Ms. Trinna Cheeks McKay, a black woman, the student participant in the subject Training Grant, was admitted to our graduate Ph.D. program in the School of Geophysical Sciences in September, 1987 and, as a participant in the subject Training Grant, was awarded a stipend and was invited to participate in research activities under Dr. Chameides’ guidance which were relevant to NASA Grant NAG-1-786.

From September, 1987 to May, 1988, Ms. McKay was a full-time graduate student in our program and also spent a fair amount of time on research activities related to ozone photochemistry. Ms. McKay took and passed the following courses during this period:

- GEOS 4650 Introduction to Atmospheric Sciences
- GEOS 6830 Introduction to Physical Meteorology
- GEOS 8133 Special Topics in Geophysical Sciences
- MATH 2308 Calculus V
- GEOS 6820 Introduction to Atmospheric Chemistry
- GEOS 6831 Physical Meteorology
- GEOS 8500 Special Problems in Geophysical Sciences

Unfortunately, because of medical problems Ms. McKay had to withdraw from the program on May 24, 1988. We are hopeful that Ms. McKay will be able to resume her studies in our program in January, 1989.
