A hurried conference goes on prior to a meeting.

The Georgia Tech Chapter of Alpha Phi Omega is one of many chapters of this national service fraternity which are scattered on numerous prominent campuses. The purpose of the group is to assemble college men in a fellowship which will develop friendship and leadership in the members. The goal of all the efforts of this group is service to humanity, on campus and off the campus.

Membership in the group is open to all men who desire to render service and who have previously been associated with scouting.

The Gamma Zeta Chapter at Georgia Tech has been active on campus for over twenty years and continues to strengthen its ever-increasing program of service projects. These include the "Ugliest Man on Campus" drive, the proceeds from this drive going to worthy charities; supervision of campus elections; sponsoring of the campus Blood Drive; and conducting tours on Parents Day. With these many projects this organization is one of the most respected here on the campus.
Service to the Tech campus and to the unfortunate of Atlanta was the goal of the Circle K Club for this year. Striving to obtain this goal, the members participated in such activities as the Campus Chest Drive, Homecoming, and Parents Weekend. Serving Atlanta, the club, which is affiliated with the Northside Kiwanis Club, provided the Fulton Boys Club with helpful assistance.

The Circle K Club, like its counterpart in high schools, the Key Club bases its membership on leadership, service, and high character. It urges its members to display these qualities on the campus and provides opportunities for them.

By participating in these projects the Tech Circle K Club offers many chances for the student to be of service to his fellow man and bring recognition to his school and himself.

The Circle K Club is an excellent organization for anyone who wishes to be part of a service club which also enables its members to be in close contact with the faculty.

Members of the club listen to plans for Georgia Tech Parents Weekend.
One of the foremost representations of Tech both at home and away on other college campuses is the band under the direction of Mr. Ben Logan Sisk and Drum Major, Richard Boozer. The Tech band displays precision drill and accomplished musical talent during the Fall Quarter on the football field. Part of the color for which the Tech football games are famous is due to the half-time exhibitions of the band with selected majorettes from local high schools and a Tech coed, Beverly Cover, twirling.

During the winter quarter, the band adds greatly to the spirit of the students gathered in the Alexander Memorial Coliseum to view the basketball games. After practicing all winter, the band presents a concert annually during Spring Quarter.

Although the curriculum at a technical school leaves little free time, the Tech band members manage to find enough time to meet three times a week to practice for activities. This in itself is a tribute to the interest of the members.

The Band
Another spectacular halftime show gets underway as the majorettes and the band prepare to step off.

The tuba section blares out on the chorus of "Ramblin' Reck from Georgia Tech."

Bev Cover, Tech's pretty head majorette, displays her twirling ability during halftime.
The Co-op Club has a unique position on Georgia Tech's campus—that of being two distinct groups, yet united as one organization. Formed in 1915 to foster school spirit, fellowship and as a service organization, the club has continually functioned as one of the most energetic groups that has ever existed on Tech's campus.

Among the club's many activities are the Annual Summer Quarter Miss Perfect Lip's Contest and Dance, taking underprivileged boys to the basketball games, winning honors in the annual campus Blood Drive, and the responsibilities of supervising Freshmen orientation in the summer quarter.

The Club is active in intramurals, giving medals to the winners in softball, ping-pong, chess, and tennis. They also sponsor two annual smokers with the Briarean Society, as well as making a loan fund available to Co-ops under the auspices of both sections. The organization of the club is such that co-ops may enjoy as many privileges and opportunities as the regular students do in extra-curricular work.
ROBERT C. HART, President

During intermission, members and their husbands enjoy a snack.

Dames Club

The February Valentine Dance was a welcome relief from the monotony of winter studies.
"Students have clubs, why not students’ wives?" This was the idea responsible for the organization of the Tech Dames’ Club. Several of the graduate students’ wives realized their need for social activities while their husbands were busy with work for obtaining a degree. In the Fall of 1948, six wives formed the Club. From this small beginning, the Tech Dames’ Club has grown until now, in its twelfth year, the membership is well over three hundred.

The Dames’ Club begins each year with either a Tea or a Newcomers’ Meeting given by the present and past sponsors, to welcome new and old members to the Club. This is followed by a monthly business meeting and a bridge and canasta party held on the second and fourth Tuesday of each month respectively. Various parties are held throughout the year to which husbands are invited, and the season is climaxed by a Spring Banquet and Dance. Again this year the Tech Dames’ Club sponsored the Mrs. Homecoming Contest, and just being the third year for the contest, it met with great success.
The Georgia Tech Radio Club is an organization composed primarily of licensed radio amateurs, although membership is open to anyone interested in amateur radio. The club's "ham" station, W4AQL, is located in the penthouse atop the physics building. The club station runs at least 500 watts on the most popular amateur bands. In addition, the club has a 75-watt rig available to novice licensees and an excellent medium-power 6 meter rig.

With the high powered transmitters, they can reach around the world on all amateur short-wave bands. Activities center around this station, including "chewing the rag," with other amateur stations all over the world, handling messages for members and other students, and helping prospective "hams" learn enough to obtain their own government license.

The members of the Georgia Tech Radio Club are eagerly looking forward to the completion of the new electrical engineering building on campus, as its present plans include a new radio shack and the obtaining of some new equipment.

In the club radio shack, two members listen for signals from other hams around the world.
Since 1956, members of one of the most colorful elements on campus have been organized into the Pan-American Union Club. The club is based on Pan-American ideals, and its objectives include better human relations among its members as well as a cultural exchange of pertinent ideas.

Outstanding events in the club year include many dances, excellent intramural teams, and lectures by noted guests. Topics on which some of the invited guests have spoken include the political situation between Argentina and the U.S. and the principles of Communism. Lively discussions are the order of the day at the meetings.

To maintain a constant cultural exchange, the club meets with professors and students of Tech and with organizations in Atlanta interested in Latin America. The club presents a weekly radio program of themes and music from Latin America and it publishes a monthly newspaper which is distributed among interested people. The Pan-American Union Club also helps the foreign students through the orientation program.

The student branch of the Society of Automotive Engineers is a technical group that appeals to the student interested in design, production, operation or maintenance of automotive material.

The purpose of this organization is to promote, through the holding of meetings, the arts and sciences and engineering practices connected with design, construction and utilization of automotive apparatus and to encourage good fellowship among the engineering students at Georgia Institute of Technology.

At the meetings of this society, films and speakers are presented to broaden the students’ engineering education. The Society of Automotive Engineers provides an opportunity for those interested to meet and discuss automotive topics. In this way the students’ understanding of the basic engineering problems and their solutions is further developed. Under the able leadership of President, Harry Sugden, the society had a successful year.

The Georgia Tech chapter of Saint Patrick's Council was organized in 1950. The main purpose of this organization is to promote interest of the student body of the Georgia Institute of Technology in the several honorary and professional societies of the academic departments in the general welfare of the school.

The principal function of the year for this organization is the planning, promoting, and co-ordination of Engineers Week.

During this week the council entertains a group of outstanding high school students selected by local chapters of the Georgia Society of Professional Engineers. These students are selected on the basis of the ability and interest that they have shown in the field of engineering. During their visit to Tech they are acquainted with the campus.

The climax of Engineers Week is the award made by Saint Patrick's Council. This is the Bonner Spearman Memorial Trophy, presented to the school exhibiting the best display.

The Georgia Tech Veterans Club is now in its sixth year here at Georgia Tech. The club was organized by Korean Veterans, but membership is now open to all ex-servicemen now attending Georgia Tech.

The main objective of the club is to assist veterans in their adjustment from service to college life. The Tech Veterans Club was founded for the betterment of the veteran at Tech. This organization is striving to improve the student-faculty relationship.

Meetings are held every other week throughout the year with outstanding speakers and entertaining movies featured for the pleasure and relaxation of the members. The club participates in campus activities through the intramural sports program, homecoming festivities, and two years ago it sponsored, with the help of the Student Council, an election jamboree designed to increase the students' interest in the student government. Student functions include dinner-dances, banquets, and picnics for members and their dates.
Members spend a moment of leisure discussing problems facing the Vet's Club.

Stakes are low and entertainment is high at a Vet's Club poker party.
The Women Students' Association, since it was organized in 1957, has served as the official, collective voice of the women students on the Tech campus. Membership, made up of active and inactive members, consists of all undergraduate women who are enrolled in day school. Graduate students are listed as associate members. These girls work together with the student council and with the faculty advisors to promote the general welfare of women students, to establish and maintain finest standards of character and conduct, and to coordinate the activities of the women students.

In order to accomplish this, a board selected from the active members has set up a special code of rules by which the women students of the Tech campus live. An attempt is made to keep these constantly up to date as more women students enter Georgia Tech.

The outstanding activity of this organization is the orientation of women students. Members work with the World Student Fund to collect money at one of the football games.

Dorothy Vidosic, Association president, collects dues from other members of the W.S.A.
Religious
Every Friday night the Baptist Student Union begins its program with the singing of hymns.
The purpose of the Baptist Student Union is to minister to the religious needs of the Baptist students here at Tech. The organization encourages students to participate in the educational and worship programs of the local churches and the Baptist Student Union Center of the campus.

The Student Center is the meeting place for vespers programs, prayer meets, and Bible discussion groups. These activities are designed to assist the student in becoming a spiritually mature individual.

The Georgia Tech Baptist Student Union provides workers for local mission endeavors and directs projects for aid to the underprivileged children of the area. During the past three years the group has sent members to do mission work in the summer. It has also financially assisted members who could not attend without aid.

The Baptist Student Union also provides many social and recreational opportunities. Some of these are planned in conjunction with the many girls' schools here in Atlanta.

Butch Henderson, devotions leader, assisted by Tex Moore, leads a song during the program.

The BSU house offers students a place in which they can relax and study.

Canterbury Club

The Georgia Tech Episcopal College program is a student organization which is sponsored by the Episcopal Church in order to bring Georgia Tech students more fully into the life of their church. Members are drawn together by common need, looking for a way of life in the Christian faith and searching for answers to the basic universal questions.

Tech students meet jointly with Agnes Scott students in their new College Center at the All Saints' Church. There they may participate in the Sunday evening program including supper, discussion groups, worship, as well as social and recreational activities. On week nights the activities include houseparties, study groups, and various social and religious programs which are held frequently throughout the year. Students may gather at the College Center to study, relax, or bring dates for a late snack.

Tech men play a vital part in the parish of all Saints' Church, serving as Lay Readers and working with other members of the parish in services and missions here in Atlanta.

In the lobby before fellowship begins, everyone fills out identification cards.
After the evening meal is over, members cheerfully clean-up before attending church.

Scott and Tech freshmen enjoy fellowship and a traditionally good Canterbury dinner.

The evening offering is taken up as members enjoy another interesting and informative program.

The Christian Science Organization at Georgia Tech was established in May, 1956. Its main purpose is to afford to all of those student so desiring an opportunity to learn and to apply the truths of Christian Science. This group also strives to unite the Christian Scientists at Georgia Tech in closer bonds of Christian fellowship and to co-operate with other student groups here on the Tech campus in promoting inter-religious interest.

The Georgia Tech Christian Science Organization sponsors every year an open lecture on Christian Science for the entire student body. Weekly testimony meetings, to which all students and faculty members of Georgia Tech are invited, include a lesson prepared by a member consisting of selections from the Bible and correlative passages from Science and Health, with Key to the Scriptures, by Mary Baker Eddy, the discoverer and founder of Christian Science.

The latter portion of all of the meetings is devoted to experiences, testimonies, and remarks on Christian Science.
The King's Men on the Georgia Tech campus is an organization composed of friends and members of the Church of Christ. It has as its fundamental purpose the provision of Christian fellowship for those students and faculty members who wish to join this organization. Guests are cordially invited to attend all meetings of this organization.

The King's Men of the Georgia Tech campus meet regularly every other Monday, beginning with the first Monday after registration of every quarter. The King's Men's meetings usually start with dinner at six p.m. in the ODK room in Brittain Dining Hall. These meetings are followed by a speaker who discusses current problems which are of local and national importance. The speaker at these dinner meetings is generally a religious or business leader from the Atlanta and surrounding area.

In addition to these regular bi-weekly meetings the Kings Men of the Georgia Institute of Technology have several social functions during the year that are eagerly anticipated.

Members of King's Men relax for a moment during a meeting in the Wilby Room.
Fostering the spiritual, social, and intellectual interests of the Lutheran students at Georgia Tech and in the Atlanta area, the Lutheran Student Association is a student religious organization strongly inclined toward Lutheran culture and brotherhood. Meetings are held on the second Sunday and fourth Friday of every month, for the main purpose of uniting college students in Christian knowledge and spirit with the understanding of God and their church.

With the increased activity of student concern about politics and social and world affairs, the Lutheran students at Tech, with the help of the Lutheran Student Association of America and the World Student Christian Federation, have been actively engaged in the studious examinations of the Life and Mission of the church in our political and social problems.

Students from the Atlanta area attend meetings on other campuses, thus keeping the L. S. A. an organized Ecumenical Movement throughout our nation, and also on the Tech campus.

BERNARD C. DIESEN, President

Lutheran Student Association

Members of the LSA enjoy an informative and interesting program.

MEMBERS

Dinner is served every Sunday night prior to the program.
Meeting dates and notices of importance to Newman Club members are posted on the bulletin board.

FRANK E. ROPER JR., President

The Newman Club display drew lots of attention during organizations night.

Everybody wants to contribute to another worthy Newman Club project.
Combining spiritual activity and lots of fun, the Newman Club Beatnik Party was a tremendous success.

Newman Club

"The Year of the Big Breakthrough"—such was 1960 for the Georgia Tech Newman Club. During the past summer the Newman House was remodeled for its first full time resident chaplain—Father Giles Anthony Webster.

The result—an expanded and revitalized program. The community spiritual life grew at a healthy pace. Daily Mass attendance grew steadily with nearly everyone receiving Holy Communion. Monthly Days of Recollection were supplemented by a quarterly week-end retreat with the Trappists Monks at the Conyers Retreat House. A pioneer Apologetics class attracted a small, but very interested group.

Membership had a healthy increase. In November the largest group in the club's history was initiated. Attendance records were broken with the outdoor dances.

The volleyball and football teams won their league championships, but lost in the school play-offs.

God indeed blessed the club; with His grace we look forward to almost certain future growth in breadth and depth.
Not only does the house serve as a place for recreation, but it also gives students a place to study.

Members listen to a guest minister from an Atlanta church.
The Methodist Church at work on the campus is represented by the Wesley Foundation. As a part of the National Methodist Student Movement, it ministers to the needs of Tech students through a varied program of worship, study, and recreation. The purpose of the Wesley Foundation is to provide a program designed to create greater personal relationships with God and to continue to strengthen ties with the church in order to assure Christian maturity.

A beautiful new Wesley Foundation, which was completed this year, now serves as a center for weekly vespers services, study groups, and Friday night programs of worship and spiritual enrichment. Convenient to the heart of the campus the new center has a large assembly area, lounge, library-reading room, TV area, offices as well as administrative area, and living facilities for six students.

Both spiritual and recreational activities are offered for the students. These include student conferences, intramural sports, and deputations to many of the college campuses.
The religious organization at Tech for Presbyterian students is the Westminster Fellowship. The purpose of this organization is to provide a program of activities which will tie its members in a close bond of fellowship while trying to elevate man and his spiritual and religious thoughts.

Each Friday evening, student-conducted meetings are held at the Presbyterian Student Center. These attract students from Tech and also Agnes Scott who attend the Presbyterian churches throughout the Atlanta area. In these meetings, participants seek to find the answers to our most basic concerns in order to apply the Christian message in worship as well as in the discussion periods.

Also offered to those who attend these meetings are a warm spirit of friendliness and many hours of fun in recreation. Social activities are frequently scheduled at the students' center. In addition to these, the student center, which is centrally located on campus, is available for study, relaxation, and personal counseling for any student who needs it.
THE LORD HATH SHOWN THEE O MAN. WHAT IS GOOD, AND WHAT DOTH THE LORD REQUIRE OF THEE, BUT TO DO JUSTLY, AND TO LOVE KINDNESS, AND TO WALK JUSTLY WITH THY GOD. MICAH 6:8

YMCA
The Young Men's Christian Association is primarily a center of fellowship on campus and its services are available to any student of Georgia Tech. Many students chose to become active members by joining one or more of the groups commissioned by the YMCA Board of Directors.

The Tech YMCA Cabinet is composed of the elected student officers of the Association, the chief officer of each commissioned group, and members-at-large selected from the active membership. It provides leadership and assistance in planning and carrying out the program of the commissioned groups and in all other phases of YMCA activities.

Though studying takes up a large part of each day, there will be times when a student wants to get away from the books and take part in one of the commissioned groups of the YMCA. These groups concerned with many diversified activities give the student an opportunity to enjoy himself and at the same time. The Tech "Y" has a place for everyone.

Alpha Y Phalanx is a Georgia Tech YMCA organization. The annual major project of the club is Freshman Camp. The club's members plan and organize the four day briefing session for the indoctrination of entering freshmen. Leading upperclassmen, faculty members, school officials, and outstanding citizens of Atlanta give useful words of advice to the new "rats." The Camp is held near Toccoa, Georgia, in the Blue Ridge foothills.

In addition to the Freshman Camp, Alpha Y Phalanx sponsors other projects as a service to fellow students. Last year the club sponsored a book drive for the Asian Foundation. It also sponsored a Freshman Camp evaluation, and the completion of a fireplace at the YMCA camp.

During the winter quarter of each year since Alpha Y has been in existence, it has sponsored a winter project which has proven beneficial to the entire student body here at Georgia Tech. As an integral part of the YMCA, this organization hopes to continue presenting beneficial projects.

Immediately after their arrival from a week of camp, a meeting in the Tech YMCA auditorium starts things off for the new freshmen as they begin their college life.
Each night of Freshman Camp new rats meet and discuss various aspects of work and play at Georgia Tech.
The Georgia Tech Bar Bell Club was founded in the spring of 1955. It was established by a group of men from Tech who were interested in weight training. Since its founding it has grown into a very active organization on the Georgia Tech campus. It enables the school to have a weight lifting team which Tech is proud to have representing it.

The Georgia Tech Bar Bell Club is a YMCA organization. It gives its members a chance to "get away from the books" and have organized fun.

The primary purpose of the club is to develop a weight lifting team, but it also provides a place on campus for all interested Tech men to train with weights. With this in mind the club offers progressive training programs with facilities for the beginner and the advanced trainee in its own room in the basement of the YMCA.

The members of the Georgia Tech Bar Bell Club have won several titles in competition and plan to enter new contests in the future with the hopes of defending the old titles.

Any time during the week members of the club can use the facilities of the barbell room in the Tech Y.
Weight lifting members also use the clubroom as a means of relaxation from their everyday problems.

Harry Johnson, Mr. America of 1960, at Student Activities Night.

Using the weights and barbells, members keep themselves physically fit for the rigorous daily life of Tech.
Executive Roundtable

Industrial leaders often present interesting programs for members of the executive roundtable.

The Executive Round Table is a recent addition to Georgia Tech's family of fine campus organizations. The group, an affiliate of the Georgia Tech YMCA and the Atlanta Personnel Club, had its beginning in the fall of 1956 and has since grown to a position of high regard on campus. The purpose of this organization is to promote an understanding of the responsibilities of management through application of the principles of ethical leadership. Although membership is selective, all Tech students who are second quarter sophomores or more are eligible for membership regardless of the individual's major.

Meetings are held twice a month, usually on the first and the third Wednesdays. The programs consist of dinner, a brief business meeting, and an address. The speakers are top men in business and industry in Atlanta and the Southeast. They provide Georgia Tech students with an opportunity to hear first-hand about problems and situations which occur rather frequently in many branches of engineering.
After an enjoyable meal at the Pickrick members are entertained by a guest speaker.

Gamma Psi members plan carefully for the Mathematics Department social.

Membership in the YMCA group known as Gamma Psi is open to all women students at Georgia Tech.

Various projects are planned and sponsored throughout the year. The biggest of these is Freshman Camp, sponsored for the past four years in cooperation with WSA. Upperclassmen and counselors provide informative programs about the many phases of campus life. Speakers from the campus are invited to give talks on the various services offered by their particular offices.

At Christmas each year, members collect food, clothing, and toys for a needy family. Members of the group also help in the annual collection for WSF.

Brightening the winter quarter is the social which Gamma Psi holds for a different department each year. This year the math department was invited. It is hoped that at this informal gathering the relationship between the students and the faculty will be bettered.

Gamma Psi tries to assist other campus groups in need.
The Georgia Institute of Technology's Recreation Council is a service organization which is sponsored by the Tech YMCA. Though the organization participates in a variety of activities, its primary purpose is to provide inexpensive recreation and an opportunity for Georgia Tech men to meet local girls. For this primary purpose the recreation council sponsors hayrides and Friday night Open House at the YMCA for Tech students, Agnes Scott students, and nursing students from around Atlanta.

During this past year additional work was done on the sound system in the Georgia Tech Y's auditorium to further improve the dances. Other necessary duties such as advertising the dances, and providing the refreshments are accomplished by this very active group. Several social gatherings for the Recreation Council were held this year.

The Georgia Institute of Technology's Recreation Council's membership is open to any student of the school who desires to take part, having his interest repaid by student interest.

Monday night meetings are devoted to the planning of the many activities that the Recreation Council sponsors.
Sigma Y Phalanx is a service club which is active four quarters a year. Its main purpose is to unite young men in cooperative efforts to practice and extend Christian standards and ideals.

This organization is also active in its social capacity. Sigma Y Phalanx sponsors hayrides and parties throughout the year.

Exchanging deputations with other colleges in the southeast, and sending members to conferences in New York, in the Blue Ridge Mountains, and Washington are two more reasons why Tech is proud of this organization.

Sigma Y Phalanx maintains the Georgia Tech YMCA Camp as one of its projects. Its members are in charge of maintaining the one hundred and ninety-three acres of wooded land which comprises the campsite.

This organization maintains the Travel Board in the post office. It is primarily for the convenience of the Tech students who wish a ride or want riders to go with them.
The "T" Book is a self-supported student publication which is under the control of the YMCA rather than the Board of Publications. The "T" Book is the official hand-book of the Georgia Institute of Technology. It is published annually by the "T" Book staff of the Georgia Tech YMCA, and it is distributed free of charge to all freshmen and transfer students and all of the faculty members. The fundamental purpose of the "T" Book is to help orientate strangers to our campus and to the city of Atlanta and then to serve as a reference book throughout the readers' stay at Tech.

The "T" Book contains information about Georgia Tech and the many campus organizations. The "T" Book also includes many other items especially helpful to freshmen such as a drawing of the lettered Rat Cap, Freshman Rules, the Creed, the yells, and the famous school songs.

The "T" Book of Georgia Tech has become a tradition on the Georgia Institute of Technology's campus as it encourages freshmen to take an active part in the school life.

World Student Fund Committee

Committee discussing qualifications of applicants for the Zurich Scholarship.

FERDINAND SCHLAEPFER
Switzerland
John Walker and Alan Koralek busily examine reports during the weekly meeting.

The ambition of the organization known as World Student Fund is unique. Tech is the only school in the country with such a program. Objectives of the organization are to aid the cause of world peace and international friendship and to promote professional competence by providing the opportunity for selected students to study for one year at Tech and by awarding scholarships for Tech men to study abroad.

Operations of the group are under the direction of the World Student Fund Committee. They receive support from the students, faculty, alumni, and interested citizens. A main source of funds is a collection made at one of the football games: This year the most successful collection in history was made.

Students brought to Tech's campus this year included men from Germany, Pakistan, Southern Rhodesia, Lebanon, Scotland, and Switzerland. Having these students living in the dormitories and eating at the various fraternity houses creates valuable experiences for these guests and the Tech students.
The Georgia Tech Toastmasters Gavel Club, the on-campus organization representing Toastmasters International, is a campus organization designed to meet the specific needs of its members. The work of the organization is based primarily on the principles of learning by doing and improving through criticism and practice. These two principles lead toward better public speaking ability and stronger leadership qualities. Each member has an opportunity to gain experience through short impromptu speeches as well as through longer prepared speeches. Expert criticism by experienced Toastmasters enables each member to improve with each speech.

How does all this finally affect the member? With an organization such as this you will find its member to be a more conscientious student or a successful business man; but above all you will immediately recognize his poise, his congeniality, and his outstanding leadership ability.

Speechmaking leads to the discovery of hidden abilities, bringing out latent talents and thus enriching a man’s life.
