Tech MEETS ALABAMA FOR THIRD GAME

Tech Regiment Is Inspected

Army Inspectors Review Cadets

Lieutenant-Colonel Merriam and Major McElroy, members of the Army inspection team, will inspect the Tech R.O.T.C. Monday and Tuesday.

The inspectors entered every phase of the military department thorough­ly. They went to all classes and examined the students and called for both close and extended order drill at the inspection of the regiment on Monday afternoon. Some of the inspectors asked the students numerous questions and many of the instructors were so overwhelmed by the brass button that they did not answer as well as they might have under normal conditions.

The regiment is among the dis­tinguished military colleges until last year, when the right to wear the star on the right sleeve of the uniform was lost. The system of distinguished military colleges has been abandoned, however, and the units will be reported as to their condition on a par with other military units in the future. It is to be hoped, however, that the regiment made a good enough showing to warrant its being reported as satisfactory, for it is the only branch of the school's reputation for being at the top in all branches of work. The regiment, therefore, has the government to make more liberal allowances for uniform equipment and other necessary items, and the students will be required to make no promises while here, but will have to make the improvements some time before June 1.

The examination of officers among the R.O.T.C. officers seems to be that, (Continued on Page 7, Column 3)

Submarine Mine Is Presented to the Navy

Details of Construction of Mine Revealed

A huge submarine mine has been presented to the Navy by Tech R.O.T.C. by the Navy. The mine was presented to the Navy by the U.S. G. V. G. M. G. S. T. C. officers of the school.

The mine is a large, massive structure designed to sink both ships and submarines. It is constructed of steel and concrete and is capable of destroying any type of vessel it encounters. The mine is equipped with a detonator that can be set to explode at any time and is designed to sink any vessel that approaches it.

Design of Memorial Window Submitted by Judy Harris

Marionettes to Present The Buccaneer Aspring Production

The Marionettes have under way a spring production of "The Buccaneer" several years ago. It is a historical drama calling for a large number of students, and in the department of emotional parts.

The "Buccaneers," written by Law­rence, Merriam and Morgan, are being corrected in order to pro­duce this spring. The story centers around theorious pirates and cut­throat crews. The machine will act as a credit to our class. Therefore, the class memorial, and have final draw­ings submitted for their approval.

With these instructions from the class the committee has made ar­rangements to carry on with their work. We have received the assistance of Mr. Bush-Brown who has ad­vised us on the design of the window. The committee has been given approval by the church, and have been divided into four main parts of the design. The new window will be placed in the church, and will include the designs of the new window. The committee has also been instructed by Mr. Bush-Brown to submit a complete and fini­shed design of the window, which will be taken all these things into considera­tion and believe that the stated

The Tech band and fife and drum corps were given a great surprise. This was the first public appearance that the corps has made, and it received the applause of the thousands upon the sidewalks and the thousands upon the sidewalks and the thousand windows of the tall office buildings.

The parade moved down Peachtree and Whitehall streets to Hunter, where it turned and proceeded to the Cin­ema. The Tech band and fife and drum corps were given a great surprise. This was the first public appearance that the corps has made, and it received the applause of the thousands upon the sidewalks and the thousands upon the sidewalks and the thousand windows of the tall office buildings.

Notes From the Business School

Miss Smith, representing the Monroe Calculating Company has come to Tech with the suggestion that a course giving recognition in the use of Monroe Calculators which she says is in heavy demand at the Commerce Institute. This course is to be offered as an independent study, and will require a knowledge of the Monroe. Machineinery valued at over five thousand dollars was loaned by the Monroe Company.

The Georgia Tech School of Commerce and Industry have instituted a course in Commercial Law, to be given by Mr. Mc. Davis, Mr. Kerr, and Mr. Napier. The course will be announced in the next issue of the Yellow Jacket.

Representatives of the W. T. Grant Department Store of New York, the Pythian Chemical Company of Atlanta, and the First National Loan and Trust Company of Atlanta, were on the campus last week looking for competent workers to enter their respective companies.

Last week Professor Sparks, Doctor of Philosophy, who has been among the yearly religious exercises in the college, was one of the speakers at the graduation exercises of the University of Georgia.

The Commerce Department of Georgia Tech will attend a conference of the American Association for the Advance of Colleges of Business. Tech is one of the few states coming the falling in on the others being the Universities of Georgia, North Carolina, and Yale.

Handcups of Quantity Production

It is evident now recognized that our methods of quantity production are very largely responsible for our industrial supremacy and, indeed, our national prosperity, but some people claim that they are carried too far. One such observer is a Frenchman, who, when asked what he says on the subject in his recent book, "America Comes of Age," the other response to the question was "Perfect."

In the telephone industry the same handicap has been noticed. For instance, for many years the bell telephone receivers, we are reminded, "were well known for their ringing and dead-beat signals and terminals or post offices."

In the telephone industry the same handicap has been noticed. For instance, for many years the bell telephone receivers, we are reminded, "were well known for their ringing and dead-beat signals and terminals or post offices."

The American Magazine and Scribner's Weekly — concludes the discussion with this paragraph—

"These illustrations are not given to substantiate our point, but simply to indicate one of the hundreds of ways in which it is possible to keep its product up to date. It is reported that each year American inventors have been forced to take several hundred patents from England or France, for the simple reason that the foreign invention had no immediate use, whereas the American invention had a market and a ready sale. Although this invention handicap is not so great, in order to get to the market. Although, surprisingly enough, the time lag, due to our quantity-production idea, which we have so thoroughly adopted, is a decided detriment to American inventors."

With the same brilliance that characterized the Ad Ball of two years ago, the A.T.O.'s gave last week's party. It was beyond a doubt the most brilliant college function of the year. And that they well succeeded is shown by the fact that the Journal and so many different and do it in a big way. And that they well succeeded is shown by the fact that the Journal

Driving Club, but then the A.T.O.'s

would have been there and told us just what we want. This must have been an important party for the members of the class, and the planning of this was fully approved by their classmates.

The little girls from our fair metropolis and the millions of little old home towns that the map-makers forgot seem to enjoy it as much as ever. But such as life has a pair of pants, wet or dry, cold or hot, hanging around us is ultimately happy—even unto the millenium and pair-of-dice. May all the girls that were there and those that weren't get a bid next time and enjoy it to the full.

Over here were a few people left, but they kept pretty much under cover. They hardly ventured beyond the battlements of their dates' homes and even then just to a show or the movie store for that customary lump of cash or orange or cherry in what have you. This must have been the Deserted Village as far as we could see.

Our correspondents were all in Athens this past week-end and forming the buffalo ring at the morning hours of the day. The band is now practising its arrangement for the Homecoming game. They are scantily attired in the best small town uniforms will be ready for the band parade. They are scantily attired in the best small town uniforms. And they probably repeated this year.

This week the Nanmakuls are again parading before the campus and we have found out who the prominent freshman are. As usual there is the buffalo ring and the broom and then the long walk and sheller and barrel staves on Saturday night.

Tech Golf Team Defeats Tarheel Foursome

Russell Williams and Irwin Star

The second foursome of the Tech golf team saved the day Saturday when Shag Irvin and Joe Hi Williams played an unusual brand of the Scotch game and won eight out of four possible points in their match with the North Carolina team on the East Lake course. The final score was 11 to 6 in favor of the Jackets.

The playing of Joe Hi Williams was the sensation of the day. Although he was not the low scorer, he possessed the ability to put the ball in the hole when it was most needed. His score for the day was 76. Watts Gunn, cap­ tain of the Tarheems, was the low scorer of the day, with a 74. However, Watts was handicapped in his game by the fact that Charlie Brum­ ley, his partner, was not shooting a good brand of golf at all that day.

For North Carolina, Adams did best in a 75. With his partner, Mayson, he beat the first Tech four­ some. This is the first year that North Carolina has had a golf team, and with the showing that they are making this year it is expected that they will have one of the outstanding college teams in the South for a few years.

The Tech team left on its only trip of the year last Wednesday morning. Thursday they encounter the powerful Tech team, a team which is one of the strongest in the country.

The following day they meet the Blue Jays, Tarheels, and the day after that they encounter the Yale team. These latter two teams are among the best in the Eastern section of the country, and the showing that the Jackets make will indicate how their team compares with the Eastern section of the country.

On May 11 and 12 the Tech will play the Southern in its third intercol­ legiate title. Up to date the team has won all four matches played. One match, that with Vandy, had to be called off account of snow.

The Jackets have taken every series that the Georgia teams have played. No one can beat the Jackets in their home games so far. Alabama invades the local field this week-end and a battle royal is ex­ pected. The Jackets Title has last

(Continued on Page 7, Column 3)
AUBURN FROSH TRIUMPH OVER TECH RATS

Carter Lets Junior Jackets Down With Two Bingles
Freshmen Lose to Baby Petrels and Boys' HI

While their big brothers were winning the third game of a three-game series, the Tech freshmen caught a Tartar in the Baby Tigers. Carter, Auburn freshman pitcher, let the series, the Tech freshmen caught a victorious Tiger Cubs' five. The play of Issacis at short was the outstanding feature of the game for the Junior Jackets.

Before leaving for the Lovelace Village, the Tech rats played games with the Oglethorpe frosh, and with the Boys' High prep school team. Both teams defeated the fighting fros, the Boys' High by the score of 9-7, and the Boys' High team by 22-5. The Tech rats just could not get together in either game. In the Boys' HI game the Jackets could not hit the apple, and no game can be won without runs.

The Tech Auburn score by innings: Batteries—Tech: Branson, Murphy

The Freshmen swimmers ended their season last night at the "YY" pool. They were defeated by the Emory University of Atlanta. It was a hard fought affair.

The Tech in points up to the last event, the relay, but by the loss of this splash, lost the meet by the close score of 29-28.

The Junior Jacket swimmers have shown a good team this season, but lost the final plunge when they lost Cubahe, who is a co-op. Swimming in the relay gave the Jackets the necessary strength to win their meet, because most all of their meet rested on the outcome of the relay.

Georgia lost both games played last week and will be back tomorrow for revenge. The Bulldogs have a powerful team this year, but will have rough going in taking the Jackets, who are back full of ideas, for a ride.

The "butterfly" champions will journey down to Fort Benning, Georgia States, and the Tech Tankmen will be out to defeat the Georgia States before the fact that they are playing on foreign soil is taken played an unusual hand of the score.

The second and final order for the Tech Yellowjackets was held Thursday night. The meet was held Thursday night. The meet will be held at the Atlanta Athletic Club on Saturday night, May 5. The teams competing in this meet will be Emory, Tech and the "Bulldogs" from Athens.

This will be the first trip affair that the Tech tankmen have participated in this season. All three schools have unusually strong squad and this promises to be a close water battle.

Flying Easy to Learn

By J. BEN FALKNER
Instructor Flinlea Flying School
ATLANTA, Ga., April 27—Walking takes more time to learn than flying. As babies we all spent several hours a day for two months or more learning to balance ourselves and acquiring the strength to walk in a fairly straight line. A beginner who has mastered this in six weeks of instruction in the air. This 10 hours, though, like our early efforts at walking, is spread over a period of six weeks or two months.

A sense of balance is the keynote of flying just as it is in walking. A person who lacks a sense of balance and cannot "feel" whether his airplane is level probably could not learn to fly well, but neither could he be made to walk well.

If I discovered a student whose sense of balance was far below par I would advise him to give up flying. To show how rare this is, however, during 1927 I instructed 117 students in the Pilchuck school at Philadelphia and found none so afflicted. Only one of the number failed to snap into flying, a large majority losing before finishing 10 hours of instruction. The student in question, a man 30 years old, refused to give up flying and declared that if I continued to insist that he should buy a plane somewhere and teach himself in this case he seemed to spell disaster so I continued his instruction until he mastered the art, and each succeeding week he improved in the same degree the art.

Flying must be easy and natural, easy, after all, because I was astounded to learn recently that our "hopeless" student is operating a flourishing flying field in an eastern state. He is after all, because I was astounded to learn recently that our "hopeless"

Spring Initiation of Phi Psi to be Held

The spring initiation of Phi Psi honorary textile fraternity comprises the following men: George Gardner, Edward Herrn, Charlie Casey, Frank Anderson and Alfred Clifton. The initiation, after being allowed a short time of grace, will be given a second and final degree of the initiation one week hence. Psi Phi is an honorary textile fraternity of national scope, chapters being located in representative textile schools in the United States and membership is confined strictly to textile students.

At the last meeting place for the dance to be given on May 2 was diseased, and those who remember Phi Psi's overall dance that was given last year in the gym will be looking forward to this year's dance with an appreciation.

Peter Paul and Billie Richardson were Beta chapter's representatives to the recent National Textile convention.

G.S.T.

Pool Tournament Draws to a Close

The Pi Kappa Phi pool tournament now in full swing, and the semi-finals should be finished this week. The silver loving cup offered as a trophy will be on display this week in the window of some prominent business establishment in the city.

The following men survived the first round: Fowler, Yager, Hanna, Keadie, Simmons, Austin, Jones, Enes, Nabors, Hobbs, Best, Thornton, Sheppard, Collins, Camp Prull, Alexander, Mezger, Sheppard and Clark.

Marionettes Play Augusta, Savannah

Leave Next Thursday

The Marionettes leave on a week old trip to Augusta and Savannah Thursday, May third to present "The Patsy." This will probably be the last trip of a very successful season. The club has journeyed to Forsyth, Macon, Cartersville, Dalton, and Charleston during the early part of the year where they were received with much enthusiasm and praise, as evidenced by the local newspapers in those cities.

"The Patsy" is a clever three act comedy, written by Barry Connors. A typical story of American life in which Patricia Harrington the younger daughter allows her selfish and ambitious sister, Grace, to have everything she wants until she finds herself in love with Tony Anderson, who is courting Grace, and strangely knows that Pat exists. But she determines to win the man she loves, and does she get him? Oh boy! and how.

The Play is well cast with nine characters, four of which are taken by female impersonators. Axel Talbert as Patricia almost makes you believe that he is a girl, as well does the play the leading feminine role. If you could forget, for just a moment, that mean, contemptible sister, Grace, and think who makes her character seem as it does, you would discover a real artist. Leon Brown makes a fine character as the mother and wins the applause of the audience many times.

Other characters who are well cast are: Luke Lord as the father; Rodman Edwards as Tony Anderson; George Weitzel as Billy Caldwell; "Son" Thomas as Patrick O'Flarity; Lexter Culver as Sadie Buchanan; and Myron Underwood as "Trip Bus," the taxi driver. The Marionette orchestra under the direction of Joe McCain will accompany the players on the trip.

Others making the trip are Jack Warnor, Business Manager; Harvey Smith, Assistant Director; Douglas Bartholomew, Property Manager; Lee Weingelford, Stage Manager; Howard Brewton, Assistant Stage Manager; Phil Howard, Publicity Manager; and Floyd Walton, Assistant Publicity Manager.

G.S.T.

Tom Tom

Angry Customer (reading a package on the counter)—"Makes washing a pleasure, does it? Does the washing while you wait, does it? It's the little flake of soap that—"

Groover—"Maddam, one moment, please. This is not soap.

Angry Customer—"Not soap? Not soap?"

"No, your daughter asked for a half-pound of grated cheese and a half-pound of soap flakes. This is the cheese."

"My stars! And last night I made a pudding."—Progressive Grocer.

Where "good enough" isn't—

PRACTICE, practice and more practice. And you have the well-oiled, well-regulated and successful machine—in college athletics and in industry.

At Western Electric this desire never to rest on past achievements has led to many striking developments in telephone manufacture.

New methods and machinery used in making telephone cable have resulted in striking economies. An entire industry—that of wire drawing—has been redesigned to give four times the previous production from a given floor area.

Who knows where the next achievement will occur? Perhaps in any one of the many projects on which Western Electric men are ever so busily working—inspired by the thought that the accomplishment itself is only a little greater than the will to accomplish.
Mr. Foster Addresses Commerce Students

Qualifications for Success Discussed

The opportunities and qualifications of a chain store business that awaits a college man, were discussed by Mr. Foster, manager of the W. T. Grant Company, before commerce juniors and seniors Monday morning.

Mr. Foster urged that Tech men, who like to play golf on Saturday afternoon and who are going to make Atlanta their permanent home, will do well not to consider entrance into department and chain store business. Promotion frequently requires a man be transferred over the street, while the open order drill that was called for on Monday afternoon was for any other unit. The freshmen especially, covered themselves with glory by answering all but one or two questions that were given them.

WANTED: The Balfour Company desires the services next fall of several experienced high school jewelry makers for the States of Georgia, Florida, and South Carolina for a month or so.

A National Reputation

THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of ability and ambition a training which will fit them for positions of responsibility and power.

The national reputation of this institution is based not on claims, but on results. Its greatest asset is the record which its alumni are making in the productive work of the world. Georgia Tech graduates succeed because they have been trained both to think scientifically and to work efficiently.

Courses in CIVIL, ELECTRICAL, MECHANICAL, TEXTILE, GENERAL, AND CERAMIC ENGINEERING, ENGINEERING CHEMISTRY, ARCHITECTURE, COMMERCE, AND GENERAL SCIENCE.

Coast Artillery, Signal Corps, Air Service, Infantry, and Ordnance Units of the R. O. T. C.

What Shakespeare says about Coca-Cola

"The hand that hath made you fair hath made you good" — Obviously, the Duke meant the lady—not Coca-Cola. But why bring that up? Translate it into plain United States, and you get:

IT HAD TO BE GOOD TO GET WHERE IT IS

8 million a day

The Coca-Cola Company, Atlanta, Ga.
Woodshop Stresses Pattern Making

Principles of pattern making and molding are being stressed by the woodshop this semester. M. E. 4 students are making a pattern for a clock case. The pattern is very difficult in construction and when the student has built one, he will have a clear understanding of the underlying principles of pattern making and molding.

The rough stock is produced in quantity by the same methods as would be used in furniture manufacturing, auto construction and work of that kind. Although the pattern is in seven parts, it molds in a one part flash. Horizontal dry sand cores, green sand cores, and dry sand cover cores, are embodied in the pattern. The cores and skewer wires go with it.

The students are making very good progress with the pattern and cores boxes and some will be ready for shellacing next week. When the student has built one, he will have a clock case. The pattern is very difficult in construction and when the student has built one, he will have a clear understanding of the underlying principles of pattern making and molding.

Scabbard and Blade Initiate Hold Parade

With a march to five points last Saturday, the pledges of the Georgia Tech company of Scabbard and Blade completed their third and last day of public initiation.

For three days, ending Saturday, the pledges attended classes dressed in their distinctive uniforms which consisted, from the waist up, of military coat, trench hat and military park, but from the waist down their uniform was made up of anything from B. V. D. to basketball trunks.

The class of initiates this year was unusually large, due to such a large number graduating last year. Those initiated were: Tom Newberry, C. L. Renfroe, J. A. McCain, R. J. Neufort, E. L. Moore, C. H. Robertson, M. A. Enall, J. E. Cooke, R. B. Lee, W. J. Martin, E. R. Roane, R. L. Aikat, R. L. Whaley, F. C. Rungo, R. B. Adams, R. B. Senuabargh and A. A. Hero.

Initiates Hold Parade

Julius Meares left Tuesday for Columbus, Ohio, where he will attend the Scabbard and Blade convention which is being held on Thursday, Friday and Saturday of this week.

He was elected to represent the Tech order by the active chapter and at the expense of them. Julius was elected to this honor because of his efforts and accomplishments in the military department, being a major in Colonel Pierre's army, as well as being a popular member of the Scabbard and Blade. He is a member of the Beta Theta Pi fraternity.

The Tech chapter of Scabbard and Blade has always sent representatives to the national convention.

AN ADDITION TO CAMEL SMOKE-LORE

We submit the sad case of the freshman in zoology, who, when asked to describe a camel, said, "A camel is what you wish you were smoking while you try to think of the right answer." He flunked zoology—but he knew his cigarettes. For in time of trial or time of joy, there's no friend like Camels.

"What is the greatest water-power known to man?"—Tawney Kat.
