Textile Chemistry Studied by A. A. T. C. C.

The Tech student chapter of the American Association of Textile Chemists and Colorists, formed in 1935, affords the student a chance to become better acquainted with the various phases of chemistry and textile dyeing processes. Motion pictures, tours, and speakers prominent in the textile field are introduced to help meet this end.

The Association's purpose is to promote an increase in knowledge in the application of dyes and chemicals, to further research on chemical processes and materials, and to establish channels through which increased professional knowledge may be interchanged.
As a branch of the National Organization, the student chapter of the American Ceramic Society was formed at Tech in 1926 and since its founding has become an active organization on the campus. Though a relatively small organization, the Society's members are unified and led in the true spirit of cooperation and fellowship toward a common goal of personal development and professional achievement. Frequent lectures by men prominent in the Ceramic field are offered as a means for the student to become better versed in phases of Ceramic Engineering. Sponsoring lectures is only one of the numerous activities of the organization which is quite active in campus social functions.

The American Chemical Society of the Georgia Institute of Technology, one of many recognized student chapters of the national organization, was established in 1937.

The Society's manifold purpose is to afford the students majoring in Chemistry and Chemical Engineering an opportunity to become better acquainted with one another, to secure the intellectual stimulation that arises from professional association, and to secure experience in preparing and presenting technical material before audiences of chemistry enthusiasts.

In addition the American Chemical Society at Tech strives to foster a professional spirit among its members and to install a professional pride in Chemistry and Chemical Engineering. Its members are accurately informed on the latest developments in industrial techniques and accomplishments through the society's official magazine, which is a weekly publication available to all its members. Pertinent movies, interesting and entertaining lectures, and technical demonstrations also are used to promote interest in the field of chemistry.

The Georgia Tech student chapter of the American Institute of Chemical Engineers seeks to foster a strong professional spirit among its members. Interesting films and well-informed speakers from the fields of education and industry but pertaining to topics of chemical engineering were sponsored through the year by the A. I. Ch. E., and in order to supplement the student's formal education, and for his enjoyment and chance to better know his Ch. E. colleagues, the local chapter frequently broke the monotony of school life with varieties of social functions.

To provide incentive among students of chemical engineering and to foster pride in the profession, the institute presented annual awards for high scholastic achievement, and members participated in the presentation of technical material at the annual national convention.

A. I. Ch. E. this year enjoyed a substantial rise in membership, largely through the efforts of President Bill Seaton and his assistants, the society experienced a highly active and successful season.
The Georgia Tech Architecture Society is a student branch of the Georgia Chapter of the American Institute of Architects. Its purpose is to maintain high standards in student design through the lectures it sponsors and the recognition it bestows upon outstanding students. The annual Beaux Arts Ball and a variety of parties comprise the social activities. Those students in the upper two-thirds of their class who have completed Design 207 are eligible for membership. To join the Society is to take the first in a series of steps that lead to active membership in the American Institute of Architects.
The local chapter of the Institute of Radio Engineers was established in 1945; it is the professional society for engineers in electrical communications and its related fields. Its activities are directed toward advancing the science of electronics and radio. Movies and talks by professional leaders are featured at each of its monthly meetings. The radio "shack" atop the Physics Building is available for use by members of the Institute as well as other licensed operators.

The American Institute of Electrical Engineers was founded in 1884, when the possibilities of an organization which would foster and encourage electrical development were beginning to be realized. The objects of the institute are the advancement of the theory and practice of electrical engineering, maintenance of a high professional standing among its members, and the development of the individual engineer. The institute has contributed largely toward the remarkable progress that has taken place in the electrical field since the better part of the nineteenth century. All branches of electrical engineering are represented in the membership.

The Georgia Tech Chapter of A. I. E. E. was established in 1915, and is one of 130-odd student branches in leading technical institutions of the country. Activities to stimulate interest here include lectures, demonstrations, movies, tours, and an annual delegation to the national convention to present technical papers written by Georgia Tech Students.

The American Institute of Industrial Engineers is a national organization for professional men who are performing duties in the industrial engineering field. The student chapter at Georgia Tech was organized after the opening of the Industrial Engineering School on the campus in 1946. The aim of the Georgia Tech student chapter is to create, develop, and maintain a keen interest in the field of industrial engineering. To do this, an opportunity to study further the principles taught in the classroom is given the members by having qualified speakers, illustrative movies, and plant tours to the many diversified types of industry in the Atlanta area. The chapter represents the School of Industrial Engineering in the various campus activities and functions and acts as an agent to its members for the dissemination of the latest industrial engineering developments. Annually the organization presents a trophy to the outstanding Industrial Engineering Sophomore.

Inspires Further Professional Interest
Membership in the Association of Industrial Design Students is open to all Tech men enrolled in the School of Industrial Design who have begun the series of required design courses, which begin in the second quarter of the sophomore year.

The purpose for founding such an organization was to cultivate a sense of ethical relationship between the designer and his colleagues and clients, the opportunity for a medium of social activity among industrial design students, and communication with industrial design students at other schools as well as practicing designers. Lecturers and seminars are also sponsored.
The American Society of Military Engineers desires to bring together all Tech students that are interested in the field of military engineering and the necessity for our country to remain prepared in that field. The organization, open to all Tech students, offers a varied program of speakers and field trips related to new developments in the field of military engineering, a dance and banquet once a year, and an invitation to the social activities of the local chapter of their parent institution, which is a national organization.

The Georgia Tech Student Chapter of the American Society of Civil Engineers was granted its charter in 1924. As the Society is a departmental organization, all juniors and seniors in the Department of Civil Engineering are eligible for active membership. The meetings of the society, however, which are held at regular intervals in the Civil Engineering building, are open to all students throughout the School of Civil Engineering.

The Student Chapter of the American Society of Civil Engineers is active in obtaining movies, speakers, and field trips which relate the theory of Civil Engineering to the practical methods of construction industry.

The society provides a convenient and quite successful medium for the getting together of students in fellowship and the pleasant exchange of ideas. Furthermore it takes the active lead in presenting the Civil Engineering Department's annual entry in the Engineers Week exhibit. C. E. exhibits have consistently rated high in past years.

The Georgia Tech Student Chapter of the American Society of Mechanical Engineers gives the mechanical engineering student an excellent opportunity to get together with other M. E.'s for the purpose of discussing the most recent developments in the mechanical engineering field. In attempting to better acquaint the M. E. student with this professional side of engineering, the society conducts weekly meetings, often supplemented by informative lectures by authorities in this and allied fields. Among the privileges accorded members is subscription to the monthly journal of the parent society, which deals with new developments and techniques involved in the industry. With one of the largest memberships of any society on the campus, the chapter continues to grow, providing an enjoyable outlet for the interests of those students interested in mechanical engineering in its various phases, and constituting a big step toward acquiring professional standing in the engineering community.
The National Institute of Aeronautical Sciences was founded with the purpose of encouraging original thought and new ideas in the minds of student aeronautical engineers so that they might be better equipped to contribute to progress in the rapidly advancing field of aeronautical engineering. The Institute serves as a means to coordinate the different phases of aeronautics, including practical engineering and methods of production as well as the field of education. Because the field of aeronautics is a comparatively new branch of engineering, the Institute has been able to contribute a great deal of help to its members through varied and interesting programs on material not found in the classroom. An active organization, the Institute this year sponsored the prize Engineers Week exhibit.

Benefits of Scientific Management Shown
The Society for the Advancement of Management is the recognized national professional society of management people in industry, commerce, and education. Representing no special interests, it is motivated by a selfish zeal to spread the benefits of scientific management wherever management is required. It has constantly adhered to the purpose of helping executives approach all phases of the management problem—production, distribution, administration, industrial relations—in the engineering manner.

The Student Chapter at Georgia Tech was first a departmental society in the Industrial Engineering Department, but has since opened its membership to all departments. Representation of all the engineering fields provides a more complete understanding of management problems.
Since organizations exist primarily to develop and further the interests of the student, there must be an endless variety of groups to foster the most varied of student interests and desires. Thus it is that the classification of 'councils and clubs' is perhaps the most important of all the types of organizations. For it is these groups that are basic in the structure of student outlet facilities, that provide the foundation for creativeness, the impetus for achievement or simply the atmosphere for pleasure and leisure preoccupation.

One of Tech's foremost service clubs, Alpha Phi Omega is a national service fraternity organized on the principles of the Scout Oath and Law. Its members ordinarily are men who have previously been registered members of the Boy Scouts of America, and its objectives involve developing fellowship and friendship among its members and promoting service to the student body and faculty, to youth and community, to members of the fraternity, and to the nation as participating citizens.

Among Alpha Phi Omega's services to Georgia Tech are the sponsorship of the annual "Ugliest Man on the Campus" contest, the proceeds of which are donated to charity, and the supervision of the polls during campus elections.
The Circle "K" Club, although only seven years old, has increased so in popularity that it holds a top spot among Tech's service organizations. An affiliate of Kiwanis International, the club at Tech was the sixteenth one organized; it has been instrumental in the formation of new clubs at Emory University and St. Louis. Circle "K" has worked continuously under the guidance of its sponsors, the Northside Kiwanis Club, to become a useful organization on the campus. The members have donated much of their time and effort to many worthwhile projects both on and off the campus.

Tech Band Provides Many Forms of

Practice makes perfect; this adage is one which is rigidly followed by the Georgia Tech Band. Practicing three times weekly at Crenshaw Fieldhouse, the Yellow Jacket Band continued to provide superb music for various activities on and off campus this year.

Last spring a reciprocal concert was given by the combined Tech and University of Georgia Bands at Grant Field and on the Georgia campus in Athens. During the fall the band performed at all home games and made trips to Duke and the University of Georgia with the football team. Outstanding half-time shows were executed by the band at these games. In the winter quarter music rang throughout the new Alexander Memorial Coliseum as the band provided music at home games. Tech Night at the Fox found the band once more performing for this annual event.

Herb Sherrow is band captain, Jim Long is executive officer, property and uniform lieutenants are Houston Welch and Lynn Hazlett, respectively, and Wayne Rumble is drum major. Ben L. Sisk is director.
Entertainment For Students And Public
The Bulldog Club is one of the oldest organizations on the Georgia Tech campus, and as in previous years it was one of the campus' leading organizations. It is composed of outstanding members of the Junior and Senior classes who have been selected to represent an organization which takes an active part in intramural athletics, such as fraternities, religious organizations, and other clubs. The Bulldogs are engaged in many responsible activities; however, its main purpose is to promote, organize, and arbitrate intramural athletics. The club works with the Athletic Association in deciding on rules and dates for intramural events. The club is responsible for supervising the Homecoming Weekend festivities, during which the Bulldogs judge Homecoming displays and "ramblin' recks," officiate the Freshman Cake Race, and supervise the Homecoming Dance.

In the fall, during the week preceding the Homecoming celebration, and in the spring during the week preceding the I. F. C. Weekend, the Bullpups are a colorful campus tradition in their white pants, red shirts, black coats, and derbies.

Although divided into two sections, each representing the members who are in school at two different times, the Tech Co-op Club actually works as a unit. The club is active in intramural sports, giving medals for the winners in softball, ping-pong, chess, and tennis. Other functions sponsored by the club are the two annual smokers with the Briaerean Society, dances at various times, and aiding the incoming co-op fresh-
man to get organized. Section II of the club has charge of cushions and sun visors at the football games in the fall, and the Kampus Kapers dance is offered by Section I in the winter. A loan fund for co-ops is available under the auspices of both sections. The organization of the club is such that co-ops may enjoy as many privileges as regular students do in the way of extra-curricular activities.

Georgia Tech Dames Club Provides

The Georgia Tech Dames Club, affiliated with the national organization of Dames Clubs in 1949, this year had a total membership of two hundred thirty-six. The club, which is composed of wives of Tech students, meets regularly each month. There is also a monthly bridge party for the members. Occasionally social functions are held with husbands in attendance.

The purpose of the Dames Club is to promote acquaintances and social activities among the wives of students. But their activities are not limited to social functions alone. During the Christmas season two projects were undertaken by the club. Christmas cards were sold to raise money and food baskets were sent to needy families in the Atlanta area.

This year the club was led by Mrs. Connell Roughton, President; Mrs. Samuel F. Scott, Jr. and Mrs. Troy Puckett, Vice-Presidents; Mrs. Don Scoggins, Secretary; and Mrs. Robert E. Martin, Treasurer. Sponsors for the club are wives of three Tech faculty members: Mrs. James L. Taylor, Mrs. Lane Mitchell, and Mrs. William N. Cox, Jr.
Activity for Wives of Tech Students
Drama Tech, the campus dramatic club, is outstanding among Tech's many organizations. The group offers enjoyment while teaching the various phases of theatrical work. A student interested in acting, producing, directing or any of many technical phases can find in Drama Tech an excellent opportunity for developing his interest and exercising his abilities.

Three times a year, once each quarter, Drama Tech presents a play for the public's enjoyment. Under the expert guidance of Mrs. Mary Nell Ivey, the club has become renowned throughout the Southeast for its ability to present plays of a widely diversified range. From the comedy of "Harvey" to the tense drama of "Home of the Brave" to the ancient classic of "Oedipus Rex," Drama Tech has successfully run the gamut of modern drama.

Drama Tech makes very effective use of the theater-in-the-round, a staging arrangement unique among modern theater groups and which has contributed fully to the organization's success.

All students, faculty members, and employees of Georgia Tech who are interested in working with Drama Tech are welcomed to join. Credit for English is given in many cases.

Amid increasing prestige, Drama Tech

Crenshaw Field House is the home of DramaTech's unique theatre-in-the-round.

Final make-up application indicates the nearness of curtain time.

This highpoint in a typical Drama Tech production represents endless hours of patient practicing.

Savannah Boys Comprise Geechee Club

Reorganized in 1946, the Tech chapter of the Geechee Club did not until recent years become a prominent organization on the campus. Its enthusiasm and prestige increased so rapidly, however, that it is now one of the most formidable of the clubs. Unique in that it is composed only of Savannah boys, the Geechee Club originally catered to veterans and existed primarily to arrange transportation for its members to and from home. The club has now increased to include most Tech Savannahians and has made an enviable record for itself, especially in intramural athletics and social life.
The Georgia Tech Hellenic Club was organized on the Tech campus in 1956, but in one short year has taken its place among versatile campus organizations. The club is composed only of students of Greek descent attending Georgia Tech or some other college in the Atlanta area. The primary purpose of this club is to promote good will and better understanding among the Greek students. The club meets twice each month. The activities of the club are varied and include athletics and social functions; throughout the year the Hellenic Club sponsors formidable intramural teams and has a variety of picnics and dances.

Glee Club Represents Tech as Good

Again, as in the past, the Georgia Tech Glee Club maintained its high standing among the active organizations on campus. Under the direction of Mr. Walter Herbert the forty-man singing group represented the South at the annual convention of the Intercollegiate Music Council held at Rensselaer Polytechnic Institute in Troy, New York, last April. Their annual appearance at the Fox Theatre was made during May and they performed with the Atlanta Pops Orchestra at the kick-off of the Atlanta Red Cross Drive. Numerous concerts were given throughout the state during the year including Brenau College and West Georgia College.

Practice sessions are held every Tuesday and Thursday night at the Y and due to the high interest shown, a Freshman Glee Club was formed and scheduled appearances were made.

The president of the Glee Club is Don Bearden, assisted by Vice-President Charles Poston, Secretary Henry Everett, and Business Manager Bill Woodyear.

Management Club's Large Membership

George Spragins

OFFICERS

George Spragins .................. President
Bill Maulding ..................... Vice President
Lee Greer .......................... Secretary
James Grimes ..................... Treasurer
The Georgia Tech Management Club is a student organization of the Industrial Management Department, which embraces all fields of industrial managing. Its membership is open to all Industrial Management juniors and seniors. Members and advisors of the club strongly recommend that all Industrial Management students participate in this club so that they might learn first hand about the management side of industry as a supplement to required classroom work.

During the school year the club sponsors many activities of interest to the student of Industrial Management; included in a season’s agenda are lectures by outstanding industrial leaders, provocative and informative films, and educational field trips, plus a variety of social functions. This was a successful year for the club; its membership was among the largest of any campus organization.
Since most students at Tech come in contact with mathematics only as it is related to applications in engineering fields, the Georgia Tech Mathematics Club was formed in 1956 to present discussions on mathematical topics which, while less applicable to engineering practice, would be equally interesting and stimulating, and would afford the student the chance to acquaint himself with the logic, precision, and even beauty of the total mathematical structure, elements of which he might otherwise miss.

Club meetings are held once each month, and although subjects are geared to interest the upperclassman, all students are invited.

Physics Club Membership Open To All

The Physics Club of Georgia Tech, although sponsored by the Physics Department, serves no particular interests and is open to any interested student attending Tech. Through the sponsoring of a series of authoritative lecturers, various field trips, and other available means, the Physics Club strives to associate its members with a better rounded knowledge of science through the introduction of many of its various phases.

Social activities of the club this year included a picnic held during the spring quarter. Service to the school was rendered through the club's participation in Engineers Week.
The Radio Club is primarily an organization of enthusiasts of amateur radio. Its primary aim is to promote the general welfare of its members and to maintain an active interest in communication by amateur radio. To fulfill this aim, the club owns high-powered transmitters which cover all the active "ham" bands. This equipment is located in the penthouse atop the Physics Building.

A secondary purpose of the club is to provide instruction in the principles of amateur radio for aspirant "hams" which might enable them to qualify for the government license.
This year the Ramblin’ Reck Club was unusually successful in carrying out its purpose of developing enthusiastic school spirit, specifically among the entering freshmen students. Weekly pep rallies were spiced by the appearance of guest personalities and were highlighted by the pre-Tennessee game rally and the "Beat Tulane" bonfire rally, attended by hundreds of students. In addition to the rallies the club sponsored the Ramblin’ Reck Parade and directed "Stunt Nite." Instrumental in the indoctrination of entering students, the Ramblin’ Recks, furthermore, set forth and enforced requirements and limitations of "rat" privileges.
The St. Patrick's Council was organized on the Tech campus in 1950. The purpose of its organization was to promote the interest of the Georgia Institute of Technology and the several honorary and professional societies of the academic departments in the school. Its principal function is the planning, promoting, and coordinating of Engineers Week. The Council assumes further responsibility during this week by entertaining a group of outstanding high school students who have been selected by local chapters of the Georgia Society of Professional Engineers on the basis of their ability and interest in the field of engineering.

The Georgia Tech Chapter of the American Society of Exploration Geophysicists, experiencing its second year on the campus, had its roots in the former Geology Club. The new name was acquired when a charter was obtained from the National Society of Exploration Geophysicists.

The primary purpose of the organization is to foster among the Tech students an interest in geology, mineralogy, and their relationships to engineering. As part of the regular programs, field trips are sponsored and in addition there are numerous speeches by prominent authorities in the field.
The general purpose of the Spiked Shoe Club has been to foster, to forward, and to further increase interest in track as an amateur sport throughout southeastern schools. The Georgia Tech Chapter of Spiked Shoe is composed of lettermen and numeral winners in track and cross-country and of other individuals highly interested in track and field. This year inaugurated the giving of a trophy to the outstanding high school athlete in track.
The Georgia Tech Chapter of Toastmasters' International, founded in 1950, was the first college chapter among the hundreds of Toastmasters' Clubs. Toastmasters in an educational club, especially useful on the Tech campus, since it seeks to improve through practical experience, the ability to speak in public. Weekly, through planned programs, members deliver prepared and extemporaneous speeches, thus constantly improving their power of speech.

The "T" Club, a relatively new organization on the Tech campus, owes its successful existence to Coach Bobby Dodd. The club is exclusive in that it is open only to lettermen, nearly all of whom are members. The club is actively engaged in meeting its members' interests, and year before last, the "T" Club building was erected.

The primary goal of the Tech "T" Club is to promote fellowship among athletes, the coaching staff, the faculty, the student body, and the alumni of Georgia Tech.

One of the newer organizations on the campus, the Veteran's Club in two short years has become one of the largest and most active organizations to be found on the Hill.

Any veteran enrolled at Tech is eligible for membership. Since its beginning the club has undertaken many projects, but its principal project has been the aiding of each quarter's veterans.

Veteran's Club Exists Primarily to Aid
entering veterans in their transition from duty in the service to life at Tech. Through a well-planned program of outstanding speakers and entertaining movies as well as dinner-dances and picnics, the Georgia Tech Veteran's Club attempts to provide its members with the social and cultural needs necessary to supplement their formal education and to better the already good veteran-faculty relationships.

In The Orientation of Incoming Vets
The purpose of the Tech Camera Club is to promote student interest in photography. In order to pursue this goal a special course in elementary photography, taught by qualified members of the club was offered. In addition, the club maintains a well-equipped darkroom and holds two salons each quarter. Pictures are criticized by local professional photographers who speak each quarter on topics suggested by the members, and each quarter members are given a chance to photograph a hired professional model.

The Young Men's Christian Association is not just another campus organization. It is a primary center of fellowship, whose services are available to any student of Georgia Tech. Every student, in fact, by virtue of a portion of his activity fee to the "Y," is a "privilege" member. Many students choose to become "active" members by joining one of the groups commissioned by the Y. M. C. A. Board of Directors. These groups, including the Alpha Phalanx, the T-book staff, and several others, provide their members with a great deal of enjoyment and render many valuable services to the campus and the community.

The Y. M. C. A. building is a familiar landscape on the Tech campus. It houses many Techmen, but more important, it provides a distinct service by housing not only the Y. M. C. A. organizations but also the Glee Club, the Technique, the Blue Print, the Engineer, the Camera Club, and a variety of other Tech organizations.

Available facilities at the "Y" include ping-pong, pool, and various parlor games. A leisurely moment can be spent reading the evening paper or a favorite magazine, playing the piano, or just relaxing.

Freshman Camp Offered by Alpha Phalanx

For the huge task of indoctrinating each entering freshman in the ways of Tech life, the Alpha Phalanx Club deserves the greatest amount of credit, for, as always, the annual Freshman Camp was sponsored and directed by Alpha Phalanx members. Leading upperclassmen, faculty members, school officials, and outstanding citizens of Atlanta gave useful hints and words of advice to the "lowly" rat. The club, as a part of the Y. M. C. A., also offered lectures and a student entertainment project. Alpha Phalanx is only one of the many "Y" clubs whose membership is open to any Tech student.
Sigma Phalanx, an active social and service club sponsored by the Georgia Tech Y. M. C. A., has broadened its field of activities this year to include many varied service projects. The club is in charge of the "Y" Camp and has made many improvements there during the year. Care of the "Y" truck which is used for hayrides and other purposes is another service rendered by the club.

Social activities of Sigma Phalanx included several hayrides and dances. In addition deputations were exchanged between Sigma and several surrounding women's colleges, including G. S. C. W., Brenau, and the University of South Carolina.

YMCA Rec Council Sponsors Dances

The Y. M. C. A. Recreation Council is one of several groups comprising the Georgia Tech Y. M. C. A. Cabinet. Though the organization participates in various activities, its primary function is to provide Tech students the chance to attend a dance or a hayride each Friday night. The week before a dance is spent rounding up girls from Agnes Scott and the various nursing schools in the vicinity, advertising the dance, providing for the free refreshments, and engaging in the other necessary duties. The members were repaid for the efforts, however, for this year the dances were the most successful ever.

Baptist Student Union Promotes the
The Baptist Student Union seeks to link Georgia Tech's Baptist students with Atlanta's Baptist churches in an effort to promote Sunday School attendance and active Baptist Training Union in the local churches' organizations. On the campus the Baptist Student Union sponsors vespers, religious discussion groups, intramural athletic teams, a choral group, a bi-weekly newspaper, and other organized activities of interest to the Baptist student; in addition to offering social, recreational, and religious facilities at the Baptist Student Union Center.

In cooperation with the B. S. U.'s of other Atlanta colleges and universities, the Tech group furnishes workers for local mission endeavor, donates Thanksgiving baskets to needy families, and sponsors Christmas parties for underprivileged area children.

Every student who either is a member of a local Baptist church or a member of a local B. S. U. or Sunday School class automatically becomes a member of the Baptist Student Union. Total membership amounts to over five hundred Tech students. The legislative groups of the Union include the B. S. U. Executive Council, the Freshman Council, and committees comprising the Greater B. S. U. Council.

Spiritual Character of Tech Baptists
Tech Canterbury Offers an Answer to

Canterbury is a community of students in the Episcopal Church, drawn together by common needs, looking for a way of life in the Christian faith and searching for answers to the basic universal questions.

Students from Tech and Agnes Scott meet each Sunday night in All Saints' Church, near the Georgia Tech campus, to join together for supper, worship, discussion, and recreation. In All Saints' Church Tech men play a vital part in parish life; twenty members of Canterbury have been licensed as lay readers and they work with other members of the parish in leading services in the parish and in missions in the Atlanta area.

Activities are not restricted to Sunday nights; during the present year Canterbury members have been looking forward to the completion of a new Student Center, which is being constructed as a part of the parish facilities. Members of Canterbury are building furniture for the Center, which will be open at all times for the convenience of both students and faculty members. "Moving in" time was anticipated to arrive early in the Spring Quarter of 1957.
Members build furniture for the new Episcopal Student Center.

The Georgia Tech Chapter of the Newman Club was established on the campus in 1928. The Newman Club, a religious organization which offers the Catholic students at Tech much in the way of spiritual and intellectual guidance along with various social activities, is regularly active with other Newman Clubs in the vicinity in social and religious functions. Members of the Tech Newman Club may enjoy the many dances, parties, and picnics, as well as the religious functions sponsored by the chapter. A few of the activities on the religious side of the club's agenda include Lenten lectures every Sunday evening during Lent, the annual Mother's Day Mass and Communion Breakfast, and Mass at the Newman House every first Friday of the month and on Holy Days of Obligation. During the winter quarter of this year the Newman Club initiated the practice of holding two Masses every Sunday.

One very worthwhile social function was the annual March of Dimes Dance, the proceeds of which were donated to the charity.

At 724 Techwood Drive, on the corner of Third Street, is located the new Presbyterian Student Center, a place of relaxation, study, fellowship, friendship, Christian outreach, and sympathetic help. Here the work of the Presbyterian Church on the campus, the Westminster Fellowship, is concentrated. Through the Center new students can find a satisfactory church home in the Atlanta area and can meet with other Presbyterian students who are active in the Greater Atlanta Presbyterian student work.

The Center is primarily a place of religious activity. On Tuesdays, student-led services of worship are offered and Friday nights, education and social interests are discussed at open house. In addition, however, social activities are frequently planned for the members' enjoyment, and in the Center can be found a piano, a radio, a ping-pong table, and reading matter. Any Presbyterian and their friends caring to make their religion active while at college are invited to join any one of the committees at work in the Presbyterian Student Center.
The Wesley Foundation is a Methodist organization for students at Georgia Tech whose purpose is to unite its members in a close bond of fellowship while attempting to place human character and religious behavior on a higher level of existence. The regular meetings on Friday nights, which are planned by a student council, have found the house so full that it has become necessary to begin working on plans for a new student center. These meetings consist of a short worship service followed by a program which will vary from a humorous debate to an educational film about a foreign country.

The Wesley Foundation is rapidly rising to a place among the outstanding of the religious organizations. Progress of the past two years is well illustrated in the fact that Bob Marbut was re-elected to preside over the organization for the second straight year.

The Christian Science College Organization was established at Georgia Tech in May, 1956. Its purpose is to: unite the Christian Scientists within the college in closer bonds of Christian fellowship; afford to those so desiring an opportunity to learn and apply the truths of Christian Science; cooperate with other students religious groups in projects that promote inter-religious interest.

Weekly testimony meetings are given with a lesson prepared by one of the members consisting of selections from the Bible and correlative passages from the writings of Mary Baker Eddy, the discoverer and founder of Christian Science.

Hillel Serves Jewish Students

The B'nai B'rith Hillel Foundation at Tech is one of the more than two hundred active college chapters of the B'nai B'rith organization. The Hillel program is designed to provide the Jewish student, through discussion and study, with knowledge of Jewish life by acquainting him with the faith, literature, and history of his people. It hopes to help the student's integration into the general community by the promotion of wholesome fellowship and intergroup relations.

Hillel is designed to serve all Jewish students, regardless of "denominational" preferences or degree of conviction. No particular view of Jewish life is endorsed.
