**Freshmen Must Observe Tech’s Traditions**

Customs Outlined To Aid Freshmen

How many traditions of Tech do you already know? Just what do you think of them as really meant by the two words “Tech Spirit”? Perhaps the terms Short Shirt Fight, Hose Week, Vigilance Committee, Cross-Country, and so-forth, mean very little to you yet.

It is a tradition of Tech that all the old customs and practices which go to make up what are known as the traditions of the college are rather meaningful. He wants to become familiar with those traditions, so that he will be able to speak of them in the careless manner in which old Tech men do.

It is a tradition of Tech that one must rate well up in his studies in order to produce into Tech this year is the Com­

College Night To Be Held In Y.M.C.A.

Activities Leaders Will Speak

College Night, or the evening when the freshmen get their first real glimpse of Tech, will be held Tuesday, Sept. 27th, 9:30 p.m., in the Student Union. Prof. F. S. Fields, Dr. Brittain, and the activity leaders will speak on the various organizations of the college.

College Night To Be Held In Y.M.C.A.

Monday Night

OrIENTATION CLASSES

TAKE UP FIRST WEEK

Over 900 Frosh Attended Sessions

College began officially for the class of 31, excepting in the chapel of the Academic building Tuesday, Sept. 20th, 1927. At nine o’clock and at one o’clock groups of freshmen were taken for registration. Eight o’clock Wednesday morning classes opened and the theories and mysteries of orientation were explained at that time.

The first week of orientation was given over to between field, who is in charge of those meetings, Dr. Brittain, and the activity leaders of each of the Frosh classes. Prof. F. S. Fields, Dean of Men, and Dr. W. V. Skiles, Dean of the School, told the new men.

WELCOME TO NEW STUDENTS

Welcome, Class of 1921, to college!

That long summer vacation has actually come to an end, and you have
started a new life, a life that is both pleasant and full of challenge. It
will be your responsibility to make it as pleasant and as challenging
as you desire. You may accept a college career, and your own pride
does not want you to fail. But this is only a part of the story. You
must also learn to keep forthwith and achieve the proper goal take
notice of the different things that go on about you.

There are three great fields of

service and endeavor here at college:

study, activities, athletics—and the

proper goal take notice of the

things going on about you.

We, the Technique have been taken care

of by the student activities fee.

**Alumni Appears With Improved Cover**

With the September issues, "The Georgia Tech Alumnus" appeared with a new cover design and arrangement that do much to make this attractive little alumni paper more acceptable to its readers.

The cover design was drawn for the paper last year by George E. Hoffman, of the Dixie Engraving Company, of Savannah, who graduated in 1922. The rearrangement and additions were the results of the collaboration of John Green, of the class of 1927, and Mr. J. R. Hessemer, editor, and secretary of the National Alumni Association.

Later, in an effort to incorporate a section relating to the achievements of Tech men in professional fields, the cover was expanded, with the result that the school to the different fields of endeavor in which it is interested.

**Jones and Gunn Make New Records**

International Records Held
By Tech Men

Georgia Tech is well represented in the field of athletics by no less than four international champions. Tech men have scored successes both in track and in such other sports as tennis and basketball.

The most illustrious son of Tech is Dr. Walter Dean Ewell, world-renowned and world-famed golfer, Bobby Jones. Bobby went to Tech for several years, and was the architect of the Southern Conference golf title. In 1923, 1924, and 1925, Bobby won the national amateur championship. In 1926, he won the national open and the Wimbledon championships. Bobby, who has been a golfer since he was a child, has won golf prizes, medals, and cups that he knows what to do with. His record has never been broken and probably will never be approached for the sheer all-around playing ability. In play he resembles one of a tireless golf-machine.

The most brilliant part of his record is in the national amateur championship. This he has won three times in the last four years. Jones won the national amateur in 1924, 1925, and 1927, being runner-up to 1926. He won the national open in 1925 and 1926. In 1926 and 1927 he was unanimous choice for the Walker cup team, and proved his all-around ability by winning the British open championship.

The second of Tech's champions is Watts Gunn. Watts is still an undergraduate at Tech but this does not deter him from ranking as one of the leading players of the country. He was also a choice for the Walker cup team and also played in the British open. He has the National Inter-collegiate championship as well as the Southern Conference title to his credit.

He has won the Georgia state crown for the third or fourth time. The captain of the 1926 Tech track team, Ed Hanes, and one of the most brilliant midfielder-passers in the country, was the National College Conference-jump record, the Southern Conference record, and the Georgia state crown in the broad jump.

Another Yellow Jacket who is creating records to fall is Dave Young, who created a sensation at Iowa City by his own efforts, and who created a sensation at Iowa City.

**The Technique, Atlanta, Ga., Friday, September 23, 1927**

**Faculty Adds Many New Men To Roster**

Many new faces appear on the faculty of the Georgia School of Tech. Among these are some professors and instructors who will assume new positions, and where there are coming as additions to their departments, returning to Tech from a leaves of absence, or attending college for a year or more taking advanced courses in their line of work.

Mr. W. S. Taylor returns to the Chemistry Department as Asst. Professor; Mr. E. H. Folk returns to the English Department as Asst. Professor; and Mr. W. A. Goan returns as instructor in the English Department.

The greatest expansion has been made in the Architecture Department where two professors and two instructors have been added. The Textile Engineering Department has also been expanded. The expansion will greatly increase the accommodations of these departments, but no entirely new courses are being offered.

The following is a list of the new members of the faculty according to the Departments:

- **Architecture**
  - Mr. R. C. Dean, Asst. Professor.
  - Mr. M. S. Sisk, Instructor.
  - Mr. F. E. Markle, Instructor.
  - Mr. C. M. Laughter, Instructor.

- **Chemistry**
  - Mr. W. S. Taylor (Returned), Asst. Professor.
  - Mr. C. E. Murphy, Instructor.
  - Mr. Paul Weber, Instructor.
  - Mr. E. G. Gilsheath, Instructor.
  - Mr. A. W. Stahlknecht, Instructor.

- **English**
  - Mr. E. H. Polk (Returned), Asst. Professor.
  - Mr. W. A. Cate (Returned), Instructor.
  - Mr. T. B. Stroup, Instructor.
  - Mr. J. A. F. Rucker, Instructor.
  - Mr. Fred C. Stewart, Asst. Professor.

- **History**
  - Mr. L. E. Porter, Instructor.

(Continued on Page 8, Column 5)

**The Athlete's Friend**

It's strenuous business for the athlete to keep up with his work and at the same time get the sleep the coaches demand. Many have discovered a way to do it. They use a Remington Portable for their writing. It makes them get better marks because of the neatness and legibility of the typing—Easy Payments.

**Remington Portable**

Yellow Jacket Schedule

Heavy

Tech Opens With V. M. I.

Officials of the Georgia Tech Athletic Association have made up a football schedule that could try the worth of any team in the country. No effort has been spared to make the Yellow Jacket schedule as complete as possible so as to engage the best teams of the Conference and as to leave no doubt as to the championship of the Conference should Tech succeed in triumphing over all her opponents.

The Yellow Jackets open the slate by taking on the Flying Squadron of V. M. I. As in previous years Tech has no option but to send her best team to meet V. M. I. In a long series of games Tech have shown that a powerful backfield is the backbone of a championship football team.

Coach W. A. Alexander at the helm and with three All-American players as his assistants, this year promises to be most successful.

V. M. I. Backs Swamp Wofford

37-9

First Cadet Victory

Coach Alexander's swarming horde of Yellow Jackets will open the 1927 football season for the first time in six years without engaging the Oglethorpe Petrels. The first game of the year will be with the Virginia Military Institute Cadets, who invade the Tech field, next Saturday, October 1.

The Cadets opened the season September 17 by swamping Wofford College, of Spartanburg, S. C., by the score of 37-9.

V. M. I. Backs

This is the first time that an all-star Western team will engage an all-star Southern team in football, and the result is a decided favorite with Tech. Coach W. A. Alexander at the helm and with three All-American players as his assistants, this year promises to be most successful.

The Varsity Football team is coached by Alexander at the helm, Hank Bjorkman, All-American end at Dartmouth in 1924, in charge of the ends; Bob Randolph, the veteran fullback and a good one, hitting the line harder than ever before.

With the same coaching staff which had an enviable record at Notre Dame and has improved it with his splendid backfield. Don Miller, when he came to Tech had an enviable record at Notre Dame and has improved it with his splendid backfield. Bob Randolph, the veteran fullback and a good one, hitting the line harder than ever before.

The next game, on October 8, Tech tackles the Green Wave of Tulane. Last year Tulane furnished the greatest thrill of the season, with the ex-Continued on Page 8, Column 1

ALL-AMERICAN STARS COACH TEAM

With the same coaching staff which did such fine work last year, Georgia Tech may boast of one of the strongest units in the South. With Coach W. A. Alexander at the helm and with three All-American players as his assistants, this year promises to be most successful.

The Varsity Football team is coached by Alexander at the helm, Hank Bjorkman, All-American end at Dartmouth in 1924, in charge of the ends; Bob Randolph, the veteran fullback and a good one, hitting the line harder than ever before.

The next game, on October 8, Tech tackles the Green Wave of Tulane. Last year Tulane furnished the greatest thrill of the season, with the ex-

Captain Crowley on the left flank.

This year the fresh are being coached by Roy Mondorfer, who turned out such a fine basketball team and freshman baseball team last year, Mark Thorpe, of last year's team, and Kid Clay the Napoleon of baseball at Tech.

Coaches Prepare For Opening of Season

With V. M. I.

Large Squad Tris Out

With the first three weeks of intensive practice over, and only one week remaining before the initial game of the season, that with the Flying Squadron of V. M. I., Coach Alexander and his able assistants are rapidly getting the 1927 Yellow Jackets into shape, although such valuable men as Barron, Pool, Thorpe, and Marshall have graduated, the coaches are sure that these places can be filled with capable men.

Although the results of the summer school examinations were awaited with much uncertainty by coaches, as well as players and fans, the outcome is almost assured, practically the entire "wooden santon" passed their examinations and were allowed to re-enter school.

Many of the old timers together with those fresh from the cadet squad are rounding into shape exceptionally well. Bob Randolph will no doubt lead the Southern conference in puntting, and will be an important factor in the aerial attack of the Jackets.

Horace, Perham, Read, Thomaen, and Missill will be the fine horsemen of the Jackets with Bob Randolph, the veteran fullback and a good one, hitting the line harder than ever before.

Thomason is an outstanding half back of the team. He is a superior half back carrier, a deadly interferer, and

CHEROKEE FOOTBALL GAME TO BE PLAYED ON TECH FLATS 

ROUGHER THAN LACROSSE IS OPINION OF EXPERTS

One of the most unique and interesting exhibitions of athletic skill and endurance will be the Cherokee Football Game on the Tech Flats on Saturday afternoon, when Chief Samson Ocal and his band of Cherokee Indians will demonstrate their prowess on the hardball game on the American continent, Indian Football.

According to those who have witnessed one of the contests, the game is roug­her than football or lacrosse, faster than tennis or hockey, and more skillful than either golf or baseball.

The Cherokee have played this game of games for many generations and take pride in the fact that their game is faster, rougher, and more skillful than any of their white brothers.

The contest will be a friendly one, being for the benefit of the Sandlot Organization of Atlanta, and is back­ed by the American Legion. A large crowd is expected to witness the game as this will be the second time that the teams have met off their reservation.

Cherokee Football is played on a field 100 by 400 feet, two teams of eight men with a to­rner on each side. The duty of the to­rner is to see that all the players play all the time and to enforce this ruling he is armed with a long stick with which he persuades the players not to stop.

The ball is of hard rubber and is slightly larger than the orthodox golf ball. It must be pitched from the ground or caught from the air only with the hands. After catching, however, the ball may be carried in any manner whatsoever. Most of the experienced players either carry it in their mouths or tucked under their chins. After a player receives the ball he drops his stick and lights out for the goal. On the way, he may be tripped, tackled, blocked, or otherwise upset by the opposition. On the moment that he hits the ground, and everyone hits it sooner or later, he must put the ball back in play by throwing it or handing it to some other player preferably one on his own side. If the ball is held in the mouth as often happens, it may be extracted by hair pulling, nose-twisting, or other and sundry gentle persuas­ive methods.

The playing field is supposed to be a hundred and fifty yards long and about the width of a football grid­iron. The goals are not at the ends of the field, but are two imaginary trees about twelve feet apart. The ball, in order to score a point, must be between the posts, and not thrown or batted. The game is concluded when one team has scored twelve goals and there is no time-out allowed. When a man is knocked out or is taken out of the game because of injuries, his substitute may take his place until he is able to return. There are no personal fouls and only one technical foul. The latter is the ball held after being tackled, and the penalty is a good beating by the to­rner until he releases the ball and puts it back into play.

The players wear nothing but bolt corks and in order to distinguish be­tween the players, each team is painted a distinctive color. This is done, it is claimed, in a most grotesque, if not attractiveness, manner. Much could be learned by football players on the art of interference by the witnessing of this game. The plays used are full of tricks and are very deceptive, many goals being made through fake plays.

Southern Conference Swings Into Action

Asbury Meets Stetson '13A Plays Millhops

With the exception of Georgia Tech, Tulane, Mississippi Ag­gies, and Ole Miss, the entire South­ern Conference swings into action for the opening of the 1927 season to­morrow, September 24. With thousands of cheering students and old fair­nesses, the annual football season has stepped into its busy routine.

ATLANTA
No sooner had the numerous and weary miles of the trip to Atlanta faded from our minds, than the memories of things gone by, than — by every manner of reckoning it was the greatest anachronistic bong companions one and all repair- ing to the stadium to see the legend that was Gerber's.

A sophomore from Louisville Gerber's would be a very peculiar and decidedly unorthodox looking character, but, at any rate, to us, at any rate, there simply is no other place to dance. Yes, we have not without giving however, that we allowed the ways and the means of change; perhaps the train to Virginia had al­ ready shown the trend of the occasion. Yes it is said that Augustus Ecuador, V. A. Richmond, and truly to all who have made one forget the dump around­ rounds of this place of rendez­ vouse, are to enhance the brilliance of every other college Dance than the the Georgia Tech this year.

But, to continue, we had a won­ derful time. At first our darkest SOUTHERN CONFERENCE

NEW LATERAL PASS RULES GIVEN (Continued from Page 3)

followers:

Section 1. Any player may, at any time, pass, hand or throw the ball in any direction except towards his opponent's goal.

A. On a backward pass by the snapper-back of the first, second, or third down, when the ball goes out of bounds, it shall belong at the point where it touched the ground and the play shall count as a down; on the fourth down the ball shall be returned to the point where it went out of bounds.

B. On any other such pass, other than said pass by the snapper-back, on the first, second, or third down, when the ball strikes the ground or goes out of bounds before passing into possession and control of the player, the ball is dead and shall be brought to the point where it struck the ground or went out of bounds unless the point is beyond the goal line.

A new Wahl Pen is a classmate. Its right-tight, light up, and sharpen easily to a point — a point that's professional in line and form. It won't gain anything from being concealed. It won't gain anything from being concealed. It won't gain anything from being concealed.

New Styles! New Colors! New Size!

WALRY SEZ: It's not necessarily to be a 'grind' to be smart. The way only a Wahl Pen can 'write' — or should — is nobody's business — an' how! Pleased to meetcha.
Textile Course For Salesmen Put In Night School

The fall term of the Evening School of Applied Science begins Monday, September 19th. Among the offerings this fall are courses which will make it possible for students to take special courses and obtain certificates or degrees. The courses of study this fall include seven two-year certificate courses and 21 special courses. Among the new courses offered is some special textile work for salesmen and buyers or anyone handling textile fabrics. This class is taught by Prof. Bush, head of the Textile Department and meets at M. Rich and Bros. Every Monday and Thursday evenings.

Professor SPENDS NOVEL VACATION

(Continued from Page 1) "Black" Smith, head bookkeeper, may be taken as an example of work not displayed by the average New York Central man relative to Professor King's connection with the road for two or three months during the summer.

The writer had the privilege of being associated with Professor King for about two weeks in connection with some tonnage rating tests with the use of the dynamometer car. Life on the spaghetti crew is far from a bed of roses; it is hardly possible to make such a fel low-worker who is then required to sur mount the pleasing ensemble with a ridiculous little cap of yellow. It is absolutely necessary to have a skillful driver in order to avoid a possible collision in the case of a machine with which he is not practiced in the use of the dynamometer car. It was a pleasure to have Professor King's company during the summer.

The writer had the privilege of being associated with Professor King for about two weeks in connection with some tonnage rating tests with the use of the dynamometer car. Life on the spaghetti crew is far from a bed of roses; it is hardly possible to make a satisfactory machine with which he is not practiced in the use of the dynamometer car. It was a pleasure to have Professor King's company during the summer.

It was a pleasure to have Professor King's company during the summer.
Summer Session Well Attended

After the conclusion of the 1927 Summer School, A. B. Morton, Dean of the Summer School, stated that it had been the largest and most successful session that he had ever experienced.

A total of five hundred and thirty-five students were enrolled, according to Dean Morton. An increase of one or two per cent over the enrollment of the previous year.

During the session the attendance was unusually good and there was practically no sickness at all. This is very unusual for a summer school and the faculty as well as the students are to be commended for it.

There were no deaths reported although several students were permitted to go home on account of sickness or death in their families. The attendance of the students was also high and the majority of them passed.

When Alabama39s winning the championship of the All-Southern Conference in 1916. As everyone knows, the Jackets take the place of a suit of clothes. The Jackets will make the only two

When Alabama invades the Flats on the first date and Vanderbilt the next week. The team has

In conclusion, service, irrigation or drainage work, the Koehring Dragline with fast, smooth action under Finger Tip control advances mile after mile, making straight, accurate ditches without a delay for repairs. Every Koehring product built for dependable service!

CONTRACTORS naturally expect an organization which builds dependable pavers, mixers, gasoline shovels and cranes, to build staunch draglines. Draglines, more than any other machine, are often used far from the sources of supply where dependability is all important.

Heavy Duty Construction, which builds the Koehring Paver its predominant position among contractors in all parts of the country, is built into the Koehring Gasoline Dragline. Along with the rugged construction, Koehring design has accomplished simplicity and accessibility. There are no service stations in the swamps — repairs must be quick and easy.
