pea-

nut crop this year is ex-

cellent, with both pro-
duction and prices high.

The work of cutting the crop now is well under way throughout the goo-

ber belt of middle and south Georgia.

THE TECHNIQUE, ATLANTA, GEORGIA  Page 5
U. S. Service Teams May Schedule College ‘B’ Squads

Coach Alexander is working on the idea that B teams in college football play teams made up of men in the service of the United States. He said that there are a great number of boys who play on the B team the entire four years in college, and consequently never get into a real ball game.

At present many service teams are being organized all over the country, and these teams will be seeking games for their schedule. This is a very opportune time to get these B team games started and also let the boys play some football that haven’t a chance to play varsity ball.

Let’s all hope something of this sort is done, for it would color many boys in the future. Who knows? This might be a place where some hidden talents and varsity material may be found.

"People Must Work"—Says Recent Cummings

ATLANTA, Ga.—(AP) — The board of regents, which controls the state’s university system, has named a committee to look into what one state’s university system, has named to the Board of Directors of the Georgia Tech Athletic Association in May. Other alumni members of the Athletic Board are Robert T. Jones, Jr., 1922, and W. A. Parker, 1919.

Frat Bowling Teams To Begin Action Soon

The bowling leagues composed of Georgia Tech fraternal and other campus organizations desiring to enter will begin play on Friday, October 10. The Bulldog Club has requested that all those desiring to enter teams in the Gold or White League will please notify Polly Poole at the ATO house. There will be a meeting of all teams at 7:30 P.M. on the third floor of the student center at 8:00 P.M.

Freshmen Flak

There'll be plenty of a game. Don't let Chattanooga fool you. Scrappy Moore's outfit is piling away for Jackets, and they are tough as nails. Grig Onis, fullback, is one of the best single men on the field, and the cheers of the entire student body during a contest will be as devastating as a package of dynamite, and yet they've been known to let plenty of duds fall. Any game to which Tech is a party, toss a cent for the winnies. It's probably the surest method; but not for Saturday's tilt. The odds are with the Engineers from home.

Sophomore Plentiful

Coach Alexander is stewing up woe for the Chattanooga Moccasins. The Old Man of Football is going to pep up the game with red-hot sophomores and a score of seasoned vets. The oufs are going to be thrown in right and left under the new substitution rule, saving the stronger portion of the Varsity from the injury jinx and for another trip to the Bowl, possibly.

The Arrow Shirt

The Arrow Double—buttoned-up collar shirt one minute and an open-necked sport shirt the next.

CHATTANOOGA CHOO-CHOO
Well, tomorrow is another day—and the start of another football season. And gentlemen, don't let anyone tell you that our gold in gold are starting off with a bratter, because there are those among us who have said that the Techsters can take the choo-choo from Chattanooga for a long ride the odds are even on the Notre Dame Fray. Perhaps this is a very brash statement, and perhaps again what we really mean is that prospects for the '41 Jackets are either pretty bad or pretty wonderful. In any case, few people have been shot for having a good case of optimism, and while the game Saturday promises to have just a bit more zip than the usual first-of-the-sea son warm up, we're a little prejudiced for the brighter outlooks.

As we mentioned before, the Monarchs from up in Tennessee will be no push around for the second stringers. Their season last year told of victory after victory from our friends with a score of 28-0, not to mention casual triumphs over Mercer, Center, and Sewanee. The national rating for boys in Blue and White was even a bit better than ours last year—the were rated 8th and we came off with an even 100, so you can see there will be a right nice little tussle on the Flats before there are any "Yellow Jackets from Notre Dame have a one-day stand at Coach Alex's theatre-on-the-flats?"

There are few things that give any more real fun to a college student about this time of year than looking forward a couple of weeks and speculation about the chances of the home team in a big game. And what games could be much bigger than the one scheduled for October 11, when the famous "Fighting Irish" from Notre Dame have a one-day stand at Coach Alex's theatre-on-the-flats? The Irish, complete with new coach, new system, and all the trimmings, have a return engagement on the Flats after meeting the Jackets two years in a row up in South Bend.

In the opinions of the dopesters, the Irish, as far as material goes, are stronger offensively than last year but a bit weaker on defense. Their season last year told of victories over Howard with a score of 28-0, not to mention casual triumphs over Mercer, Center, and Sewanee. The national rating for boys in Blue and White was even a bit better than ours last year—the were rated 8th and we came off with an even 100, so you can see there will be a right nice little tussle on the Flats before there are any "Yellow Jackets from Notre Dame have a one-day stand at Coach Alex's theatre-on-the-flats?"

Experiment Station Perfecting Magnesium Extraction Process

The present emergency and the defense program have thrown a spotlight on magnesium and brought to the attention of everyone the necessity for the efficient and cheap production of this metal which is so important in the manufacture of various alloys. America's production of magnesium is rising rapidly under the stimulus of defense demands. Estimated production for 1940 was 6,850 tons, and plans now under way look to an ultimate production of 25,000 tons annually.

The difficulty in the production of Magnesium is not the lack of Magnesium-containing raw materials, but the isolation of the pure metal itself.

Northwestern Gauges Effects of Lightning
New Equipment Installed by Westinghouse Technologists

One of the most comprehensive surge test apparatus for testing the effects of lightning on all kinds of electrical equipment was recently sold to Northwestern University for use in their new $5,000,000 Technological Institute at Evanston, Ill.

The lightning-making equipment—a 1,500,000 volt surge generator, a 500,000 volt-ampere, 60-cycle high voltage test set—will be built and installed by the Westinghouse Electric and Manufacturing Company. Westinghouse engineers collaborated with the Northwestern Technological Institute, headed by Dean O. W. Esherick, in planning the laboratory. These high voltage installations will help make the engineering school at the Evanston, Ill., university one of the best equipped in the United States.

The lightning laboratory will be used in the instruction of Northwestern students, for insulation research although the facilities will be available to public utilities in the Chicago area.

Doors that will act as safety switches are among the elaborate protective devices to be installed in the laboratory for the safety of students.

Several processes are known already for accomplishing this, but they are not sufficient to satisfy the demands in the present emergency. To remedy this situation, the Tennessee Valley Authority, in cooperation with the State Experimental Station, is endeavoring to perfect a process of the extraction of Magnesium from dolomite, also known as chrysotile and pyrolusite, a magnesium-silicate (MgO·7SiO2), which is occurring in large quantities in Georgia and North Carolina.

However, at the present time, while the process is still in the experimental stage, and due to the National Emergency, Mr. Houston (the research director) is unable to divulge any details about the process.

Religious Speakers

Two speakers will represent the Jews and Protestants at several campuses across the country, aiding the efforts in Georgia and North Carolina.

REligious Speakers

(Continued from Page 1)

In special missions, will represent the Catholics, and Rabbi Lessing again, of Baltimore, will represent the Jews.

Important Mission

At present these men are in England on a vital religious mission. With special consent of the United States Government, they flew over in a bomber two weeks ago. The subject of their lectures will deal with the strong unity of the religious groups in Great Britain. The mission has a purpose: (1) to inculcate in the British the message of religious unity in America, and (2) to bring back to us a story of a united Great Britain where Catholics, Jews, and Protestants are fully supporting their governmental theories.

unique slogan

Atlanta is one of the twelve United States cities in which the lectures will be held.

The National Conference of Christians and Jews has as its slogan, "Make America Safe for Differences." Rather than trying to get religious groups to agree, they are insisting on the right to disagree.

No Charge for Lectures

Responsible for securing these prominent men to speak to both Georgia students and the Atlanta public, without charge, are Dr. Ashby Jones, Mr. Walter Rich, and Mr. Hughes Spalding, who, as a committee, have collaborated with the head offices of the National Conference.

New Rules

(Continued from Page 7)

before, for a minor revolution in the hipper-dipper brand of football in the offing.

The be-knickered arbitrators have also been touched by this reform movement. According to an agreement ratified by the National Association of College Football, new signal changes have been adopted, which are, along with the rule violations:

1. To show the intentional grounding of a forward pass, the official should hold both hands over his right shoulder.

2. Unportmanteau conduct will be indicated by the official extending both arms out straight from the sides of his body with the palms facing down.

3. Illegal touching of a kicked or free ball will be shown by the official tapping both shoulders with his hands, the upper arm being parallel to the ground while he is making the signal.

Further tending to streamline the game is the new numbering system being given a tryout by numerous leagues from coast to coast. In order to enable the paying customers to more easily determine who's doing what, the referees will do something about what goes down on the greenward and to spot the individual performance of every player, the end will be numbered in the 60's, the tackles in the 70's, the guards in 80's, centers in the 50's, quarterbacks in the 40's, fullbacks in the 30's, left halves in the 20's, and right halves in the 10's. Going a step farther in the complete clarification of the situation, the left members of the line will wear odd numbers, the right, even. Always for these improvements, the Tech squad is reported to be planning on using this system during the impending season.

Scabbard & Blade

Scabbard and Blade, honorary organization for junior and senior military and naval students, had a special initiation last Thursday night, September 20. Paul Bailey and Ed D'Amato, both co-operative students, were initiated at these ceremonies.

Collegiate Digest on lookout for Timely, Interesting Snaps

Collegiate Digest, the national photo supplement for college papers, is looking for timely, human-interest pictures of events that happen on your campus. If you're a shutterbug, here's an easy way to pick up some spending money or pay for your film and develop.

1. Mail your pictures to Editor, Collegiate Digest, 22 Paviing, Minneapolis, Minnesota.

2. Payment of $3 for each useful picture may be made upon acceptance.

3. Good quality glass prints are essential. Only pictures that are sharp in detail and have good tone quality will be accepted. Action or candid photos are preferred.

4. All pictures must be properly captioned with full details.

5. Unused prints will be returned to the sender.

or others who might enter the high voltage room. The doors will be so interlocked with the equipment that, should a person accidentally enter one and wander into the room, the high voltage circuits would be opened immediately. In addition to the regular control desk, a small portable control unit about the size of a serving tray and as easily carried will operate the high power devices from any spot in the laboratory.

A better method is to send it home regularly by Railway Express—and have it returned the same way.

Our service is fast, sure—and convenient. Economical rates include pick-up and delivery at no extra charge within our range of coverage in all cities and principal towns. Your choice of prepaid or collect charges. Just as convenient too, for 'most any shipment:

WHAT ARE YOU DOING WITH YOUR LAUNDRY THIS YEAR?...

Railway Express Agency, Inc.

NATION-WIDE RAIL-AIR SERVICE

Everywhere you go, they satisfy

Says Paul Douglas, well-known radio announcer

Somebody whistles a few bars of a catchy tune. Others pick it up.

Soon the whole country's whistling it. It's a hit.

Somebody lights up a cigarette. Likes it. Passes the word along.

Soon the whole country's smoking it. It's a hit. IT'S CHESTERFIELD.

The big thing that's pushing Chesterfield ahead is

Is the approval of smokers like yourself.

Chesterfields are definitely Milder, Cooler-Smoking and Better-Tasting.

They're made of the world's best cigarette tobaccos

Blended just right to give you more smoking pleasure.

But even these facts wouldn't count if smokers didn't just naturally like them.

Once a smoker finds out from Chesterfield

What real smoking pleasure is, nothing else will do.

Yes, fellow smokers, IT'S YOUR APPROVAL

THAT'S PUSHING CHESTERFIELD AHEAD.
