Seniors
For the past sixteen years, “Mother” Mary Travis Brooks has lived in the Chi Phi house. In addition to her duties as housemother, Mrs. Brooks has also worked at the Tech Bookstore, the Student Center information desk, and is now a part-time switchboard “girl” with Campus Centrex. She has been honored by numerous organizations on campus, such as Order of Omega, the Co-op Club, and the S.G.A. Through her work at and around Georgia Tech, Mother Brooks has become a tradition both the Chi Phi’s and the Tech community can be proud of. She personifies the spirit and loyalty found at Tech, and will outlast the cold whistle of academia for many years.
A good place to catch some rays on a sunny afternoon is the Student Center steps.
A graduating mechanical engineer, Mike Cosentino has completed his education the hard way — by working his way through school. In addition to being a student and a dorm counselor, Mike works twenty-five hours a week in the shipping department of Sears on North Avenue. He has supported himself well and feels that the experience has been very rewarding. Familiarization with the working environment has led to substantial job offers from various companies.

Mike has resided in Techwood dorm his entire time here. Though his room overlooks the crime ridden Techwood Projects, he has easily adjusted to the rigors of city living. In fact, his lifestyle has prepared him for anything the outside world can throw at him.
"I just lost one million dollars in one hand at Casino Night."

A recent addition to the Georgia Tech cheerleading squad is Susan Bailey, a ceramic engineer from Tuscaloosa, Alabama. Being on the Tech squad takes up a lot of Susan’s time, however, she still finds time to be active in the Ramblin’ Reck Club and the Executive Roundtable. Since both groups deal with school spirit, she feels that her experiences with them were very instrumental in helping her to attain the position of cheerleader. When not in her cheerleading outfit, Susan can sometimes be seen at athletic events dressed as the Reck Club’s yellow jacket. As a co-op student, she has an interesting position in the Engineering Experiment Station’s solar energy research group.
Sex life at Tech has improved with the admittance of more women.

Chris McGahey is a Civil Engineering major from Syracuse, New York. He spent his freshman year at the University of Tennessee and is presently a Georgia Tech junior co-oping with the Georgia Environmental Agency. Outside the classroom, McGahey's activities cover a broad range. He has been past president of Drama Tech as well as news and music director at WREK, the student-run radio station. In addition to this, Chris is current President of Chi Epsilon, the CE honorary, and a member of Omicron Delta Kappa.

This summer Chris spent a month in Nairobi, Kenya studying animal behavior. He also plans to travel to South Kenya with the Friendship Force in the coming Spring.

Tech alum Jimmy Carter visited Tech during the summer Energy Conference.
Kappa Kappa Psi members put in long practice hours.
One Tech student who falls into no stereotype is Kodaq Gordon, a thirty year old junior in Mechanical Engineering. He is neither a jock nor a nerd; he is an individual. In contrast with most Tech students, Kodaq had already acquired job experience before coming to Tech, serving in the United States Air Force during the Vietnam conflict from 1968-1973. Having served his country in the line of duty, Kodaq favors draft registration for both men and women. On campus, he is involved with A.S.M.E. and the Society of Automotive Engineers, as well as being a senior counselor in Techwood dorm. He is also involved with the IDC and the Student Center Movie Committee.

While most apathetic students are content to attend programs sponsored by the Student Center, a few, like Rosemary Higgins, have the initiative to get involved with planning events and join the center's Program Board. Though currently serving as Student Center Vice-President, she has served as Student Center President and Chairman of both the Homecoming Committee and the Travel Committee. Having always been interested in this area, Rosemary began her career as student assistant to Program Director Sally Hammock. Most recently, she was honored by being the first Tech student to receive the Norman A. Whitten Award, given by the Association of College Unions International for exceptional student union work.

A senior majoring in industrial management, Rosemary has also been honored by being inducted into ANAK, Tech's highest honorary, as well as ODK, the national leadership society. Feeling that she has grown a great deal through her work with the Program Board, Rosemary is considering pursuing a future career in this field.

As a mechanical engineering major from Camilla, Georgia, sophomore David Gurley co-ops during spring and fall quarters. He works for Simons-Eastern, an engineering consulting firm, and through this gains experience as a draftsman. While at Tech, David works part time in the housing office and also ushers during events held at the Omni.

Aside from work and school, David involves himself in various activities. He is very concerned with housing problems and has been president of the Glenn Dorm Council. David presently serves as an Interdormitory Council Representative.

When he is not spending time on his housing related activities, David participates in the Techwood Tutorial Project. He serves as a big brother to Tony Mitchell, both tutoring and spending time with him. They often go to SAC and work out. Looking to the future, David plans to continue his involvement in extracurricular activities and has applied to be a FASET leader during summer quarter.

Being Editor of any major college newspaper requires constant dedication and sacrifice, and the *Technique* — "The South's Finest" — is no exception. After four years of staff work, Karl Green was ready for the task. Dealing with an often impossible crew of subordinates, Karl was still able to crank out thirty-two issues during his reign as "head honcho" for the 1979-80 school year.

An industrial management major, Karl was chosen for the position by the Board of Student Publications. Though many students can't fully appreciate the work involved in his job, Karl is able to handle it not only with diplomacy, but also a pinch of success, which is especially hard to do at an all night deadline.
After all the work of repairing it, this Honda still won't run.

Dubbed “Mr. Georgia Tech” by thousands of students, Dean George Griffin has enjoyed a long and varied career. A 1922 C.E. graduate, he played football under coaches Heisman and Alexander, in a day when a 100 pound player could function as a quarterback. While still in school, he became a coaching assistant and later the Tech track coach. Dean Griffin served in the Navy during both World Wars, and following the last one, also served as the N.R.O.T.C. officer at Tech. Following this he moved into the job of Assistant Dean of Students and in 1946 succeeded to the head position. During his eighteen year reign as Dean, he became a friend and companion to countless students. In the days when beer was a closet item and rat caps concealed crew cuts, he established himself as the man that students could confide in. The truest expression of Tech’s appreciation for this man materialized in 1964 when the magnificent “7” abscended with the whistle and presented it to him upon his retirement.

Georgia Tech enjoyed an athletic heyday during the Bobby Dodd era which has been unparalleled in the school's history. Starting his Tech career in 1931, Dodd served as assistant football coach, varsity baseball coach and freshman basketball coach. However, it was not until he was appointed to the head football position in 1945 that the so called "Glory Days" began. In his 22 years at Tech's helm, he constantly kept his charges in the top ten and 14 times took them to bowl games. In 1966, Bobby Dodd accepted the position of Athletic Director and guided Tech's sports fortunes until 1976.

Today, this energetic man is still very much involved in Tech athletics. The recent hiring of Bill Curry has left him more optimistic about Tech football than he has been in the last 30 years. On the subject of his football success, Dodd attributes the performance to Tech's drawing power as a good school and his staff's well organized training program. Bobby Dodd gave the Institute some of its finest moments and that in itself is the best reflection on this Tech legend.
Students “enjoy” an unexpected dip in the Library Fountain.
Seniors

Giving new students a good first impression of Georgia Tech can be a very difficult job, but for Terry Knight, it is an obsession. The senior, mechanical engineering major is Keith Ivey’s assistant in the recently established office of New Student and Parent Programs. Among the programs with which Terry is actively involved are FASET, Parent’s Weekend, and a special continuing education workshop for freshmen. In her capacity, Terry deals with both incoming students and their parents through special programs.

Besides her participation in Students Center Programs, Terry has also been actively involved with music and is a past president of the Georgia Tech Choral.
After a Phi Delt party, Tom Lewis wonders why his date left early.
