THE INSTITUTE OF Radio Engineers has as its aim the advancement of the theory and practice of radio and electronics of allied branches of engineering and of related arts and sciences, their application to human needs, and the maintenance of a high professional standing of its members. The objectives of the IRE are scientific, literary, and educational.

The Georgia Tech section of the IRE was founded in 1945. Monthly meetings are held, at which motion pictures are shown and talks are given by professional leaders. Interested students from all departments are invited to attend the meetings.

This year Dr. Benjamin J. Dasher, Director of the School of Electrical Engineering received the distinction of being named a Fellow of IRE.

THE PHYSICS CLUB is a student organization whose object is to provide interested students with a channel through which they can further their study of physics, to develop their interest and to give a supplement to classroom work. All Tech students are exposed to the field of physics so the membership is not restricted to physics majors.

Programs give the members insight into many of the phases of science and give a basic knowledge of the practical application of physics. This purpose is accomplished through the sponsoring of a series of formal lectures on various scientific and engineering topics. Discussions are held at the meetings so members can air their own views. These lectures and meetings are entirely open to the public.

THE GEORGIA TECH Mathematics Club was formed on the Tech campus in 1955 for the purpose of providing interested students with the opportunity to pursue the subject of mathematics in a non-classroom environment. The mathematical subjects discussed are not necessarily applicable to engineering practice, but are equally as interesting and stimulating, and afford the student the chance to acquaint himself with the logic, precision, and the beauty of the total mathematical structure.

The Mathematics Club is open to all Tech students, not just to Math majors. Subjects are geared to interest the upperclassmen, although all students are invited to the meetings which are held once a month.
COUNCILS AND CLUBS
ALPHA PHI OMEGA is a national service fraternity founded in 1925, and the Gamma Zeta Chapter here at Tech has been active for twenty years. Membership is open to all students who have participated in the Scouting movement in the past. Its purpose is "to assemble college men in the fellowship of the scout oath and law, to develop friendship and to promote service to humanity."

Among its many activities of service, the Gamma Zeta Chapter sponsors the annual "Ugliest Man on Campus" contest, the proceeds of which are donated to charity and co-sponsoring the annual campus Red Cross Blood Drive. Plans are underway for erection of a sign on the expressway to inform motorists of the location of the Tech campus.
THE GEORGIA TECH Rocket Society was made an official student chapter of the American Rocket Society on April 23, 1957. The presentation of the charter was made by the Executive Secretary of the Society, Mr. James Harford.

The Rocket Society presents interesting films of current interest to its members as well as lectures by prominent figures in the field of rocketry. Thus the chapter carries out its desire to aid interested persons in advancing their knowledge of the fields of rocketry, jet propulsion, and related sciences. Membership in the Georgia Tech Rocket Society is not limited to any certain department of school, but all who express an interest in these fields is welcome. Various interesting field trips are also made.

THE GEORGIA TECH BAND IN CONCERT FORMATION AND IN THEIR WHITE AND GOLD UNIFORMS, PREPARE TO PLAY A SONG.

The Band

THE GEORGIA TECH Band, under the direction of Mr. Ben L. Sisk, has the important job of representing Tech both at home and away on other campuses. The band played at half-time during the football games, with color provided by the twirling Tech coeds, introduced for the first time, and by majorettes from local high schools.

During the winter quarter, the band played at basketball games held in Alexander Memorial Coliseum. An annual spring concert is planned for the spring quarter.

Free time is hard to find for Tech band members, but they all manage to meet three times a week to practice for their various activities at their Crenshaw Field House headquarters.

BAND REHEARSALS on Tuesday nights are a very important part of musical training.
THE BULLDOG CLUB is composed of outstanding members of the Junior and Senior classes selected to represent groups which take part in intramurals.

The main purpose of the Bulldog Club is to promote, organize, and officiate at intramural athletic events. The club works closely with the Athletic Association on rules and intramural schedules.

Another Bulldog function is Homecoming Weekend. They supervise the Homecoming displays and “ramblin’ reck” judging, the choosing of the Homecoming Queen, the Homecoming Dance, officiate the Cake Race, and provide color with the Bullpups in their white trousers, red shirts, black jackets, and derbies.

This year the Bulldog Club introduced a trophy for the highest scoring man in intramural football.

THE CO-OP CLUB was organized in 1915 to unite the leaders in the co-op department and to establish a closer feeling of friendship among co-op students. Although divided into two sections, each representing the members who are in school at one of two different times, the Tech Co-op Club actually works as a unit. The club is active in intramurals, giving medals for
winners in the softball league and the ping-pong, chess, and tennis tournaments. Other club functions are the two annual freshmen smokers, sponsored jointly with the Briaerean Society, and an orientation program for incoming co-op freshmen. The big social event of the Co-op Club is the "Miss Perfect Lips" Dance, held in the summer.

Dames Club

OFFICERS
MRS. ROSE ELLEN STANLEY . . . . . . . President
MRS. BARBARA WILLIAMS . . . . . . . Vice President
MRS. MARLENE MCKINNEY . . . . . . . Secretary
MRS. BETTY PEACOCK . . . . . . . . . . . Treasurer

THE GEORGIA TECH chapter of the National Association of University Dames begins its activities in the fall with a Newcomers Tea given by past and present sponsors. This year the tea was held at Dr. Harrison's home, with Mrs. Harrison as guest of honor.

The Dames Club holds a fall party, and enjoyable bridge and canasta meetings, as well as the regular monthly meetings. A dance to celebrate the installation of new officers is held in May.

The purpose of the Dames Club is to promote acquaintances and social activities among the wives of Georgia Tech students. Various projects are also undertaken by the club.

There are nearly 400 members, all of which are wives of Tech students.

THE CLUB'S SONG LEADER leads those present in songs honoring the Christmas season during a Dames Club meeting.

DAMES CLUB SPONSORS, FROM LEFT TO RIGHT: Mrs. Ray Graves and Mrs. E. R. Bollinger. Not pictured is Mrs. William Cox.
Circle K is a national service organization fostered by Kiwanis International. The local group, organized in 1950, has worked continuously under the guidance of its sponsors, the Northside Kiwanis Club, to become a useful organization at Georgia Tech. The members have given much of their time and effort to a number of worth-while projects both on and off the campus of Georgia Tech.

Circle K is an extended and expanded version of Key Club, a high school organization sponsored by Kiwanis International. Both are service-honorary societies devoted to constructive work.

With an eye to the future, Circle K hopes to further its horizons in service work and to draw more members into the organization.
THE PAN AMERICAN CLUB of Georgia Tech was founded in 1956. The club is based on Pan American ideals, and its objectives include better human relations among its members as well as a cultural exchange of pertinent ideas.

The club sponsors several dances, outstanding intramural teams, and lectures by noted guests. The lecturers emphasize possible solutions to the economic and social problems and ways in which international relations might be improved.

The Pan American Club is interested in the social, athletic, and cultural development of its members. Recent dictatorial upsets in the Americas are of current interest, and are discussed enthusiastically among the members.
The Philosophy Club was established for the purpose of allowing its members the pursuit of knowledge and understanding. Logic, ethics, aesthetics, and political and social philosophy are discussed in a desire to find new avenues of thought and to better understand human problems.

All members of the Philosophy Club are free to give and take equally of the knowledge imparted by new domains of thought. The greatest emphasis in the club is placed on instilling in all its members a perpetual desire to seek knowledge and truth.

Several distinguished lecturers appear before the Philosophy Club throughout the year.

Membership in the Philosophy Club is open to all interested Georgia Tech students.
THE RADIO CLUB is primarily an organization of licensed radio amateurs, although membership is open to anyone interested in amateur radio. The club "ham" station, W4AQL, is located in the penthouse atop the Physics Building. It is available to licensed members and boasts an array of equipment. With the combination of transmitters and antennas, they can reach around the world on most of the "ham" bands. Activities center around the station: "chewing the rag" with other amateur stations, handling phone patches for members and other students, and helping prospective "hams" learn enough to obtain their own government licenses. The aim of the club is to promote the general welfare of its members and to maintain an interest in "ham radio."

Grant Schnieder . . . . . . . . Secretary
Kaye Don Harris . . . . . . . . Treasurer

DRAMA TECH IS ONE of the most widely known campus activities. Utilizing the effective "theater in the round" style of presentation, the club has won acclaim throughout the Southeast for its excellent productions of such plays as Oedipus Rex, Much Ado About Nothing, and There Shall Be No Night.

The student who participates in DramaTech has an opportunity to study acting, set design, lights and sound and the various other skills which are a part of producing a play. And for the time he devotes to the organization, the student may receive academic credit from the English Department.

Combining the expert directing of Mary Nell Ivey and the technical skills of Tech students invariably means an evening of "quality theater" at DramaTech.
A SCENE from the Fall Quarter production, "What Price Glory" is acted out.
THE SOCIETY FOR ADVANCEMENT OF MANAGEMENT, better known on the Tech campus as SAM, is the largest organization on the campus and the Tech chapter stands number one in the nation for membership.

SAM "firsts" for the year include the sponsoring of a management conference, an interchange of ideas with top level management; the establishment of the North Avenue Journal, a monthly form page newsletter containing items of general and special interest to the members; and organization of the Student-Faculty Relations Committee. Many plant trips were made during the year. A significant contribution was made by the Georgia Employment Committee in producing a brochure showing industrial locations in Georgia by territories.

THIS YEAR the Ramblin' Reck Club was unusually successful in fulfilling its purpose of developing enthusiastic school spirit, specifically among the entering freshmen students. Weekly pep rallies were spiced by the appearance of guest personalities and were highlighted by the pre-Tennessee and pre-Auburn game rallies, which hundreds of students attended. The club also sponsored the Ramblin' Reck Parade, the freshman Cake Race, a unique Coed Cake Race, and a "shirt-tail parade." Instrumental in the indoctrination of entering students, the Ramblin' Recks set forth and enforced requirements.

This year's officers included George Cates, President; Bill Harris, Vice President; and Richard Higgenbotham, Secretary-Treasurer.
THE SOCIETY OF AMERICAN MILITARY ENGINEERS has as its major aims the bringing together of all Georgia Tech students who are interested in the field of modern military engineering and in the necessity for our country's remaining well prepared and up-to-date in that highly important field. The organization, open to all interested Georgia Tech students, offers a highly interesting, informative, and varied program of speakers and field trips related to the field of military engineering. In addition, the Society offers to its members a dance and banquet once a year, as well as an invitation to the many social functions of the local chapter of its parent institution, which is a well established, nationally known organization.

Society of American Military Engineers
THE GEORGIA TECH GLEE CLUB, some 50 voices strong, is the voice of Georgia Tech, as is the band. They serve as public relations men in song. The Glee Club is one of the most traveled and best known organizations on the Tech campus.

In recent years, the Glee Club has participated in the intercollegiate Musical Council Conventions, held in Troy, New York and at Michigan State College. They have also entertained at the famous Blue Room of the Roosevelt Hotel in New Orleans.

In addition, the Glee Club sang at several universities around Atlanta, as well as in outlying suburbs, and other towns. The Glee Club also sings for the pleasure of Tech students at campus concerts.
THE GLEE CLUB, composed only of Georgia Tech students, rehearses on Tuesday nights for their busy schedule throughout the year.

PROFESSOR HERBERT carefully goes over a portion of one of the songs during practice so that it will be understood.

PROFESSOR HERBERT AND PRESIDENT GRAVES ADMIRE THE PLAQUE PRESENTED TO THE GEORGIA TECH GLEE CLUB BY THE NATIONAL IFC.
ORIGINALLY FOUNDED IN 1954 as the Geology Club, the Georgia Tech student chapter of the Society of Exploration Geophysicists obtained its charter from the National Society of Exploration Geophysicists in the fall of 1955.

The primary purpose of the organization is to foster among Georgia Tech students an interest in geology, mineralogy, geophysics, and other related subjects, as well as in their applications to the various fields of engineering. This aim is accomplished by numerous field trips, lectures, and meetings. Once yearly, during the spring quarter, their annual banquet is held. At this time, speakers from the oil industry are invited to speak to the members of the society.

THE ST. PATRICK'S COUNCIL was organized on the Georgia Tech campus in 1950 for the purpose of promoting interest in Georgia Tech and the various departmental and honorary societies of the school. The society's principal function is the planning, promoting, and coordinating of Engineers Week. The council also entertains a group of outstanding high school students selected by local chapters of the Georgia Society of Professional Engineers, during Engineers Week. These students are selected on the basis of their ability and interest in engineering.

This year the St. Patrick's Council hopes to have an even more successful Engineers Week than the one that they held during the Spring Quarter last year.

THE OBJECT of the Georgia Tech Student Lecture and Entertainment Committee is to present to the students of Tech an outstanding program of entertainment for their benefit.

During the fall quarter, the Kai Winding Septet and Jerri Southern appeared at a concert Homecoming weekend. For the winter quarter, the Committee brought Richard Dyer-Bennett and the Philadelphia Orchestra to the campus. Comedienne Anna Russell appeared during the spring quarter. A number of films, both American made and foreign, were presented throughout the year.

Students are admitted to Committee-sponsored programs free of charge, as a percentage of their student activity fee is put into the Committee fund.
THE "T" CLUB is a relatively new organization on the Tech campus. Coach Bobby Dodd is to be credited with its existence and success. The club is exclusive in that it is open only to letter-men, nearly all of whom are members. The club is actively engaged in meeting the interests of its members. Just four years ago the "T" Club building was erected.

The primary goal of the Tech "T" Club is to promote fellowship among athletes, the coaching staff, the faculty, the student body, and the alumni of Georgia Tech.

Last Christmas the members of the "T" Club conducted a help project for needy families. Among their many other activities are the yearly "T" Club dance, and selling tickets for the annual "T" Club game.
THE GEORGIA TECH VETERANS' CLUB, in its fourth year at Tech, is composed primarily of Korean veterans; however, membership is open to any veteran enrolled at Tech. Its main objective is to assist the veterans in adjusting to campus life. They feel that the students who are the happiest and best adjusted are the ones who can benefit the most from their education.

Regular meetings are held every other week and are designed for the enjoyment and relaxation of the members. The meetings often include interesting speakers. Other activities of the Veterans' Club include dinner-dances, banquets, and picnics for the members and their sweethearts. In addition, the club holds golf tournaments and participates in intramural sports and Homecoming festivities.

THE WOMEN STUDENTS' ASSOCIATION was organized on the Georgia Tech campus in 1957. The membership consists of all undergraduate women students and graduate students, referred to as associate members. The purpose of the association is to promote the general welfare of women students, coordinate activities of the women students, and to establish and maintain the finest standards of character and conduct. The major activity of the group is in the orientation of new women students in the fall.

The second Coed Freshman Camp was held again this year in cooperation with the Tech Y.M.C.A. Various social functions were also held throughout the year. The association was organized as a benefit to the coeds and as a service to the school.
THE GEORGIA TECH YOUNG REPUBLICAN CLUB was chartered on October 9, 1956 as Tech’s first permanent political club. Its objectives are: first, to encourage student interest and participation in political and civil affairs; second, to provide students an opportunity to obtain political education and training; third, to encourage a strong two-party system in the South; and fourth, to promote the traditional principles of the Republican Party.

Activities of the club include regular meetings, social events, Young Republican conventions, on state, regional, and national levels, and senior Party functions such as dinners.

On occasions, joint meetings have been held with the Emory-Agnes Scott Club.
THE BAPTIST STUDENT UNION in conjunction with Atlanta Baptist churches seeks to promote Sunday School attendance and an active Baptist Training Union in the local church organizations. The B.S.U. sponsors on campus: vespers, Bible discussion groups, a choral group, a monthly newspaper, intramural athletic teams, and other organizational activities of interest to the Baptist student. Social, recreational, and religious facilities are offered at the Baptist Student Union Center.

In cooperation with the B.S.U.'s of other Atlanta colleges, the Tech group furnishes workers for the local mission projects, visits at the Juvenile Detention Home, and sponsors Christmas parties for underprivileged children of this area.
Several Canterbury members gather on the steps of the cabin at the camp ground to await new arrivals for the quarterly outing.

Canterbury is the religious organization for Tech students of the Episcopal faith. The members are drawn together by common need, looking for a way of life in the Christian faith and searching for answers to the basic universal questions.

Tech and Agnes Scott students meet each Sunday night at the Episcopal College Center at All Saints' Church, near the Georgia Tech campus, to join together for supper, worship, and recreation. Mid-week services are held, and study groups meet during the week. Tech men play a vital part in the parish life of All Saints Church; a number of members of Canterbury have been licensed as Lay Readers and they work with other members of the parish in leading services and in mission work.

Canterbury Club

The Snack Bar is only one of the many facilities available to Tech and Agnes Scott students at the College Center.
CANTERBURY MEMBERS AND THEIR GUESTS FROM THE JOLLY HOME HAVE A CHRISTMAS PARTY AT THE COLLEGE CENTER WITH SANTA CLAUS.

AN AREA OF THE EPISCOPAL COLLEGE PROGRAM is the invitation for students to eat dinner at the homes of members of the parish.

THE CHRISTIAN SCIENCE ORGANIZATION at Georgia Tech was established in May, 1956. Its purpose is to unite the Christian Scientists within the college in closer bonds of Christian fellowship; to afford to those so desiring, an opportunity to learn and apply the truths of Christian Science; to cooperate with other student groups in promoting inter-religious interests. Weekly testimony meetings to which all students and faculty of Tech are invited, include a lesson prepared by a member, consisting of selections from the Bible and correlative passages from *Science and Health, with Key to the Scriptures*, by Mary Baker Eddy, the discoverer and founder of Christian Science. The latter part of these meetings is devoted to discussions of the Christian Science religion.
THE LUTHERAN STUDENT ASSOCIATION at Georgia Tech is a very active religious organization. Regular activities include a business meeting once a month, with dinner and a guest speaker. An informal open house is held every week, and parties are given every other month including hayrides, picnics, swimming parties, record parties.

Members of the Lutheran Student Association attend three day week-end conferences with the Lutheran Student Associations of other campuses every year.

The Lutheran Student Association is a national organization, with chapters on many college and university campuses. The Atlanta Chapter includes students from the campuses of Georgia Tech, Agnes Scott College, and Emory University.
THE GEORGIA TECH CHAPTER of the National Newman Club Federation was established in 1928, as a club of Catholic culture and Catholic fellowship. This club fosters the spiritual, social, and intellectual interests of the Catholic students on campus.

The Newman House is the center of club activities on campus. Meetings are held each Tuesday night, as well as Holy Days and First Friday Mass, at the Newman House. Sunday Mass is held at the Y.M.C.A. Other events include Mother's Day Communion and Breakfast, spiritual retreats, corporate communions, lectures, discussion groups, and parties, dances, picnics and dinners. Active participation is also taken in the intramural athletic program by members of the Tech Newman Club.

THE WESLEY FOUNDATION is the Methodist Center on the campus and is a part of the National Methodist Student Movement. Its purpose is to provide a program designed to create greater personal relationships with God and to continue to strengthen those ties with the church made in youth which assure full Christian maturity.

A program of varied activities are offered to fill the spiritual, moral, and social needs of the students. These include the weekly Friday night programs, student conferences, intramural sports, and deputations to other colleges.

Plans are underway for creation of a modern new building at Fourth and Fowler streets within the next year.

THE PRESBYTERIAN STUDENT CENTER, run by the Westminster Fellowship, is a place of relaxation, study, friendship, Christian outreach, and sympathetic understanding. The Center is primarily a place of religious activity. Student-led services of worship are offered, and members may share their viewpoints during discussion periods. In addition, social activities are planned frequently for the members' enjoyment, and additional entertainment is found in the Center. Through it new students can find a satisfactory church home and meet other Presbyterians who are active in student work in Greater Atlanta.

The purpose of Westminster Fellowship is to unite its members in a close bond of fellowship, while attempting to elevate the being and his religion.
GAMES SUCH AS PING PONG ARE BUT ONE OF MANY ACTIVITIES THAT ARE OFFERED BY THE RELIGIOUS FOUNDATIONS ON THE TECH CAMPUS.

Religious Activities

MANY CHURCHES FURNISH RIDES TO CHURCH.

COFFEE AND DOUGHNUTS ARE FURNISHED FOR THOSE WHO WANT THEM.
CHARLIE COMMANDER, General Secretary of the YMCA.

YMCA Cabinet

PATSY PATTERSON comfortably serves punch to guests and visitors at one of the YMCA socials on Sunday afternoons in the library.

YMCA Cabinet members are from left to right sitting: Bobby Turner, Charles Valentine, Bill Eisenhauer, Bill Vanlandingham, Jimmy DuBard, A. J. Lend, and Jim Smythe; standing from left to right is Ronnie Bell, Oscar Persons, and Dave McNeill.
DON DAVIS, Mrs. Ruth Odum, and Mrs. Wilma Lyons are on hand at the YMCA to furnish information and to help those who want help.

ONE OF THE MANY PHASES of entertainment sponsored by the YMCA is the week-end dances promoted by the Rec Council.

OFFICERS

CHARLES VALENTINE . . . . . First Vice President
BILL VANLANDINGHAM . . . Second Vice President
JIMMY DuBARD . . . . . . Third Vice President
BILL WHITE . . . . . . Secretary

THE YOUNG MEN'S CHRISTIAN ASSOCIATION'S services are available to every Georgia Tech student and many become active members of the "Y" by participating in one or more of the groups commissioned by the Y.M.C.A. Board of Directors.

The "Y" Cabinet serves as the control center for the activities. Being composed of elected student officers of the Association, the chief officer of each commissioned group, and members-at-large from the active membership the Cabinet can assist in the planning and carrying out of the program of the commissioned groups and all other phases of Association activity. This year a large delegation from Tech attended the National Conference of the Student Y.M.C.A. during the Christmas holidays.

THE RELIGIOUS BREAKFAST, meeting on Wednesday mornings, is another of the many activities sponsored by the Tech "Y."
PRESIDENT HARRISON welcomes the freshmen as he addresses the new students at Freshman Camp.

AFTER A LONG DAY, freshmen gather with their unit counsellor for a detailed question and answer session.
ALPHA PHALANX is an integral part of the Y.M.C.A. program with membership open to any Tech student. The purpose of the organization is that of service to fellow students.

Freshman Camp is the major project of the club as each year Alpha seeks to aid freshmen by indoctrinating them in the ways of Tech life. Club members plan and organize the four-day briefing session, held in the Blue Ridge foothills, to include the "word" from leading upperclassmen, faculty members, school officials and outstanding citizens of Atlanta. In addition, other projects this year were the erection of a fireplace at the Y.M.C.A. Camp and the purchase of pictures of the campus for school bulletin boards to help visitors.
THE GEORGIA TECH BARBELL CLUB was established in 1955 by a group of Tech men who were interested in weight training. Since that date it has grown into a very active organization and presents to Tech an outstanding lifting team.

It was founded primarily for the lifting team, but incorporates physical fitness and strength in the progressive training programs it offers. There are facilities for the beginner as well as advanced trainee.

The club has won numerous titles in competition and will defend them in future contests against the teams of Greenville Health Club, Savannah Barbell Club, and Parris Island Marine Base. This challenge attracts one of the strongest breeds of men.
THE GEORGIA TECH CAMERA CLUB is a member group of the Y.M.C.A. Cabinet. A fully equipped air conditioned darkroom is maintained by the group in the basement of the Y.M.C.A. building and is set up for developing black-and-white, or color film. Membership is open to all students interested in photography and arrangements are made for members to receive a discount on photographic supplies and equipment at local dealers.

Meetings fit a well rounded program of instruction in photography and a model night is held quarterly. Also a black and white salon and a color salon is held each quarter with entries judged by Atlanta photographers. Many members being well trained and capable are of service to the student publications.

GEORGE BOYENS . . . . . . . . . . . . . Treasurer
THE EXECUTIVE ROUNDTABLE seeks to promote an understanding of the many responsibilities of management through application of the principles of ethical leadership. The group, which is affiliated with the Y.M.C.A. and the Atlanta Personnel Club, had its beginning in the Fall of 1956 and has grown to a position of high regard on campus. Membership is selective, but all students at Tech are eligible.

Meetings are held in the ODK room of Brittain Dining Hall. They consist of dinner, a short business meeting and a speaker. Programs this year included a labor leader speaking on "Labor Views the Right-to-Work Law." The following meeting a management consultant gave management’s views on the same law. Other timely topics filled the program.
GAMMA PSI is the newest of the Y.M.C.A. organizations. Membership is open to all co-eds and through this organization they carry on many service projects.

The main project of Gamma Psi is the sponsorship of Co-ed Freshmen Camp. Held at Camp Highland the Co-ed Freshmen Camp is becoming an annual project as each year more girls attend Tech. Upperclass women and faculty members hold orientate the freshmen co-eds to Tech life at the briefing sessions. Under the direction of Gamma Psi the new co-eds receive useful words of advice.

Other activities include the sponsorship of a Y.M.C.A. social each quarter to get the members of the many different Y groups together. The club also assists other groups wherever possible.
Recreation Council

OFFICERS

RUSSELL KNIGHT . . . . . . . President
HAL SAUNDERS . . . . . . . Vice President

THE RECREATION COUNCIL is a service organization; its purpose is to provide inexpensive recreation and an opportunity for Tech men and local girls to meet. Composed of Tech students, nursing students, and Agnes Scott students, the council sponsors the Friday night Open House dances at the Y.M.C.A.

This year the efforts of the group resulted in new audio-speakers for the Y auditorium to improve the dances. Other necessary duties such as advertising the dances and providing refreshments are accomplished by this active group. Hayrides often become a part of the Y program as a result of the planning of the Recreation Council.

Membership is open to all who desire to take part and their effort is repaid by student interest.

SIGMA PHALANX is a service club whose purpose is “To unite young men in cooperative effort to practice and extend Christian standards and ideals.”

Sponsoring social events and exchanging deputations with the other colleges in the Southeast keep Sigma active four quarters a year. It also maintains the Tech Y.M.C.A. Camp as one of its projects. And works for the development of the 193 acres of wooded land of the campsite. This year, it is hoped, the first building will be completed.

“Operation Leadership” is becoming an annual project as Sigma seeks to make educational and informational seminars available to Tech students. This program gives representatives of all campus organizations the chance to meet and discuss leadership.
THE T BOOK is published annually by the Georgia Tech Y.M.C.A. for distribution to new students at Tech, transfer students, and faculty members. The purpose of the book is to help the new students in becoming oriented to Tech.

The contents of the book contains information about the historical highlights of Georgia Tech, the many organizations, the honor societies, and the religious groups. Special items for the freshmen include the Freshman Code, the school yells, and the famous school songs.

The T Book has become a tradition on the Tech campus as it encourages freshmen to take an active part in school life.

The World Student Fund Committee fires questions at a scholarship hopeful in a winter interview, held in the conference room of the Tech YMCA.

The World Student Fund guests perform at one of the YMCA socials held in the Wilby Room are shown singing some of their native songs.

World Student Fund Committee

THE WORLD STUDENT FUND helps to aid the cause of world peace, international friendship, and professional competence by providing the opportunity for outstanding students from abroad to study for one year at Tech and by awarding scholarships to Tech men for study abroad. The operation is directed by the World Student Fund Committee and is supported by students, faculty, alumni, and interested citizens.

Unique, as the only student organization of its kind throughout the country, the W.S.F. committee this year was able to invite students from Germany, France, South Africa, Scotland, and Switzerland. Having these students at Tech living in the dormitories and eating at the fraternities as guests creates many valuable experiences for the guest and Tech students.
THIS YEAR, only eight years after its organization here, the Toastmasters got off to a roaring start by having the best exhibit at this year's Activities Night. The Georgia Tech Chapter of Toastmasters' International was the first college chapter among the hundreds of Toastmasters' Clubs.

It was quite apparent Activities Night that the purpose of the Toastmasters is chiefly educational. Toastmasters seeks to improve the ability to speak in public through practical experience. Since it is especially desirable for an engineer to be a competent speaker, this makes the Toastmasters' Club a particularly worthwhile organization here at Tech. The programs each week are planned so as to allow members to deliver both prepared and extemporaneous speeches.
