A new Robert and Company designed research laboratory building for the Georgia Scientific and Technical Research Foundation will open in Winter 1985 on the GeorgiaTech campus.

The design challenge: to provide laboratories that can be made task/equipment specific, offeringTech a facility that can accommodate the ever-changing demands of technology and science.

Robert and Company met the challenge. The new 200,000 SF facility will provide flexible lab spaces with all necessary mechanical and support functions available. The experiments to be in residence will prescribe the changes to be made.

"Change the environment; do not try to change man."
Buckminster Fuller, 1969

CHANGE ... the certainty for the future ... the challenge for you, the Class of 1984.
The Fair, Blue-eyed, KA Mechanical Engineers of June '84

NELSON F. GOETZ, P.E.
PRESIDENT
Electronics/Computer Engineers

You spent long hours studying to get your degree, but now you're wondering where in the world to go to best use those new skills.

**WARNER ROBINS AIR LOGISTIC CENTER** offers a civil service career as an engineer with a chance to work with state-of-the-art technology to support the most advanced defense weapons systems in the world.

Warner Robins ALC will be hiring qualified electronic/computer engineers. For more information call toll free 1-800-841-9193 or 1-800-342-0570 (in Georgia) or write to: DPCSC-Employment office, Robins A.F.B., Georgia 31098

**WARNER ROBINS AIR LOGISTICS CENTER**

The Video Component and Display Division and the New Products Division will apply RCA's advanced CRT and electronic circuit technology to the vast new color data display monitor market. High resolution, low cost, high reliability systems and their interface components will be essential elements in tomorrow's DP hardware marketplace. With RCA, you will have high visibility and exceptional opportunity for growth.

**Design Engineers**

We are looking for experienced BSEE's or equivalent who will design color data display monitors using automated design tools. You will also handle project responsibilities in circuit design through the design to manufacturing in the following areas:

**VIDEO CIRCUITS:** Experience in wide-bandwidth video amplifiers for high resolution displays.

**DEFLECTION CIRCUITS:** Experience in the design of horizontal and vertical deflection circuits for TV receivers or monitors.

**SWITCHING POWER SUPPLIES:** Experience in the design of switching power supplies for industrial or consumer markets.

**COMPUTER AUTOMATIC TESTING:** Knowledge of software, hardware, (digital and analog) and automated test techniques for testing integrated circuits, printed circuit boards and finished products.

**Senior Applications Engineers**

We seek experienced BSEE's or equivalent with an applications background in the consumer products industry involving analog and digital circuitry. Experience with specification review, video amps, deflection circuits and color CRT high resolution systems is preferred. You will provide monitor interface evaluation, display tube demonstrations, and circuit modifications to monitors and test equipment.

**Systems Engineers**

We are looking for experienced BSEE's or equivalent with broad technical ability as well as good communications and people skills. You will be working with a variety of operating units and professional disciplines.

**TUBE/MONITOR INTERFACE:** Knowledge of circuits relating to CRT display devices, including applications in both color and monochrome. Ability to analyze systems plus knowledge of CRT fundamentals required.

**COMPUTER/MONITOR INTERFACE:** Excellent knowledge of computer basic display memory conversion and video drive circuits. A good working knowledge of computer output signal levels including Videotex and Teletext standards, and the application of TELIDON and NABTS transmission standards is also required. You will be developing proposals involving integrated display memories and monitor designs by use of innovative transmission techniques.

**Electronic Packaging Engineers**

A BSME or equivalent plus three years experience in packaging of electronic circuitry, injection molding and metal stamping design for consumer electronic products is preferred. CAD/CAM experience is a plus. You will be involved in the design of packaging for video equipment.

**Mechanical Designers/Electronic Packaging**

An Associate degree in mechanical engineering or equivalent plus experience in electronic packaging, design of die castings, injection molding and metal stampings for consumer, commercial or industrial electronic products required. CAD/CAM experience preferred.

**Electronic Engineering Technicians**

We seek those with an Associate degree in mechanical/technical engineering or equivalent and at least three years experience. The ability to work with engineers in design evaluation and the development of production processes is important in the following:

**CAD:** CAD experience in design of printed circuit boards. Knowledge of automatic placement and routing programs.

**CIRCUIT DESIGN:** Baseband video circuits, horizontal and vertical deflection circuits and switching power supply circuit design is required.

**ELECTRO-MECHANICAL:** Experience in TV repair plus circuitry design required. Responsibilities include product evaluation, customer demonstrations, circuit modifications and troubleshooting.

**Live And Work In Lancaster, Pennsylvania**

A warm welcome awaits you and your family in Lancaster. It is more than a place of history and comfort, it's a living experience. Major cities - New York, Philadelphia, Baltimore and Washington, plus ski resorts, mountain retreats and the Chesapeake Bay are nearby. RCA offers competitive salaries and fringe benefits. To discover what RCA has to offer, forward your resume and salary requirements in confidence to:

**RCA**

A career in engineering, of course, is what you make of it.

At Ford Aerospace & Communications Corporation, we can help you make it awfully darn interesting, exciting, and rewarding.

For example, take our Space Information Systems Operation in Houston, Texas. Ford Aerospace is engineering the Mission Control Center at Johnson Space Center for the Space Shuttle Operational Era. We're engineering systems that help train the astronauts, analyze Shuttle systems data for evidence of toxic contamination, keep astronaut medical histories. We're engineering and building the command and control centers for the Spacelab and the Space Telescope. Go for management, go for specialization. You get to rub elbows with the best engineers in the business, and you get Galveston Bay, a bayside way of life, and an excellent salary and fringe package to help you enjoy it all.

So if you want a career in electrical or digital engineering or computer sciences, join Ford Aerospace & Communications Corporation in Houston. We won't let you chug along. We'll put your fanny to the fire and make you go Zip! Zoom!

For employment information and brochures, write or call

And check the Placement Office for names of Tech grads with us now.

We’re Paradyne Corporation, an international leader in the design, development and marketing of data communications/data processing products. We are continually in need of talented and self motivated individuals searching for challenge in a variety of engineering disciplines.

We at Paradyne believe our success is a direct result of the minds and skills of the people who work here. Unlike many other companies in our industry, where new grads might spend months or even years before being exposed to meaningful projects, we’ll give you challenging projects to sink your teeth into right away. And if you’re good, you’ll advance fast. Plus you’ll have access to the most up-to-date technology available today.

If you’re looking for a career with challenge, look at Paradyne. Check with the placement office or send your resume to: Paradyne Corporation, Professional Staffing, P.O. Box 2826, 8550 Ulmerton Road, Largo, FL 33540.
This Is Harris

Exceptional People Paving the Way to the Information Age

The line that separates information processing and communications has all but disappeared. Today, these functions, together with the electronic technologies which drive them, are merging within the broader confines of a new industry — the Information Technology industry. Harris Corporation is at the leading edge of this exciting new era. Over the past 20 years we have developed an extensive line of information processing and communication products which generate worldwide annual sales of more than $1.3 billion. These products are now being brought together into truly integrated, synergistic systems and networks which make possible higher levels of efficiency and productivity. We're entering a period of outstanding growth opportunity. Our confidence in capitalizing on this opportunity stems from our increasing expenditure on product research and development, and from our exceptional people — people who thrive on challenge, like these outstanding graduates.

"As a software development engineer for the Word Processing Division, I've had opportunity for exposure to software development in a range of different areas. My section's concerned with software tools, and I've had the challenge, for example, of working with the operating systems and hardware groups to integrate pieces of software. I am doing programming in both high-level and assembly languages. And my projects have also been valuable learning experiences."

Mark Maharg, BSCS

INFORMATION SYSTEMS SECTOR

"At Harris Broadcast Division, my involvement in the design of microprocessor-based control systems for radio and television broadcast equipment is not confined to one phase of a project. There is high probability of my staying on a project through its completion. In the communications field, Harris is committed to an important role in state-of-the-art development. This is a company with a people-oriented environment. Harris made a point of looking at my total background so I could draw on all my resources."

Mary Bukowski, MA Mathematics, MSSE

COMMUNICATIONS SECTOR

"I wanted a hands-on job with a leading technology company in an area of research and development where I could apply my skills. In Group Operations, I'm developing new processing techniques for the fabrication of dielectrically-isolated and junction-isolated silicon IC chips and have the freedom within bounds to experiment with new ideas. I interact with colleagues I respect. And I've had the opportunity to attend the Harris Graduate Program in Business and extend my educational base."

Charles Messmer, Ph.D. in Materials Science

SEMICONDUCTOR SECTOR

"I've been able to enter the systems engineering department of the Government Satellite Communications Division without the usual required experience. My position lets me look at a system from a complete perspective, instead of relating to only one aspect. With help from a well-seasoned and very cooperative group of engineers, I'm working on the development of a distributed processing control system for planning and managing worldwide satellite communications networks. It's a task that's never been done before."

Cedric Wooten, MSEE

GOVERNMENT SYSTEMS SECTOR

Join the exciting world of these Harris professionals. Career openings exist in our four sectors in California, Florida, Illinois, New York, Texas and other states for graduates with bachelor or advanced degrees in Electrical, Mechanical, Industrial, Chemical and Computer Engineering as well as Physics, Computer Science and Business. If you seek a company that recognizes academic accomplishment, see us on campus or send your resume to Harris Corporation, College Relations, Department BY, 1025 W. NASA Blvd., Melbourne, FL 32919. An Equal Opportunity Employer M/F/H/V.

Men's Tennis
Florida Power and Light is the second fastest growing utility in the U.S. And we're looking for qualified engineers to grow with us!

An investor-owned utility serving the east and lower southwest coasts of Florida, FPL has openings for electrical, mechanical, nuclear, civil and industrial engineers. We offer opportunities for growth in the areas of planning and design, power plant operations, customer contact and more.

We also offer an attractive salary with excellent benefits, and the year-round recreational activities available in the growing state of Florida.

So if you're an engineer looking for a good company to grow with, talk to us first. Qualified candidates should submit resume including salary history in confidence to: College and Professional Recruitment, Florida Power & Light Company, P.O. Box 029100, Miami, Florida 33102.

SET YOUR SIGHTS ON THE COMPANY THAT SETS THE STANDARDS

The ELECTRONICS and SPACE DIVISION of Emerson Electric Co. Broad-based in product line. International in scope and influence. An innovator...setting the standards that others will follow for years to come. The ELECTRONICS and SPACE DIVISION is involved in the design and manufacture of high-technology armament and electronic systems. Its products include specialized radar, automatic test systems, airborne armament systems, missile launching and guidance systems. The ELECTRONICS and SPACE DIVISION is also involved in the optical field, and has extensive software programming ability and familiarity with modern computer architecture.

Emerson's ELECTRONICS and SPACE DIVISION is located in St Louis, Missouri. Historic and cosmopolitan, St. Louis is a city that boasts many recreational and entertainment opportunities as well as a superior standard of living.

The ELECTRONICS and SPACE DIVISION of Emerson leads the industry in quality and innovation. We offer top salaries and comprehensive benefits, as well as a superior professional environment. To learn more about the many career opportunities at E&S, write to:

TOUCHDOWN AT THE
RAMADA INN CENTRAL

$39.95

plus tax, occupancy 1 to 4 persons

The Ramada Inn Central, Atlanta's only Ramada on Peachtree Street, just minutes from Georgia Tech, offers special "Yellow Jacket" rates for students, parents, and alumni.

Ramada Inn Central guests are treated to excellent service in a prime location—just north of the campus—on Peachtree at Brookwood Station. Newly decorated guest rooms, fine cuisine, and a relaxing lounge are available within a lush landscaped setting.

"Yellow Jacket" special rates are ideal for Football Weekends, Parents Day, Homecoming, Graduation, or any special occasion throughout the year. For more information on this "Yellow Jacket" special, call (404) 875-9711.
