Letter from the President

To Members of the Class of 1952:

It is my privilege to welcome you to Georgia Tech. You will find here an institution of happy success and development.

Georgia Tech is a growing institution, and nothing that is growing is as important as you and the Georgia Tech men of the present and future. The future of Georgia Tech is in your hands.

The faculty and students make an institution great. If you would have Georgia Tech the greatest technological institution the world has ever seen, you must do your part.

You are fully aware that we are living in a critical period of the world's history—one of unified cooperation, one of reconstruction following a great war, one of the discovery of the possibilities of the use of atomic energy. All of these things affect our lives at Georgia Tech, and we are making a determined effort to help you make the most of them.

As we continue to improve our services in the general direction of the mission of Georgia Tech, we shall be more successful in meeting your needs. We shall be more successful in meeting your needs if you help us make the acquaintance of the faculty advisor assigned to you. Also, you will not be able to work with us if you do not care to do so with us. We are happy to have your help on our faculty, and you share a great responsibility for the success of Georgia Tech.

At Georgia Tech we judge your oil and grease by the number of bad habits you acquire, by the arrogance you show in doing to others what you would not have them do to you. In the by-gone years, there have disappeared with the war and the return of the veterans. Among the expressions could have been heard at Tech in the by-gone years but they express only the attitude that the upperclassmen will have you do anything you care to do. These advisors are among the best ablest and most devoted men we have on our faculty, and they are available to you.

With the coming of this year we should like to take up the subject of the freshmen regulations about rat caps. We have had the big advantages of the rat cap tradition at Tech. The tradition is that it points out to you who your classmates and friends are. We hope you will get acquainted with them.

We all want to do the very best for you. The freshmen are expected to be part of the regular campus life. The high importance of the big advantages of the rat cap tradition is that it points out to you who your classmates and friends are. We hope you will get acquainted with them.

We have a new phase of your career is to get acquainted with the people around you. Your rat cap should rest entirely with you.

Class of 1952

Take Warning!

If the class of 1952 expects to achieve anything worthwhile it must analyze its student role and its organization. It must be clear to you that you do not have to do much if you want to have a good grade. You don't have to do much if you want to have a good grade. You are not doing any of your work always yourself. You are not doing any of your work always yourself. You are not doing any of your work always yourself.

In the various degree-granting schools professional and semiprofessional organizations exist. In the degree-granting schools professional and semiprofessional organizations exist. In the degree-granting schools professional and semiprofessional organizations exist.

The important things of chemistry depend on your future work. If you are to become a high school graduate and later a chemist, you will have a great advantage on Georgia Tech. The field of science that you have a great advantage in is the chemistry of the future work. If you are to become a high school graduate and later a chemist, you will have a great advantage on Georgia Tech. The field of science that you have a great advantage in is the chemistry of the future work. If you are to become a high school graduate and later a chemist, you will have a great advantage on Georgia Tech. Library Rules and Regulations Explained to Enlighten Frosh

The library is open Monday through Thursday from 8:00 a.m. until 9:00 p.m.; on Saturday from 8:00 a.m. until 1:00 p.m.

New students when first using the library must show some identification that they are enrolled at Ga. Tech; thereafter, each boy should sign his name and box number, or if a day student his Atlanta address, when he checks out a book. All books, except reference books and magazines, may be taken out of the library, after they have been first charged at the desk. Four books may be taken at one time, kept for a period of 14 days, and if not in demand may be once renewed for the same length of time. The date on or before which the book should be returned, the stamp is stamped on the date due slip in the back of the book.

Various books are placed on reserve by professors for supplementary reading and textbook reserve. These books must be asked for at the desk and should be signed for before the book is taken from the desk. They may not be taken from the library except after 8:00 p.m. Monday through Friday and after 10:00 a.m. on Saturday. They are to be returned by 9 o’clock the next morning.

There are also reserve reading books which may be checked out for three (3) days at a time and renewed for the same period.

A fine of two cents a day is charged for every day a regularly circulated book is kept overdue. Ten cents per hour or part of an hour is charged for overnight reserved books which are not returned by 9:00 a.m. Those reserved books may be taken out of the library, after they have been first charged at the desk. Four books may be taken at one time, kept for a period of 14 days, and if not in demand may be once renewed for the same length of time. The date on or before which the book should be returned, the stamp is stamped on the date due slip in the back of the book.

Introduction to The Robbery; Take It for What It's Worth

By Mack Gregorie

The Georgia Tech College Inn, more fondly known as The Robbery, has long been an institution at Tech. It is a bit obscure, but it is believed by many to have prisons shortly after 1898 when a Spanish-American War vet was overcharged eight cents on a jar of mustache wax.

The Robbery is run as a practically non-profit organization by the school for the convenience of the students. All profits which accrue are returned to the students either in the form of improved service or as new buildings—evidenced by the new banquet hall now under construction.

For the convenience of the students, the school provides:
- A simple rectangular bar which sells burned almond sundae and at which all thunder breaks loose every hour on the hour. Woe be unto the unsuspecting one who is caught with an empty jar of mustache wax.
- A simple rectangular bar which sells burned almond sundae and at which all thunder breaks loose every hour on the hour.
- A simple rectangular bar which sells burned almond sundae and at which all thunder breaks loose every hour on the hour.
- A simple rectangular bar which sells burned almond sundae and at which all thunder breaks loose every hour on the hour.

For freshmen interested in an active part in the religious life of Georgia Tech, there are the Baptist Student Union, the Newman Club, Wesley Foundation, and the YMCA. The Georgia Tech "Y" takes the leadership in providing spiritual life as well as recreational and social facilities.

In the field of journalism, there are excellent chances for service, and the various publications welcome any one who desires to participate, either in writing or from the business management end. The major publications are The Blue Print, the school annual; The Yellow Jacket, humor and fiction magazine; and The Technique, semi-weekly newspaper.

Most Students Are Required To Enroll in R.O.T.C. Courses

All students at Tech are required to complete two years of R.O.T.C. training. Two additional years' training is optional. The only exceptions among the freshmen are the following: veterans who have completed ninety or more days of service prior to November 27, 1947; aliens; those students who cannot pass the physical; and those who are over twenty-three years of age.

Freshmen have their choice of three branches of R.O.T.C.—Army, Navy, and Air Force. The largest of these—Air Force training is divided into three units: artillery, infantry, ordnance, signal corps, corps of engineers, and chemical corps. The Department of the Air Force offers students a choice of either Air Force administration and military management or aircraft maintenance and engineering.

The Navy ROTC has three classifications of students. Regular students are chosen in nationwide competitive examinations held each December and upon graduation. Student agree to take four years of Naval Science training and to accept commissions as Ensigns, U.S.N.R., upon graduation.

Yellow Jackets Prepare To Meet Vandy Saturday

By Ray Wynford

Already named as the team to beat in the South by many noted au­thorities, the 1948 Yellow Jacket football squad will journey to Nashville this Saturday to clash with a strong Vanderbilt University eleven in old Dudley Field this Saturday.

The Commodores are ruled stronger than ever before by the igni­tion of head coach Red Sanders. For the first time, Vandy has strength in depth in most positions. Center Charlie Hoover and end Ken Cooper are all-American hopefuls in the center of a strong Commodore line. The tackles are, like Tech's, not outstanding but Vandy has several good ones. The ends may be the where the Commodores will wear down first against the Jackets' speedy backs. The Vandy offensive power lies primarily in big 200 pound Deen Davidson, a tailback who scored 36 points last season. Davidson is a sophomore running back and punter and can pass if necessary. Bobby Perry and Jamie Wade will also be in the pitching from the Commodores back­field. Tiny Leo Valley furnishes the breakaway star for the Vandy bunch. Offensive formations will be mainly from the single wing, but a short punt and a spread are also used by the Commodores.

At present there seem to be no indi­vidual stars one can single out in the Tech squad. Coach Dodd lost all­American Bobby Davis and big, rug­ged Ralph Slaten from last year's tackle corps. Replacing these two will present a problem. The rest of the line seems good and deep. Lewis Lock leads four good centers, all­American hopeful Bill Healy stands out at guard, and short Hayes Mc­Kinney looks good at the same slot. There are many good ends including captains Cutchbryer and Browder. Studdox tied with halfback Red Pat­ton for Yellow Jacket scoring honors last year.

Although Tech lost Jim Still, the Orange Bowl passing ace, to the pros and George Mathews by graduation, Coach Dodd still has a crew of de­pendable backs. The passing game will miss the strong arm of Still but Southard and Brown are still around. McCoy, Patting, Horsman, Bowerman, Queen, Jordan, North, and Peck are all speedy and versatile on offense. Ziegler and Humphries will go to the fullback post with either doing the blocking chores for the Jackets as needed.

Coach Dodd stated last week, "I can't see two touchdowns differences between these two teams if we battled Vandy all day. I'll settle for seven points." The Tech coach expects lots of trouble from the rugged Com­modore line.

GET FROSH TICKETS FRIDAY, OCTOBER 1

Season football tickets for fresh­men will be distributed on Friday, October 1st between the hours of 8:30 and 5 at the Athletic Dept. Office which is located at the corner of Third and Fowler—at the north end of the West (new) stands of Grant Field. YOU MUST HAVE WITH YOU YOUR TUITION RECEIPT.
