Success at Georgia Tech came slowly and only after several years of hard work and study to this year's graduating seniors. Students achieved small goals in the process helping to round out their "Tech" experience. Whether it was a win on the playing field, a perfect test score, or an invitation to join a special honor society, these small successes helped students to continue even at the worst times.

The friendships built during their experiences are the most last achievement any graduate will make.

Exhausted after a long tug, a student collapses on the edge of the tug pit. The annual Greek Week event leaves much of the campus with its own personal layer of Georgia clay. Photo by Merry Whaley.
Founded in 1932, The Buschman Company has played an important role in the conveyor industry. Beginning as a components manufacturer, the company now offers total systems design, manufacturing and installation capability to customers world-wide. Buschman is proud of being "the complete conveyor company"—one reliable source for engineering, equipment, and accessories.

Buschman's rapid growth as an industry leader is proof of its dedication to improving productivity through cost efficient conveyor systems.

Located minutes north of Cincinnati, Ohio, allows Buschman to serve its customers with quick, on-time shipment of quality and competitively priced conveyor products.

Become a part of "America's fastest-moving conveyor company"! Contact our Cincinnati Headquarters personnel department to learn more about available positions.

OUR CONVEYOR PRODUCTS INCLUDE:

- **SORTATION** - fast, accurate, gentle
- **ACCUMULATION** - true zero-pressure!
- **BELT** - efficient slider or roller bed
- **ROLLER** - gravity and powered belt, chain or cable
- **WHEEL** - economical, versatile
- **OVERHEAD CABLE** - reliable, easily adapts to your needs
- **MANAGEMENT CONTROLS** - graphic, microprocessor based, interfaceable with other equipment
- **CAROUSEL** - Staying on track!

You don't have to be cut out for corporate life to get ahead.

Not at Chevron.

We believe there is strength in diversity. And that unique, innovative work comes from unique, innovative people. Like you.

We tailor assignments as much as possible to take advantage of your particular combination of talents and experience.

You'll have plenty of opportunity to develop your own professional objectives and to integrate them with ours.

So, don't worry about being cut out for corporate life. At Chevron, individuality counts and you're already in great shape. To learn more about a future with us, meet our recruiters on campus. Check with your placement office for dates and times. An equal opportunity employer.

"I don't get it."

Learning never comes easy, even to the most learned. But for those who refuse to give in to the snags, dead ends and countless excuses to quit, education becomes more than a formal program with a beginning and an end. It's a way of life with an inevitable result: the thirst for still more knowledge.

We get paid for results.

Over the past four decades, Southwire Company has grown from one man's dream to the nation's largest manufacturer of copper and aluminum rod, wire and cable for the transmission and distribution of electricity.

The late Roy Richards Sr., a Georgia Tech graduate, built Southwire in Carrollton, Georgia, against the advice of industry experts. It was not wise, they said, to build a wire plant in rural Georgia, far from raw materials, skilled labor and venture capital.

But Richards believed in his dream and in the American people. And they proved him right. Forty years later, that vision and Southwire people nationwide are the driving force behind the company.

Today, Southwire products are marketed worldwide and one in five homes in the nation are wired using Southwire products.

Our markets are global and growing. In product lines, technology and production methods, Southwire sets the standards—the standards for quality, innovation and service. And it all began as the dream of one Georgia Tech graduate. With an education, the possibilities are endless.

SOUTHWIRE

One Southwire Drive

Dirt
HAYWARD BAKER

A KELLER COMPANY

Dirt: Better known to the engineer as Ground. Civil engineers know that ground conditions can affect building sites. Ground can also cause problems for existing structures. Hayward Baker, the nation’s leading Ground Modification specialty contractor, solves difficult ground problems throughout North America.

We are looking for the action-oriented engineer who wants to see a project from start to finish; someone who has a technical understanding of soils and wants to make things happen. If you have a strong geotechnical background and a construction aptitude, send us a resume today.

This country may be in danger. We could be losing something we can't afford to lose. Once, in this country when a man produced a product it was the best he could possibly make. He stood behind it - with pride. He lived a simple idea - do it right, or don't do it at all. Nobody told him that. No government agency dictated it. And it built a standard of living for the world to aim at . . . Now that idea is threatened by slipshod, the second rate. To some it means quick riches - to some it means quick death of the standards we have built.
Union Camp -
Leading the way into the 21st century

Leaders grow for the future. At Union Camp, we’re leading the way into the 21st century with our intensive forestry management programs.

Union Camp long ago planted the seeds for these programs, which include genetic research, site specific management, cultural treatments, and environmental stewardship. The programs make us leaders, growing for the future, today.

At Union Camp, we never stop making things better.

ITT Rayonier is a well established company in the Forest Products Industry with a strong commitment to sustained growth. Its programs in Conservation of Natural Resources, Environmental Protection, Community Service and Research are among the most advanced in the industry. Opportunities exist for graduates in Chemistry and Chemical, Mechanical, Civil and Electrical Engineering as well as Business and Industrial Management.

THE PAPER INDUSTRY

ARE YOU CUT OUT FOR IT?

Today's paper industry must meet the growing demand for paper and related products, while seeking new and better ways to protect the environment. And we are constantly involved in the exciting changes and breakthroughs in research and technology.

This makes the paper and related industries one of today's most important and challenging fields. So we need a new breed of engineer with vision, ambition and a keen inventiveness.

ARE YOU CUT OUT FOR IT?

For a brochure and information on the exciting careers in the paper and related industries, call TAPPI at 446-1400 ext. 220. Or attend a TAPPI Student Chapter meeting. There's one near you! Call the Georgia Tech Chemical Engineering Department at 894-3556.

exciting assignments for imaginative people

Sandia National Laboratories has career opportunities for outstanding BS, MS & PhD candidates in engineering and the physical sciences.

One of the nation’s largest multi-program laboratories, Sandia is engaged in research and development, addressing important national security issues with emphasis on nuclear explosive weaponization, advanced energy systems and related technologies. Challenging assignments exist in such areas as the application of intense ion beams to inertial confinement fusion; use of lasers and other analytical tools to improve understanding of the combustion process; and development of special silicon and hybrid microcircuits for defense and energy programs. Supporting this work is a full complement of modern laboratory equipment and facilities, a large central network of mainline computers, including several CRAY-XIS systems and a GRAY-XMP together with a large number of smaller distributed systems of the VAX 11/780 class.

The Lab’s principle locations - Albuquerque, NM and Livermore, California - offer a complete range of cultural and recreational activities combined with the informal living style of the West. Sandia’s benefit package includes paid health care, life insurance, retirement and 24 days paid vacation. US citizenship is required.

Qualified candidates should write to:

The Institute of Paper Science and Technology

Education, Experience, Leadership . . . for over 60 years

The Institute of Paper Science and Technology (IPST) is a private, graduate research university dedicated to multidisciplinary graduate education; research; and educational, informational, and technical services related to the pulp and paper industry. IPST has an alliance with the Georgia Institute of Technology and is located a mile north of the Georgia Tech campus in Atlanta, Georgia.

Education
IPST M.S. and Ph.D. degree programs prepare graduates for challenging careers in the pulp and paper industry. Features of an IPST education include:

- Full fellowships and tuition scholarships
- 3:1 student-to-faculty ratio
- Student-designed research
- Paid industrial internships
- Historically, nearly 100% placement upon graduation

Research
IPST conducts fundamental and applied research in areas of long-term interest to the pulp and paper industry. Research is integrated into the educational mission of IPST and both activities benefit from the association.

Service
- Continuing education courses designed for scientific and technical professionals are available throughout the year.
- The Research Services Division provides professional problem solving and development services for IPST's educational and research divisions and for industry.
- IPST's Information Services Division is a comprehensive source of pulp and paper-related information.

CSI designs and manufactures cryogenic equipment for the safe transportation and storage of liquid oxygen, liquid nitrogen, liquid argon and liquid helium.
We market these cryogenic products to the industrial gas producers for welding applications, and the restaurant business for carbonating beverages.
CSI is proud to help support Georgia Tech by participating in their student co-op program.

NCR and Georgia Tech
A progressive partnership for success.

Your formal education is complete. Now continue your professional development at NCR, the $6 billion computer industry leader.

Together with Georgia Tech, we’re creating tomorrow’s hottest retail computer systems. Be part of the excitement. And make a real impact on systems design and development.

Along the way, we’ll provide you with career-long education, including on-the-job training. In addition, our policy of promotion-from-within allows you to grow along with us.

If you are graduating with a BS or MS in ICS, EE/CE, or related disciplines, NCR invites you to apply your ideas to real-life solutions and share our stake in the future. Visit the Georgia Tech placement office or write to:

THE FEED THEY NEED

Since 1934 F-R-M Feeds have helped farmers all over the Southeastern United States meet the nutritional needs of their livestock and poultry. F-R-M has developed feed and mineral products and feeding programs for poultry, swine, beef, dairy cows, horses, rabbits, cats, dogs, goats, game birds, fish and even crickets and worms. Research, field tests and customer approval are all integral parts of our continuing efforts to maximize production and minimize expense in your livestock and poultry operations.

Quite simply, F-R-M strives to produce a quality product at economical costs and gives you the service you deserve.

When it comes to nutrition for your livestock and poultry look to F-R-M for "the feed they need."

Creative employees are thinkers and doers. They don’t just accept things because they’ve "always been done that way." The resourceful worker knows that the competition is continually looking for a way to do the job better and that we need at all times to be at least one step ahead of the other guys.

J. Carter Fox, President & CEO

Chesapeake Corporation is a Fortune 500 integrated paper and forest products company based in Richmond, Virginia and operating in over 30 locations nationwide.
