Quadnode structure in hard disk
- Quadnode instantiated with data
- Quadnode without data
- Quadnode skipped
- Quadnode’s properties, such as bounding box, delta values, etc.

Fig 1: Terrain management structure

Fig 2: After fly-in, without prediction & without node skipping

Fig 3: Same as Fig 2, with prediction & with node skipping

Fig 4: After fly-in, with random paging

Fig 5: Same as Fig 4, with prioritized center paging
