Outstanding Diplomat Speaks at Y Tuesday

Dr. William J. R. Thorneke, Dutch diplomat, author and traveler, will speak Tuesday night at 8 in the subject of his talk will be "The Dutch Frederic." All proceeds will go to the World Student Service Fund. Tickets are now on sale at the bookstore for 50 cents apiece. The International Relations Club is sponsoring the event with the cooperation of S. Scharf, faculty advisor for the club, and the YMCA. Dr. Thorneke, in addition to being a diplomat, is an authority on political and economic questions. He is a native of the Netherlands and is a student of Dutch history. He is a graduate of the University of Leyden, where he obtained a doctorate in law. He is now visiting professor of political science and history at Emory University.

Senior Class Votes Graduation Banquets in March and June

By Homer Pittman

The senior class outlined its social calendar for the rest of the year at its meeting last Tuesday called to order by class president, Mr. R. F. Thiers. Mr. Thiers, executive secretary of Georgia Tech Alumni Relations, explained the functions of his office and its abilities to help Tech alumni and the school itself.

As student speaker at the meeting basketball captain, Jim Nolan, Jim Nolan, the senior class, assumed leadership in organizing a smooth and successful series of events. The class also discussed the remaining basketball games. The team is hard to understand the next five or six games we will do better if you give your moral support, Jim, said, "In the next few years we will do better."

March Banquet

The senior class has chosen the March graduation banquet to be held on March 17 at the Atlanta Terrance Hotel with Central Park as the Junior Class. The Junior class graduates' plans for a banquet included a basketball dance on June 11 at the Atlanta Billiard Card. The seniors are to be the hostesses for the evening of the banquet. The banquet is being held to commemorate the graduation of the seniors.

Dr. Thorneke is grandson of J. R. Thorneke, former Prime Minister of the Netherlands, who founded the Liberal party in his country and is still popularly venerated as a symbol of progress and liberalism among all Dutch people. Beared in these high traditions, Dr. Thorneke entered the University of Leyden in 1911 and obtained his degree of Doctor of Law at the University of Leyden, Holland and his graduation from the Ecole Libre des Sciences Politiques in Paris.

He served in France, Japan among other places as head of the high command of the war office during the rise of Hitler, became Chargé d'Affaires in Norway and in 1943 Envoy Extraordinary and Minister Plenipotentiary in China. He was chairman of the Committee of the Red Cross; the Austrian Committee for Austria, Vice President of the Mixed American-British Committee and political and economic advisor to various public institutions.

Widely Travelled

Internationally known as an authority on political questions, Dr. Thorneke has lectured widely at universities and institutions throughout Europe, the Far East, Middle-East and South Africa. He has contributed to leading newspapers and periodicals in Holland, England, and the United States. His latest book, a treatise on post-war conditions in Asia and China, has just been published in Holland. Travelling widely, since his return to his country, he visited before and during the war nearly every part of the globe, including China, Japan, Europe to China, Japan, Korea, Manchuria, China, India, Malaya, South-Eastern Indies, South Africa, Egypt, Palestin, Syria, Lebanon, Iraq, Iran, Palestine, British U.B.A. and U.S.A. Dr. Thorneke is at present visiting professor of political sciences and history at Emory University.

Council's Committee Proposes New Activities Point System

In its report to the Student Council on Tuesday the Rules Committee presented its plan for proposed changes in the Extra-Curricular Point System, since the council stated last quarter that it would be inadvisable to institute any changes in point system during the current academic year. The committee is continuing its efforts on the point system plan for next academic year.

Under the proposed revisions, a motion to initiate the changes was made at the council meeting last Tuesday. The proposed point system is based on a number of offices a student may hold on the campus in addition to the number of hours he works. The office would have a definite value on the number of offices that of the classes in section 4. The number of offices a student may hold in the Student Council is, according to Mr. R. J. Thiers, executive secretary of Georgia Tech Alumni Relations, explained the functions of his office and its abilities to help Tech alumni and the school itself. The committee is continuing its efforts on the point system plan for next academic year.

The committee is to be composed of three members: a. Seniors with dates b. Juniors who have not graduated c. Sophomores

1. Seniors with dates shall be seated in section H and J and extending downward.
2. The flash card section shall be retained in the same location as last spring with preference in seats given to seniors who graduated in 1950 as seniors. This plan also reserves the first seats in section E for seniors with dates who are seniors without dates in the senior section.

At the Tuesday meeting of the Student Council, two seating plans for football seas were presented. One was the plan of the Student Council Athletic Committee; the other was the plan of W. A. Alexander, both will be considered by the council at a later date, and the final decision will be made by the council.

The plans, which are printed below, differ materially in only a few respects. The Athletic Committee's plan is favored by the junior class; however, Alexander, Mr. R. F. Thiers, executive secretary of Georgia Tech Alumni Relations, explained the functions of his office and its abilities to help Tech alumni and the school itself. Although the City Council had passed in December an ordinance declaring North Avenue a no-parking area at all times, the signs were not posted until Tuesday of this week in the hope of giving the Georgia Tech students either do not read signs or do not take them serious, the city police send out a series of cars with loud speaker and cars to decorate the student cars with blue tags.

Welfare Committee Probes Food Prices

During the fall quarter the Student Welfare Committee of the Student Council was charged with an investigation into alleged raise in food prices in the immediate vicinity of the campus, as compared with prices of approximately the same items at the school dining hall. Such an investigation, if all factors were properly evaluated, could become extremely complex and for this reason the committee hesitated to publish raw figures when such relatively intangible factors as satiation, service, atmosphere, location, quantity of service rendered and date of evaluation were involved. The committee is continuing its efforts on the point system plan for next academic year.

The weather to the contrary, Saturday night, February 5, from 8 to 12, will be "Winter Frolics" in the Tech gymnasium. The informal dance will be presented by the Student Council as part of its social committee schedule for the year, and will feature the music of Jesse Duckworth. Tickets will be printed at $1.00 or $2.00, tax included.

Brian Brown, social committee chairman, said that plans were made to decorate the gymnasium in blue and silver to carry out the seasonal theme of the dance. Tickets will be printed on a form of blue dance at the information desk in the Administration building, and will also be available at the student union and the Fountain 2. 

The committee is continuing its efforts on the point system plan for next academic year. There will be a meeting of the Georgia Tech Engineering Manager Monday, January 31, at 3 p.m. to discuss the budget of the YMA. All members of the committee and any interested in doing this type of work are urged to attend.

Student Council to Give Informal Dance Feb. 5

By John Huskinson

The weather to the contrary, Saturday night, February 5, from 8 to 12, will be "Winter Frolics" in the Tech gymnasium. The informal dance will be presented by the Student Council as part of its social committee schedule for the year, and will feature the music of Jesse Duckworth. Tickets will be printed at $1.00 or $2.00, tax included.

Brian Brown, social committee chairman, said that plans were made to decorate the gymnasium in blue and silver to carry out the seasonal theme of the dance. Tickets will be printed on a form of blue dance at the information desk in the Administration building, and will also be available at the student union and the Fountain 2. 

The “Gator Ball,” also sponsored by the Student Council, will meet with unaltered success. Brown and White's committee is following much the same pattern for the "Winter Frolics." At least one similar dance is tentatively planned for the spring; however, as many dances will be held as are warranted by the social calendar.

There will be a meeting of the Georgia Tech Engineering Manager Monday, January 31, at 3 p.m. to discuss the budget of the YMA. All members of the committee and any interested in doing this type of work are urged to attend.
**Point Load Revision**

(Continued from page 1) that only by holding office can a man develop his leadership abilities. The committee feels that the office now available should be divided among as many as possible, and that by using this point system as revised they will be serving the best interests of the students, in addition to performing their function as established in the constitution by last year council.

The point load system is presented below with the office and the old and new point rating of the office. The maximum point load a man may carry is 12.

| Student Council President | 11* | 11* |
| Student Council Chairman | 7*  | 7*  |
| Student Council Secretary | 5*  | 5*  |

What Are the Needs?

Conscientious ingenuity is being displayed by students and professors in many war-torn countries as they struggle against unbelievable odds to promote education and cultural values. A quick survey of some—not all—of the neediest countries will show where dollars can be used to advantage.

ITALY—Although Italian markets have large food displays, black market prices are far beyond the reach of the average student. Sugar, fats, and vitamins products are much needed to supplement the low cost canteen fare, if malnutrition is to be avoided. In large centers, with a student population of 50,000, and Naples, with 20,000, the housing situation is desperate. Even where space is available for the large numbers of refugees from country districts, bedding, sheets, and blankets are lacking; bombed-out homes have not been able to provide them. In Milan last winter, lack of fuel made it necessary for many students to work in a temporary shelter for its own protection. The end of UNRRA supplies has reduced canteen assistance to disease. Chinese university life is bereft of adequate library, but for most classes books are non-existent until at least a year after students are in bad shape. The student pavilion is built as a unit of a larger arrangement near Salzburg—the vast extent of 23 degrees Fahrenheit.

GREECE—Political instability has seriously hampered reconstruction, and student hostels are in bad shape. One block of UNRRA supplies has reduced canteen

GERMANY—More than any other student group in the world today, the German needs and crave contact with other nations. In spite of serious food shortages and a crying need for medical supplies, the students' contributions to both the The Rector of the University of Feiburg, a recipient of one of W.S.R.'s standard small libraries, reports that what he wants for its borrowed library is a book, something he can work with. How much is this? Too much? Not enough? It seems very little—a glass of milk, a book, a microscope—but in the aggregate it means that the universities in the war-devastated nations can go on, that students at those universities can continue their training.

It means that the terrible lack of trained specialists—doctors, lawyers, engineers—can be gradually met. It means that every nation can have the basic leaven of educated men and women the world needs so desperately. You have insured these things through the annual World Student Service Fund campaigns on your campus.

Through the W.S.R.F., you have helped your fellow students abroad, without regard to race, color or creed, in five main fields:

- FOOD
- MEDICAL AID
- BOOKS
- CLOTHING
- HOUSING

You are the only source of help in this country. The American government is sending aid abroad—aid for heavy industry, for economic rehabilitation. You are asked to help the people who can make that reconstruction last. You are asked to furnish the margin that insures that not one class will be lost. Only you can furnish that margin.

Give to...

Somewhere in China a student gets the bean milk that brings his daily diet up to the food value of your lunch.

Somewhere in Europe a student gets a book. A set of mimeographed notes—but still a book, something he can work with.

Somewhere in Asia a laboratory without equipment gets a microscope.

New Horizons

From its inception the World Student Service Fund has been more than a money-raising agency for relief purposes. It has performed a vital function on American campuses in overcoming isolationism, and has done much to create a world reality in libraries, reports that waiting lists for the books are so long that the last student will not have a chance to get one of the books in two years. Similar collections are being sent to all university centers, and correspondences exchanges are being set up to follow students in other parts of the world.

CHINA—The Chinese student has nearly 100,000 unpublicized needs, and reports needs even more critical than in war-time. Large numbers of students are existing on a starvation diet that is tragically undermining their resistance to disease. Chinese university life is bereft of any library, but for most classes books are non-existent. Bamboo huts erected on the campus are the only library. Bamboo microscopes are used in the Jia Li College and a microscope has to serve sixty students.

The Rector of the University of Feiburg, a recipient of one of W.S.R.'s standard small libraries, reports that what he wants for its borrowed library is a book, something he can work with.
Tech Matmen Face Auburn Here Tonight

Hot competition is expected in what will probably turn out to be the toughest match this winter when Tech grapples with Auburn tonight at eight in the local gym. Both team members and coaches have been running for this match, and the results are important. Auburn is SEC champ in the "grunt and grizzly" field.

The team is in its best condition, and the spirit is high due to the second squad keeping the first on the leash. Badger won from Hodges (155) in a match that was not decided until the last two seconds. Bill Mazanti won the right to grapple by beating Gardner Ivey (155) in another close match.

Stars Improving
Rhodes and Franklin are both improving and are expected to give good accounts of themselves. Clay Mathews' match last week was one of his best and he will attempt to do the same again tonight.

The coaches have rounded up a good bit of information on Auburn's strength and style, and they have been drilling it into the squad. Short, Tech wants to throw Auburn off balance and leave them on the floor. A large turnout is expected for the match.

Frosh Elect
At a meeting held last Saturday, the freshmen swimming team elected Charlie Harrison as captain of the 1949 version of the frosh squad.

Hard Work and Good Results

In addition to these duties, Chick must also provide press seats as well as regularly attend all meetings of other organizations, visiting sports digni-
taries, and newspaper men with whom he has been associated in the field of
the press. Chick handles all phases of publicity for the Athletic Association
and is responsible for the excellent football and backcourt brochures which were
published this year in booklet form for the first time. Included in these
booklets are biographies of the coaches and players and past records of
the Tech squads through the years.

During the football season, Chick has more than his share of tasks to
perform. He handles the public address system in the pressbox to assist the
many sports writers in following the games and preparing their copy.
He supplies complete statistics of each team before the games begin and
also compiles complete statistics of the games and announces them to
the writers.

Unsung Hero

Emerge Victorious to Lead Leagues

By Fred Tallant

Several powerhouses forged to the front this week as the intramural basketball program reached the half-way mark. Nine teams still have spotless records but the teams on top of the heap is the Wesley Foundation, leader of the Silver League with a record of five wins against no setbacks.

Chi Phi, the only undefeated team in the Gold League, is leading that league behind the Chi Phi's and the Phi Epsilon Pi quintet gained a half game as they defeated the Phi Kappa Phi squad 27-17, the ATO also won two games this week for their third win against no defeats. In other league contests of the weekend as they dropped one to the Phi Epsilon Pi's, 28-26.

Chi Psi Leads Tornado

With a 4-0 record, the boys from Chi Psi are leading the Tornado League. However, since the Chi Psi squad was not scheduled to play this week, the second place Tau Kappa Epsilon quintet gained a half game as they defeated the Phi Epsilon Pi's 30-26.

Gheechies Win Forfeit

The Gheechie Club won from Harris Dorm by forfeit Tuesday to hand them their third win against no defeats and an added grip on the Red League lead. Towsers Dorm No. 1 won one and lost one game over the weekend as they dropped one to Glenn Dorm 32-30 and won by forfeit from Harris Dorm. In the other Red League game, Callaway Apts. handed Glenn Dorm a 23-23 loss.

Two Undefeated Teams

With undefeated teams in first and second places, the Black League provides the other leagues a hard time in the playoffs. The Wesley Foundation maneuvered Lawson 43-20 for their fifth straight win of the season against no setbacks. In other league games, the Yanks topped the Baptists 58-21, the Gheechies Win Forfeit 38-21. In the other league contest of the week, the Blue Devils edged Towsers Dorm No. 2 22-20.

Phi Epsilon Pi Elects Officers for Year

At their recent election on January 25, Xi Chapter of Phi Epsilon Pi elected the following officers: Superior, Arnold Goldberg; Vice Superior, Robert Kleinman; Corresponding Secretary, Robert Hecht; Treasurer, Carl Edleson. They collected a 4-0 record, the boys from Phi Epsilon Pi are leading the Red League with a record of four wins and no defeats. Led by Frank Zeiger, Bob McCoy, and Bob Look, the Sigma Chi squad reached the half-way mark. Nine teams still have spotless records but the teams on top of the heap is the Wesley Foundation, leader of the Silver League with a record of five wins against no setbacks.

Chi Phi Leads Tornado

With a 4-0 record, the boys from Chi Psi are leading the Tornado League. However, since the Chi Psi squad was not scheduled to play this week, the second place Tau Kappa Epsilon quintet gained a half game as they defeated the Phi Epsilon Pi squad 27-17, the ATO also won two games this week for their third win against no defeats. In other league contests of the weekend as they dropped one to the Phi Epsilon Pi's, 28-26.
