Scholarly & Reference E-Book Collection

The Scholarly & Reference E-Book Collection contains electronic books purchased by Ohio academic libraries from these publishers:

- ABC-Clio: educational reference books – encyclopedias, handbooks, biographical collections, guides – on many specialized topics, primarily in the humanities and social sciences.
- Gale: reference books published by Thomson Gale; also includes a few reference books from Macmillan, St. Martin's, and Scribner.
- Sage: encyclopedias and reference handbooks from the Sage eReference catalog, mainly in the social sciences.
- Springer: high-quality scientific, technological and medical books. Springer imprints also include Apress, Birkhäuser, Physica-Verlag, Steinkopf, and others.

You may also want to search some of the collections listed separately in the Other E-Book Collections, such as Oxford Reference Online.

Use of the Scholarly & Reference collection assumes you have read the Acceptable Use Policy.

Search all finding aids

The OhioLINK Finding Aid Repository is designed to showcase the rich collections housed in archives, libraries, and other institutions throughout the state of Ohio. The Repository provides access to collections on a broad scale, increasing the visibility of these unique and valuable resources for research.

The OhioLINK Finding Aid Repository contains descriptions of archival collections from contributing institutions in Ohio. Collection descriptions are fully searchable. Researchers can view brief summaries of collections, or the entire text of finding aids, with search keywords highlighted. The Browse, Search, and Advanced Search options allow users to browse the entire repository, do a focused search for specific topics, or limit search results to a specified institution.

Carol Mirman was a senior majoring in Fine Arts at Kent State University in 1970 and was one of the Kent 25. The Kent 25 refers to the twenty five students and faculty indicted by a grand jury on criminal charges for crimes in conjunction with the events of May, 1970. In this oral history, Carol Mirman gives her eyewitness account of the May 4, 1970, shootings on the Kent State campus. She was in the Commons area at the time and was with Jeffrey Miller after he had been shot. She also describes events that took place in downtown Kent on Friday, May 1.

AUXIN TRANSPORT DURING GRAVITROPISM AND PHOTOTROPISM USING A GFP-BASED BIOSensor

Plants are extremely sensitive to their environment, able to detect and respond to such stimuli as gravity, touch, light, moisture, and nutrient gradients. One of the most common outcomes upon sensing a stimulus is for the plant to undergo differential growth either toward or away from the stimulus. Growth responses toward or away from stimuli are known as tropisms. Plant tropisms have been the object of scientific study for over 200 years, with each successive generation of researcher applying current state-of-the-art technologies and approaches to further our understanding of the mechanisms responsible for growth regulation. Research on tropisms provides a point of integration today among the fields of cell biology, genetics, molecular biology, biophysics, biochemistry, and physiology.

The Digital Resource Commons is a multi-institution academic repository provided free-of-charge to member schools and other digital preservation organizations. It's a statewide platform for the long-term saving, discovering and sharing of unique, historical, and scholarly materials produced by the University System of Ohio and Ohio's private colleges. It is a federation of centrally-hosted digital libraries and collections that have been branded to match each member organization's main web site, and that are administered remotely by liaisons from each institution.

OhioLINK Digital Resource Commons

OhioLINK Digital Resource Commons is a collaborative effort of the Ohio Library & Information Network and its member libraries. The DRC is a service that collects, preserves, and distributes digital material of historic and scholarly importance. The DRC is an important tool for preserving the discoveries of higher education and for providing access to unique collections while facilitating global scholarly communication.

Answer the Open Source challenge

- Shift Away From:
  - Closed systems
  - Proprietary software
  - Vendor lock-in

- Shift Towards:
  - Interoperability
  - Open source software
  - Community ownership
Constantly evolve
"Well, in our country," said Alice, still panting a little, "you'd generally get to somewhere else — if you run very fast for a long time, as we've been doing."

"A slow sort of country!" said the Queen. "Now, here, you see, it takes all the running you can do, to keep in the same place. If you want to get somewhere else, you must run at least twice as fast as that!"
Cutting edge becomes obsolete
Becomes cutting edge
Becomes obsolete again.

The Ohio Library and Information Network
Average Records loaded per second

The chart shows the average number of records loaded per second for different batch submissions. The x-axis represents the batch submission numbers, while the y-axis shows the number of records. The data indicates variability in the number of records loaded across different submissions.
OhioLINK Digital Resources Management Committee Wiki

News and Action Items

Shari Laster and Ohio Godort DRC featured! Check out the Federal Depository Library Desktop article and the post at Free Government Information.

DRC Awarded NEH Grant to Build Creative Humanities Scholarship Tools. OhioLINK's award-winning Digital Resource Commons (DRC) will soon add new tools to encourage creative scholarship within the state's historical collections, thanks to a $50,000 grant from the National Endowment for the Humanities. The funds will be used to host three "Design and Build" workshops, each bringing together humanities researchers, librarians and software developers to create applications that will make it easier to combine historical collections in new ways.

Liaison Stephen X. Flynn (College of Wooster) has been named a Library Journal Mover and Shaker for 2012! More information here.

With the launch of the Digital Resource Commons, OhioLINK recognizes the importance of increasing cooperation in the creation and sharing of digital collections. The Digital Resource Management Committee facilitates that cooperation by developing a community of digitization practitioners to share expertise and resources. Membership is weighted towards library staff with hands-on digitization experience. For more information, see the Scope and Organization of the DRMC.

Interested in finding out more? Sign up for the LISTSERV. Those from OhioLINK institutions interested in an instance should contact John Davidson at OhioLINK.

Meeting Schedule 2012
