Student Body Witnesses Many Transitions on Campus

The ultimate transition at Tech is one which everyone who stays here for four years will experience. It is not a change in the quality of the athletic program or any individual team. The decreasing number of parking spaces on campus involves most, but not quite, everyone. The growing construction of buildings and sidewalks on campus takes away more and more green space and frequently leaves us colder and less in touch with the softness of nature. The growing number of women on campus seems to be a major change affecting everyone, but guys still complain about a lack of social life. Crime on campus is becoming more of a reality and although a number of students are directly or indirectly changed by it, a great many remain untouched. Even the gradual, yet steady, decline of our GPA is not an all-pervasive change.

But everyone grows up. Four or five years marks the transition from freshman to college graduate. But this does not occur without a great many changes in attitude. Hopefully, these changes are positive. Maybe we learn to accept people without regard to the color of their skin or can become friends with someone who didn’t grow up with the same background or even in the same country. For those who have learned to reach out and care about others, the campus is an exciting place. However, cynicism and apathy sometimes seem to be in vogue and we find it easier to remain aloof. But the seemingly unbearable experience of working toward a degree necessitates making friends.

RIGHT: Student Center lounge is a place for work as well as relaxation. OPPOSITE RIGHT: Coed takes a long walk behind the library at day’s end. BELOW LEFT: Warm weather brings studying outdoors. BELOW RIGHT: Library fountain gives Tech coed a chance to watch passing students. BOTTOM: Construction on Yellow Jacket Plaza began summer quarter.
Student Friendships Serve as Impetus for Change

At Tech, we work hard, and when it's time to relax, we like to have our friends around. The friends may change from year to year, but the spirit of friendship remains. Friendships that develop with the girl in English or the guy down the dorm hall are ones which made life at Tech more colorful.

Friendships effect changes within, and more often than not, the change is for the better. This makes it necessary for us to step back and take a look at who we are and how we fit into the overall picture.

We are all a part of the careful orches-

tration which is Georgia Tech. Whether it be at the end of one year or four, we share the universal feeling of pride. Pride grows from having faced an experience which we sometimes hated, but nevertheless endured. The reality of the situation brought about an inner confrontation which forced us to mature.

In the end, we look back and it all comes together. We have accomplished something through our efforts — both singularly and collectively. And it would not have been the same with the absence of any one person.

Eventually, friends graduate or leave for a variety of other reasons. But the people made the journey through Tech more meaningful, and we can't help but feel grateful to them. But the transition is not complete and never will be. Even after graduation, we keep changing as a result of our years spent growing at Georgia Tech.

TOP, LEFT TO RIGHT: Library offers many spaces. Life at Tech requires a good day's rest. BOTTOM, LEFT TO RIGHT: 5:00 traffic is easier on a bicycle. Pinball machine reflects aspect of student life. Student walks across square.
GEORGIA INSTITUTE OF TECHNOLOGY

Established by Act of the General Assembly
Oct. 13, 1885; site selected Oct. 20, 1886
Administration Building erected, 1887
First Session, Oct. 7, 1888.

In July, August, 1864, this site was occupied by one of a series of forts connected by rifle-pits which, 12 mi. in extent, encircled Atlanta. During siege operations the city was defended by Gen. Hood's Army of Tennessee. Opposing this sector were the 4th & 20th corps of the Federal Army of the Cumberland posted in the area between 10th & 14th Sts. The siege began July 22d & ended Aug. 25.
