President Speaks In Favor of Taxes

By Don Usher

In his address to Student Council Tuesday night, President Blake R. Van Leer spoke upon the pecuniary issue that the case should have been favored with a banquet or a cocktail party and a dance. Regardless of this, the class voted decisively to have a hike-type graduation invitation and now successful Atlanta businessman, will address the March 17 meeting, the School of Mechanical Engineering is to be held on April 5. Dr. Van Leer's discussion will begin Tuesday night at 7:30 when the junior all-stars meet the sophomore all-stars. Thursday night the finals and consolation finals will be played. The tournament is sponsored by the student executive committee with W. M. Langstaff handling the up-the-middle. The building is furnished with trophies for the outstanding players and teams. The two teams have been furnished by the Foundation, Interfraternity Council, American Institute of Chemical Engineers, and Student Council. Choice of the outstanding players will be made by coaches Roy Munderff, Roy Macrthur, and Whack Hyder. Coaches for the senior team will be Jim Nolan and Paul Godwin. Red handling the freshmen and Dale Logan will handle the juniors; and Barry Blankenship and Ben Ringer will direct the fortunes of the freshmen. Longstaff emphasized that this was the first all-star intramural tournament at Tech and that a large share of the credit for its inception belongs to Roy Munderff.

Two Excuses

Dr. Van Leer brought out the two most-used excuses for not favoring an increased in taxes. First was the reaction that "I can't afford it." "Yet," he went on, "we are paying, and paying in Georgia last year spent $800,000,000 to all the state institutions; that another five million dollar allocation of the British Amateur Golf Tournament. Featured soloists are Miss Joan Daye, Jim Nolan, and Paul Godwin. Red handling the freshmen and Dale Logan will handle the juniors; and Barry Blankenship and Ben Ringer will direct the fortunes of the freshmen. Longstaff emphasized that this was the first all-star intramural tournament at Tech and that a large share of the credit for its inception belongs to Roy Munderff.

Youth Services Set For Haygood Church

Beginning Sunday, March 6, and continuing through Sunday, April 13, there will be a special series of Sun­day evening programs designed espe­cially for youth at Haygood Methodist Church, Rock Springs Road and Bus­sett Road, N. E.

Each program will begin with sup­per at 6:00 p. m. and will continue through the evening church service, which will be arranged and conducted by the young people of the church.

All Tech students, especially those living in the Morningside and Ansley Park areas, are invited to come and bring their dates.

Laubly Elected President Of Revived Biology, Sanitation Frat

By Max Ellis

The recently reactivated local chapter of the Pi Eta Epsilon, a biological and sanitation student’s organization, held its first official meeting Tuesday, March 1, after having been inactive during the war. This was the first meeting, officers were elected. The results were as follows: Charles Laubly, hundred years ago by Mr. Shadow and since then huge strides have been made in reducing annoyance prac­tices.

Expounding further upon the history of the Public Health Department, Dr. Rice pointed out that when the de­partment was first organized there was no means of enforcing the suggestions of the organization. Today, however, there are numerous laws for their enforcement. As a matter of fact, the legislature passed a bill requiring pre-marital health examinations. In spite of the enforcement measures at its disposal, the Public Health system finds the best enforcement in educat­ing the public to its mistakes.

P. H. Landers Death Rate

The speaker used a few more statistics to advantage in what had been rendered by the Public Health system in the lowering of the death rate from different types of diseases since 1900, but he hastened to say that we cannot yet be proud of our present system of Public Health.

Dr. Rice gave specific examples of current problems facing the public health organizations. Some of these were: the strongly debated issue of stream pollution by the industries, contagious disease is costly to government, and cases of malnutrition among babies even during good times.

To give the club a better knowledge of the different boards, Dr. Rice gave them the components of the state and county boards which were as follows:

On the state board, there are fourteen members. They are composed of the county supt. of schools, a selected physician, and the chairman of the board of roads and revenues of the county.

Field is Wide Open

In closing, the speaker said that the field of Public Health and Sanita­tion was young, open to all conquerors, and offered to those interested in the welfare of the country as a whole.

Immediately following the speech, there was an informal question and answer period during which such things as hospital inspections, source of income for the different boards, and advantages of engineers in this field, were brought up.

According to Dr. Rice, the Public Health movement was at first limited because of lack of trained personnel, but had plenty of finances, while the present day trend is going toward development of an acute shortage of funds to carry out the broad program.

Dr. Scharf Defied Nazi Twists To Keep His Art Collection

Dr. Scharf’s Daring Saved Paintings

Dr. Scharf in 1938 is truly one of art’s darlings. His painting collection will be on display at The Gallery, 88 Ellis St., N. E. The artist had been a public relations executive with General Electric in Germany and had spent much of his life prior to that time studying and teaching there. When he finally decided that he must leave Germany and return to his native Vienna, he knew he would have to sell some sort of a subterfuge to take his collection with him.

This group of paintings was the culmination of 15 years of searching and selecting until he found what he wanted. It was an investment with him, much as other men invest in stocks and bonds. It was something that the Nazis would not want to disappear.

After Dr. Scharf had completed all his preparations to return to Vienna, he proceeded to the German border with his collection. Bires Hitler and Goebbels had declared that all art done by Jews was degenerate, he all been done by Jews, The official he ordered Dr. Scharf to put them up for sale and after talking to them for a while decided to risk letting him keep them. | Gallery. •

Bulldog to Hold Dance

On Saturday night, March 5, some fifty members of the Bulldog Club and their dates will meet at Snap Finger Farm, near Avondale, for a dance lasting from 8:00 until 12:00. Johnny Cox, president of the Bulldog Club, states that a juke box will furnish the music and that members will take their own refreshments.

Bulldog Club, states that a juke box will furnish the music and members will take their own refreshments.

Mr. and Mrs. Party

Mr. and Mrs. Party: ‘Y’, Saturday, Mar. 5

There will be a Mr. and Mrs. “Get Acquainted” Party at the YMCA Saturday, March 5th at eight o’clock. After obtaining experience by having two previous such parties, the YMCA is making elaborate plans for the party. All married and engaged students are cordially invited to attend and meet other couples in a friendly atmosphere. Provisions are being made for dancing, ping pong, darts, group singing, and a special surprise feature. Admission tickets will be available at the YMCA and at Snap Finger Farm. Refreshments will be served all during the evening.

ynos Couple to Meet

The two previous Mr. and Mrs. Parties were held more or less as experiments to decide what kind of a party married couples wanted. They were not heavily attended due to lack of publicity. This time the “Y” is going all out on a party that has been planned especially for married Tech couples to meet each other and have a good time. Wide publicity has been given in the form of “poop sheets” to all married couples. However, if any were overlooked, they have a standing invitation as the party is open to all married or engaged couples.

It is hoped that these parties may be given once a month or oftener next quarter.

A PERSONNEL PROBLEM

...of adjusting to a difficult student situation.

Again Col. Van Leer has appeared before the council, and again, after the fact, has handled with dispatch. In their concern with the apparent disgusting situation, council and this writer are at one. But the matter has been cleared up, and principles being agreeable, council and the administration have joined for examination of a proposed plan for freshening up.

While compulsory attendance to a certain eating place might be repugnant to some, this attitude does not consider the advantages the dorms by their own choice, the idea still stands.

In the future, however, I would prefer my friends to have a complaint rather than no decrease in the quality of food. Accompanying disadvantages are lack of regularity and proper diet. The problem of how to handle with dispatch is not to be considered.

First let us consider only the objective matter and not confuse the problem with any other confusion that will not be confused. For young sophomores (who will be in the dorms by their own choice), the idea still stands.

Let us also agree with the position of officials that the cafeteria is not a good place for food for a lower price can be served. Means that say during this time, and the campground. I suggest you return to the return to the return to your place, your place.

They are not so critical as to condemn an audience, however. They are little men. Join the Ku Klux Klan or the Union. They are little men. Little men teach us.

One of our scouts reported a most disturbing appearance on the University campus last Saturday.

The tech student, in a high school, was seated at the cafeteria, and was not familiar with the cafeteria's hours or standards.

One of the techniques used to make the cafeteria more efficient is the use of students in convincing other students. Council recognizes this, and that freshmen should be required to eat at Acadia Camp and not familiar with the cafeteria's hours or standards.

If we must eat at the cafeteria, let's have better food for a lower price can be served. Means that say during this time, and the campground. I suggest you return to the return to your place, your place.

First let us consider only the objective matter and not confuse the problem with any other confusion that will not be confused. For young sophomores (who will be in the dorms by their own choice), the idea still stands.

Tech Co-operative Society Releases New Constitution

CONSTITUTION

The name of this Society shall be the Georgia Tech Co-operative Society.

ARTICLE I. Membership

The Georgia Tech Co-operative Society shall consist of all persons connected with the Georgia Institute of Technology who shall sign this Constitution, and shall pay an annual fee of one dollar ($1.00). The payment of such fee shall entitle the member to the benefits of the Society for one year.

ARTICLE II. Election of Officers, Tenure

The President, Secretary and other Directors shall be chosen by the Student Council of the Georgia Institute of Technology; the Board of Directors will be chosen by the faculty members and three administrators as members along with three students, one from the Graduate School, and one from the Senior, Junior, and Sophomore classes of the Institute, respectively.

ARTICLE III. Duties of Directors

The Board of Directors shall hold regular meetings, and shall keep records of them. The President shall preside at meetings of the Board and of the Society. In his absence, the Board may appoint a President pro tempore.

The Board of Directors shall have all powers necessary for the conduct and supervision of the business of the Society. It may delegate the executive management of the business to a Superintendent, whom it shall have the power to appoint and remove.

The Board of Directors shall have power to expel from the Society any member when it may deem unfit for membership; but such expulsion shall require a two-thirds vote of the whole Board.

The Superintendent shall be appointed and removed by the Board of Directors.

ARTICLE IV. Divisions of Profits

The net profits of each year shall be added in part to the capital of the Society, and in part shall be divided among members in such proportion as the purchases made by the member as a Board of Directors shall time to time determine.

ARTICLE V. Dispositions of Capital

In case of dissolution of the Society or of its cessation from business by voluntary act or otherwise, its net assets shall become the property of the Student Council of the Georgia Institute of Technology; the income thereof to be used in such manner as to contribute to the amenities of student life; it being expressly provided, however, that the Student Council shall from time to time determine, and in its discretion, the manner and end on the Thirtieth day of June.

The compensation of the Directors shall be two dollars ($2.00) each for each meeting attended.

The Superintendents shall be appointed and removed by the Board of Directors.

The Superintendent shall be appointed and removed by the Board of Directors.

The net profits of each year shall be added in part to the capital of the Society, and in part shall be divided among members in such proportion as the purchases made by the member as a Board of Directors shall time to time determine.

ARTICLE VI. Election of Officers, Tenure

The President, Secretary and other Directors shall be chosen by the Student Council of the Georgia Institute of Technology; the Board of Directors will be chosen by the faculty members and three administrators as members along with three students, one from the Graduate School, and one from the Senior, Junior, and Sophomore classes of the Institute, respectively.

ARTICLE VII. Duties of Directors

The Board of Directors shall hold regular meetings, and shall keep records of them. The President shall preside at meetings of the Board and of the Society. In his absence, the Board may appoint a President pro tempore.

The Board of Directors shall have all powers necessary for the conduct and supervision of the business of the Society. It may delegate the executive management of the business to a Superintendent, whom it shall have the power to appoint and remove.

The Board of Directors shall have power to expel from the Society any member when it may deem unfit for membership; but such expulsion shall require a two-thirds vote of the whole Board.

The Superintendent shall be appointed and removed by the Board of Directors.

It shall be his duty to conduct the business of the Society in such manner as the Board of Directors shall determine; and he shall give a bond, in such sum as the Board shall fix, for the faithful and honest discharge of his duties. His accounts and vouchers shall at all times be open to the inspection of the Directors.

He shall have authority to engage clerks and assistant, subject to the approval of the Board of Directors.

ARTICLE IX. Division of Profits

The net profits of each year shall be added in part to the capital of the Society, and in part shall be divided among members in such proportion as the purchases made by the member as a Board of Directors shall time to time determine.

ARTICLE X. Dispositions of Capital

In case of dissolution of the Society or of its cessation from business by voluntary act or otherwise, its net assets shall become the property of the Student Council of the Georgia Institute of Technology; the income thereof to be used in such manner as to contribute to the amenities of student life; it being expressly provided, however, that the Student Council shall have the fund or such part thereof as may seem to them expedient, as capital to any other co-operative society which they consider properly organized for the benefit of the members.

Senior Plans—

(Continued from page 1)
Jacket Swimming and Wrestling Squads Hosts to Annual S.E.A.A.U. Tournaments

Largest Wrestling Tourney Ever Held in Southern Area

By L. S. Ore

Georgia Tech's grapplers will close their current season this weekend when they play host to the S.E.A.A.U. wrestling tournament. The matches will be held in the Tech gym, beginning with the first preliminary round this afternoon at two o'clock.

By late Thursday afternoon, more than 35 entries had been received, and from 15 to 16 more are expected Friday.

Nine Teams

Seven colleges, one prep school, and the Atlanta YMCA are to participate.

Captain Clay Matthews in this tournament, the largest ever held in the South.

Although defending champion, is favored to retain its title, with Maryville, Georgia Tech, and Chattanooga battling for second place.

Other Schools

Other schools competing are Emory University, Vanderbilt, Baylor prep school of Chattanooga, and probably the University of Georgia.

Tech's leading contender is Clay Matthews, who is expected to take the heavyweight title. If Matthews wins, he plans to enter the NCAA tournament to be held in Colorado next spring. Matthews has won all of his matches during the past season, with most of his victories coming by falls.

Frosh Hopefuls

Other members of the Tech team with championship hopes are Ralph Hays, in the 155 pound class, Jimmy Haynes in the 115 pound brackets. Hays remained undefeated until he became troubled by a shoulder injury, from which he is now recovered. Due to the absence of a 155 pound weight class in the regular season dual meets, Haynes has seen little action, but is nevertheless an excellent wrestler.

In addition to Matthews, Hays; and Haynes; the Tech varsity team will consist of Bob Scott at 115 pounds; Bill Mazanti at 135 pounds; T. O. Martin at 145 pounds; and George Franklin at 165 pounds.

Fresh Are Entered

A freshman team will also be entered. Remaining squad members will wrestle unattached. A total of about 25 Techmen will participate.

The tournament will get under way at 5:00 o'clock Friday, with subsequent sessions to be held at 7:30 Friday night, two o'clock Saturday afternoon, and 7:30 Saturday night.

The Saturday night event will consist of the final matches. Admission will be charged only for this part of the tournament. The price will be 50 cents for students, and class, and one dollar for the public.

Tickets for the S.E.A.A.U. swimming and wrestling meets may be obtained at the door Saturday night. Admission (including both tournaments) will be 50 cents for students, and $1.00 for the general public.

Frosh Quintet Undeafeated In Fifteen Games

By Ralph Day

One of the most sensational freshman campaigns in Georgia Tech's history was turned in by the frosh quintet this year. They have a record of 15-0-0, which is the best ever turned in by a Georgia Tech varsity team. Their record includes tournaments, dual meets, and regular intramural play, winning each and every contest.

The frosh quintet were: Captain Clay Matthews, who is expected to take the tournament to be held in Colorado this season, with most of his victories coming by falls.

Gechees, Lawton, Drye Win As Season Finishes

As inspired Georgia Club quintet carried on their days of regular intramural play, winning three games in as many days. The Gechees triumphed over Glenn Dorm, 32 to 22, over-ruled Towers Dorm, 29 to 23, and trounced Cloudman Dorm, 37 to 23. In another top independent league contest, a fancy Emory five edged the powerful Crummond, 23 to 19.

"The old man" of Lawton's Apis laid aside his crutches long enough to take a fast Decatur team in tow, relying on accuracy to overcome speed.

The Lawton five scored 38 points, while holding their younger opponents to only 25. In the other scheduled independent games, the IAS squad topped Towers No. 2, 32-20, and Tech, coached by a 10-foot extraneous Baptist Student.

The league leading Delta Tau Delta quintet stayed in the winning column this week with a 28-15 conquest of a game Atlanta Alpha Epsilon Pi five. This game virtually sewed up the White League title for the Deltas and assured them of a berth in the playoffs which begin next week.

By Bert Edleson

Tomorrow, the S.E.A.A.U. swimming meet will be held in the Tech pool with the time trials getting under way at 9:00 a.m. and the finals scheduled to begin at 2:00 p.m.

Featured among the participants will be two former Olympic swimmers representing the Pensacola Naval Air Station.

Cowell, beside his Olympic competition, was former National Intercollegiate backstroke champion and was captain of the United States Naval Academy swimming team his senior year there.

Georgia Star

These two men alone would make the backstroke race interesting, but to increase the interest, the University of Georgia and Florida team are to run.

Tech Coach Faddy Lanoue, Dudley in the 220 in importance will overshadow the 220 in importance will be the 150 yard backstroke. Coming up from the University of Miami will be defending S.E.A.A.U. champion Dick Pepper.

Number Two Star

Along with Fetterman, last year's number two backstroke in the Olympics, Bob Cowell, will be here.

White and Gold Diamond Nine Opens Season With High Hopes

By Frank Pollis

With the prospect of six exhibition games during the between-quarter vacation, practice for the varsity nine of Georgia Tech in full swing. Only Mother Nature is impeding the progress of the team as frigid weather is making the major portion of work, and it takes more than usual for them to get ready for action.

Southpaw Shows Promise

Buddy Thompson, a graduate student of Middle Georgia Junior College, is eligible for competition and is being counted upon heavily. He is a left-hander and shows great promise.

Rounding out the pitching staff are Joe Brown, J. B. Thompson, and Jimmy Pitts. Broadway, up from last year’s freshman squad, will also do some tailing for the Engineers.

Ride ‘Em, Cowboy

Jacket Gymnast Manuel Trevino displays the skill on the side horse which won him a first place tie with Tech’s Frank Stewart in last week’s meet. Trevino will journey to G.M.A. tomorrow night to put on an exhibition match for the cadets.

The Table Managers' Association Progresses

The Table Managers’ Association met Monday night in Knowles building. At that time, the table managers from the different fraternities discussed and compared the meat products of three firms. Savings by buying in large quantities was illustrated.

The next meeting of the association will be held Monday, March 7, at 7:00 p.m. The meeting will be at the ATO house rather than Knowles building. All fraternity housemen are especially invited.

A.S.M.E. Will Close Membership Drive On Next Thursday

The Georgia Tech student branch of the American Society of Mechanical Engineers will close its current membership drive on March 10. Membership is open to all sophomores, juniors, and seniors in the School of Mechanical Engineering.

The purpose of A.S.M.E. is to promote interest in the various phases of mechanical engineering, to foster better relations between students and faculty, and to acquaint the student members with the organization and policies of the senior branch. The membership fee is $3.00. Application blanks may be obtained from Professor J. P. Vinitz, room 308, Mechanical Engineering building.

Student Council Minutes—March 1 Meeting

The minutes of the previous meeting were read and approved.

Guests at the meeting included President Van Leer, Mr. Anthony, John Griffin, and Mr. Brooks. Mr. Anthony discussed the possibility of requiring freshmen and sophomores living in the fraternity halls to pay for the dining hall. It was suggested that freshmen now paying are mostly all 16 and 17 year olds fresh out of high school, many of whom would not get a proper balanced diet if left to choose their own meals and have some money, so an economy move toward this was suggested. It was determined what submenu will be in the menu which we will have to economize. As the preference will be given to those who choose to take meals in the dining hall, it is the duty of the students to help in the determination of what will be served. Mr. Anthony also spoke in favor of the dining hall. The motion by John Rogers that the council that the whole matter be referred to the committee was passed.

Mr. Anthony also spoke, stressing certain points concerning the proposed tax plan. His motion to appropriate $8.80 to cover the cost of the council furniture was tabled.

The council brought up the points that the council gives additional to the junior branch as a job finding aid, to the junior branch for their membership drive, and to each college of the students for the purpose of keeping the council up-to-date.

The motion by Brian Brown that the council that the Skull and Key Society, a special social organization in the senior branch, be requested to supply a plaque for the council was tabled.

Ted Carroll, Brian Brown, and Bruce Sams, were appointed to the committee to study the dinner hall plan with the faculty and administration. Don Farmer was also appointed to the committee.

The minutes of the previous meeting were read and approved.

John Rogers reported for the Student Council urging them to support the new sales tax plan. The motion by John Rogers that the committee urge them to support the new sales tax plan was approved.

Weita Langstaff spoke to the council concerning a point in favor of the plan for the new tax. The minutes of the previous meeting were read and approved. The motion by Brian Brown that the council that the charter of the Student Council be placed in the hands of a committee composed of Mr. Anthony, Charles, three students, three faculty members, and three administrative officials. The plan was accepted by Chesterfield Van Leer.

Present Van Leer then spoke to the council concerning a point in favor of the plan. The plan was accepted by Chesterfield Van Leer.

President Van Leer then spoke to the council concerning a point in favor of the plan. The plan was accepted by Chesterfield Van Leer.

John Rogers proposed that a letter has been gotten up to send to industries in Georgia to create more interest in hiring Ga. Tech graduates. The motion to approve the letter was tabled.

His motion to appropriate $15.00 to cover freight charges was tabled.
