congratulations
class of 1982
EE's, ME's
Physics & Geophysics

We don't fly into the earth, but we do explore it.

Just as the crew aboard a shuttle orbiter combines the latest technology and engineering training to explore space, a Schlumberger engineer uses the latest technology to evaluate subsurface formations. Special devices are lowered into wells drilled miles into the earth's crust. These earth probes operate under extreme environmental conditions to provide answers to the petroleum industry. Shuttle Orbiter? No. We use a half million dollar computerized mobile laboratory.

To investigate the possibility of you taking command of an Earth Explorer, interview with a Schlumberger Engineer at your College Placement Center, or send resume to:

SCHLUMBERGER OFFSHORE SERVICES

FACT:

Daniel is a wholly owned subsidiary of the Fluor Corporation.

FACT: Daniel offers competitive salaries and a comprehensive benefits program including, a company sponsored non-contributory profit sharing plan, life and accidental death insurance, group family hospitalization, and major medical coverage, sick leave, relocation assistance, a payroll deduction savings plan, and a tuition aid program for studies in your field.

FACT: Daniel has been awarded the distinction of being named the world’s safest construction company.

FACT: Realizing your potential means each employee must be committed to “self” development. Your career growth with Daniel is largely a result of applying your skills and abilities to the challenge of the job opportunities available.

FACT: You have now learned a little about a complex, rapidly growing organization, Daniel Construction Company. If you are interested in making our future a part of your own, talk with Daniel’s representative or write:

Professional Employment
DANIEL CONSTRUCTION COMPANY
A Division of Daniel International Corporation
Daniel Building
Greenville, South Carolina 29602
(803) 298-3315

An Equal Opportunity Employer M/F

From our beginning over forty-five years ago, Daniel Construction Company has become one of the largest construction firms in the country and as a result of the Fluor acquisition, Daniel is now part of one of the largest engineering/construction firms in the world. With a backlog of scheduled work totaling several billion dollars, Daniel designs, builds and maintains for a growing number of new and returning clients.

Our success is due to many factors, the first and most important of which is our commitment to our people. Through careful analysis of your performance and interest, we help find the right career paths for you.

Daniel is organized into operating groups, each with a specific area of responsibility to meet the overall needs of our clients. These operating groups are: Power, Chemical and Fibers, Industrial, Regional, International, Engineering, Maintenance and Mechanical, and Quality and Technical Services.

FACT: Employment – 50,000 Craft and Professionals.

FACT: Corporate offices are located in Greenville, South Carolina, regional offices located throughout the United States. Approximately 250 projects throughout the world.

"HERE AT MCI, WE START YOU IN THE MIDDLE OF THE ACTION... AND KEEP YOU THERE."

- Mike Benoit, President
Management Cybernetics International, Inc.
Georgia Tech Graduate

Your entry credentials here should include a degree in Computer Sciences, fluency in COBOL or other high level languages, and an interest in joining a young, energetic company entering its second decade of growth as developer and marketer of sophisticated hardware/ software systems and EDP services to businesses.

The working climate is one of high academic rigor plus comfortable informality. You will quickly find yourself part of the action in MCI's team approach to projects, where you stay with the action from original system concept to delivery... and beyond.

The bottom line is important to the new grad who'd rather not be in the shadows, wasting that all-important first year out. If you're good enough to be wanted here, you're good enough to start in the middle of the action at MCI.

Check your Placement Office for further information, on-campus interviews, or drop a note to Paul Benoit at Management Cybernetics International, Inc., P.O. Box 388467, Atlanta, GA 30356.

Engineer: Whoot, whoot chugga chugga

Engineer: sssshhhHHROOMM! Zip! Zoom!

A career in engineering, of course, is what you make of it.

At Ford Aerospace & Communications Corporation, we can help you make it awfully darn interesting, exciting, and rewarding.

For example, take our Space Information Systems Operation in Houston, Texas. Ford Aerospace is engineering the Mission Control Center at Johnson Space Center for the Space Shuttle Operational Era. We’re engineering systems that help train the astronauts, analyze Shuttle systems data for evidence of toxic contamination, keep astronaut medical histories. We’re engineering and building the command and control centers for the Spacelab and the Space Telescope. Go for management, go for specialization. You get to rub elbows with the best engineers in the business, and you get Galveston Bay, a bayside way of life, and an excellent salary and fringe package to help you enjoy it all.

So if you want a career in electrical or digital engineering or computer sciences, join Ford Aerospace & Communications Corporation in Houston. We won’t let you chug along. We’ll put your fanny to the fire and make you go Zip! Zoom!

BUILD YOUR CAREER TODAY, MAKING ENERGY FOR TOMORROW.

At Georgia Power Company, we're providing electricity every day for the growing needs of our customers.

Survival and progress in life's endeavors depend on reliable, efficient energy. Our need for growth can expand your own professional opportunities.

We're constantly looking for ways to improve the use of energy—creating solar heating and cooling systems, electronic load-management devices, innovative time-of-day rate structures, electric commuter cars. It's a necessary and vital struggle.

The serious problems of energy supply and efficient energy use demand the best minds we can muster. Right now, and for future problem-solving, we're looking for graduates who have interest or experience in these areas:

- Accounting
- Data Processing
- Finance
- Electrical Engineering
- Power Generation
- Civil and Mechanical Engineering
- Transmission and Distribution
- System Operations and Communication
- Generating Plant Construction
- Nuclear Engineering

Our representatives would like to meet with you to discuss a possible future for you with Georgia Power Company. We will be on your campus.

Please register at your placement office to arrange an interview.

MANAGEMENT FELLOWSHIPS FOR MINORITY ENGINEERS

The demand for engineers, especially minority engineers, with management skills far exceeds the supply. The Atlanta University Graduate School of Business Administration has established a program specifically for the engineer who wishes to pursue the MBA degree. As the only private, predominantly Black, fully accredited (AACSB) MBA program in the country we are seeking you as a student. Our exclusive focus on one degree, taught by a distinguished faculty, in a small class setting is designed to allow you to get the most out of your graduate education. All of this is enhanced by a proven national placement record in both the public and private sector.

For information on the fellowship program, write or call:

NAVY OFFICER PROGRAM

GET A HEAD START IN A NUCLEAR CAREER.

Train for a career as a Nuclear Propulsion Officer in the Navy. The Navy has the most advanced nuclear equipment in the world, and needs advanced nuclear trained officers to maintain and operate it.

The graduate level training you’ll receive in this program could cost $30,000. As a Nuclear Propulsion Officer, you’ll be rewarded with increased responsibilities and promotion potential.

QUALIFICATIONS: Age—19 to 27½ years old. Education—Working towards (or have completed) BA or BS degree. Citizenship—U.S. citizenship required.

Applications may be submitted after completion of sophomore year in college. If you think nuclear propulsion is your future, then you know the Navy is the place to begin. Call the Naval Management Programs Office for more information.

EXPERIENCE THE THRILL OF FLYING

Be an Air Force navigator.

Using highly sophisticated equipment, you'll be responsible for directing your aircraft to its destination with pinpoint accuracy. You'll have to be alert to all aspects of flying and have a comprehensive understanding of your aircraft and capabilities.

Our navigators are the best in the world. They train in the finest facilities.

Just what kind of people are we looking for? We're seeking capable young men and women who can rise to meet a challenge. We need people who are leaders and decision makers. We're looking for people who can remain calm under pressure and make accurate split-second judgments.

If this describes you, contact your nearest Air Force recruiter. Ask about the challenging and rewarding future you'll have as an Air Force navigator.

We have the experience you're looking for.

Looking for a good company to grow with?

Florida Power and Light is the second fastest growing utility in the U.S. And we’re looking for qualified engineers to grow with us!

An investor-owned utility serving the east and lower southwest coasts of Florida, FPL has immediate openings for electrical, mechanical, nuclear, civil and industrial engineers. We offer opportunities for growth in the areas of planning and design, power plant operations, customer contact and more.

We also offer an attractive salary with excellent benefits, and the year-round recreational activities available in the growing state of Florida.

So if you’re an engineer looking for a good company to grow with, talk to us first.

Qualified candidates should submit résumés including salary history in confidence to: College and Professional Recruitment, Florida Power & Light Company, P.O. Box 529100, Miami, Florida 33152.

When you’re two or more years out, look into the greater rewards Boeing shares with its sales/technical representatives.

(If you’re a Tech Alumnus, this message is addressed to you—here and now!)

The growth of Boeing Computer Services marketing CYBER and Cray timesharing services has created a number of new opportunities for sales/technical representatives with at least two years experience working with CDC hardware and software, FORTRAN and timesharing systems.

You may not be aware that Boeing Computer Services Company is one of the nation’s fastest growing computer service firms, with more than 7,000 computer professionals and support personnel at Boeing centers from coast to coast.

Opportunities exist in our Atlanta office, as well as offices in New York, Chicago, Detroit, Dallas, Denver, L.A., Seattle, and many other top 25 markets in the U.S. and Canada. They call for Sales Technical Representatives who can provide technical support for the full range of user services, not limited to engineering applications. While some marketing background is important, those with appropriate technical credentials plus an aptitude for and an interest in marketing will be considered.

For further information, or immediate consideration for openings in Atlanta or elsewhere, please write fully in confidence to Walter B. Sanderson, III.

If you're looking for a future look to Energy.

The search for oil and gas remains one of the world's greatest challenges. At Western Geophysical, we've accepted that challenge.

We've accepted it so well, in fact, that Western Geophysical is the world's leading seismic exploration company, both in size and reputation.

Our teams of geophysicists, mathematicians, physicists, computer scientists, electrical engineers and technicians, surveyors, and navigation technicians have contributed some of the greatest advancements in the history of the search for energy resources. And this is a continuing process.

If you want a career with a future, join a company with a future.

an equal opportunity employer
The Comfort Inn invites the students, staff and alumni of Georgia Tech to visit our newly remodeled facilities.

Please call for reservations for a comfortable and enjoyable stay during your visit at Georgia Tech.
Here are some of the answers.

The tests don’t stop when you graduate. Some of the hardest lie ahead. Like the one you’re facing right now — how to launch your career so that every year counts as a big one in personal and professional achievement. You want to look back and say “Now that was a good move.”

It’s your life and your future. What does all this have to do with The BDM Corporation? A lot. Because we have at least some of the answers you will want to consider. . . answers to questions like these:

1. “Where should I look for a career?”

Look for a company that is committed to growth and has compiled an outstanding growth record to confirm that commitment. (BDM grew at a rate of 30% per year throughout the last decade.)

2. “Why is corporate growth so important?”

Strong corporate growth means that the opportunity for personal career growth is much greater than in a more static organization. (Graduates who joined BDM two years ago have moved far ahead of their counterparts in most other organizations.)

3. “Why should I join a professional services company?”

For one reason, because ours has become a service economy. A modern professional services company offers greater opportunity, greater diversity, greater potential. (BDM gives you the best of two worlds — professional services growth plus a corporate focus on tomorrow’s technology and systems.)

4. “What are the most promising fields in which to apply my technical skills?”

National defense and security, communications, energy and transportation come quickly to mind. (Not coincidentally, these are the primary areas established for BDM growth in the 1980s.)

5. “The world is changing fast. How can I avoid a dead-end career?”

Choose a company dedicated to being out in front of the changes. (Our clients hire BDM to help them anticipate tomorrow’s changes; so we must stay on the leading edge of advances in both national policy and technology.)

6. “What else should I look for in choosing a career?”

An organization large enough to offer you real opportunity but not so big that you are unimportant to it. A professional staff (your future colleagues) with outstanding credentials and demonstrated achievements. A working environment that is both thoughtful and dynamic. Nationwide locations. A planned advancement program offering multiple “ladders” of career growth within a flexible matrix management structure. A chance to contribute directly to major national and international programs and issues. And, of course, competitive compensation and benefits.

We have just described the career opportunity waiting for you at BDM. Send us your resume, and we’ll tell you more about BDM. Contact: College Relations Coordinator, 2A-10, The BDM Corporation, 7915 Jones Branch Drive, McLean, VA 22102. An equal opportunity employer m/f. U.S. Citizenship required. A subsidiary of BDM International, Inc.
A sleek graceful sailing vessel glides across the sometimes green, sometimes blue Caribbean. The cargo: you. And an intimate group of lively, fun-loving shipmates.

Uniform of the day: Shorts and tee shirts. Or your bikini if you want. And bare feet.

Mission: A leisurely cruise to remote islands with names like Martinique, Grenada, Antigua—those are the ones you’ve heard of. Before the cruise ends, you’ll know the names of many more. You’ll know intimately the enchanting different mood of each...and its own beauty and charm.

Life aboard your big sailing yacht is informal. Relaxed. Romantic.

There’s good food. And ‘grog’. And a few pleasant comforts... but any resemblance to a plush pretentious resort hotel is accidental.

Spend 6 days exploring paradise. Spend six nights watching the moon rise and getting to know interesting people. It could be the most meaningful experience of your life...and it’s easily the best vacation you’ve had.

A cruise is forming now. Your share from $300. Write Cap’n Mike for your free adventure booklet in full color.

Come on and live.

The 1982 BLUEPRINT was printed and bound by Taylor Publishing Company in Dallas, Texas. Printed on 80 pound Taylor enamel paper, offset lithography was used throughout the 592 page book. The press run was 8200 copies.

The cover was designed by the editor and Larry Naylor. The material is black 075 Fabrikoid with handtooled grain applied to three-fourths and shoe grain applied to the remaining fourth. Gold 917 has been silkscreened on flat embossed surfaces. The die is hand cut in brass. All designs and lettering on the cover are embossed. The division pages are four color full bleed pictures.

All halftones were reproduced using a 150 line elliptical dot screen. Color was reproduced by Taylor's Hell Laser Scanner from prints made by Meisel Photochrome Corporation of Atlanta, Georgia. Color transparencies were taken by the photo staff, from which internegatives were made into commercial grade custom prints.

Classes portraits were taken by Robert and Rosanne Voisine of Yearbook Associates of Miller's Falls, Massachusetts. Approximately 2800 students were photographed.

Heading type was Palantino Bold with Palantino Bold italic kickers. Body copy was 10 point leaded 2 point; caption type was 8 point leaded 1 point; and group identification type was 6 point solid. Helvetica 6 point was used on the index. Folios, both recto and verso, were used in 8 point Helvetica type.

Special thanks goes to Debra Tapp and Laurie Long at Meisel Photochrome of Atlanta, Georgia for their help in completing the color.

The table of contents photo was taken before the Georgia Tech-Georgia football game from the top of the Southern Bell Building. Special thanks go to Greg Aden of Southern Bell.

The beauties photographs were taken by the photo editor at the Swan House grounds of the Atlanta Historical Society in Buckhead.

Georgia Tech has become a major part of all of us, students, faculty, and staff. The alumni always speak proudly of Ma Tech to those who have not experienced the spirit of this grand old school. The long hours of hard work are forgotten as the rewards are realized. The friendships made here continue, highlighted by those memorable events.

A tradition, whether simple or structured, serves us well as a point for reflecting upon our past; for traditions never die, they just evolve. As the present fades into memories, we realize that the four or more years at this school has given us a new outlook on life. The firm Tech traditions have contributed to this growth by tying the past to the present.
As the campus approaches its centennial, it is clearly not the Georgia Tech of the late nineteenth century. Between now and then many traditions have been developed to stabilize particular facets of our student lives. When we enter a world greater than the Tech campus, we enter confident, firm in the knowledge we have gained from our experiences here.
Experiences Increase Our Knowledge
The 1982 BLUEPRINT is the seventy-fifth edition of Georgia Tech’s yearbook. For seventy-five years small groups of students have taken time away from their studies, social lives and sleep to capture a year of Georgia Tech’s history in pictures and words.

Working on this book for the past nine months has been quite an experience. I was privileged to be associated with a hard-working group of people who made up the staff. Few students, who have not worked on a yearbook before, can begin to understand the tremendous effort that goes into the production of these books. The section editors really did a superb job in meeting deadlines even though we were all faced with the challenge of working with the world’s slowest photographers. All kidding aside, Joel Wyble’s unwavering dedication to print quality has given this book some of its finest photographs ever.

The time spent working on this edition has given me several moments of extreme emotion. Never had I experienced the deep frustration of having only half the required number of pages just a few hours before deadline or the total elation later that same day when everything had fallen into place and the complete box was on its way to Dallas.

All the deadlines went well in the end, even those two GPA-killers in February, and for that I can only thank the section editors, the staff and my friends who responded to desperate pleas.

Although his title is Publishing Representative, Larry Naylor is much more than that. He is a true friend whose devotion to this book in terms of his personal time is limitless. Thank you for all the help and advice, Larry.

I also would like to thank my fraternity brothers who time and time again helped me.

All in all, this long endeavor has been worthwhile, but I am quite ready to resume the life of a student who goes to classes and gets more than four hours of sleep a night.

I hope that the 1982 BLUEPRINT will help you to remember the trials and triumphs of the past year we all spent here at Georgia Tech.

Paul Lindemann, Editor
