ALL BMW'S ARE CREATED EQUAL.
THEN IT'S EVERY DEALER FOR HIMSELF.

To have the distinction of being the #1 BMW Dealer, it takes more than just having the best price, or the best service, or the most experience, or having the largest selection of BMW's, or having the most convenient location, or being the oldest, or being the largest, or being the #1 BMW dealer in total customer satisfaction, or having sold more BMW's than any other dealer. It takes ALL of the above to make Global Imports the #1 BMW Dealer.

A Word from Our President...

Peachtree Software has set a standard for excellence by offering a superior product at a reasonable price. It is this commitment to quality and value that has made our name the first name in accounting software. I graduated from Tech myself, and therefore can confidently say that Georgia Tech adheres to the same high standards. I would like to personally salute the students and 1989 graduates of Georgia Tech for their hard work and outstanding effort. Keep up the good work!

Bright Thinkers Give Us Our Real Power

Picture Yourself Among The Industry Leading Team of Professionals at Georgia Power.

While the present-day Georgia Power Company was started in the mid-'20s, forerunner companies go back roughly a century. With a sound history of service and a progressive set of values, Georgia Power has moved more and more toward a team management approach involving employees at all levels in the decision-making process.

Although many areas of the country are experiencing a dramatic slowing in population growth, the opposite is true for Georgia, a manufacturing leader, the transportation hub, a major distribution point, and the financial center for the Southeast.

We offer new graduates the chance to learn and grow within the framework of one of the most rapidly changing industries in the world. We think that with trained, perceptive professionals who are motivated by the challenges of producing today's power, we can meet the energy needs of tomorrow. The technical nature of our business provides a diverse range of career opportunities for graduates in:

- Electrical Engineering
- Mechanical Engineering
- Nuclear Engineering

Who have interest or experience in:

- Nuclear and Fossil Power Generation
- Transmission and Distribution
- Telecommunications
- Residential, Commercial & Industrial Marketing
- Systems Operations

An Equal Opportunity Employer
With a C&S Instant Banking card, you have instant access to your accounts anytime, day or night at more than 160 C&S Instant Banker locations throughout Georgia. And for on-campus banking convenience, C&S has an Instant Banker located right in the student center. You'll also have access to hundreds of additional automated teller machines statewide with AVAIL and thousands nationwide with CIRRUS.

The C&S Instant Banking card...it's your very own "instant bank."

AT THE NAVAL AIR TEST CENTER, the reach of technology knows virtually no bounds. That’s because our job is to test and refine the most advanced aircraft and aircraft systems in the world. Our work begins with the very latest developments in electronics and computer science, as well as aerospace and mechanical engineering. Microprocessor systems, computer-aided design, digital flight control, communications, microwave networks, simulation technology — these are just a few of the fields in which we excel.

WHEN YOU LAUNCH YOUR CAREER at the Naval Air Test Center, you soon find that the opportunities for hands-on involvement with a wide range of projects are limitless. You work with the newest concepts and most sophisticated equipment in your field. And you enjoy the satisfaction of following your projects from start to finish, from theory in the lab to deployment in the sky.

YOU’LL BE IMPRESSED BY OUR BENEFITS, TOO, including opportunities for fully paid graduate education as well as rapid advancement. And our location in the heart of Chesapeake Bay Country promises a lifestyle that many of your peers will envy.

My sincerest thanks to Dean Ed Kohler and Larry Naylor for production coordination.

Billie Mathews.
In commitment. In drive. In talent. As one of the world’s largest and most progressive forces in information technology, Unisys welcomes individual initiative and encourages self-expression. In a special environment that offers high visibility and plenty of career potential. Potential that can take you to the top.

We invite you to join us in a future that promises to be as full of innovation and excitement as our past. Created in 1986 by the union of Sperry and Burroughs, we’ve not only met our expectations. We’ve exceeded them. And our comprehensive plan for accelerated future growth holds many outstanding opportunities in store for graduates with a BS/MS or PhD in Engineering or Computer Science, BS in Marketing, Accounting or Finance or MBA in Finance. Find out more. Write to: Unisys Corporation, Office of Professional Employment, Room 2A42, One Unisys Place, Detroit, MI 48232. And put your skills where they belong. At the top. With Unisys. An affirmative action employer.
Imagine the professional environment that would challenge your mind—every day. That’s what you’ll find at Michelin, an innovator in the radial tire industry respected throughout the world. Because at Michelin, we’re always searching... for new ways to improve on our product excellence, for new ways to increase our efficiency, and for new ways to gain even greater market share. We combine technology with human creativity to get the job done, and done at levels that exceed our own high standards. It’s more than challenging; it’s thought provoking. Find out for yourself.

**MYTH:** At NSA, you must choose one specialty and then stick with it.

**FACT:** NSA encourages you to diversify.

Many myths have arisen about careers at the National Security Agency. The facts, however, are these:

- **NSA has broad and challenging opportunities for MATHEMATICIANS, ELECTRONIC ENGINEERS, and COMPUTER SCIENTISTS.**
- **NSA opportunities allow you to diversify your experience. You can move around within the agency and try different disciplines—we'll even train you for each transition.**
- **NSA plays a key role in protecting our national security. We process foreign intelligence information... safeguard our government's communications... and secure our nation's computer systems.**
- **NSA work involves leading edge research and the latest technology. Our computer complex is among the largest in the world. Our work in communications sets the pace for the industry.**
- **NSA salaries are competitive.**
- **NSA offers much more than job security. Benefits include paid vacation and holidays, insurance options and tuition reimbursement. In addition, our employees enjoy the attractive lifestyle of the Baltimore-Washington area.**
- **NSA performs work that is critical to our nation's security. It is work you'll be proud to do.**

For more facts, or to apply, send your resume today.

**NSA. The opportunities are no secret.**

We're well connected.

For close to 100 years, Stromberg-Carlson has been earning an outstanding reputation in the telecommunications industry for products and ideas which are revolutionary.

We've become a major supplier to many of the major telephone and telecommunications companies because we're clearly their best connection to the latest developments in the industry. We're leading advancements in the areas of software development, common carrier software design, systems engineering and mechanical technology.

Our emphasis on R&D is strengthened by our family connections. As a subsidiary of GPT, one of the world's leading electronic companies, we are able to combine some of the world's most advanced research and product technologies with the proven performance of our own DCO switching system.

So any way you look at it, we've got all the right connections for engineers and other dynamic individuals who are interested in joining an industry leader. Contact us today. We'll tell you more about our innovative programs and rewarding career opportunities, as well as the generous salaries and benefits we provide.

Call or send your resume to: Stromberg-Carlson, Professional Staffing, Box GTB, 400 Rinehart Road, Lake Mary, FL 32746. We are an equal opportunity employer. M/F/H/V.

We keep you learning. As an engineering or technical graduate, there's a good chance that Prime computers contributed to your education. The fact is, students from 1/4 of all American engineering and technical schools learn on our computers.

And as a Prime employee, you never stop learning. Working alongside project leaders, you'll take an active role in the development, marketing, or support of our general-purpose, 32-bit superminicomputers and related products.

Once you know Prime, you'll also find we give you the independence to prove yourself and move on to higher levels of responsibility. As a company providing integrated system solutions to the manufacturing, financial services, government, education, and scientific marketplaces, Prime can give you every opportunity to measure up to your potential.

If you have a degree in Computer Science, Electrical Engineering, or Computer Engineering, we invite you to explore opportunities at Prime. Direct experience or course work in Microcomputing, Architectural Design, Software/Hardware Development and Design and/or familiarity with operating systems is desirable. Send your resume to: Robin Falcione, Human Resources, Prime Computer, Inc., SM&D, GT, MS10B-12, 500 Old Connecticut Path, Framingham, MA 01701.

NAVIGATING THE FUTURE WITH FABRICS AND FIBERS.

With unfailing direction and firm commitment, Amoco Fabrics and Fibers Company has become a leader in fiber research, producing a diverse line of fibers, yarn systems and fabrics used every day in the home and in industry.

**Carpet fibers and backings**
Amoco’s continuous filament olefin yarn system, Marquesa Lana, along with the nation’s No. 1 backing systems, ActionBac secondary and PolyBac primary, are all used in the manufacturing of America’s highest quality carpets.

**Construction fabrics**
Amoco’s complete line of woven and non-woven polypropylene fabrics, used for paving, ground stabilization, erosion control and silt fence, meet or exceed all engineering requirements.

**And more**
Amoco also provides vital ingredients for end products like wallcoverings, upholstery fabrics, disposable nonwovens and luggage, just to name a few.

So, when you look to the future, look to the leader. Look to Amoco.

Opportunities for Innovation

Innovation has been a Georgia Tech tradition for more than 100 years. And for 80 years, it has been a shaping force for Kawneer Company, the world’s leading manufacturer of architectural aluminum products.

As innovator of the first glass holding metal framing system in 1906, and many product “firsts” since then, Kawneer’s architectural systems are featured on many of the world’s most recognized buildings.

Our products provide diversity of design to architects and building owners in the United States and throughout the world, where our 15 manufacturing plants are strategically located. Over four thousand employees are dedicated to innovative problem-solving, product integrity and attention to the market needs.

Kawneer Company salutes Georgia Tech, where opportunities for innovation begin.

Galileo examined an assortment of magnifying lenses and asked, "What if..."

At Hewlett-Packard, we never stop asking, "What if..."

At the beginning of the 17th century, Galileo experimented with a new combination of magnifying lenses. He then used his discoveries to create an incredibly powerful telescope. A telescope that enabled him to closely observe the topography of the Earth's moon—and to discover four of Jupiter's moons. This quest to push the limits of existing knowledge—to always ask, "What if..."—underlies the innovative spirit at Hewlett-Packard. Our company is propelled forward by a staff of enterprising professionals from a diversity of backgrounds. Professionals whom we encourage and inspire to look at things from a different point of view. And where you'll find the support and resources necessary to help you reach your career objectives.

So take a new perspective on your career. Look to Hewlett-Packard.

Please send resumes to: Hewlett-Packard Company, P.O.Box 105005, Atlanta, GA 30348.

Dearest Mary,

This past year we have very much enjoyed the time we have spent taking your photo assignments. The satisfaction that we received was not dampened in the least by your occasional bitching. We are very sorry for the times when we were unable to get your photos taken on time and immensely sorry for the assignments which were missed altogether. Through your guidance we have been able to surmount such obstacles as lost film, double exposures and other bad things. Those of us fortunate enough to be graduating soon will dearly miss your friendly smile and cheerful disposition. The majority of us, however, will remain on the staff and sincerely look forward to yet another exciting year.

Love and kisses,
Mike and his roving band of photogs
1989 Blueprint Specifications

The 1989 BLUEPRINT was printed and bound by Taylor Publishing Company in Dallas, Texas. Printed on 80 pound Taylor enamel paper, offset lithography was used throughout the 576 page book. The press run was 7600 copies.

The cover was designed by the editor, the photo editor, the organizations and classes editor, and Dolores Landin and Larry Naylor of Taylor Publishing Company. The cover is a four-color lithocote printed background with a quarter-bound spine of black SMR material. Gold hot foil stamping was used for decoration on the cover. The endsheets are printed in PMS 343.

All halftones were produced using a 150 line elliptical dot screen. Color was reproduced by Taylor’s Hell Laser Scanner using a 150 line computerized dot screen printer from prints made by Meisel Photochrome Corp. of Atlanta, Georgia. Both color negatives and color transparencies, from which internegatives were made, were taken by the photo staff and made into commercial grade custom prints.

Classes portraits were taken by Southeastern Portraits of Forest Park, Georgia. Approximately 2900 students were photographed. Beauties pictures were taken by Dirk Botterbusch and Chris Tham, for judging by Elite Model Management of Atlanta, Georgia. Beauties pictures appearing in the BLUEPRINT were taken by Dirk Botterbusch on the Georgia Tech campus and by Chris Tham in the studios of Southeastern Portraits.

All type used in the book for headlines, body copy, captions, kickers, group identifications, folios and index is Times Roman.

List of photographers...

...continued...
"I was thinking of maybe running razor blades under my fingernails for relaxation after this." — Eric

You know, it was one of those years. There were times of enthusiasm and times of apathy. To be truthful, sometimes I thought that this book would never be ready in time for the spring delivery. I guess that all past editors have thought the same thing, though, so why should I have felt any different. Considering the situation we started with, however, everything turned out pretty well. After losing all but one section editor from the 1988 staff, I was really frantic in September. Giving section editor positions to freshmen is just not done, but I did it — I had to. Miracle of miracles, everyone came through for me, and I will always be grateful. I want to thank the entire staff, including all the photogs, especially those who performed above and beyond the call. Without you, the nights would have been a lot longer and none of us would have gotten as much sleep as we did. Although the entire year was memorable, a few things do stand out.

Susan — What an artist you became! I think you were holding out on me. I've never seen the Student Life section run so smoothly and get finished so quickly. Thanks for everything — I've really enjoyed working with you. Please stick with it.

Lee — I don't really know what to say. One deadline you were going on vacation and the next you were finished early. I don't know how it all got finished, but thank God it did. Thanks for putting up with all my anti-Greek and anti-male comments. You know I didn't mean it (?)

Tonya and George — You two were a really unlikely pair. I never saw you and then suddenly, your section was finished. Y'all did a great job without much supervision and finishing during the second deadline was a real help. Thanks!

Olin — You showed more dedication and responsibility than I ever could have expected. Your section is a really difficult one and you handled it very well. I appreciate all those trips to the AA, and all your other hard hours of work so much. Thanks for never complaining and never letting me down.

David — And you thought you couldn't do it. I knew that with a few ideas and a good push you would be a great section editor. In my opinion, Academics has never looked better or been more interesting. Your copy is outstanding. I think that you gained something from this year and I hope that you agree.

Mary — Can you believe it! It's finally finished. You were a lifesaver all year long. Your sections look great. It was really nice to see someone take some time with organizations and give those groups something for their money. Although you were relentless at times, you got the job done and your help to me was invaluable. Dallas was great. Bowling was great. I can actually function on a word processor now, too, even though I am still not computer friendly. No matter what happens, please continue.

There is one person who shares all credit for this book — Mike Moncrief. Mike, you are really a great guy. Your long hours in the darkroom were necessary, but your long hours listening to me gripe weren't. Thanks. I think we managed to make a pretty nice book and I hope you agree. I wish you and Bitsy all the best and I know that life will be wonderful for both of you. There are three other people I want to specifically thank. Larry Naylor is a man without whom a BLUEPRINT would never reach completion. Larry, I remember three years ago when I was scared to even ask you a question — we've come a long way. Thank you so much for everything, advising me book-wise and personally. I'm glad that I didn't let you down, and I hope that you stick around for many years to come. Dean Kohler, thanks for all your help and advice, and thanks for being so patient. I know it took me a while to learn the routine. Finally, and most importantly, I want to thank my Mom, Melissa Thorpe. Every time I said I couldn't do it, you said I could. Your faith in me for my entire life has been so amazing, I can't even begin to thank you for it. You are the main reason I got this book finished, and I hope that you enjoy it.

Creating this yearbook has been a hard job for many people and I hope that it is enjoyed by students, faculty, alumni and friends for many years to come. Thanks again, and try to remember not to take life too seriously. Children have the right idea. When they look up all they see is a beautiful blue sky.

Eden L. Thorpe, Editor
