NAVIGATING THE FUTURE WITH FABRICS AND FIBERS.

With unfailing direction and firm commitment, Amoco Fabrics and Fibers Company has become a leader in fiber research, producing a diverse line of fibers, yarn systems and fabrics used every day in the home and in industry.

**Carpet fibers and backings**
Amoco's continuous filament olefin yarn system, Marquesa® Lana, along with the nation's No. 1 backing systems, ActionBac® secondary and PolyBac® primary, are all used in the manufacturing of America's highest quality carpets.

**Construction fabrics**
Amoco's complete line of woven and non-woven polypropylene fabrics, used for paving, ground stabilization, erosion control and silt fence, meet or exceed all engineering requirements.

**And more**
Amoco also provides vital ingredients for end products like wallcoverings, upholstery fabrics, disposable nonwovens and luggage, just to name a few.

So, when you look to the future, look to the leader. Look to Amoco.

Amoco Fabrics and Fibers Company

Over 125,000 Parts Are Just Around The Corner.

NAPA has been your hometown auto parts store for years. With over 125,000 top quality parts available, we always have the parts you need.

And they’re covered by NAPA’s National Warranty Program, good at over 6,700 NAPA stores coast to coast. With our competitive prices, there’s never any reason to cut corners.

Because there are no unimportant parts.

"America's fastest-moving conveyor company"

Founded in 1932, The Buschman Company has played an important role in the conveyor industry. Beginning as a components manufacturer, the company now offers total systems design, manufacturing and installation capability to customers world-wide. Buschman is proud of being "the complete conveyor company" - one reliable source for engineering, equipment and accessories.

Buschman's rapid growth as an industry leader is proof of its dedication to improving productivity through cost efficient conveyor systems.

Located minutes north of Cincinnati, Ohio, allows Buschman to serve its customers with quick, on-time shipment of quality and competitively priced conveyor products.

Become a part of "America's fastest-moving conveyor company"! Contact our Cincinnati Headquarters personnel department to learn more about available positions.

OUR CONVEYOR PRODUCTS INCLUDE:
- SORTATION - fast, accurate, gentle
- ACCUMULATION - true zero-pressure!
- BELT - efficient slider or roller bed
- ROLLER - gravity and powered belt, chain or cable
- WHEEL - economical, versatile
- OVERHEAD CABLE - reliable, easily adapts to your needs
- MANAGEMENT CONTROLS - graphic, microprocessor based, interfaceable with other equipment
- CAROUSEL - Staying on track!

Work at FPL, and you’ll probably need a couple of extra suits.

Or perhaps a new tennis racket. Maybe even a set of golf clubs. That’s because Florida Power and Light engineers get to live in a tropical playground all year long. But they get something even more important. The chance to work for one of America’s largest investor-owned electric utilities. A place where engineers are rewarded for their hard work and innovative solutions.

If you’re a professional with the desire to succeed, we’d like to hear from you. We offer competitive salaries, excellent benefits and one of the country’s fastest growing service areas. Our requirements include a B.S. degree in Electrical, Mechanical or Civil Engineering. And, you might need a few new suits.

Send your resume and salary history to:
FPL, Human Resources

Shrinking the world isn’t going to be easy.

You need to have the most advanced technology in the industry. Sprint/United does. You’ve got to gather a family of companies to ensure your success at many levels. We did. And you simply must recruit the brightest, most aggressive people. We are.

Our goal is simply to become the world’s best telecommunications company. So we designed and built the first nationwide 100% digital, fiber-optic network for voice, data and video transmission. And with our strong family of companies, including US Sprint and United Telecom, we have numerous exciting opportunities in a variety of fields.

So as the telecommunications industry continues to grow on a global scale, so can your career.

And Sprint/United has long supported a well-balanced lifestyle with flexible benefits.

If you want to help shrink the world, talk to us.

If you have any questions, please get in touch with your Southeast regional contact at US Sprint, Manager of Staffing, 3100 Cumberland Circle, Atlanta, Georgia 30339. Or, if you’re interested in corporate-wide opportunities, write to Sprint/United, Manager of University Relations, P.O. Box 11315, Kansas City, MO 64112. We are an equal opportunity employer.

**Exciting assignments for imaginative people**

Sandia National Laboratories has career opportunities for outstanding MS & PhD candidates in engineering & the physical sciences. One of the nation's largest multi-program laboratories, Sandia is engaged in research & development, addressing important national security issues with emphasis on nuclear weapons, advanced energy systems & related technologies.

Challenging assignments exist in such areas as the application of intense ion beams to inertial confinement fusion; use of lasers & other analytical tools to improve understanding of the combustion process & development of special silicon & hybrid micro circuits for defense & energy programs. Supporting this work is a full complement of modern laboratory equipment & facilities, a large central network of mainline computers, including several CRAY-1S systems & a CRAY-X/MP together with a large number of smaller distributed systems of the VAX 11/780 class.

The Labs' principal locations, Albuquerque, New Mexico & Livermore, California offer a complete range of cultural & recreational activities combined with the informal living style of the west. Sandia's benefit package includes paid health care, life insurance, retirement & 24 days vacation.

Qualified candidates write to: Staff Recruiting & Employment, 3531 Sandia National Laboratories, Post Office Box 5800, Albuquerque, New Mexico 87185 or Personnel Div. 8022, Sandia National Laboratories, Post Office Box 969, Livermore, California 94550.

Your Future at TVA...

Since its establishment by Congress in 1933 as a unique federal corporation, Tennessee Valley Authority (TVA) has grown into one of the nation's largest electric utilities and a major regional development agency serving parts of seven southeastern states.

The TVA of the 1990s promises to continue as a dynamic, change-driven place to work. A place that's interesting, exciting and challenging. We seek employees who can make a difference with their talents and energy. People who will help us hone our competitive edge through increased productivity and efficiency.

In return we provide an atmosphere where employees can stretch their full potential. We offer an atmosphere in which employees need not be pigeon-holed, but rather, have the chance to develop their skills and branch into a variety of tasks.

If you're seeking job satisfaction and challenge, plus a great environment in which to grow and succeed, then send your resume to:
Tennessee Valley Authority

This country may be in danger. We could be losing something we can't afford to lose. Once, in this country when a man produced a product it was the best he could possibly make. He stood behind it—with pride. He lived a simple idea—do it right, or don't do it at all. Nobody told him that. No government agency dictated it. And it built a standard of living for the world to aim at... Now that idea is threatened by the slipshod, the second rate. To some it means quick riches—to some it means quick death of the standards we have built.

Congratulations to the Class of '91

CSI designs and manufactures cryogenic equipment for the safe transportation and storage of liquid oxygen, liquid nitrogen, liquid argon and liquid helium.

We market these cryogenic products to the industrial gas producers for welding applications, and the restaurant business for carbonating beverages.

CSI is proud to help support Georgia Tech by participating in their student co-op program.

Southwire: From One Man’s Dream To A World Leader

Over the past four decades, Southwire Company has grown from one man’s dream to the nation’s largest manufacturer of copper and aluminum rod, wire and cable for the transmission and distribution of electricity.

The late Roy Richards Sr., a Georgia Tech graduate, built Southwire in Carrollton, Georgia, against the advice of industry experts. It was not wise, they said, to build a wire plant in rural Georgia, far from raw materials, skilled labor and venture capital.

But Richards believed in his dream and in the American people. And they proved him right. Forty years later, that vision and Southwire people nationwide are the driving force behind the company.

Today, Southwire products are marketed worldwide and one in five homes in the nation are wired using Southwire products.

Our markets are global and growing. In product lines, technology and production methods, Southwire sets the standards—the standards for quality, innovation and service. And it all began as the dream of one Georgia Tech graduate. With an education, the possibilities are endless.

SOUTHWIRE
One Southwire Drive
Carrollton, Georgia 30119-001
Be Part of the Team

Naval Coastal Systems Center (NCSC), located on the Gulf of Mexico in Northwest Florida, is the Navy’s principal research and development, and test and evaluation center in support of Navy projects and operations that take place primarily in coastal regions.

NCSC is currently seeking entry level civilian Scientists and Engineers. It offers challenging careers in Engineering (Computer, Electronics, and Mechanical) and in the Physical/Mathematical Sciences (Computer Science, Operations Research Analysis, Mathematics and Physics).

Scientists and Engineers research, develop, test, and evaluate equipment and software in support of mine countermeasures, sonar and torpedo countermeasures, swimmer operations, diving and salvage, amphibious operations, and coastal and inshore defense.

A career at NCSC means a good salary, flexible working hours, generous education benefits, and the right to transfer from one federal agency to another without loss of earned benefits.

At NCSC, you’ll have the opportunity to propose, design, and execute projects in a wide range of technical disciplines.

The Institute of Paper Science and Technology

Education, Experience, Leadership...for over 60 years

The Institute of Paper Science and Technology (IPST) is a private, graduate research university dedicated to multidisciplinary graduate education; research; and educational, informational, and technical services related to the pulp and paper industry. IPST has an alliance with the Georgia Institute of Technology and is located a mile north of the Georgia Tech campus in Atlanta, Georgia.

Education
IPST M.S. and Ph.D. degree programs prepare graduates for challenging careers in the pulp and paper industry. Features of an IPST education include:
• Full fellowships and tuition scholarships
• 3:1 student-to-faculty ratio
• Student-designed research
• Paid industrial internships
• Historically, nearly 100% placement upon graduation

Research
IPST conducts fundamental and applied research in areas of long-term interest to the pulp and paper industry. Research is integrated into the educational mission of IPST and both activities benefit from the association.

Service
• Continuing education courses designed for scientific and technical professionals are available throughout the year.
• The Research Services Division provides professional problem solving and development services for IPST's educational and research divisions and for industry.
• IPST’s Information Services Division is a comprehensive source of pulp and paper-related information.

Because you are a highly motivated person who has prepared yourself for a challenging career, you should consider joining our winning team. For information on career opportunities call me today, or send your resume to:

ATEC Associates, Inc.

ATTN: Billy Logue, Corporate Recruiter
P.O. Box 501970, Dept. 171
Indianapolis, IN 46250-1970

Canonie Environmental Services Corp., is experiencing strong, consistent growth in the hazardous waste remediation industry. To help support this growth, we are seeking highly motivated, experienced candidates capable of joining a technology driven, innovative, and team-oriented group of professionals.

If you desire to meet the challenges of a growing organization on the leading edge of hazardous waste remediation and possess experience in the following disciplines:

- Civil Engineering
- Hydrogeology
- Geotechnical Engineering
- Chemical Engineering
- Electrical Engineering
- Mechanical Engineering

Please submit resume in confidence to: Cheryl J. MacDonald, Corporate Human Resource Manager, 800 Canonie Drive, Porter, IN 46304.

MEET THE CHALLENGE WITH Canonie Environmental

Late night study sessions... fast food... bitter coffee. You finally have it all behind you. The diploma is at hand. Congratulations! But now it is time to think about the transition from academic to professional life. We can help you.

We're Stromberg-Carlson. Not the largest company in telecommunications today. But, very possibly, the best.

For close to 100 years, we've put our expertise behind the latest telephone equipment and telecommunications systems. Because we're not the biggest in our field, far-thinking engineers and technicians enjoy greater visibility, and the opportunity to make more of an impact.

But, don't let our size fool you. Stromberg-Carlson is a subsidiary of international telecommunications giant, Plessey.

And that allows us to combine some of the world's most advanced research and product technology with the proven performance of our own DCO switching system. And provide innovative solutions to the many challenges facing tomorrow's telephone operating companies.

If you're a graduating Electrical Engineer or Computer Scientist, consider becoming involved in breakthrough technology with Stromberg-Carlson. You can get involved in lightwave technology, digital switching, networking and more. You can enjoy substantial rewards. Of course, there is one small thing you'll have to give up when you work with a company our size. The illusion that bigger always means better.

Learn more about why a growing company named Stromberg-Carlson should become a big factor in your future. Write today for more information: Stromberg-Carlson, Professional Staffing, 400 Rinehart Road, Lake Mary, FL 32746. An Equal Opportunity Employer M/F/H/V.
For all the right reasons.

Rates. Reliability. Technology.
Accessibility.

These are the tangible reasons business and industry buy electricity from us.

Another is our people. They are bright, young and proud.

Taking shape in their minds today are the solutions for tomorrow.

Their ingenuity is our trademark.

JACKSON ELECTRIC MEMBERSHIP CORPORATION
Arizona.
A perfect balance of sophistication and fun.

In Arizona, you'll find that sophisticated cultural amenities blend with an enjoyable southwestern lifestyle. You'll also find affordable housing, a relatively low cost of living, limitless recreational opportunities, and Allied-Signal Aerospace Company's Garrett Auxiliary Power Division.

As the most highly recognized manufacturer of gas turbine engine auxiliary power units, we provide a high-tech, supportive environment where talent and dedication is valued and rewarded.

Sophistication and fun, with the kind of versatile opportunities sought by engineering professionals. Don't settle for anything less. Send your resume to:

Allied-Signal Aerospace Company
Garrett Auxiliary Power Division

Exploring the facts and fantasies of electrical energy with students of all ages.

Parker's full system capabilities in quality motion control products are creating success stories for our employees.

Darrell Quander Sr., is one example. A Fluidpower Group Mobile Sales Engineer, Darrell applied perseverance and skills to develop a key customer's business into the Group's largest account in just a three-year period.

Says Darrell, "It's a pleasure to represent a reputable company like Parker. My position has responsibility, and the freedom to apply my own talents to be as successful as I'd like to be."

If responsibility and success are important to you as you begin your career, contact us. Send your resume to:

In the early 1980s GE set out to become the most competitive business enterprise in the world.

It was not just a proclamation, but a commitment to achieve market share leadership in a remarkably diverse portfolio of businesses in the technology, manufacturing and services sectors.

Today, as we begin the 1990s, eleven of GE's thirteen major businesses are either world or national leaders. And though our financial services and communications businesses are too diverse for single market share measurements, they are of scale and potential appropriate to a 54 billion dollar company.

The challenge to maintain world leadership in an enterprise as broad as ours requires competitive excellence in every aspect of every business function.

Most of all, it requires people who thrive on competing with and for the best. People who view global challenges as a world of opportunity.

If you are that kind of person, we'd like to meet you.

GE is an Equal Opportunity Employer.
In spite of the many changes in the eye care profession today, it's the relationship between practitioner and patient that ensures safe and successful contact lens wear.

“We believe the role of CIBA Vision is to support that relationship without ever disrupting it.”

THE PAPER INDUSTRY

ARE YOU CUT OUT FOR IT?

Today's paper industry must meet the growing demand for paper and related products, while seeking new and better ways to protect the environment. And we are constantly involved in the exciting changes and breakthroughs in research and technology.

This makes the paper and related industries one of today's most important and challenging fields. So we need a new breed of engineer with vision, ambition and a keen inventiveness.

ARE YOU CUT OUT FOR IT?

For a brochure and information on the exciting careers in the paper and related industries, call TAPPI at 446-1400 ext. 220. Or attend a TAPPI Student Chapter meeting. There's one near you! Call the Georgia Tech Chemical Engineering Department at 894-2865.

TAPPI
